Supplemental Information
Second Quarter 2019

Current period information is preliminary and based on company data available at the time of the earnings presentation. It speaks only as of the particular date or dates included in the accompanying pages. Bank of America Corporation (the Corporation) does not undertake an obligation to, and disclaims any duty to, update any of the information provided. Any forward-looking statements in this information are subject to the forward-looking language contained in the Corporation’s reports filed with the SEC pursuant to the Securities Exchange Act of 1934, which are available at the SEC’s website (www.sec.gov) or at the Corporation’s website (www.bankofamerica.com). The Corporation’s future financial performance is subject to risks and uncertainties as described in its SEC filings.
The Corporation reports the results of operations of its four business segments and *All Other* on a fully taxable-equivalent (FTE) basis. Additionally, the results for the total Corporation as presented on pages 13-15 are reported on an FTE basis.

(1) Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. Tangible book value per share provides additional useful information about the level of tangible assets in relation to outstanding shares of common stock. (See Exhibit A: Non-GAAP Reconciliations - Reconciliations to GAAP Financial Measures on page 36.)

</table>

(1) Regulatory capital ratios at June 30, 2019 are preliminary. We report regulatory capital ratios under both the Standardized and Advanced approaches. The approach that yields the lower ratio is used to assess capital adequacy.

(2) Tangible equity ratio equals period-end tangible shareholders’ equity divided by period-end tangible assets. Tangible common equity ratio equals period-end tangible common shareholders’ equity divided by period-end tangible assets. Tangible shareholders’ equity and tangible assets are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. (See Exhibit A: Non-GAAP Reconciliations - Reconciliation to GAAP Financial Measures on page 36.)

(1) The impact of interest rate risk management derivatives on interest expense is presented below. Interest expense includes the impact of interest rate risk management contracts, which increased (decreased) interest expense on:

- NOW and money market deposit accounts by $31.4 billion
- Consumer CDs and IRAs by $4 billion
- Negotiable CDs, public funds and other deposits by $4 billion
- Banks located in non-U.S. countries by $4 billion
- Federal funds purchased, securities loaned or sold under agreements to repurchase, short-term borrowings and other interest-bearing liabilities by $30 billion
- Long-term debt by $33 billion

(2) includes $35.0 billion, $31.4 billion and $29.7 billion of structured notes and liabilities for the second and first quarters of 2019 and the second quarter of 2018, respectively.

(3) Net interest income includes FTE adjustments of $149 million, $153 million and $154 million for the second and first quarters of 2019 and the second quarter of 2018, respectively.

(1) Nonperforming loans are included in the respective average loan balances. Income on these nonperforming loans is generally recognized on a cost recovery basis.

(2) The impact of interest rate risk management derivatives on interest income is presented below. Interest income includes the impact of interest rate risk management contracts, which increased (decreased) interest income on:

| Interest-bearing deposits with the Federal Reserve, non-U.S. central banks and other banks | $29 | $— |
| Federal funds sold and securities borrowed or purchased under agreements to resell | $(137) | $(19) |
| Debt securities | — | (3) |
| U.S. commercial loans and leases | $(18) | $(19) |

Net hedge expense on assets | $(126) | $(56) |

Certain prior period amounts have been reclassified to conform to current period presentation.

Current period information is preliminary and based on company data available at the time of the presentation.

(1) FTE basis is a non-GAAP financial measure. FTE basis is a performance measure used by management in operating the business that management believes provides investors with a more accurate picture of the interest margin for comparative purposes. The Corporation believes that this presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. Net interest income includes FTE adjustments of $302 million and $304 million for the six months ended June 30, 2019 and 2018, and $149 million and $153 million for the second and first quarters of 2019, and $155 million, $151 million and $154 million for the fourth, third and second quarters of 2018, respectively.

Certain prior period amounts have been reclassified to conform to current period presentation.

</table>

(1) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

(2) Total earning assets and total assets include asset allocations to match liabilities (i.e., deposits) and allocated shareholders’ equity.

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

(1) Active digital banking users represents mobile and/or online users.
(2) In addition to the U.S. credit card portfolio in Consumer Banking, the remaining U.S. credit card portfolio is in GWIM.
(3) The above loan production amounts represent the unpaid principal balance of loans and, in the case of home equity, the principal amount of the total line of credit.
(4) In addition to loan production in Consumer Banking, there is also first mortgage and home equity loan production in GWIM.

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

(1) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital.
Other companies may define or calculate these measures differently.

(2) For presentation purposes, in segments or businesses where the total of liabilities and equity exceeds assets, the Corporation allocates assets from All Other to match the segments’ and businesses’ liabilities and allocated shareholders’ equity. As a result, total earning assets and total assets of the businesses may not equal total Consumer Banking.

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

Current period information is preliminary and based on company data available at the time of the presentation.

(1) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

(2) Total earning assets and total assets include asset allocations to match liabilities (i.e., deposits) and allocated shareholders' equity.

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

(1) Assets under management include deposits that are managed within investment accounts. Prior periods have been revised to conform to current period presentation.

(2) Defined as managed assets under advisory and/or discretion of GWIM.

(3) Includes margin receivables which are classified in customer and other receivables on the Consolidated Balance Sheet.

(4) Includes financial advisors in the Consumer Banking segment of 2,818, 2,773, 2,722, 2,618 and 2,622 at June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018, respectively.

(5) Financial advisor productivity is defined as annualized Merrill Lynch Global Wealth Management total revenue, excluding the allocation of certain asset and liability management (ALM) activities, divided by the total average number of financial advisors (excluding financial advisors in the Consumer Banking segment).

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

(1) Investment banking fees represent total investment banking fees for Global Banking inclusive of self-led deals and fees included within Business Lending.  
(2) Advisory includes fees on debt and equity advisory and mergers and acquisitions.  
(3) Investment banking fees represent only the fee component in Global Banking and do not include certain other items shared with the Investment Banking Group under internal revenue sharing agreements.  
(4) Criticized exposure corresponds to the Special Mention, Substandard and Doubtful asset categories defined by regulatory authorities. The reservable criticized exposure is on an end-of-period basis and is also shown as a percentage of total commercial reservable utilized exposure, including loans and leases, standby letters of credit, financial guarantees, commercial letters of credit and bankers’ acceptances.  
(5) Nonperforming loans, leases and foreclosed properties are on an end-of-period basis. The nonperforming ratio is nonperforming assets divided by loans, leases and foreclosed properties.  

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.  

Current period information is preliminary and based on company data available at the time of the presentation.

---

(1) Substantially all of Global Markets total revenue is sales and trading revenue and investment banking fees, with a small portion related to certain revenue sharing agreements with other business segments. For additional sales and trading revenue information, see page 25.

(2) Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

(1) Includes Global Banking sales and trading revenue of $243 million and $244 million for the six months ended June 30, 2019 and 2018, and $128 million and $115 million for the second and first quarters of 2019, and $126 million, $51 million and $79 million for the fourth, third and second quarters of 2018, respectively.

(2) For this presentation, sales and trading revenue excludes net debit valuation adjustment (DVA) gains (losses) which include net DVA on derivatives, as well as amortization of own credit portion of purchase discount and realized DVA on structured liabilities. Sales and trading revenue excluding net DVA gains (losses) represents a non-GAAP financial measure. We believe the use of this non-GAAP financial measure provides additional useful information to assess the underlying performance of these businesses and to allow better comparison of period-to-period operating performance.

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

Current period information is preliminary and based on company data available at the time of the presentation.

(1) All Other consists of ALM activities, equity investments, non-core mortgage loans and servicing activities, liquidating businesses and certain expenses not otherwise allocated to a business segment. ALM activities encompass certain residential mortgages, debt securities, and interest rate and foreign currency risk management activities. Substantially all of the results of ALM activities are allocated to our business segments. Equity investments include our merchant services joint venture, as well as a portfolio of equity, real estate and other alternative investments. (2) Includes elimination of segments’ excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders’ equity of $543.0 billion and $517.1 billion for the six months ended June 30, 2019 and 2018, $549.5 billion and $542.4 billion for the second and first quarters of 2019, and $525.6 billion, $516.3 billion and $519.6 billion and the fourth, third and second quarters of 2018, respectively. (3) Includes elimination of segments’ excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders’ equity of $544.0 billion, $566.8 billion, $540.8 billion, $529.8 billion and $522.2 billion at June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018, respectively.

Certain prior period amounts have been reclassified among the segments to conform to current period presentation.

(1) Includes loans and leases, standby letters of credit and financial guarantees, derivative assets, assets held-for-sale, commercial letters of credit, bankers’ acceptances, securitized assets, foreclosed properties and other collateral acquired. Derivative assets are carried at fair value, reflect the effects of legally enforceable master netting agreements and have been reduced by cash collateral of $33.0 billion, $32.4 billion and $33.3 billion at June 30, 2019, March 31, 2019 and June 30, 2018, respectively. Not reflected in utilized and committed exposure is additional non-cash derivative collateral held of $29.4 billion, $32.6 billion and $36.1 billion, which consists primarily of other marketable securities, at June 30, 2019, March 31, 2019 and June 30, 2018, respectively. Total utilized and total committed exposure includes loans of $7.2 billion, $5.5 billion and $5.4 billion and issued letters of credit with a notional amount of $107 million, $61 million and $167 million accounted for under the fair value option at June 30, 2019, March 31, 2019 and June 30, 2018, respectively. In addition, total committed exposure includes unfunded loan commitments accounted for under the fair value option with a notional amount of $4.5 billion, $3.0 billion and $3.2 billion at June 30, 2019, March 31, 2019 and June 30, 2018, respectively.

(2) Includes U.S. small business commercial exposure.

(3) Includes the notional amount of unfunded legally binding lending commitments net of amounts distributed (e.g., syndicated or participated) to other financial institutions.

(4) Industries are viewed from a variety of perspectives to best isolate the perceived risks. For purposes of this table, the real estate industry is defined based on the primary business activity of the borrowers or the counterparties using operating cash flows and primary source of repayment as key factors.

Certain prior period amounts have been reclassified to conform to current period presentation.

### Total Top 20 Non-U.S. Countries Exposure

| Total Top 20 Non-U.S. countries exposure | $182,638 | $59,495 | $19,236 | $32,925 | $294,294 | $(16,781) | $277,513 | $24,412 |

(1) Includes loans, leases, and other extensions of credit and funds, including letters of credit and due from placements, which have not been reduced by collateral, hedges or credit default protection. Funded loans and loan equivalents are reported net of charge-offs but prior to any allowance for loan and lease losses.

(2) Long securities exposures are netted on a single-name basis to, but not below, zero by short exposures and net credit default swaps purchased, consisting of single-name and net indexed and tranched credit default swaps.

(3) Represents credit default protection purchased, net of credit default protection sold, which is used to mitigate the Corporation’s risk to country exposures as listed, consisting of net single-name and net indexed and tranched credit default swaps. Amounts are calculated based on the credit default swaps notional amount assuming a zero recovery rate less any fair value receivable or payable.

(4) Represents country exposure less hedges and credit default protection purchased, net of credit default protection sold.

Certain prior period amounts have been reclassified to conform to current period presentation.

Current period information is preliminary and based on company data available at the time of the presentation.

(1) Foreclosed property balances do not include properties insured by certain government-guaranteed loans, principally loans insured by the Federal Housing Administration (FHA), that entered foreclosure of $294 million, $400 million, $488 million, $500 million and $573 million at June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018, and June 30, 2018, respectively.

(2) Balances do not include nonperforming loans, leases and foreclosed properties that are held for sale at fair value and are nonreservable.

(3) Balances do not include purchased credit-impaired loans even though the customer may be contractually past due. Purchased credit-impaired loans were recorded at fair value upon acquisition and accrue interest income over the remaining life of the loan.

(4) Balances do not include the following:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Nonperforming loans accounted for under the fair value option</td>
<td>10</td>
<td>67</td>
<td>12</td>
<td>16</td>
<td>46</td>
</tr>
</tbody>
</table>

(5) Balances do not include loans held-for-sale past due 30 days or more and still accruing of $3 million, $4 million, $53 million, $30 million and $28 million at June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018, respectively, and loans held-for-sale past due 90 days or more and still accruing of $0, $1 million, $2 million, $8 million and $11 million at June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018, respectively. At June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018, there were $9 million, $6 million, $10 million, $21 million and $24 million, respectively, of loans accounted for under the fair value option past due 30 days or more and still accruing interest.

(6) These balances are excluded from total nonperforming loans, leases and foreclosed properties.

(7) Total assets and total loans and leases do not include loans accounted for under the fair value option of $7.9 billion, $6.2 billion, $4.3 billion, $5.7 billion and $6.2 billion at June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018, respectively.

(8) Criticized exposure corresponds to the Special Mention, Substandard and Doubtful asset categories defined by regulatory authorities. The reserve criticized exposure excludes loans held-for-sale, exposure accounted for under the fair value option and other nonreservable exposure.

Certain prior period amounts have been reclassified to conform to current period presentation.

</table>

(1) For amounts excluded from nonperforming loans, leases and foreclosed properties, see footnotes to Nonperforming Loans, Leases and Foreclosed Properties table on page 31.

(2) Consumer loans and leases may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection. Certain troubled debt restructurings are classified as nonperforming at the time of restructuring and may only be returned to performing status after considering the borrower’s sustained repayment performance for a reasonable period, generally six months.

(3) Our policy is not to classify consumer credit card and non-bankruptcy related consumer loans not secured by real estate as nonperforming; therefore, the charge-offs on these loans have no impact on nonperforming activity and, accordingly, are excluded from this table.

(4) Includes U.S. small business commercial activity. Small business card loans are excluded as they are not classified as nonperforming.

(5) Commercial loans and leases may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection. Troubled debt restructurings are generally classified as performing after a sustained period of demonstrated payment performance.

Certain prior period amounts have been reclassified to conform to current period presentation.

Current period information is preliminary and based on company data available at the time of the presentation.

### Asset Quality Indicators

- Ratio of the allowance for loan and lease losses/Annualized net charge-offs: 2.68
- Percentage of loans and leases outstanding: 2.38
- Total Ratio: 2.52

(1) Ratios are calculated as allowance for loan and lease losses as a percentage of loans and leases outstanding excluding loans accounted for under the fair value option. Consumer loans accounted for under the fair value option include residential mortgage loans of $300 million, $315 million and $489 million and home equity loans of $358 million, $353 million and $359 million at June 30, 2019, March 31, 2019 and June 30, 2018, respectively. Commercial loans accounted for under the fair value option include U.S. commercial loans of $3.9 billion, $2.8 billion and $3.5 billion and non-U.S. commercial loans of $3.3 billion, $2.7 billion and $1.9 billion at June 30, 2019, March 31, 2019 and June 30, 2018, respectively.

(2) Total loans and leases do not include loans accounted for under the fair value option of $7.9 billion, $6.2 billion and $6.2 billion at June 30, 2019, March 31, 2019 and June 30, 2018, respectively.

(3) Includes allowance for loan and lease losses for U.S. small business commercial loans of $498 million, $489 million and $465 million at June 30, 2019, March 31, 2019 and June 30, 2018, respectively.

(4) Allowance for loan and lease losses includes $4.1 billion, $4.1 billion and $4.0 billion allocated to products (primarily the Consumer Lending portfolios within Consumer Banking and purchased credit-impaired loans) that are excluded from nonperforming loans and leases at June 30, 2019, March 31, 2019 and June 30, 2018, respectively. Excluding these amounts, allowance for loan and lease losses as a percentage of total nonperforming loans and leases was 129 percent, 113 percent and 102 percent at June 30, 2019, March 31, 2019 and June 30, 2018, respectively.

n/m = not meaningful

Certain prior period amounts have been reclassified to conform to current period presentation.
## Exhibit A: Non-GAAP Reconciliations

### Bank of America Corporation and Subsidiaries

#### Reconciliations to GAAP Financial Measures

(Dollars in millions, except per share information)

The Corporation evaluates its business based on the following ratios that utilize tangible equity, a non-GAAP financial measure. Tangible equity represents an adjusted shareholders’ equity or common shareholders’ equity amount which has been reduced by goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities. Return on average tangible common shareholders’ equity measures the Corporation’s net income applicable to common shareholders as a percentage of adjusted average common shareholders’ equity. The tangible common equity ratio represents adjusted ending common shareholders’ equity divided by total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities. Return on average tangible shareholders’ equity measures the Corporation’s net income applicable to common shareholders as a percentage of adjusted average total shareholders’ equity. The tangible equity ratio represents adjusted ending shareholders’ equity divided by total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities. Tangible book value per common share represents adjusted ending common shareholders’ equity divided by ending common shares outstanding. These measures are used to evaluate the Corporation’s use of equity. In addition, profitability, relationship and investment models all use return on average tangible shareholders’ equity as key measures to support our overall growth goals.

See the tables below for reconciliations of these non-GAAP financial measures to the most closely related financial measures defined by GAAP for the six months ended June 30, 2019 and 2018 and the three months ended June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018 and June 30, 2018. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. Other companies may define or calculate supplemental financial data differently.
