

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: 1-7182

MERRILL LYNCH & CO., INC.

(Exact name of Registrant as specified in its charter)

Delaware

13-2740599

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer Identification No.)

**Bank of America Corporate Center
100 N. Tryon Street
Charlotte, North Carolina**

28255

(Address of principal executive offices)

(Zip Code)

(704) 386-5681

Registrant's telephone number, including area code

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES NO

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting
company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

As of the close of business on August 2, 2013, there were 1,000 shares of Common Stock outstanding, all of which were held by Bank of America Corporation.

The Registrant is a wholly-owned subsidiary of Bank of America Corporation and meets the conditions set forth in General Instructions H(1)(a) and (b) of Form 10-Q and is therefore filing this Form with the reduced disclosure format as permitted by Instruction H(2).

During the six months ended June 30, 2012, Merrill Lynch received a non-cash capital contribution of approximately \$1.1 billion from Bank of America associated with certain employee stock awards.

See Notes to Condensed Consolidated Financial Statements.

Merrill Lynch & Co., Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements (Unaudited)
June 30, 2013

Note 1. Summary of Significant Accounting Policies

Description of Business

Merrill Lynch & Co. Inc. ("ML & Co." and, together with its subsidiaries "Merrill Lynch"), provides investment, financing and other related services to individuals and institutions on a global basis through its broker, dealer, banking and other financial services subsidiaries. On January 1, 2009, Merrill Lynch was acquired by, and became a wholly-owned subsidiary of, Bank of America Corporation ("Bank of America").

Intragroup Reorganization

On November 1, 2012, in connection with an intragroup reorganization involving Bank of America and a number of its subsidiaries, Merrill Lynch acquired two affiliated companies and their respective subsidiaries from Bank of America. The acquisition was effected through a non-cash capital contribution from Bank of America. In accordance with Accounting Standards Codification ("ASC") 805, *Business Combinations* ("Business Combinations Accounting"), the Condensed Consolidated Financial Statements include the historical results of the acquired affiliated companies and their subsidiaries as if the transaction had occurred on January 1, 2009, the date at which all the affected entities were first under the common control of Bank of America. Merrill Lynch has recorded the assets and liabilities acquired in connection with the transaction at their historical carrying values.

Basis of Presentation

The Condensed Consolidated Financial Statements include the accounts of Merrill Lynch. The Condensed Consolidated Financial Statements are presented in accordance with U.S. Generally Accepted Accounting Principles ("U.S. GAAP"). Intercompany transactions and balances within Merrill Lynch have been eliminated. Transactions and balances with Bank of America have not been eliminated. The interim Condensed Consolidated Financial Statements are unaudited; however, all adjustments for a fair presentation of the Condensed Consolidated Financial Statements have been included.

These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements included in Merrill Lynch's Annual Report on Form 10-K for the year ended December 31, 2012 (the "2012 Annual Report"). The nature of Merrill Lynch's business is such that the results of any interim period are not necessarily indicative of results for a full year. Certain prior-period amounts have been reclassified to conform with the current period presentation.

Consolidation Accounting

Merrill Lynch determines whether it is required to consolidate an entity by first evaluating whether the entity qualifies as a voting rights entity ("VRE") or as a variable interest entity ("VIE"). The Condensed Consolidated Financial Statements include the accounts of Merrill Lynch, whose subsidiaries are generally controlled through a majority voting interest or a controlling financial interest.

VREs - VREs are defined to include entities that have both equity at risk that is sufficient to fund future operations and have equity investors that have a controlling financial interest in the entity through their equity investments. In accordance with ASC 810, *Consolidation* ("Consolidation Accounting"), Merrill Lynch generally consolidates those VREs where it has the majority of the voting rights. For investments in limited partnerships and certain limited liability corporations that Merrill Lynch does not control, Merrill Lynch applies ASC 323, *Investments - Equity Method and Joint Ventures* ("Equity Method Accounting"), which requires use of the equity method of accounting for investors that have more than a minor influence, which is typically defined as an investment of greater than 3%

to 5% of the outstanding equity in the entity. For more traditional corporate structures, in accordance with Equity Method Accounting, Merrill Lynch applies the equity method of accounting where it has the ability to exercise significant influence over the operating and financing decisions of the investee. Significant influence can be evidenced by a significant ownership interest (which is generally defined as a voting interest of 20% to 50%), significant board of director representation, or other contracts and arrangements.

VIEs - Those entities that do not meet the VRE criteria are generally analyzed for consolidation as VIEs. A VIE is an entity that lacks equity investors or whose equity investors do not have a controlling financial interest in the entity through their equity investments. Merrill Lynch consolidates those VIEs for which it is the primary beneficiary. In accordance with Consolidation Accounting guidance, Merrill Lynch is considered the primary beneficiary when it has a controlling financial interest in a VIE. Merrill Lynch has a controlling financial interest when it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and an obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. Merrill Lynch reassesses whether it is the primary beneficiary of a VIE on a quarterly basis. The quarterly reassessment process considers whether Merrill Lynch has acquired or divested the power to direct the activities of the VIE through changes in governing documents or other circumstances. The reassessment also considers whether Merrill Lynch has acquired or disposed of a financial interest that could be significant to the VIE, or whether an interest in the VIE has become significant or is no longer significant. The consolidation status of the VIEs with which Merrill Lynch is involved may change as a result of such reassessments.

Securitization Activities

In the normal course of business, Merrill Lynch has securitized commercial and residential mortgage loans; municipal, government, and corporate bonds; and other types of financial assets. Merrill Lynch may retain interests in the securitized financial assets by holding notes or other debt instruments issued by the securitization vehicle. In accordance with ASC 860, *Transfers and Servicing* ("Financial Transfers and Servicing Accounting"), Merrill Lynch recognizes transfers of financial assets where it relinquishes control as sales to the extent of cash and any other proceeds received.

Revenue Recognition

Principal transactions revenue includes both realized and unrealized gains and losses on trading assets and trading liabilities, investment securities classified as trading investments and fair value changes associated with certain structured debt. These instruments are recorded at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Gains and losses on sales are recognized on a trade date basis.

Commissions revenues include commissions, mutual fund distribution fees and contingent deferred sales charge revenue, which are all accrued as earned. Commissions revenues also include mutual fund redemption fees, which are recognized at the time of redemption. Commissions revenues earned from certain customer equity transactions are recorded net of related brokerage, clearing and exchange fees.

Managed account and other fee-based revenues primarily consist of asset-priced portfolio service fees earned from the administration of separately managed accounts and other investment accounts for retail investors, annual account fees, and certain other account-related fees.

Investment banking revenues primarily include fees for the underwriting and distribution of debt, equity and loan products and fees for advisory services, which are accrued when services for the transactions are substantially completed.

Earnings from equity method investments include Merrill Lynch's pro rata share of income and losses associated with investments accounted for under the equity method of accounting.

Other revenues include gains (losses) on investment securities, including sales of available-for-sale securities, gains (losses) on private equity investments and other principal investments and gains (losses) on loans and other miscellaneous items.

Contractual interest received and paid, and dividends received on trading assets and trading liabilities, excluding derivatives, are recognized on an accrual basis as a component of interest and dividend revenues and interest expense. Interest and dividends on investment securities are recognized on an accrual basis as a component of interest and dividend revenues. Interest related to loans, notes, and mortgages, securities financing activities and certain short- and long-term borrowings are recorded on an accrual basis as interest revenue or interest expense, as applicable.

Use of Estimates

In presenting the Condensed Consolidated Financial Statements, management makes estimates including the following:

- Valuations of assets and liabilities requiring fair value estimates;
- The allowance for credit losses;
- Determination of other-than-temporary impairments for available-for-sale investment securities;
- The outcome of pending litigation;
- Determination of the liability for representations and warranties made in connection with the sales of residential mortgage and home equity loans;
- Determination of whether VIEs should be consolidated;
- The ability to realize deferred tax assets and the recognition and measurement of uncertain tax positions;
- The carrying amount of goodwill and intangible assets;
- The amortization period of intangible assets with definite lives;
- Incentive-based compensation accruals and valuation of share-based payment compensation arrangements; and
- Other matters that affect the reported amounts and disclosure of contingencies in the Condensed Consolidated Financial Statements.

Estimates, by their nature, are based on judgment and available information. Therefore, actual results could differ from those estimates and could have a material impact on the Condensed Consolidated Financial Statements, and it is possible that such changes could occur in the near term. A discussion of certain areas in which estimates are a significant component of the amounts reported in the Condensed Consolidated Financial Statements follows:

Fair Value Measurement

Merrill Lynch accounts for a significant portion of its financial instruments at fair value or considers fair value in their measurement. Merrill Lynch accounts for certain financial assets and liabilities at fair value under various accounting literature, including ASC 320, *Investments - Debt and Equity Securities* (“Investment Accounting”), ASC 815, *Derivatives and Hedging* (“Derivatives Accounting”), and the fair value option election in accordance with ASC 825-10-25, *Financial Instruments - Recognition* (the “fair value option election”). Merrill Lynch also accounts for certain assets at fair value under applicable industry guidance, namely ASC 940, *Financial Services - Broker and Dealers* (“Broker-Dealer Guide”) and ASC 946, *Financial Services - Investment Companies* (“Investment Company Guide”).

ASC 820, *Fair Value Measurements and Disclosures* (“Fair Value Accounting”) defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements.

Fair values for over-the-counter ("OTC") derivative financial instruments, principally forwards, options, and swaps, represent the present value of amounts estimated to be received from or paid to a marketplace participant in settlement of these instruments (i.e., the amount Merrill Lynch would expect to receive in a derivative asset assignment or would expect to pay to have a derivative liability assumed). These derivatives are valued using pricing models based on the net present value of estimated future cash flows and directly observed prices from exchange-traded derivatives, other OTC trades, or external pricing services, while taking into account the counterparty's creditworthiness, or Merrill Lynch's own creditworthiness, as appropriate. When external pricing services are used, the methods and assumptions used are reviewed by Merrill Lynch. Determining the fair value for OTC derivative contracts can require a significant level of estimation and management judgment.

New and/or complex instruments may have immature or limited markets. As a result, the pricing models used for valuation often incorporate significant estimates and assumptions that market participants would use in pricing the instrument, which may impact the results of operations reported in the Condensed Consolidated Financial Statements. For instance, on long-dated and illiquid contracts extrapolation methods are applied to observed market data in order to estimate inputs and assumptions that are not directly observable. This enables Merrill Lynch to mark to fair value all positions consistently when only a subset of prices are directly observable. Values for OTC derivatives are verified using observed information about the costs of hedging the risk and other trades in the market. As the markets for these products develop, Merrill Lynch continually refines its pricing models to correlate more closely to the market price of these instruments. The recognition of significant inception gains and losses that incorporate unobservable inputs is reviewed by management to ensure such gains and losses are derived from observable inputs and/or incorporate reasonable assumptions about the unobservable component, such as implied bid-offer adjustments.

Certain financial instruments recorded at fair value are initially measured using mid-market prices which results in gross long and short positions valued at the same pricing level prior to the application of position netting. The resulting net positions are then adjusted to fair value representing the exit price as defined in Fair Value Accounting. The significant adjustments include liquidity and counterparty credit risk.

Liquidity

Merrill Lynch makes adjustments to bring a position from a mid-market to a bid or offer price, depending upon the net open position. Merrill Lynch values net long positions at bid prices and net short positions at offer prices. These adjustments are based upon either observable or implied bid-offer prices.

Counterparty Credit Risk

In determining the fair value of financial assets and financial liabilities, Merrill Lynch considers the credit risk of its counterparties, as well as its own creditworthiness. Merrill Lynch attempts to mitigate credit risk to third parties by entering into netting and collateral arrangements. Net counterparty exposure (counterparty positions netted by offsetting transactions and both cash and securities collateral) is then valued for counterparty creditworthiness and the resultant counterparty credit valuation adjustment ("CVA") is incorporated into the fair value of the respective instruments.

Fair Value Accounting also requires that Merrill Lynch consider its own creditworthiness when determining the fair value of certain instruments, including OTC derivative instruments (i.e., debit valuation adjustment or "DVA") and certain structured notes carried at fair value under the fair value option election. Merrill Lynch's DVA is measured in the same manner as CVA. The impact of Merrill Lynch's DVA is incorporated into the fair value of OTC derivative contracts even when credit risk is not readily observable in the instrument. For additional information on calculating CVA and DVA, see Note 6.

Legal and Representations and Warranty Reserves

Merrill Lynch is a party in various actions, some of which involve claims for substantial amounts. Amounts are accrued for the financial resolution of claims that have either been asserted or are deemed probable of assertion if,

in the opinion of management, it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. In many cases, it is not possible to determine whether a liability has been incurred or to estimate the ultimate or minimum amount of that liability until the case is close to resolution, in which case no accrual is made until that time. Accruals are subject to significant estimation by management, with input from any outside counsel handling the matter.

In addition, Merrill Lynch and certain of its subsidiaries made various representations and warranties in connection with the sale of residential mortgage loans and home equity loans. Breaches of these representations and warranties may result in the requirement to repurchase mortgage loans or to otherwise make whole or provide other remedies. See Note 14 for further information.

Income Taxes

Merrill Lynch provides for income taxes on all transactions that have been recognized in the Condensed Consolidated Financial Statements in accordance with ASC 740, *Income Taxes* ("Income Tax Accounting"). Accordingly, deferred taxes are adjusted to reflect the tax rates at which future taxable amounts will likely be settled or realized. The effects of tax rate changes on deferred tax liabilities and deferred tax assets, as well as other changes in income tax laws, are recognized in net earnings in the period during which such changes are enacted. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts that are more-likely-than-not to be realized. Pursuant to Income Tax Accounting, Merrill Lynch may consider various sources of evidence in assessing the necessity of valuation allowances to reduce deferred tax assets to amounts more-likely-than-not to be realized, including the following: 1) past and projected earnings, including losses, of Merrill Lynch and Bank of America, as certain tax attributes such as U.S. net operating losses ("NOLs"), U.S. capital loss carryforwards and foreign tax credit carryforwards can be utilized by Bank of America in certain income tax returns, 2) tax carryforward periods, and 3) tax planning strategies and other factors of the legal entities, such as the intercompany tax-allocation policy. Included within Merrill Lynch's net deferred tax assets are carryforward amounts generated in the U.S. and the United Kingdom (the "U.K.") that are deductible in the future as NOLs. Merrill Lynch has concluded that these deferred tax assets are more-likely-than-not to be fully utilized prior to expiration, based on the projected level of future taxable income of Merrill Lynch and Bank of America, which is relevant due to the intercompany tax-allocation policy. For this purpose, future taxable income was projected based on forecasts, historical earnings after adjusting for the past market disruptions and the anticipated impact of the differences between pre-tax earnings and taxable income.

Merrill Lynch recognizes and measures its unrecognized tax benefits in accordance with Income Tax Accounting. Merrill Lynch estimates the likelihood, based on their technical merits, that tax positions will be sustained upon examination considering the facts and circumstances and information available at the end of each period. Merrill Lynch adjusts the level of unrecognized tax benefits when there is more information available, or when an event occurs requiring a change. In accordance with Bank of America's policy, any new or subsequent change in an unrecognized tax benefit related to a Bank of America state consolidated, combined or unitary return in which Merrill Lynch is a member will generally not be reflected in Merrill Lynch's Condensed Consolidated Statement of Earnings (Loss) and Condensed Consolidated Balance Sheet. However, upon Bank of America's resolution of the item, any material impact determined to be attributable to Merrill Lynch will be reflected in Merrill Lynch's Condensed Consolidated Statement of Earnings (Loss) and Condensed Consolidated Balance Sheet. Merrill Lynch accrues income-tax-related interest and penalties, if applicable, within income tax expense.

Merrill Lynch's results of operations are included in the U.S. federal income tax return and certain state income tax returns of Bank of America. The method of allocating income tax expense is determined under the intercompany tax allocation policy of Bank of America. This policy specifies that income tax expense will be computed for all Bank of America subsidiaries generally on a separate pro forma return basis, taking into account the tax position of the consolidated group and the pro forma Merrill Lynch group. Under this policy, tax benefits associated with NOLs (or other tax attributes) of Merrill Lynch are payable to Merrill Lynch generally upon utilization in Bank of America's tax returns.

Securities Financing Transactions

Merrill Lynch enters into repurchase and resale agreements and securities borrowed and loaned transactions to accommodate customers and earn interest rate spreads (also referred to as “matched-book transactions”), obtain securities for settlement and finance inventory positions. Resale and repurchase agreements are generally accounted for as collateralized financing transactions and may be recorded at their contractual amounts plus accrued interest or at fair value under the fair value option election. In resale and repurchase agreements, typically the termination date of the agreements is before the maturity date of the underlying security. However, in certain situations, Merrill Lynch may enter into agreements where the termination date of the transaction is the same as the maturity date of the underlying security. These transactions are referred to as repo-to-maturity (“RTM”) transactions. In accordance with applicable accounting guidance, Merrill Lynch accounts for RTM transactions as sales and purchases when the transferred securities are highly liquid. In instances where securities are considered sold or purchased, Merrill Lynch removes or recognizes the securities from the Condensed Consolidated Balance Sheet and, in the case of sales, recognizes a gain or loss in the Condensed Consolidated Statements of Earnings (Loss). At June 30, 2013 and December 31, 2012, Merrill Lynch had no outstanding RTM transactions that had been accounted for as sales and an immaterial amount of transactions that had been accounted for as purchases.

Resale and repurchase agreements recorded at fair value are generally valued based on pricing models that use inputs with observable levels of price transparency. Where the fair value option election has been made, changes in the fair value of resale and repurchase agreements are reflected in principal transactions revenues and the contractual interest coupon is recorded as interest revenue or interest expense, respectively. Resale and repurchase agreements are substantially collateralized and are not sensitive to credit risk. For further information, see Note 4.

Merrill Lynch may use securities received as collateral for resale agreements to satisfy regulatory requirements such as Rule 15c3-3 of the Securities Exchange Act of 1934.

Securities borrowed and loaned transactions may be recorded at the amount of cash collateral advanced or received plus accrued interest or at fair value under the fair value option election. Securities borrowed transactions require Merrill Lynch to provide the counterparty with collateral in the form of cash, letters of credit, or other securities. Merrill Lynch receives collateral in the form of cash or other securities for securities loaned transactions. For these transactions, the fees received or paid by Merrill Lynch are recorded as interest revenue or expense. Securities borrowed and loaned transactions are substantially collateralized and are not sensitive to credit risk.

For securities financing transactions, Merrill Lynch's policy is to obtain possession of collateral with a market value equal to or in excess of the principal amount loaned under the agreements. To ensure that the market value of the underlying collateral remains sufficient, collateral is generally valued daily and Merrill Lynch may require counterparties to deposit additional collateral or may return collateral pledged when appropriate. Securities financing agreements give rise to negligible credit risk as a result of these collateral provisions, and no allowance for loan losses is considered necessary.

Substantially all securities financing activities are transacted under master agreements that give Merrill Lynch the right, in the event of default, to liquidate collateral held and to offset receivables and payables with the same counterparty. Merrill Lynch offsets certain securities financing transactions with the same counterparty on the Condensed Consolidated Balance Sheets where it has such a master agreement, that agreement is legally enforceable and the transactions have the same stated maturity date. See Note 7 for further information.

All Merrill Lynch-owned securities pledged to counterparties where the counterparty has the right, by contract or custom, to sell or repledge the securities are disclosed parenthetically in trading assets or in investment securities on the Condensed Consolidated Balance Sheets.

In transactions where Merrill Lynch acts as the lender in a securities lending agreement and receives securities that can be pledged or sold as collateral, it recognizes an asset on the Condensed Consolidated Balance Sheets carried at fair value, representing the securities received (securities received as collateral), and a liability for the same amount,

representing the obligation to return those securities (obligation to return securities received as collateral). The amounts on the Condensed Consolidated Balance Sheets result from such non-cash transactions.

Trading Assets and Liabilities

Merrill Lynch's trading activities consist primarily of securities brokerage and trading; derivatives dealing and brokerage; commodities trading and futures brokerage; and securities financing transactions. Trading assets and trading liabilities consist of cash instruments (e.g., securities and loans) and derivative instruments. Trading assets also include commodities inventory. See Note 6 for additional information on derivative instruments.

Trading assets and liabilities are generally recorded on a trade date basis at fair value. Included in trading liabilities are securities that Merrill Lynch has sold but did not own and will therefore be obligated to purchase at a future date ("short sales"). Commodities inventory is recorded at the lower of cost or fair value. Changes in fair value of trading assets and liabilities (i.e., unrealized gains and losses) are recognized as principal transactions revenues in the current period. Realized gains and losses and any related interest amounts are included in principal transactions revenues and interest revenues and expenses, depending on the nature of the instrument.

Derivatives

A derivative is an instrument whose value is derived from an underlying instrument or index, such as interest rates, equity security prices, currencies, commodity prices or credit spreads. Derivatives include futures, forwards, swaps, option contracts and other financial instruments with similar characteristics. Derivative contracts often involve future commitments to exchange interest payment streams or currencies based on a notional or contractual amount (e.g., interest rate swaps or currency forwards) or to purchase or sell other financial instruments at specified terms on a specified date (e.g., options to buy or sell securities or currencies). All derivatives are accounted for at fair value. See Note 6 for further information.

Investment Securities

Investment securities consist of marketable investment securities and non-qualifying investments. See Note 8 for further information.

Marketable Investment Securities

ML & Co. and certain of its non-broker-dealer subsidiaries follow the guidance within Investment Accounting for investments in debt and publicly traded equity securities. For Merrill Lynch, the trading classification under Investment Accounting generally includes those securities that are bought and held principally for the purpose of selling them in the near term, securities that are economically hedged, securities used for liquidity management purposes, or securities that may contain a bifurcated embedded derivative as defined in Derivatives Accounting. Securities classified as trading are recorded at fair value; subsequent changes in fair value are recognized through earnings. All other qualifying securities are classified as available-for-sale ("AFS") and are held at fair value with unrealized gains and losses reported in accumulated other comprehensive income (loss) ("OCI").

Realized gains and losses on investment securities are included in current period earnings. For purposes of computing realized gains and losses, the cost basis of each investment sold is based on the specific identification method.

Merrill Lynch regularly (at least quarterly) evaluates each AFS security whose fair value has declined below amortized cost to assess whether the decline in fair value is other-than-temporary. A decline in a debt security's fair value is considered to be other-than-temporary if it is probable that all amounts contractually due will not be collected, Merrill Lynch either plans to sell the security or it is more likely than not that it will be required to sell the security before recovery of its amortized cost. For unrealized losses on AFS debt securities that are deemed other-than-temporary, the credit component of an other-than-temporary impairment is recognized in earnings and the non-

credit component is recognized in OCI when Merrill Lynch does not intend to sell the security and it is more likely than not that Merrill Lynch will not be required to sell the security prior to recovery.

Non-Qualifying Investments

Non-qualifying investments are those investments that are not within the scope of Investment Accounting and primarily include private equity investments accounted for at fair value and other equity securities carried at cost or under the equity method of accounting.

Private equity investments that are held for capital appreciation and/or current income are accounted for under the Investment Company Guide and carried at fair value. Additionally, certain private equity investments that are not accounted for under the Investment Company Guide may be carried at fair value under the fair value option election.

Merrill Lynch has non-controlling investments in the common shares of corporations and in partnerships that do not fall within the scope of Investment Accounting or the Investment Company Guide. Merrill Lynch accounts for these investments using either the cost or the equity method of accounting based on management's ability to influence the investees, or Merrill Lynch may elect the fair value option. See the Consolidation Accounting section of this Note for more information.

For investments accounted for using the equity method, income is recognized based on Merrill Lynch's share of the earnings or losses of the investee. Dividend distributions are generally recorded as reductions in the investment balance. Impairment testing is based on the guidance provided in Equity Method Accounting, and the investment is reduced when an impairment is deemed other-than-temporary.

For investments accounted for at cost, income is recognized when dividends are received, and gains (losses) are recognized when the investment is sold. Instruments are periodically tested for impairment based on the guidance provided in Investment Accounting, and the cost basis is reduced when an impairment is deemed other-than-temporary.

Loans, Notes and Mortgages, Net

Merrill Lynch's lending and related activities include loan originations, syndications and securitizations. Loan originations include corporate and institutional loans, residential and commercial mortgages, asset-backed loans, and other loans to individuals and businesses. Merrill Lynch also engages in secondary market loan trading (see the Trading Assets and Liabilities section of this Note) and margin lending, which is included in customer receivables. Loans included in loans, notes, and mortgages are classified for accounting purposes as loans held for investment or loans held for sale.

Loans held for investment are generally carried at amortized cost, less an allowance for loan losses, which represents Merrill Lynch's estimate of probable losses inherent in its lending activities. The fair value option election has been made for certain held-for-investment loans, notes and mortgages. Merrill Lynch performs periodic and systematic detailed reviews of its lending portfolios to identify credit risks and to assess overall collectability. These reviews, which are updated on a quarterly basis, consider a variety of factors including, but not limited to, historical loss experience, estimated defaults, delinquencies, economic conditions, credit scores and the fair value of any underlying collateral. Provisions for loan losses are included in interest and dividend revenue in the Condensed Consolidated Statements of Earnings (Loss).

Merrill Lynch's estimate of loan losses includes judgment about collectability based on available information at the balance sheet date, and the uncertainties inherent in those underlying assumptions. While management has based its estimates on the best information available, future adjustments to the allowance for loan losses may be necessary as a result of changes in the economic environment or variances between actual results and the original assumptions.

In general, loans that are past due 90 days or more as to principal or interest, or where reasonable doubt exists as to timely collection, including loans that are individually identified as being impaired, are classified as non-performing unless well-secured and in the process of collection. Loans, primarily commercial, whose contractual terms have been restructured in a manner which grants a concession to a borrower experiencing financial difficulties are considered troubled debt restructurings ("TDRs") and are classified as non-performing until the loans have performed for an adequate period of time under the restructured agreement. Interest accrued but not collected is reversed when a commercial loan is considered non-performing. Interest collections on commercial loans for which the ultimate collectability of principal is uncertain are applied as principal reductions; otherwise, such collections are credited to income when received. Commercial loans may be restored to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection.

Loans held for sale are carried at lower of cost or fair value. The fair value option election has been made for certain held-for-sale loans, notes and mortgages. Estimation is required in determining these fair values. The fair value of loans made in connection with commercial lending activity, consisting mainly of senior debt, is primarily estimated using the market value of publicly issued debt instruments when available or discounted cash flows.

Nonrefundable loan origination fees, loan commitment fees, and "draw down" fees received in conjunction with held for investment loans are generally deferred and recognized over the contractual life of the loan as an adjustment to the yield. If, at the outset, or any time during the term of the loan, it becomes probable that the repayment period will be extended, the amortization is recalculated using the expected remaining life of the loan. When the loan contract does not provide for a specific maturity date, management's best estimate of the repayment period is used. At repayment of the loan, any unrecognized deferred fee is immediately recognized in earnings. If the loan is accounted for as held for sale, the fees received are deferred and recognized as part of the gain or loss on sale in other revenues. If the loan is accounted for under the fair value option election, the fees are included in the determination of the fair value and included in other revenues.

Merrill Lynch purchases loans with and without evidence of credit quality deterioration since origination. Evidence of credit quality deterioration as of the purchase date may include statistics such as past due status, refreshed borrower credit scores and refreshed loan-to-value ("LTV") ratios, some of which are not available as of the purchase date. Purchased loans with evidence of credit quality deterioration, for which it is probable that Merrill Lynch will not receive all contractually required payments receivable, are accounted for in accordance with ASC 310-30, *Receivables - Loans and Debt Securities Acquired with Deteriorated Credit Quality* ("Purchased Credit-Impaired Loan Accounting") as purchased credit impaired ("PCI") loans. The excess of the cash flows expected to be collected on PCI loans, measured as of the acquisition date, over the estimated fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loan using a level yield methodology. The difference between contractually required payments as of the acquisition date and the cash flows expected to be collected is referred to as the nonaccretable difference. PCI loans that have similar risk characteristics, primarily credit risk, collateral type and interest rate risk, are generally pooled and accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. Once a pool is assembled, it is treated as if it were one loan for purposes of applying the accounting guidance for PCI loans. An individual loan is removed from a PCI loan pool if it is sold, foreclosed, forgiven or the expectation of any future proceeds is remote. When a loan is removed from a PCI loan pool and the foreclosure or recovery value of the loan is less than the loan's carrying value, the difference is first applied against the PCI pool's nonaccretable difference. If the nonaccretable difference has been fully utilized, only then is the PCI pool's basis applicable to that loan written-off against its valuation reserve; however, the integrity of the pool is maintained and it continues to be accounted for as if it were one loan.

Merrill Lynch continues to estimate cash flows expected to be collected over the life of the PCI loans using internal credit risk, interest rate and prepayment risk models that incorporate management's best estimate of current key assumptions such as default rates, loss severity and payment speeds. If, upon subsequent evaluation, Merrill Lynch determines it is probable that the present value of the expected cash flows has decreased, the PCI loan is considered to be further impaired resulting in a charge to the provision for loan losses and a corresponding increase to a

valuation allowance included in the allowance for loan losses. If, upon subsequent evaluation, it is probable that there is an increase in the present value of the expected cash flows, Merrill Lynch reduces any remaining valuation allowance. If there is no remaining valuation allowance, Merrill Lynch recalculates the amount of accretable yield as the excess of the revised expected cash flows over the current carrying value resulting in a reclassification from nonaccretable difference to accretable yield. The present value of the expected cash flows is determined using the PCI loans' effective interest rate.

New Accounting Pronouncements

Effective January 1, 2013, Merrill Lynch retrospectively adopted new accounting guidance from the Financial Accounting Standards Board ("FASB") requiring additional disclosures on the effect of netting arrangements on an entity's financial position. The disclosures relate to derivatives and securities financing agreements that are either offset on the balance sheet under existing accounting guidance or are subject to a legally enforceable master netting or similar agreement. This new guidance addresses only disclosures, and accordingly, did not have any impact on Merrill Lynch's consolidated financial position or results of operations. For the related disclosures, see Note 6 and Note 7.

Effective January 1, 2013, Merrill Lynch adopted new accounting guidance on the presentation of comprehensive income that requires reporting the amounts reclassified out of each component of OCI based on its source and the income statement line items affected by the reclassifications. Merrill Lynch did not have any material reclassifications from OCI for all periods presented.

In December 2012, the FASB issued a proposed standard on accounting for expected credit losses. It would replace multiple existing impairment models, including an "incurred loss" model for loans, with an "expected credit loss" model. The FASB announced it would establish the effective date when it issues the final standard. Merrill Lynch cannot predict at this time whether or when a final standard will be issued, when it will be effective or what its final provisions will be. It is possible that the final standard could have a material adverse impact on Merrill Lynch's results of operations once it is issued and becomes effective.

Note 2. Transactions with Bank of America

Merrill Lynch has entered into various transactions with Bank of America, including transactions in connection with certain sales and trading and financing activities, as well as the allocation of certain shared services. Details on amounts receivable from and payable to Bank of America as of June 30, 2013 and December 31, 2012 are presented below.

Receivables from Bank of America are comprised of:

(dollars in millions)

	June 30, 2013	December 31, 2012
Cash and cash equivalents	\$ 10,803	\$ 9,446
Cash and securities segregated for regulatory purposes	5,019	5,257
Receivables under resale agreements	7,628	13,090
Receivables under securities borrowed transactions	865	—
Trading assets	849	409
Net intercompany funding receivable	7,970	16,473
Other receivables	2,836	1,155
Total	<u>\$ 35,970</u>	<u>\$ 45,830</u>

Payables to Bank of America are comprised of:

(dollars in millions)

	June 30, 2013	December 31, 2012
Payables under repurchase agreements	\$ 748	\$ 556
Payables under securities loaned transactions	5,911	3,686
Short-term borrowings	745	925
Deposits	131	140
Trading liabilities	288	509
Other payables	3,243	1,780
Long-term borrowings	1,460	1,156
Total	<u>\$ 12,526</u>	<u>\$ 8,752</u>

Total net revenues and non-interest expenses related to transactions with Bank of America for the three months ended June 30, 2013 were \$546 million and \$545 million, respectively. Such net revenues and non-interest expenses for the six months ended June 30, 2013 were \$851 million and \$1,107 million, respectively. Total net revenues and non-interest expenses related to transactions with Bank of America for the three months ended June 30, 2012 were \$349 million and \$656 million, respectively. Such net revenues and non-interest expenses for the six months ended June 30, 2012 were \$619 million and \$1,082 million, respectively.

Total net revenues related to transactions with Bank of America for the three and six months ended June 30, 2013 included intercompany service fee revenues of \$294 million and \$534 million, respectively. Total non-interest expenses related to transactions with Bank of America for the three and six months ended June 30, 2013 included intercompany service fee expenses of \$434 million and \$878 million, respectively. Total net revenues related to transactions with Bank of America for the three and six months ended June 30, 2012 included intercompany service fee revenues of \$205 million and \$372 million, respectively. Total non-interest expenses related to transactions with Bank of America for the three and six months ended June 30, 2012 included intercompany service fee expenses of \$538 million and \$932 million, respectively. Intercompany service fee revenue and service fee expense from Bank of America represents the allocations of certain centralized or shared business activities between Merrill Lynch and Bank of America. Such fees are generally determined in accordance with subsidiary transfer pricing agreements.

During the three and six months ended June 30, 2013, Merrill Lynch acquired certain residential mortgage loans from Bank of America. Such loans had an aggregate unpaid principal balance of \$5.3 billion and an aggregate carrying value of \$4.2 billion as of June 30, 2013. See Note 10 for further information.

Bank of America and Merrill Lynch have entered into certain intercompany lending and borrowing arrangements to facilitate centralized liquidity management. Included in these arrangements is a \$50 billion extendible one-year revolving credit facility that allows Bank of America to borrow funds from Merrill Lynch at a spread to the London Interbank Offered Rate ("LIBOR") that is reset periodically and is consistent with other intercompany agreements. The credit facility matures on January 1, 2014 and will automatically be extended by one year to the succeeding January 1st unless Merrill Lynch provides written notice not to extend at least 45 days prior to the maturity date. There were no amounts outstanding at both June 30, 2013 and December 31, 2012 under this credit facility. There is also a short-term revolving credit facility that allows Bank of America to borrow up to an additional \$25 billion. Interest on borrowings under the credit facility is based on prevailing short-term market rates. The line of credit matures on February 11, 2014. At June 30, 2013 and December 31, 2012, approximately \$7.8 billion and \$16.2 billion, respectively, was outstanding under this line of credit. See Note 12 for further information on intercompany financing agreements with Bank of America. In addition, Bank of America has guaranteed the performance of Merrill Lynch on certain derivative transactions (see Note 6). Bank of America has also guaranteed certain debt securities, warrants and/or other certificates and obligations of certain subsidiaries of ML & Co. (see Note 12) and in certain instances the return of collateral posted by counterparties.

Note 3. Segment and Geographic Information

Segment Information

Pursuant to ASC 280, *Segment Reporting*, operating segments represent components of an enterprise for which separate financial information is available that is regularly evaluated by the chief operating decision maker in determining how to allocate resources and in assessing performance. The business activities of Merrill Lynch are included within certain of the operating segments of Bank of America. Detailed financial information of the nature that could be used to allocate resources and assess the performance and operations for components of Merrill Lynch, however, is not provided to Merrill Lynch's chief operating decision maker. As a result, Merrill Lynch does not contain any identifiable operating segments under Segment Reporting, and therefore the financial information of Merrill Lynch is presented as a single segment.

Geographic Information

Merrill Lynch conducts its business activities through offices in the following five regions:

- United States;
- Europe, Middle East, and Africa (“EMEA”);
- Pacific Rim;
- Latin America; and
- Canada.

The principal methodologies used in preparing the geographic information below are as follows:

- Revenues are generally recorded based on the location of the employee generating the revenue; and
- Intercompany transfers are based primarily on service agreements.

The information that follows, in management’s judgment, provides a reasonable representation of each region’s contribution to the consolidated net revenues:

(dollars in millions)

	For the Three Months Ended June 30, 2013	For The Six Months Ended June 30, 2013	For the Three Months Ended June 30, 2012	For The Six Months Ended June 30, 2012
Revenues, net of interest expense				
Europe, Middle East, and Africa	\$ 1,017	\$ 2,383	\$ 1,012	\$ 2,465
Pacific Rim	649	1,337	387	1,107
Latin America	216	535	320	582
Canada	81	159	44	150
Total Non-U.S.	1,963	4,414	1,763	4,304
United States ⁽¹⁾⁽²⁾	4,386	8,252	3,352	5,576
Total revenues, net of interest expense	\$ 6,349	\$ 12,666	\$ 5,115	\$ 9,880

⁽¹⁾ U.S. results for the three and six months ended June 30, 2013 included net gains of \$46 million and \$12 million, respectively, due to the impact of changes in Merrill Lynch's credit spreads on the carrying values of certain long-term borrowings, primarily structured notes. U.S. results for the three and six months ended June 30, 2012 included net losses of \$36 million and \$2.2 billion, respectively, due to the impact of changes in Merrill Lynch's credit spreads on the carrying values of certain long-term borrowings, primarily structured notes.

⁽²⁾ Corporate net revenues and adjustments are reflected in the U.S. region.

Note 4. Fair Value Disclosures

Fair Value Accounting

Fair Value Hierarchy

In accordance with Fair Value Accounting, Merrill Lynch has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

Financial assets and liabilities recorded on the Condensed Consolidated Balance Sheets are categorized based on the inputs to the valuation techniques as follows:

- Level 1.* Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that Merrill Lynch has the ability to access (examples include active exchange-traded equity securities, exchange-traded derivatives, U.S. Government securities, and certain other Non-U.S. government obligations).
- Level 2.* Financial assets and liabilities whose values are based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:
- a) Quoted prices for similar assets or liabilities in active markets (examples include restricted stock and U.S. agency securities);
 - b) Quoted prices for identical or similar assets or liabilities in non-active markets (examples include corporate and municipal bonds, which can trade infrequently);
 - c) Pricing models whose inputs are observable for substantially the full term of the asset or liability (examples include most over-the-counter derivatives, including interest rate and currency swaps); and
 - d) Pricing models whose inputs are derived principally from or corroborated by observable market data through correlation or other means for substantially the full term of the asset or liability (examples include certain residential and commercial mortgage-related assets, including loans, securities and derivatives).
- Level 3.* Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's view about the assumptions a market participant would use in pricing the asset or liability (examples include certain private equity investments, certain residential and commercial mortgage-related assets and long-dated or complex derivatives).

As required by Fair Value Accounting, when the inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement in its entirety. For example, a Level 3 fair value measurement may include inputs that are observable (Level 1 and 2) and unobservable (Level 3). Therefore gains and losses for such assets and liabilities categorized within the Level 3 reconciliation below may include changes in fair value that are attributable to both observable inputs (Levels 1 and 2) and unobservable inputs (Level 3). Further, the following reconciliations do not take into consideration the offsetting effect of Level 1 and 2 financial instruments entered into by Merrill Lynch that economically hedge certain exposures to the Level 3 positions.

A review of fair value hierarchy classifications is conducted on a quarterly basis. Changes in the observability of valuation inputs may result in a reclassification for certain financial assets or liabilities. Reclassifications are reported as transfers in or transfers out of the Level as of the beginning of the quarter in which the reclassifications occur. Therefore, Level 3 gains and losses represent amounts recognized during the period in which the instrument was classified as Level 3. See the recurring and non-recurring sections within this Note for further information on transfers between levels.

Valuation Processes and Techniques

Merrill Lynch has various processes and controls in place to ensure that its fair value measurements are reasonably estimated. A model validation policy governs the use and control of valuation models used to estimate fair value. This policy requires review and approval of models by personnel who are independent of the front office and periodic re-assessments to ensure that models are continuing to perform as designed. In addition, detailed reviews of trading gains and losses are analyzed on a daily basis by personnel who are independent of the front office. A price verification group, which is also independent of the front office, utilizes available market information including executed trades, market prices and market observable valuation model inputs to ensure that fair values are reasonably estimated. Merrill Lynch executes due diligence procedures over third party pricing service providers in order to support their use in the valuation process. Where market information is not available to support internal valuations, independent reviews of the valuations are performed and any material exposures are escalated through a management review process.

While Merrill Lynch believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

During the second quarter of 2013, there were no changes to Merrill Lynch's valuation techniques that had or are expected to have, a material impact on its condensed consolidated financial position or results of operations.

The following outlines the valuation methodologies for Merrill Lynch's material categories of assets and liabilities:

U.S. Government and agencies

U.S. Treasury securities U.S. Treasury securities are valued using quoted market prices and are generally classified as Level 1 in the fair value hierarchy.

U.S. agency securities U.S. agency securities are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. The fair value of agency issued debt securities is derived using market prices and recent trade activity gathered from independent dealer pricing services or brokers. Generally, the fair value of mortgage pass-throughs is based on market prices of comparable securities. Agency issued debt securities and mortgage pass-throughs are generally classified as Level 2 in the fair value hierarchy.

Non-U.S. governments and agencies

Non-U.S. government obligations Non-U.S. government obligations are valued using quoted prices in active markets when available. To the extent quoted prices are not available, fair value is determined based on reference to recent trading activity and quoted prices of similar securities. These securities are generally classified in Level 1 or Level 2 in the fair value hierarchy, primarily based on the issuing country.

Municipal debt

Municipal bonds The fair value of municipal bonds is calculated using recent trade activity, market price quotations and new issuance levels. In the absence of this information, fair value is calculated using comparable bond credit spreads. Current interest rates, credit events, and individual bond characteristics such as coupon, call features,

maturity, and revenue purpose are considered in the valuation process. The majority of these bonds are classified as Level 2 in the fair value hierarchy.

Auction Rate Securities (“ARS”) Merrill Lynch holds investments in certain ARS, including student loan and municipal ARS. Student loan ARS are comprised of various pools of student loans. Municipal ARS are issued by states and municipalities for a wide variety of purposes, including but not limited to healthcare, industrial development, education and transportation infrastructure. The fair value of the student loan ARS is calculated based upon a number of assumptions including weighted average life, coupon, discount margin and liquidity discounts. The fair value of the municipal ARS is calculated based upon projected refinancing and spread assumptions. In both cases, recent trades and issuer tenders are considered in the valuations. Student loan ARS and municipal ARS are classified as Level 2 or Level 3 in the fair value hierarchy.

Corporate and other debt

Corporate bonds Corporate bonds are valued based on either the most recent observable trade and/or external quotes, depending on availability. The most recent observable trade price is given highest priority as the valuation benchmark based on an evaluation of transaction date, size, frequency, and bid-offer. This price may be adjusted by bond or credit default swap spread movement. When credit default swap spreads are referenced, cash-to-synthetic basis magnitude and movement as well as maturity matching are incorporated into the value. When neither external quotes nor a recent trade is available, the bonds are valued using a discounted cash flow approach based on risk parameters of comparable securities. In such cases, the potential pricing difference in spread and/or price terms with the traded comparable is considered. Corporate bonds are generally classified as Level 2 or Level 3 in the fair value hierarchy.

Commercial loans and commitments The fair values of commercial loans and loan commitments are based on market prices and most recent transactions when available. When not available, a discounted cash flow valuation approach is applied using market-based credit spreads of comparable debt instruments, recent new issuance activity or relevant credit derivatives with appropriate cash-to-synthetic basis adjustments. Commercial loans and commitments are generally classified as Level 2 in the fair value hierarchy. Certain commercial loans, particularly those related to emerging market, leveraged and distressed companies have limited price transparency. These loans are generally classified as Level 3 in the fair value hierarchy.

Mortgages, mortgage-backed and asset-backed

Residential Mortgage-Backed Securities (“RMBS”), Commercial Mortgage-Backed Securities (“CMBS”), and other Asset-Backed Securities (“ABS”) RMBS, CMBS and other ABS are valued based on observable price or credit spreads for the particular security, or when price or credit spreads are not observable, the valuation is based on prices of comparable bonds or the present value of expected future cash flows. Valuation levels of RMBS and CMBS indices are used as an additional data point for benchmarking purposes or to price outright index positions.

When estimating the fair value based upon the present value of expected future cash flows, Merrill Lynch uses its best estimate of the key assumptions, including forecasted credit losses, prepayment rates, forward yield curves and discount rates commensurate with the risks involved, while also taking into account performance of the underlying collateral.

RMBS, CMBS and other ABS are classified as Level 3 in the fair value hierarchy if external prices or credit spreads are unobservable or if comparable trades/assets involve significant subjectivity related to property type differences, cash flows, performance and other inputs; otherwise, they are classified as Level 2 in the fair value hierarchy.

Collateralized loan obligations (“CLO”) are valued based upon the present value of expected future cash flows, utilizing yields that are derived from those of comparable securities. CLOs are generally classified as Level 3 in the fair value hierarchy.

Equities

Exchange-Traded Equity Securities Exchange-traded equity securities are generally valued based on quoted prices from the exchange. These securities are classified as either Level 1 or Level 2 in the fair value hierarchy, primarily based on the exchange on which they are traded.

Convertible debentures Convertible debentures are valued based on observable trades and/or external quotes, depending on availability. When neither observable trades nor external quotes are available, the instruments are valued using a discounted cash flow approach based on risk parameters of comparable securities. In such cases, the potential pricing difference in spread and/or price terms with the traded comparable is considered. Convertible debentures are generally classified as Level 2 in the fair value hierarchy.

Derivative contracts

Listed Derivative Contracts Listed derivatives that are actively traded are generally valued based on quoted prices from the exchange and are classified as Level 1 in the fair value hierarchy. Listed derivatives that are not actively traded are valued using the same approaches as those applied to OTC derivatives; they are generally classified as Level 2 in the fair value hierarchy.

OTC Derivative Contracts OTC derivative contracts include forwards, swaps and options related to interest rate, foreign currency, credit, equity or commodity underlyings.

The fair value of OTC derivatives is derived using market prices and other market based pricing parameters such as interest rates, currency rates and volatilities that are observed directly in the market or gathered from independent sources such as dealer consensus pricing services or brokers. Where models are used, they are used consistently and reflect the contractual terms of and specific risks inherent in the contracts. Generally, the models do not require a high level of subjectivity since the valuation techniques used in the models do not require significant judgment and inputs to the models are readily observable in active markets. When appropriate, valuations are adjusted for various factors such as liquidity and credit considerations based on available market evidence. In addition, for most collateralized interest rate and currency derivatives the requirement to pay interest on the collateral may be considered in the valuation. The majority of OTC derivative contracts are classified as Level 2 in the fair value hierarchy.

OTC derivative contracts that do not have readily observable market based pricing parameters are classified as Level 3 in the fair value hierarchy. Examples of derivative contracts classified within Level 3 include contractual obligations that have tenures that extend beyond periods in which inputs to the model would be observable, exotic derivatives with significant inputs into a valuation model that are less transparent in the market and certain credit default swaps (“CDS”) referenced to mortgage-backed securities. For example, derivative instruments, such as certain CDS referenced to RMBS, CMBS, other ABS and collateralized debt obligations (“CDOs”), may be valued based on the underlying mortgage risk where these instruments are not actively quoted. Inputs to the valuation will include available information on similar underlying loans or securities in the cash market. The prepayments and loss assumptions on the underlying loans or securities are estimated using a combination of historical data, prices on recent market transactions, relevant observable market indices such as the Asset Backed Securities Index (“ABX”) or Commercial Mortgage Backed Securities Index (“CMBX”) and prepayment and default scenarios and analyses.

CDOs The fair value of CDOs is derived from a referenced basket of CDS, the CDO's capital structure, and the default correlation, which is an input to a proprietary CDO valuation model. The underlying CDO portfolios typically contain investment grade as well as non-investment grade obligors. After adjusting for differences in risk profile, the correlation parameter for an actual transaction is estimated by benchmarking against observable standardized index tranches and other comparable transactions. CDOs are classified as either Level 2 or Level 3 in the fair value hierarchy.

Investment securities non-qualifying

Investments in Private Equity, Real Estate and Hedge Funds Merrill Lynch has investments in numerous asset classes, including: direct private equity, private equity funds, hedge funds and real estate funds. Valuing these investments requires significant management judgment due to the nature of the assets and the lack of quoted market prices and liquidity in these assets. Initially, the transaction price of the investment is generally considered to be the best indicator of fair value. Thereafter, valuation of direct investments is based on an assessment of each individual investment using various methodologies, which include publicly traded comparables derived by multiplying a key performance metric (e.g., earnings before interest, taxes, depreciation and amortization ("EBITDA")) of the portfolio company by the relevant valuation multiple observed for comparable companies, acquisition comparables, entry level multiples and discounted cash flows. These valuations are subject to appropriate discounts for lack of liquidity. Certain factors which may influence changes to fair value include but are not limited to, recapitalizations, subsequent rounds of financing, and offerings in the equity or debt capital markets. For fund investments, Merrill Lynch generally records the fair value of its proportionate interest in the fund's capital as reported by the fund's respective managers.

Investment securities non-qualifying include equity securities that have recently gone through initial public offerings or secondary sales of public positions. These investments are primarily classified as either Level 1 or Level 2 in the fair value hierarchy. Level 2 classifications generally include those publicly traded equity investments that have a legal or contractual transfer restriction. All other investments in private equity, real estate and hedge funds are classified as Level 3 in the fair value hierarchy due to infrequent trading and/or unobservable market prices.

Resale and repurchase agreements

Merrill Lynch elected the fair value option for certain resale and repurchase agreements. For such agreements, the fair value is estimated using a discounted cash flow model which incorporates inputs such as interest rate yield curves and option volatility. Resale and repurchase agreements for which the fair value option has been elected are generally classified as Level 2 in the fair value hierarchy.

Long-term and short-term borrowings

Merrill Lynch and its consolidated VIEs issue structured notes that have coupons or repayment terms linked to the performance of debt or equity securities, indices, currencies or commodities. The fair value of structured notes is estimated using valuation models for the combined derivative and debt portions of the notes when the fair value option has been elected. These models incorporate observable, and in some instances unobservable, inputs including security prices, interest rate yield curves, option volatility, currency, commodity or equity rates and correlations between these inputs. The impact of Merrill Lynch's own credit spreads is also included based on Merrill Lynch's observed secondary bond market spreads. Structured notes are classified as either Level 2 or Level 3 in the fair value hierarchy.

Recurring Fair Value

The following tables present Merrill Lynch's fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis as of June 30, 2013 and December 31, 2012, respectively.

(dollars in millions)

	Fair Value Measurements on a Recurring Basis as of June 30, 2013

⁽²⁾ See Note 6 for product level detail.

⁽³⁾ Certain assets that are used for liquidity management purposes were reclassified from Trading assets to Other debt securities carried at fair value during the six months ended June 30, 2013. Prior period amounts have been reclassified to conform with the current period presentation.

During the year ended December 31, 2012, \$2,040 million and \$350 million of assets and liabilities, respectively, were transferred from Level 1 to Level 2, and \$785 million and \$40 million of assets and liabilities, respectively, were transferred from Level 2 to Level 1. Of the asset transfer from Level 1 to Level 2, \$940 million was due to restrictions that became effective for non-qualifying investment securities during 2012, while \$535 million of the asset transfer from Level 2 to Level 1 was due to the lapse of such restrictions during 2012. The remaining transfers were the result of additional information associated with certain equities, derivative contracts and investment securities non-qualifying.

Level 3 Financial Instruments

The following tables provide a summary of changes in Merrill Lynch's Level 3 financial assets and liabilities for the three and six months ended June 30, 2013 and June 30, 2012.

(dollars in millions)

	Level 3 Financial Assets and Liabilities Three Months Ended June 30, 2013

Total investment securities available-for-sale	8	—	—	—	—	—	—	—	—	—	—	—	8
Investment securities non-qualifying	288	—	(3)	—	(3)	—	—	21	—	(18)	—	—	288
Total investment securities	296	—	(3)	—	(3)	—	—	21	—	(18)	—	—	296
Loans, notes and mortgages	1,436	—	12	7	19	—	(180)	8	—	(465)	—	(3)	815
Other	1,086	—	(6)	—	(6)	—	—	—	—	(813)	—	—	267
Liabilities:													
Trading liabilities, excluding derivative contracts:													
Corporate debt	16	2	—	—	2	—	4	(1)	—	—	1	(9)	9
Municipals, money markets and other	42	4	—	—	4	—	13	(10)	5	—	—	—	46
Total trading liabilities, excluding derivative contracts	58	6	—	—	6	—	17	(11)	5	—	1	(9)	55
Other payables - interest and other	4	—	—	—	—	—	—	—	—	—	1	—	5
Long-term borrowings	1,285	58	(5)	—	53	—	—	(154)	52	(44)	94	(98)	1,082

Transfers in and out related to corporate debt reflected changes in third party prices available for certain corporate loans. Transfers out for municipals and money markets reflected increased trading activity for certain ARS. Transfers in for derivative contracts, net were primarily due to additional information related to certain total return swaps ("TRS"). Transfers out for derivative contracts, net related to additional market comparables on certain option contracts. Transfers in and out related to long-term borrowings were primarily due to changes in the impact of unobservable inputs on the value of certain equity-linked structured notes.

Long-term borrowings	1,316	80	(9)	—	71	—	4	(223)	88	(91)	279	(220)	1,082

Transfers in and out related to corporate debt reflected changes in third party prices available for certain corporate loans. Transfers out for municipals and money markets reflected increased trading activity for certain ARS. Transfers out for derivative contracts, net related to additional market comparables on certain option contracts. Transfers in and out related to long-term borrowings were primarily due to changes in the impact of unobservable inputs on the value of certain equity-linked structured notes.

⁽¹⁾ During the six months ended June 30, 2012, approximately \$900 million was reclassified from Corporate debt to Mortgages, mortgage-backed and asset-backed. In the table above, this reclassification is presented as a sale of Corporate debt and as a purchase of Mortgages, mortgage-backed and asset-backed trading assets.

Transfers in and out for corporate debt primarily relate to changes in market liquidity for certain corporate loans. Transfers in for mortgages, mortgage-backed and asset-backed is primarily the result of additional information related to certain CLOs. Transfers out for mortgages, mortgage-backed and asset-backed relates to increased market activity (i.e., executed trades) for certain loans backed by commercial real estate. Transfers out for derivative contracts, net primarily relates to increased price observability (i.e., market comparables) for certain TRS and foreign exchange swaps. Transfers in and out related to long-term borrowings are primarily due to changes in the impact of unobservable inputs on the value of certain equity-linked structured notes.

The following tables provide the portion of gains or losses included in income for the three and six months ended June 30, 2013 and June 30, 2012 attributable to unrealized gains or losses relating to those Level 3 assets and liabilities held at June 30, 2013 and June 30, 2012, respectively.

CDR = Constant Default Rate

MMBtu = Million British thermal units

In the tables above, instruments backed by residential and commercial real estate assets include RMBS, CMBS, whole loans, mortgage CDOs and net monoline exposure. Commercial loans, debt securities and other include corporate CLOs and CDOs, commercial loans and bonds, and securities backed by non-real estate assets. Structured notes primarily include equity-linked notes that are accounted for under the fair value option.

In addition to the instruments disclosed in the tables above, Merrill Lynch holds \$288 million and \$287 million of Investment securities non-qualifying as of June 30, 2013 and December 31, 2012, respectively, that are primarily

comprised of certain direct private equity investments and private equity funds that are classified as Level 3. Valuations of direct private equity investments are prepared internally based on the most recent portfolio company financial information. Inputs generally include market and acquisition comparables, entry level multiples, as well as other variables. Merrill Lynch selects a valuation methodology (e.g., market comparables) for each investment and, in certain instances, multiple inputs are weighted to derive the most representative value. Discounts are applied as appropriate to consider the lack of liquidity and marketability versus publicly traded companies. For private equity funds, fair value is generally determined using the net asset value as provided by the individual fund's general partner.

Merrill Lynch uses multiple market approaches in valuing certain of its Level 3 financial instruments. For example, market comparables and discounted cash flows are used together. For a given product, such as corporate debt securities, market comparables may be used to estimate some of the unobservable inputs and then these inputs are incorporated into a discounted cash flow model. Therefore, the balances disclosed encompass both of these techniques.

The level of aggregation and diversity within the products disclosed in the tables above result in certain ranges of inputs being wide and unevenly distributed across asset and liability categories. Weighted averages have been provided for all ranges of inputs as of June 30, 2013. At December 31, 2012, weighted averages were provided for all ranges of inputs except for those related to long-term borrowings and derivative contracts, for which a qualitative discussion is presented below.

For credit derivatives at December 31, 2012, the range of credit spreads represented positions with varying levels of default risk to the underlying instruments. The lower end of the credit spread range typically represented shorter-dated instruments and those with better perceived credit risk. The higher end of the range comprised longer-dated instruments and those referencing debt issuances which were more likely to be impaired or non-performing. At December 31, 2012, the majority of inputs were concentrated in the lower end of the range. Similarly, the spread to index could vary significantly based on the risk of the instrument. The spread was positive for instruments that had a higher risk of default than the index (which was based on a weighted average of its components) and negative for instruments that had a lower risk of default than the index. At December 31, 2012, inputs were distributed evenly throughout the range for spread to index. In addition, for yield and credit correlation, the majority of the inputs were concentrated in the center of the range. Inputs were concentrated in the middle to lower end of the range for upfront points. The range for loss severity reflected exposures that were concentrated in the middle to upper end of the range, while the ranges for prepayment speed and default rates reflected exposures that were concentrated in the lower end of the range.

For equity derivatives at December 31, 2012, including those embedded in long-term debt, the range for equity correlation represented exposure primarily concentrated toward the upper end of the range. The range for long-dated volatilities represented exposure primarily concentrated toward the lower end of the range.

For interest rate derivatives at December 31, 2012, the diversity in the portfolio was reflected in wide ranges of inputs because the variety of currencies and tenors of the transactions required the use of numerous foreign exchange and interest rate curves. Since foreign exchange and interest rate correlations were measured between curves and across the various tenors on the same curve, the range of potential values could include both negative and positive values. For the correlation (IR/IR) range, the exposure represented the valuation of interest rate correlations on less liquid pairings and was concentrated at the upper end of the range at December 31, 2012. For the correlation (FX/IR) range, the exposure was the sensitivity to a broad mix of interest rate and foreign exchange correlations and was distributed evenly throughout the range as of December 31, 2012. For long-dated inflation rates and volatilities as well as long-dated volatilities (FX), the inputs were concentrated in the middle of the range.

Sensitivity of Fair Value Measurements to Changes in Unobservable Inputs

Loans and Securities

For instruments backed by residential real estate assets, commercial real estate assets, and commercial loans, debt securities and other, a significant increase in market yields, default rates or loss severities would result in a significantly lower fair value for long positions. Short positions would be impacted in a directionally opposite way. The impact of changes in prepayment speeds would have differing impacts depending on the seniority of the instrument and, in the case of CLOs, whether prepayments can be reinvested.

For student loan and municipal auction rate securities, a significant increase in projected tender price/refinancing levels would result in a significantly higher fair value.

Structured Notes and Derivatives

For credit derivatives, a significant increase in market yield, including spreads to indices, upfront points (i.e., a single upfront payment made by a protection buyer at inception) or credit spreads, default rates or loss severities would result in a significantly lower fair value for protection sellers and higher fair value for protection buyers. The impact of changes in prepayment speeds would have differing impacts depending on the seniority of the instrument and, in the case of CLOs, whether prepayments can be reinvested.

Structured credit derivatives, which include tranching portfolio CDS and derivatives with derivative product company ("DPC") and monoline counterparties, are impacted by credit correlation, including default and wrong way correlation. Default correlation is a parameter that describes the degree of dependence between credit default rates within a credit portfolio that underlies a credit derivative instrument. The sensitivity of this input on the fair value varies depending on the level of subordination of the tranche. For senior tranches that are net purchases of protection, a significant increase in default correlation would result in a significantly higher fair value. Net short protection positions would be impacted in a directionally opposite way. Wrong-way correlation is a parameter that describes the probability that as exposure to a counterparty increases, the credit quality of the counterparty decreases. A significantly higher degree of wrong-way correlation between a DPC counterparty and underlying derivative exposure would result in a significantly lower fair value.

For equity derivatives, equity-linked long-term debt (structured notes) and interest rate derivatives, a significant change in long-dated rates and volatilities and correlation inputs (e.g., the degree of correlation between an equity security to an index, between two different interest rates, or between interest rates and foreign exchange rates) would result in a significant impact to the fair value. However, the magnitude and direction of the impact depends on whether Merrill Lynch is long or short the exposure.

Non-recurring Fair Value

Certain assets and liabilities are measured at fair value on a non-recurring basis and are not included in the tables above. The tables below show the fair value hierarchy for assets and liabilities measured at fair value on a non-recurring basis as of June 30, 2013 and December 31, 2012.

[Table of Contents](#)

(dollars in millions)

	Non-Recurring Basis			Gains/(Losses)		Gains/(Losses)		Gains/(Losses)		Gains/(Losses)		
	as of June 30, 2013			Three Months Ended		Six Months Ended		Three Months Ended		Six Months Ended		
	Level 2	Level 3	Total	June 30, 2013	June 30, 2013	June 30, 2013	June 30, 2012	June 30, 2012	June 30, 2012	June 30, 2012		
Assets:												
Loans, notes and mortgages	\$	1	\$ 132	\$ 133	\$	(1)	\$	(2)	\$	(53)	\$	(40)
Other		—	2	2		—		—		—		—

(dollars in millions)

	Non-Recurring Basis						
	as of December 31, 2012						
	Level 2	Level 3	Total				
Assets:							
Loans, notes and mortgages		\$	1	\$	221	\$	222
Other		—	—		2		2

Loans, notes and mortgages includes held for sale loans that are carried at the lower of cost or fair value and for which the fair value was below the cost basis at June 30, 2013 and December 31, 2012. It also includes certain impaired held for investment loans where an allowance for loan losses has been calculated based upon the fair value of the loans or collateral. Level 3 assets as of June 30, 2013 and December 31, 2012 primarily relate to commercial real estate loans that are classified as held for sale where there continues to be significant illiquidity in the loan trading and securitization markets.

Fair Value Option Election

The fair value option election allows companies to irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and liabilities. Changes in fair value for assets and liabilities for which the election is made will be recognized in earnings as they occur. The fair value option election is permitted on an instrument by instrument basis at initial recognition of an asset or liability or upon an event that gives rise to a new basis of accounting for that instrument. As discussed above, certain of Merrill Lynch's financial instruments are required to be accounted for at fair value under Investment Accounting and Derivatives Accounting, as well as industry level guidance. For certain financial instruments that are not accounted for at fair value under other applicable accounting guidance, the fair value option election has been made.

The following tables provide information about the line items in the Condensed Consolidated Statements of Earnings (Loss) where changes in fair values of assets and liabilities, for which the fair value option election has been made, are included for the three and six months ended June 30, 2013 and June 30, 2012.

[Table of Contents](#)

Long-term borrowings	592	(21)	571	(1,841)	(21)	(1,862)

The following describes the rationale for electing to account for certain financial assets and liabilities at fair value, as well as the impact of instrument-specific credit risk on the fair value.

Resale and repurchase agreements

Merrill Lynch elected the fair value option for certain resale and repurchase agreements and, to a lesser extent, securities borrowing agreements. The fair value option election was made based on the tenor of the agreements, which reflect the magnitude of the interest rate risk. The majority of resale and repurchase agreements collateralized by U.S. Government securities was excluded from the fair value option election as these contracts are generally short-dated and therefore the interest rate risk is not considered significant. Amounts loaned under resale agreements require collateral with a market value equal to or in excess of the principal amount loaned, resulting in minimal credit risk for such transactions.

Loans and loan commitments

Merrill Lynch elected the fair value option for certain loans that are risk managed on a fair value basis. Upon the acquisition of Merrill Lynch by Bank of America, Merrill Lynch also elected the fair value option for certain mortgage, commercial, and leveraged loans and loan commitments. The changes in the fair value of loans and loan commitments, for which the fair value option was elected, that were attributable to changes in borrower-specific credit risk were not material for the three and six months ended June 30, 2013 and June 30, 2012.

As of June 30, 2013 and December 31, 2012, the aggregate fair value of loans for which the fair value option election has been made that were 90 days or more past due was \$6 million and \$115 million, respectively, and the aggregate fair value of loans that were in non-accrual status was \$19 million and \$25 million at June 30, 2013 and December 31, 2012, respectively. As of June 30, 2013 and December 31, 2012, the unpaid principal amount due exceeded the aggregate fair value of such loans that are 90 days or more past due and/or in non-accrual status by \$36 million and \$153 million, respectively.

Short-term and long-term borrowings

Merrill Lynch elected the fair value option for certain short-term and long-term borrowings that are risk managed on a fair value basis (e.g., structured notes) and/or for which hedge accounting under Derivatives Accounting had been difficult to obtain. The majority of the fair value changes on long-term borrowings are from structured notes with coupon or repayment terms that are linked to the performance of debt and equity securities, indices, currencies or commodities. Excluding gains (losses) related to changes in Merrill Lynch's credit spreads, the majority of the gains (losses) for the respective periods are offset by gains (losses) on derivatives and securities that economically hedge these borrowings and that are accounted for at fair value. The changes in the fair value of liabilities for which the fair value option election was made that were attributable to changes in Merrill Lynch's credit spreads were net gains of approximately \$46 million and \$12 million for the three and six months ended June 30, 2013, respectively, and net losses of approximately \$36 million and \$2.2 billion for the three and six months ended June 30, 2012, respectively. Changes in Merrill Lynch specific credit risk are derived by isolating fair value changes due to changes in Merrill Lynch's credit spreads as observed in the secondary cash market.

The fair value option election was also made for certain non-recourse long-term borrowings and secured borrowings issued by consolidated VIEs. The fair value of these borrowings is not materially affected by changes in Merrill Lynch's creditworthiness.

The following tables present the difference between fair values and the aggregate contractual principal amounts of receivables under resale agreements, receivables under securities borrowed transactions, loans and long-term borrowings for which the fair value option election has been made as of June 30, 2013 and December 31, 2012.

(dollars in millions)

	Fair Value at		Principal Amount Due Upon Maturity	Difference
	June 30, 2013			
Assets:				
Receivables under resale agreements	\$	99,001	\$ 98,704	\$ 297
Receivables under securities borrowed transactions		1,954	1,980	(26)
Loans ⁽¹⁾		2,472	3,163	(691)
Liabilities:				
Long-term borrowings ^{(2) (3)}		27,964	28,629	(665)

⁽¹⁾ Includes trading loans with a fair value of \$904 million and margin loans with a fair value of \$267 million.

⁽²⁾ The majority of the difference between the fair value and principal amount due upon maturity at June 30, 2013 relates to the impact of changes in Merrill Lynch's credit spreads, as well as the fair value of the embedded derivative, where applicable.

⁽³⁾ Includes structured liabilities with a fair value of \$18.6 billion and principal amount due upon maturity of \$19.0 billion as of June 30, 2013.

(dollars in millions)

	Fair Value at		Principal Amount Due Upon Maturity		Difference
	December 31, 2012				
Assets:					
Receivables under resale agreements	\$	93,715	\$	93,433	\$ 282
Receivables under securities borrowed transactions		961		892	69
Loans ⁽¹⁾		4,063		4,835	(772)
Liabilities:					
Long-term borrowings ^{(2) (3)}		30,875		32,151	(1,276)

⁽¹⁾ Includes trading loans with a fair value of \$715 million and margin loans with a fair value of \$271 million.

⁽²⁾ The difference between the fair value and principal amount due upon maturity at December 31, 2012 relates to the impact of changes in Merrill Lynch's credit spreads, as well as the fair value of the embedded derivative, where applicable.

⁽³⁾ Includes structured liabilities with a fair value of \$22.0 billion and principal amount due upon maturity of \$22.7 billion as of December 31, 2012.

Note 5. Fair Value of Financial Instruments

The fair values of financial instruments have been derived, in part, by management's assumptions, the estimated amount and timing of future cash flows and estimated discount rates. Different assumptions could significantly affect these estimated fair values. Accordingly, the net realizable values could be materially different from the estimates presented below. In addition, the estimates are only indicative of the value of individual financial instruments and should not be considered an indication of the fair value of Merrill Lynch.

The classifications of financial instruments within the fair value hierarchy have been derived using methodologies described in Note 4.

The following disclosures relate to financial instruments for which the ending balances at June 30, 2013 and December 31, 2012 are not carried at fair value in their entirety on Merrill Lynch's Condensed Consolidated Balance Sheets.

Short-term Financial Instruments

The carrying value of short-term financial instruments, including cash and cash equivalents, cash and securities segregated for regulatory purposes or deposited with clearing organizations, certain securities financing transactions, customer and broker-dealer receivables and payables, and commercial paper and other short-term borrowings, approximates the fair value of these instruments. These financial instruments generally expose Merrill Lynch to limited credit risk and have no stated maturities or have short-term maturities and carry interest rates that approximate market interest rates.

For purposes of the fair value hierarchy, cash is classified as Level 1. Cash equivalents (including time deposits placed and other short-term investments) and securities segregated for regulatory purposes or deposited with clearing organizations are classified as Level 1 and Level 2. Securities financing transactions are classified as Level 2. Customer receivables and payables are primarily classified as Level 2. Broker-dealer receivables and payables, and commercial paper and other short-term borrowings are classified as Level 2.

Loans, Notes and Mortgages

The fair values for commercial and consumer loans are generally determined by discounting both principal and interest cash flows expected to be collected using a discount rate for similar instruments with adjustments that Merrill Lynch believes a market participant would consider in determining fair value. Merrill Lynch estimates the cash flows expected to be collected using internal credit risk, interest rate and prepayment risk models that incorporate its best estimate of current key assumptions, such as default rates, loss severity and prepayment speeds for the life of the loan. Merrill Lynch elected the fair value option for certain loans and loan commitments. See Note 4 for additional information.

Deposits

The fair value for certain deposits with stated maturities was determined by discounting contractual cash flows using current market rates for instruments with similar maturities. For deposits with no stated maturities, the carrying amount was considered to approximate fair value and does not take into account the significant value of the cost advantage and stability of Merrill Lynch's long-term relationships with depositors.

Long-term Borrowings

Merrill Lynch uses quoted market prices, when available, to estimate the fair value of its long-term borrowings. When quoted market prices are not available, fair value is estimated based on current market interest rates and credit spreads for debt with similar terms and maturities. Merrill Lynch elected the fair value option for certain long-term borrowings, including structured notes. See Note 4 for additional information.

The following table presents the carrying value and fair value, by fair value hierarchy, of Merrill Lynch's loans, notes and mortgages, deposits and long-term borrowings at June 30, 2013. See Note 4 for further information regarding the fair value hierarchy:

(dollars in millions)

	Carrying Value	Fair Value Measurement		
		As of June 30, 2013		
		Level 2	Level 3	Total
Financial assets				
Loans, notes and mortgages ⁽¹⁾	\$ 20,224	\$ 511	\$ 19,606	\$ 20,117
Financial liabilities				
Deposits	11,253	11,253	—	11,253
Long-term borrowings ⁽²⁾	85,370	88,436	1,082	89,518

⁽¹⁾ Loans are presented net of the allowance for loan losses.

⁽²⁾ Includes junior subordinated notes (related to trust preferred securities).

The following table presents the carrying value and fair value of loans, notes and mortgages, deposits and long-term borrowings at December 31, 2012:

(dollars in millions)

	Carrying Value	Fair Value Measurement		
		As of December 31, 2012		
		Level 2	Level 3	Total
Financial assets				
Loans, notes and mortgages ⁽¹⁾	\$ 19,545	\$ 896	\$ 18,721	\$ 19,617
Financial liabilities				
Deposits	12,873	12,873	—	12,873
Long-term borrowings ⁽²⁾	96,058	99,528	1,316	100,844

⁽¹⁾ Loans are presented net of the allowance for loan losses.

⁽²⁾ Includes junior subordinated notes (related to trust preferred securities).

Commercial Unfunded Lending Commitments

The carrying values and fair values of Merrill Lynch's commercial unfunded lending commitments were \$44 million and \$79 million, respectively, at June 30, 2013 and \$60 million and \$104 million, respectively, at December 31, 2012. Commercial unfunded lending commitments, which are included in Other payables - Interest and other on the Condensed Consolidated Balance Sheet, are primarily classified as Level 2 or Level 3.

Fair values were generally determined using a discounted cash flow valuation approach, which is applied using market-based CDS or internally-developed benchmark credit curves. The fair value option was elected for certain loan commitments. See Note 4 for additional information.

Merrill Lynch does not estimate the fair values of consumer unfunded lending commitments because, in many instances, Merrill Lynch can reduce or cancel these commitments by providing notice to the borrower. See Note 14 for additional information on commitments.

Note 6. Derivatives

A derivative is an instrument whose value is derived from an underlying instrument or index, such as interest rates, equity security prices, currencies, commodity prices or credit spreads. Derivatives include futures, forwards, swaps, option contracts, and other financial instruments with similar characteristics. Derivative contracts often involve future commitments to exchange interest payment streams or currencies based on a notional or contractual amount (e.g., interest rate swaps or currency forwards) or to purchase or sell other financial instruments at specified terms on a specified date (e.g., options to buy or sell securities or currencies).

Derivatives Accounting establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts (“embedded derivatives”) and for hedging activities. Derivatives Accounting requires that an entity recognize all derivatives as either assets or liabilities and measure those instruments at fair value. The fair value of all derivatives and associated cash collateral is recorded on a net-by-counterparty basis on the Condensed Consolidated Balance Sheets where Merrill Lynch believes a legal right of offset exists under an enforceable netting agreement. All derivatives, including bifurcated embedded derivatives within structured notes, are reported on the Condensed Consolidated Balance Sheets as trading assets and liabilities.

The accounting for changes in fair value of a derivative instrument depends on its intended use and if it is designated and qualifies as an accounting hedging instrument under Derivatives Accounting.

Trading derivatives

Merrill Lynch enters into derivatives to facilitate client transactions, for trading and financing purposes, and to manage risk exposures arising from trading assets and liabilities. Changes in fair value for these derivatives are reported in current period earnings as principal transactions revenues.

Derivatives that contain a significant financing element

Merrill Lynch may enter into certain transactions that are documented as derivatives where a significant cash investment is made by one party. Certain derivative instruments that contain a significant financing element at inception and where Merrill Lynch is deemed to be the borrower are included in financing activities in the Condensed Consolidated Statements of Cash Flows. The cash flows from all other derivative transactions that do not contain a significant financing element at inception are included in operating activities.

Non-trading derivatives

Merrill Lynch also enters into derivatives in order to manage risk exposures arising from assets and liabilities not carried at fair value as follows:

1. Merrill Lynch's debt was issued in a variety of maturities and currencies to achieve the lowest cost financing possible. Merrill Lynch enters into derivative transactions to hedge these liabilities. Derivatives used most frequently include swap agreements that:
 - Convert fixed-rate interest payments into variable-rate interest payments;
 - Change the underlying interest rate basis or reset frequency; and
 - Change the settlement currency of a debt instrument.

Changes in the fair value of these interest rate and foreign currency derivatives are reported in interest expense or other revenues.

2. Merrill Lynch uses foreign-exchange forward contracts, foreign-exchange options, and currency swaps to hedge its net investments in foreign operations, as well as other foreign currency exposures (e.g., non-U.S. dollar

denominated debt and expenses). These instruments are used to mitigate the impact of changes in exchange rates. Changes in the fair value of these instruments are reported in OCI and other revenues when net investment hedge accounting is applied; otherwise changes in fair value are reported in other revenues.

3. Merrill Lynch enters into futures, swaps, options and forward contracts to manage the price risk of certain commodity inventory and forecasted commodity purchases and sales. Changes in fair value of these derivatives are reported in principal transactions revenues, unless cash flow hedge accounting is applied.
4. Merrill Lynch enters into CDS to manage the credit risk on certain loans that are not part of trading activities. Changes in the fair value of these derivatives are reported in other revenues.

Certain derivatives, primarily entered into with an affiliate, qualify as accounting hedges under Derivatives Accounting. These derivatives are designated as one of the following:

1. A hedge of the fair value of a recognized asset or liability (“fair value hedge”). Changes in the fair value of derivatives that are designated and qualify as fair value hedges of interest rate risk, foreign exchange risk and commodity price risk, along with the gain or loss on the hedged asset or liability that is attributable to the hedged risk, are recorded in current period earnings as interest expense, other revenues, or principal transactions.
2. A hedge of the variability of cash flows to be received or paid related to a recognized asset, liability or forecasted transaction (“cash flow hedge”). Changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recorded in OCI until earnings are affected by the variability of cash flows of the hedged asset or liability or when the forecasted purchase or sale occurs. All cash flow hedges were de-designated in 2011. The amount remaining in OCI that is expected to be reclassified into earnings in the next 12 months is not material.
3. A hedge of a net investment in a foreign operation (“net investment hedge”). Changes in the fair value of derivatives that are designated and qualify as hedges of a net investment in a foreign operation are recorded in the foreign currency translation adjustment account within OCI. Changes in the fair value of the hedging instruments that are associated with the difference between the spot rate and the contracted forward rate are recorded in current period earnings in other revenues.

Merrill Lynch formally assesses, both at the inception of the hedge and on an ongoing basis, whether the hedging derivatives are highly effective in offsetting changes in fair value or cash flows of hedged items. Merrill Lynch uses regression analysis at the hedge's inception and for each reporting period thereafter to assess whether the derivative used in its hedging transaction is expected to be and has been highly effective in offsetting changes in the fair value or cash flows of the hedged item. When it is determined that a derivative is not highly effective as a hedge, Merrill Lynch discontinues hedge accounting.

Hedge accounting activity for the three and six months ended June 30, 2013 and June 30, 2012 included the following:

Fair value hedges

The table below summarizes certain information related to fair value hedges for the three and six months ended June 30, 2013 and June 30, 2012, including hedges of interest rate risk on long-term borrowings that were adjusted and redesignated as part of Bank of America's acquisition of Merrill Lynch. At redesignation, the fair value of the derivatives was negative. As the derivatives mature, their fair value will approach zero. As a result, ineffectiveness may occur and the fair value changes in the derivatives and the long-term borrowings being hedged may be directionally the same in certain scenarios. Based on a regression analysis, the derivatives continue to be highly effective at offsetting changes in the fair value of the long-term borrowings attributable to interest rate risk.

in an asset position	23,655			5,140		
in a liability position	5,603			19,391		

⁽¹⁾ Amounts are recorded in other revenues and are attributable to certain legal entity liquidations.

Other Risk Management Derivatives

Other risk management derivatives are used by Merrill Lynch to reduce certain risk exposures. These derivatives are not qualifying accounting hedges because either they did not qualify for, or were not designated as, accounting hedges. The table below presents net gains (losses) on these derivatives for the three and six months ended June 30, 2013 and June 30, 2012. These net gains (losses) are largely offset by the income or expense that is recorded on the hedged item.

Net gains (losses) on other risk management derivatives

(dollars in millions)

	2013 ⁽¹⁾	2012 ⁽¹⁾
For the three months ended June 30:		
Interest rate risk	\$ (33)	\$ 17
Foreign currency risk	47	(703)
Credit risk	(8)	18
For the six months ended June 30:		
Interest rate risk	(41)	11
Foreign currency risk	(468)	(504)
Credit risk	1	(31)

⁽¹⁾ Amounts are recorded in other revenues and interest expense.

Interest rate risk primarily relates to derivatives used to economically hedge long-term borrowings. Foreign currency risk primarily relates to economic hedges of foreign currency denominated transactions that generate earnings upon remeasurement in accordance with ASC 830-20, *Foreign Currency Transactions* ("Foreign Currency Transactions"). As both the remeasurement of the foreign currency risk on the transaction and the changes in fair

value of the derivative are recorded in earnings, hedge accounting is not applied. Credit risk relates to credit default swaps used to economically manage the credit risk on certain loans not included in trading activities.

Derivative balances by primary risk

Derivative instruments contain numerous market risks. In particular, most derivatives have interest rate risk, as they contain an element of financing risk that is affected by changes in interest rates. Additionally, derivatives expose Merrill Lynch to counterparty credit risk, although this is generally mitigated by collateral margining and netting arrangements. For disclosure purposes below, the primary risk of a derivative is largely determined by the business that is engaging in the derivative activity. For instance, a derivative that is initiated by an equities derivative business will generally have equity price risk as its primary underlying market risk and is classified as such for the purposes of this disclosure, despite the fact that there may be other market risks that affect the value of the instrument.

The following tables identify the primary risk for derivative instruments, which includes trading, non-trading and bifurcated embedded derivatives, at June 30, 2013 and December 31, 2012. The primary risk is provided on a gross basis, prior to the application of the impact of counterparty and cash collateral netting.

(dollars in millions)

Offsetting of Derivatives

Merrill Lynch enters into International Swaps and Derivatives Association, Inc. (“ISDA”) master netting agreements or similar agreements with substantially all of its derivative counterparties. These legally enforceable master netting agreements give Merrill Lynch, in the event of default by the counterparty, the right to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. For purposes of the Condensed Consolidated Balance Sheet, Merrill Lynch offsets derivative assets and liabilities and cash collateral held with the same counterparty where it has such a legally enforceable master netting agreement.

The following table presents derivative instruments included in derivative assets and liabilities on Merrill Lynch's Condensed Consolidated Balance Sheets at June 30, 2013 and December 31, 2012 by primary risk (e.g., interest rate risk) and the platform, where applicable, on which these derivatives are transacted. Exchange-traded derivatives include listed options transacted on an exchange. Over-the-counter derivatives include bilateral transactions between Merrill Lynch and a particular counterparty. Over-the-counter cleared derivatives include bilateral transactions between Merrill Lynch and a counterparty where the transaction is cleared through a clearinghouse.

[Table of Contents](#)

Balances are presented on a gross basis, prior to the application of counterparty and cash collateral netting. Total gross derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements and have been reduced by the cash collateral received or paid.

Other gross derivative assets and liabilities in the table represents derivatives entered into under master netting agreements where uncertainty exists as to the enforceability of these agreements under bankruptcy laws in some countries or industries and accordingly, receivables and payables with counterparties in these countries or industries are reported on a gross basis.

Also included in the table is financial instrument collateral related to legally enforceable master netting agreements that represents securities collateral received or pledged and customer cash collateral held at third-party custodians. These amounts are not offset on the Condensed Consolidated Balance Sheets but are shown as a reduction to total derivative assets and liabilities in the table to derive net derivative assets or liabilities.

For information on the offsetting of securities financing agreements, see Note 7.

Trading revenues

Merrill Lynch enters into trading derivatives and non-derivative cash instruments to facilitate client transactions, for trading and financing purposes, and to manage risk exposures arising from trading assets and liabilities. The resulting risk from derivatives and non-derivative cash instruments is managed on a portfolio basis as part of Merrill Lynch's sales and trading activities and the related revenue is recorded on different income statement line items, including principal transactions, commissions, other revenues and net interest expense.

Sales and trading revenue includes changes in fair value and realized gains and losses on the sales of trading and other assets, which are included in principal transactions and other revenues, net interest expense, and commissions. Initial trading related revenue is generated by the difference in the client price for an instrument and the price at which the trading desk can execute the trade in the dealer market. That revenue is included within principal transactions on the Condensed Consolidated Statements of Earnings (Loss). For equity securities, commissions related to purchases and sales are recorded in commissions on the Condensed Consolidated Statements of Earnings (Loss). Changes in the fair value of these equity securities are included in principal transactions. These amounts are reflected in equity risk in the tables below. Revenue for debt securities, with the exception of interest, is typically included in principal transactions. Unlike commissions for equity securities, the initial revenue related to broker-dealer services for debt securities is included in the pricing of the instrument rather than charged through separate fee agreements. Therefore, this revenue is recorded in principal transactions as part of the initial mark to fair value. In transactions where Merrill Lynch acts as an agent, fees are earned and recorded in commissions. In the tables below, most government debt securities are reflected in interest rate risk. All other government debt securities (including, for example, municipal bonds and emerging markets government debt) and corporate debt securities are included in credit risk.

For derivatives, revenue is typically included in principal transactions. Similar to debt securities, the initial revenue related to dealer services is included in the initial pricing of the instrument rather than charged through separate fee agreements. Therefore, this revenue is recorded in principal transactions as part of the initial mark to fair value. In transactions where Merrill Lynch acts as agent, which includes exchange traded futures and options, fees are earned and recorded in commissions. Derivatives are included in the tables below based on their predominant risk (e.g., credit default swaps are included in credit risk).

Certain instruments, primarily available-for-sale securities and loans, are not considered trading assets or liabilities. Gains/losses on sales and changes in fair value of these instruments, where applicable (e.g., the fair value option has been elected), are recorded in other revenues. These instruments are typically reflected in credit risk.

Interest revenue for debt securities and loans is included in net interest expense.

The following tables identify the amounts in the income statement line items attributable to trading and non-trading activities, including both derivatives and non-derivative cash instruments categorized by primary risk for the three and six months ended June 30, 2013 and June 30, 2012.

Non-trading related amounts include activities in connection with principal investment, wealth management, and certain lending activities; economic hedging activity discussed in the *Non-trading derivatives* section above; and the impact of changes in Merrill Lynch's own creditworthiness on borrowings accounted for at fair value.

(1) Includes other income and other-than-temporary impairment losses on available-for-sale debt securities.

Credit Derivatives

Credit derivatives derive value based on an underlying third party referenced obligation or a portfolio of referenced obligations. Merrill Lynch is both a seller and a buyer of credit protection. A seller of credit protection is required to make payments to a buyer upon the occurrence of a predefined credit event. Such credit events generally include bankruptcy of the referenced credit entity and failure to pay under their credit obligations, as well as acceleration of indebtedness and payment repudiation or moratorium. For credit derivatives based on a portfolio of referenced credits or credit indices, Merrill Lynch as a seller of credit protection may not be required to make payment until a specified amount of loss has occurred and/or may only be required to make payment up to a specified amount.

Credit derivatives where Merrill Lynch is the seller of credit protection are summarized below:

(dollars in millions)

	Maximum Payout/ Notional	Less than 1 year	1 – 3 years	3 – 5 years	Over 5 years	Carrying Value ⁽¹⁾
At June 30, 2013:

⁽¹⁾ Derivative contracts are shown on a gross basis prior to counterparty or cash collateral netting.

⁽²⁾ Refers to the creditworthiness of the underlying reference obligations.

For most credit derivatives, the notional value represents the maximum amount payable by Merrill Lynch as a seller of credit protection. However, Merrill Lynch does not exclusively monitor its exposure to credit derivatives based on notional value. Instead, a risk framework is used to define risk tolerances and establish limits to help to ensure that certain credit risk-related losses occur within acceptable, predefined limits. Merrill Lynch discloses internal categorizations (i.e., investment grade, non-investment grade) consistent with how risk is managed to evaluate the payment status of its freestanding credit derivative instruments.

Merrill Lynch economically hedges its exposure to credit derivatives by entering into a variety of offsetting derivative contracts and security positions. For example, in certain instances, Merrill Lynch purchases credit protection with identical underlying referenced names to offset its exposure. At June 30, 2013 and December 31, 2012, the notional value and carrying value of credit protection purchased and credit protection sold by Merrill Lynch with identical underlying referenced names was:

(dollars in millions)

	Maximum Payout/ Notional	Less than 1 year	1 – 3 years	3 – 5 years	Over 5 years	Carrying Value ⁽¹⁾
At June 30, 2013:						
Credit derivatives purchased	\$ 129,273	\$ 25,347	\$ 36,754	\$ 50,195	\$ 16,977	\$ 3,826

⁽¹⁾ Derivative contracts are shown on a gross basis prior to counterparty or cash collateral netting.

Credit related notes

Credit related notes in the table above include investments in securities issued by CDO, CLO and credit linked note vehicles. These instruments are classified as trading securities. Most of the entities that issue these instruments have either the ability to enter into, or have entered into, credit derivatives.

The carrying value of these instruments equals Merrill Lynch's maximum exposure to loss. Merrill Lynch is not obligated to make any payments to the entities under the terms of the securities owned. Merrill Lynch discloses internal categorizations (i.e., investment grade, non-investment grade) consistent with how risk is managed for these instruments.

Credit risk management of derivatives

Merrill Lynch defines counterparty credit risk as the potential for loss that can occur as a result of an individual, counterparty, or issuer being unable to honor its contractual obligations. Merrill Lynch mitigates its credit risk to counterparties through a variety of techniques, including, where appropriate, the right to require initial collateral or margin, the right to terminate transactions or to obtain collateral should unfavorable events occur, the right to call for collateral when certain exposure thresholds are exceeded, the right to call for third party guarantees, and the purchase of credit default protection.

Merrill Lynch enters into ISDA master netting agreements or similar agreements with substantially all of its derivative counterparties. Netting agreements are generally negotiated bilaterally and can require complex terms. While Merrill Lynch makes reasonable efforts to execute such agreements, it is possible that a counterparty may be unwilling to sign such an agreement and, as a result, would subject Merrill Lynch to additional credit risk.

At June 30, 2013 and December 31, 2012, cash collateral received of \$26.1 billion and \$28.0 billion, respectively, and cash collateral paid of \$26.2 billion and \$32.1 billion, respectively, was netted against derivative assets and liabilities.

Monoline derivative credit exposure at June 30, 2013 had a notional value of \$11.2 billion compared with \$12.1 billion at December 31, 2012. The fair value of the monoline derivative credit exposure was \$0.4 billion at June 30, 2013 compared with \$0.9 billion at December 31, 2012. At June 30, 2013, the CVA related to monoline derivative trading instruments exposure was \$44 million compared with \$117 million at December 31, 2012, which reduced Merrill Lynch's net exposure to \$332 million at June 30, 2013. Monoline related activity for the three and six months ended June 30, 2013 resulted in gains of \$18 million and \$57 million, respectively, which primarily consisted of CVA changes.

Bank of America has guaranteed the performance of Merrill Lynch on certain derivative transactions. The aggregate amount of such derivative liabilities was approximately \$1.3 billion at June 30, 2013.

In addition, at December 31, 2012, Merrill Lynch had \$1.3 billion of net monoline exposure with MBIA, Inc. and certain of its affiliates (“MBIA”), which was included within Interest and other receivables. These contracts were not considered to be derivative trading instruments because of the inherent default risk and they did not provide a hedge benefit. During the three months ended March 31, 2013, Merrill Lynch recorded a charge of \$450 million to write down its receivable from MBIA, which was recorded as a reduction to Other revenues in that period.

On May 7, 2013, Bank of America entered into a comprehensive settlement (the “MBIA Settlement”) with MBIA to resolve all outstanding litigation between the parties, as well as other claims between the parties. Under the MBIA Settlement, all pending litigation between the parties was dismissed and each party received a global release of those claims. In connection with the MBIA Settlement, the parties also terminated various CDS transactions in connection with CMBS. Collectively, those CDS transactions had a notional value of \$7.4 billion and a fair value of \$813 million as of March 31, 2013, and, in connection with the MBIA Settlement, MBIA terminated its CDS with Merrill Lynch, and Bank of America paid Merrill Lynch the value of such terminated CDS.

Credit-risk related contingent features

Most of Merrill Lynch's derivative contracts contain credit-risk related contingent features, primarily in the form of ISDA master netting agreements and credit support documentation that enhance the creditworthiness of these instruments compared to other obligations of the respective counterparty with whom Merrill Lynch has transacted. These contingent features may be for the benefit of Merrill Lynch as well as its counterparties with respect to changes in Merrill Lynch's creditworthiness and the exposure under the derivative transactions. At June 30, 2013 and December 31, 2012, Merrill Lynch held cash and securities collateral of \$37.0 billion and \$38.2 billion and posted cash and securities collateral of \$31.2 billion and \$38.3 billion in the normal course of business under derivative agreements.

In connection with certain OTC derivative contracts and other trading agreements, Merrill Lynch can be required to provide additional collateral or to terminate transactions with certain counterparties in the event of a downgrade of the senior debt ratings of ML & Co. or certain subsidiaries. The amount of additional collateral required depends on the contract and is usually a fixed incremental amount and/or market value of the exposure.

At June 30, 2013, the amount of collateral, calculated based on the terms of the contracts that Merrill Lynch could be required to post to counterparties but had not yet posted to counterparties, was approximately \$0.8 billion.

Some counterparties are currently able to unilaterally terminate certain contracts, or Merrill Lynch may be required to take other action such as find a suitable replacement or obtain a guarantee. At June 30, 2013, the current liability for these derivative contracts was \$0.2 billion, against which Merrill Lynch had posted \$0.2 billion of collateral.

At June 30, 2013, if the rating agencies had downgraded their long-term senior debt ratings for ML & Co. or certain subsidiaries by one incremental notch, the amount of additional collateral contractually required by derivative contracts and other trading agreements would have been approximately \$0.4 billion. If the rating agencies had downgraded their long-term senior debt ratings for ML & Co. or certain subsidiaries by a second incremental notch, approximately \$4.1 billion in additional incremental collateral would have been required.

Also, if the rating agencies had downgraded their long-term senior debt ratings for ML & Co. or certain subsidiaries by one incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of June 30, 2013 was \$1.2 billion, against which \$0.7 billion of collateral had been posted. Further, if the rating agencies had downgraded their long-term debt ratings for ML & Co. or certain subsidiaries by a second incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of June 30, 2013 was an incremental \$1.0 billion, against which \$0.6 billion of collateral had been posted.

Valuation Adjustments on Derivatives

Merrill Lynch records credit risk valuation adjustments on derivatives in order to properly reflect the credit quality of the counterparties and its own credit quality on the value of the derivatives. Merrill Lynch calculates valuation adjustments on derivatives based on a modeled expected exposure that incorporates current market risk factors. The exposure also takes into consideration credit mitigants such as legally enforceable master netting arrangements and collateral. CDS spread data is used to estimate the default probabilities and severities that are applied to the exposures. Where no observable credit default data is available for counterparties, Merrill Lynch uses proxies and other market data to estimate default probabilities and severity.

Valuation adjustments on derivatives are affected by changes in market spreads, non-credit related market factors such as interest rate and currency changes that affect the expected exposure, and other factors such as changes in collateral arrangements and partial payments. Credit spreads and non-credit factors can move independently; for example, for an interest rate swap, changes in interest rates may increase the expected exposure, which would increase CVA. Independently, counterparty credit spreads may tighten, which would result in an offsetting decrease to CVA.

Merrill Lynch may enter into risk management activities to offset market driven exposures. Merrill Lynch often hedges the counterparty spread risk in CVA with CDS and often hedges the other market risks in both CVA and DVA primarily with currency and interest rate swaps. Since the components of the valuation adjustments on derivatives move independently and Merrill Lynch may not hedge all of the market driven exposures, the effect of a hedge may increase the gross valuation adjustments on derivatives or may result in a gross positive valuation adjustment on derivatives becoming a negative adjustment (or the reverse).

In early 2013, Merrill Lynch refined its methodology for calculating CVA and DVA, on a prospective basis, to adjust the way it values mutual termination clauses in derivatives contracts and to more fully incorporate the potential for the counterparties to default prior to a change in their credit ratings. This change in estimates increased both CVA and DVA by approximately \$206 million for the quarter ended March 31, 2013. The resulting net earnings impact was not material. The net CVA and DVA excluding the impact of these refinements was a gain of \$195 million and a gain of \$3 million, respectively, for the six months ended June 30, 2013.

The Valuation Adjustments on Derivatives table below presents CVA gains (losses) and DVA gains (losses) for Merrill Lynch on a gross and net of hedges basis, which are recorded in principal transactions revenues.

Valuation Adjustments on Derivatives

<i>(dollars in millions)</i>	Three Months Ended June 30				Six Months Ended June 30			
	2013		2012		2013		2012	
	Gross	Net	Gross	Net	Gross	Net	Gross	Net
Derivative assets (CVA) ⁽¹⁾	\$ 53	\$ 91	\$ (100)	\$ (52)	\$ (23)	\$ (11)	\$ 149	\$ 173
Derivative liabilities (DVA) ⁽²⁾	101	80	19	(73)	225	209	(606)	(770)

⁽¹⁾ At June 30, 2013 and December 31, 2012, the cumulative counterparty credit risk valuation adjustment reduced the derivative assets balance by \$1.2 billion and \$1.1 billion, respectively.

⁽²⁾ At June 30, 2013 and December 31, 2012, Merrill Lynch's cumulative DVA reduced the derivative liabilities balance by \$0.6 billion and \$0.4 billion, respectively.

Note 7. Securities Financing Transactions

Merrill Lynch enters into secured borrowing and lending transactions in order to meet customers' needs and earn residual interest rate spreads, obtain securities for settlement and finance trading inventory positions.

Under these transactions, Merrill Lynch either receives or provides collateral, including U.S. Government and agency securities, asset-backed, corporate debt, equity, and non-U.S. government and agency securities. Merrill Lynch receives collateral in connection with resale agreements, securities borrowed transactions, customer margin loans and other loans. Under most agreements, Merrill Lynch is permitted to sell or repledge the securities received (e.g., use the securities to secure repurchase agreements, enter into securities lending transactions, or deliver to counterparties to cover short positions). At June 30, 2013 and December 31, 2012, the fair value of securities received as collateral where Merrill Lynch is permitted to sell or repledge the securities was \$512 billion and \$500 billion, respectively, and the fair value of the portion that had been sold or repledged was \$404 billion and \$405 billion, respectively. Merrill Lynch may use securities received as collateral for resale agreements to satisfy regulatory requirements such as Rule 15c3-3 of the Securities Exchange Act of 1934.

Merrill Lynch pledges assets to collateralize repurchase agreements and other secured financings. Pledged securities that can be sold or repledged by the secured party are parenthetically disclosed in trading assets on the Condensed Consolidated Balance Sheets. The carrying value and classification of securities owned by Merrill Lynch that have been pledged to counterparties where those counterparties do not have the right to sell or repledge at June 30, 2013 and December 31, 2012 are as follows:

(dollars in millions)

	June 30, 2013	December 31, 2012
Trading asset category		
Equities and convertible debentures	\$ 13,234	\$ 11,732
Corporate debt and preferred stock	5,358	8,368
U.S. Government and agencies	9,531	41,236
Non-U.S. governments and agencies	2,164	1,707
Mortgages, mortgage-backed, and asset-backed securities	1,813	4,547
Municipals and money markets	282	2,469
Total	<u>\$ 32,382</u>	<u>\$ 70,059</u>

In certain cases, Merrill Lynch has transferred assets to consolidated VIEs where those restricted assets serve as collateral for the interests issued by the VIEs. These assets, which are not included in the table above, are disclosed on the Condensed Consolidated Balance Sheet as Assets of Consolidated VIEs. These transactions are also described in Note 9.

Generally, when Merrill Lynch transfers financial instruments that are not recorded as sales (i.e., secured borrowing transactions), the liability is recorded as either payables under repurchase agreements or payables under securities loaned transactions; however, in instances where Merrill Lynch transfers financial assets to a consolidated VIE, the liabilities of the consolidated VIE will be reflected in long or short-term borrowings (see Note 9). In either case, at the time of transfer, the related liability is equal to the cash received in the transaction. In most cases the lenders in secured borrowing transactions have full recourse to Merrill Lynch (i.e., recourse beyond the assets pledged).

Offsetting of Securities Financing Agreements

A significant majority of repurchase and resale activities are transacted under legally enforceable master repurchase agreements that give Merrill Lynch, in the event of default by the counterparty, the right to liquidate securities held and to offset receivables and payables with the same counterparty. Merrill Lynch offsets repurchase and resale transactions with the same counterparty on Merrill Lynch's Condensed Consolidated Balance Sheet where it has such a legally enforceable master netting agreement and the transactions have the same maturity date.

Substantially all securities borrowing and lending activities are transacted under legally enforceable master securities lending agreements that give Merrill Lynch, in the event of default by the counterparty, the right to liquidate securities held and to offset receivables and payables with the same counterparty. In certain instances, Merrill Lynch offsets securities borrowing and lending transactions with the same counterparty on Merrill Lynch's Condensed Consolidated Balance Sheet where it has such a legally enforceable master netting agreement and the transactions have the same maturity date.

The tables below present securities financing agreements included on Merrill Lynch's Condensed Consolidated Balance Sheet at June 30, 2013 and December 31, 2012. Balances are presented on a gross basis, prior to the application of counterparty netting. Gross assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements. For information on the offsetting of derivatives, see Note 6.

The "Other" amount in the tables below relates to transactions where Merrill Lynch acts as the lender in a securities lending agreement and receives securities that can be pledged or sold as collateral. In these transactions, Merrill Lynch recognizes an asset on the Condensed Consolidated Balance Sheet at fair value, representing the securities received, and a liability for the same amount, representing the obligation to return those securities. The "Other" amount is included on Merrill Lynch's Condensed Consolidated Balance Sheet in securities received as collateral, at fair value and obligation to return securities received as collateral, at fair value.

The column entitled "Financial Instruments" in the tables below includes securities collateral received or pledged under repurchase or securities lending agreements where there is a legally enforceable master netting agreement. These amounts are not offset in the Condensed Consolidated Balance Sheet but are shown as a reduction to the net balance sheet amount in the table to derive a net asset or liability. Securities collateral received or pledged where the legal enforceability of the master netting agreements is not certain is not included.

Gross assets and liabilities include activity where uncertainty exists as to the enforceability of certain master netting agreements under bankruptcy laws in some countries or industries and, accordingly, are reported on a gross basis.

Offsetting of Securities Financing Agreements

Note 8. Investment Securities

Investment securities on the Condensed Consolidated Balance Sheets include:

- Investments within the scope of Investment Accounting that are held by ML & Co. and certain of its non-broker-dealer subsidiaries consist of debt securities, which are classified as available-for-sale or as other debt securities carried at fair value, and are used for investment, liquidity management, and/or collateral management purposes.
- Non-qualifying investments are those that are not within the scope of Investment Accounting and consist principally of equity investments, including investments in partnerships and joint ventures. Included in non-qualifying investments are investments accounted for under the equity method of accounting, which consist of investments in (i) partnerships and certain limited liability corporations where Merrill Lynch has more than a minor influence (generally defined as three to five percent interest) and (ii) corporate entities where Merrill Lynch has the ability to exercise significant influence over the investee (generally defined as ownership and voting interest of 20% to 50%). Also included in non-qualifying investments are private equity investments that Merrill Lynch holds for capital appreciation and/or current income and which are accounted for at fair value in accordance with the Investment Company Guide, as well as private equity investments accounted for at fair value under the fair value option election.

Investment securities reported on the Condensed Consolidated Balance Sheets at June 30, 2013 and December 31, 2012 are presented below.

(dollars in millions)

	June 30, 2013	December 31, 2012
Investment securities		
Available-for-sale	\$ 612	\$ 656
Other debt securities carried at fair value ⁽¹⁾	8,748	7,722
Non-qualifying		
Equity investments	1,789	2,627
Other investments	2,928	2,620
Total	\$ 14,077	\$ 13,625

⁽¹⁾ During the six months ended June 30, 2013, certain assets that are used for liquidity management purposes were reclassified from Trading assets to Other debt securities carried at fair value. Prior period amounts have also been reclassified to conform with the current period presentation.

For both the three and six months ended June 30, 2013, there were no other-than-temporary impairment ("OTTI") losses related to non-agency mortgage-backed available-for-sale securities. For the three and six months ended June 30, 2012, OTTI losses related to non-agency mortgage-backed available-for-sale securities were \$4 million and \$6 million, respectively. Net impairment losses recognized in earnings represent the credit component of OTTI losses on available-for-sale debt securities and total OTTI losses for available-for-sale debt securities that Merrill Lynch does not intend to hold to recovery. Those amounts were \$0 million for both the three and six months ended June 30, 2013 and \$4 million and \$6 million for the three and six months ended June 30, 2012, respectively. See Note 1 for Merrill Lynch's accounting policy regarding OTTI of investment securities.

Information regarding investment securities subject to Investment Accounting follows.

(dollars in millions)

	June 30, 2013	
	Amortized Cost	Fair Value
Available-for-Sale		
Securities, mortgage-backed and asset-backed:		
Corporate ABS	\$ 209	\$ 209
Non-agency mortgage backed securities	1	1
Subtotal	210	210
U.S. Government and agencies	402	402
Total available-for-sale securities	\$ 612	\$ 612

(dollars in millions)

	December 31, 2012	
	Amortized Cost	Fair Value
Available-for-Sale		
Securities, mortgage-backed and asset-backed:		
Corporate ABS	\$ 226	\$ 226
Non-agency mortgage backed securities	40	40
Subtotal	266	266
U.S. Government and agencies	390	390
Total available-for-sale securities	\$ 656	\$ 656

There were no material gross unrealized gains or losses associated with available-for-sale securities as of June 30, 2013 or December 31, 2012. Additionally, there were no individual securities that had been in a continuous unrealized loss position for a year or more as of June 30, 2013 or December 31, 2012.

The amortized cost and fair value of available-for-sale debt securities by expected maturity for mortgage-backed securities and contractual maturity for other debt securities at June 30, 2013 are as follows:

	Available-for-Sale	
	Amortized Cost	Fair Value
Due in one year or less	\$ 410	\$ 410
Due after one year through five years	2	2
Due after five years through ten years	200	200
Total ⁽¹⁾	<u>\$ 612</u>	<u>\$ 612</u>

(1) Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay their obligations with or without prepayment penalties.

The proceeds and gross realized gains (losses) from the sale of available-for-sale securities were not material during the three or six months ended June 30, 2013 and June 30, 2012.

Equity Method Investments

At June 30, 2013 and December 31, 2012, Merrill Lynch held certain investments that were accounted for under the equity method of accounting, none of which were individually material.

Note 9. Securitizations and Other Variable Interest Entities (“VIEs”)

Merrill Lynch utilizes VIEs in the ordinary course of business to support its own and its customers' financing and investing needs. Merrill Lynch securitizes loans and debt securities using VIEs as a source of funding and as a means of transferring the economic risk of the loans or debt securities to third parties. The assets are transferred into a trust or other securitization vehicle such that the assets are legally isolated from the creditors of Merrill Lynch and are not available to satisfy its obligations. These assets can only be used to settle obligations of the trust or other securitization vehicle. Merrill Lynch also administers, structures or invests in other VIEs including municipal bond trusts, CDOs and other entities as described in more detail below.

The entity that has a controlling financial interest in a VIE is referred to as the primary beneficiary and consolidates the VIE. Merrill Lynch is deemed to have a controlling financial interest and is the primary beneficiary of a VIE if it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and an obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

The tables below present the assets and liabilities of consolidated and unconsolidated VIEs if Merrill Lynch has continuing involvement with transferred assets or if Merrill Lynch otherwise has a variable interest in the VIE. For consolidated VIEs, these amounts are net of intercompany balances. The tables also present Merrill Lynch's maximum loss exposure resulting from its involvement with consolidated VIEs and unconsolidated VIEs in which Merrill Lynch holds a variable interest as of June 30, 2013 and December 31, 2012. Merrill Lynch's maximum loss exposure is based on the unlikely event that all of the assets in the VIEs become worthless and incorporates not only potential losses associated with assets recorded on Merrill Lynch's Condensed Consolidated Balance Sheet but also potential losses associated with off-balance sheet commitments such as unfunded liquidity commitments and other contractual arrangements. Merrill Lynch's maximum loss exposure does not include losses previously recognized.

Merrill Lynch invests in ABS issued by third party VIEs with which it has no other form of involvement. These securities are described in more detail in Note 7. In addition, Merrill Lynch uses VIEs such as trust preferred securities trusts in connection with its funding activities (see Note 12).

Except as described below, Merrill Lynch has not provided financial support to consolidated or unconsolidated VIEs that it was not contractually required to provide, nor does it intend to do so.

Loan VIEs

Merrill Lynch securitizes mortgage loans that it originates or purchases from third parties. In certain circumstances, Merrill Lynch has continuing involvement with the securitized loans as servicer of the loans. Merrill Lynch may also retain beneficial interests in the securitization vehicles including senior and subordinated securities, and the equity tranche. Except as described below, Merrill Lynch does not provide guarantees to the securitization vehicles and investors do not have recourse to Merrill Lynch other than through standard representations and warranties.

The following table summarizes certain information related to Loan VIEs in which Merrill Lynch is either the transferor, servicer or sponsor and holds a variable interest as of June 30, 2013 and December 31, 2012.

(dollars in millions)

	Non-Agency					
	Prime		Subprime		Commercial Mortgage	
	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012	June 30, 2013	December 31, 2012
Unconsolidated VIEs:						
Maximum loss exposure⁽¹⁾	\$ 5	\$ 20	\$ 67	\$ 55	\$ 78	\$ 102
Senior securities held						
Trading assets	\$ —	\$ 11	\$ 12	\$ 4	\$ 5	\$ 5
Investment securities	—	1	—	—	—	—
Subordinated securities held						
Trading assets	—	—	12	3	2	2
Residual interests held	5	8	—	4	36	38
Total retained securities⁽²⁾	\$ 5	\$ 20	\$ 24	\$ 11	\$ 43	\$ 45
Principal balance outstanding⁽³⁾	\$ 305	\$ 457	\$ 5,368	\$ 6,455	\$ 19,195	\$ 17,258
Consolidated VIEs:						
Maximum loss exposure⁽¹⁾	\$ —	\$ —	\$ —	\$ 9	\$ —	\$ —
Loans, notes and mortgages	—	—	—	185	—	—
Other assets	—	—	—	12	—	—
Total assets	\$ —	\$ —	\$ —	\$ 197	\$ —	\$ —
Long-term borrowings	\$ —	\$ —	\$ —	\$ 188	\$ —	\$ —
Total liabilities	\$ —	\$ —	\$ —	\$ 188	\$ —	\$ —

⁽¹⁾ Maximum loss exposure excludes liabilities for representations and warranties.

⁽²⁾ Substantially all of the securities were in Level 2 in the fair value hierarchy.

⁽³⁾ *Principal balance outstanding includes those loans that Merrill Lynch transferred and with which it has continuing involvement.*

In accordance with consolidation guidance, Merrill Lynch consolidates Loan VIEs in which it has a controlling financial interest. For loan securitizations, Merrill Lynch is considered to have a controlling financial interest (i.e., is the primary beneficiary) when it is the servicer of the loans and also holds a financial interest that could potentially be significant to the entity. If Merrill Lynch is not the servicer of an entity or does not hold a financial interest that could be significant to the entity, Merrill Lynch does not have a controlling financial interest and does not consolidate the entity. Merrill Lynch did not have a controlling financial interest in Loan VIEs at June 30, 2013.

Merrill Lynch sells mortgage loans to VIEs with various representations and warranties related to, among other things, the ownership of the loan, validity of the lien securing the loan, absence of delinquent taxes or liens against the property securing the loan, the process used in selecting the loans for inclusion in a transaction, the loan's compliance with any applicable loan criteria established by the buyer, and the loan's compliance with applicable local, state and federal laws. Under these representations and warranties, Merrill Lynch may be required to repurchase mortgage loans with the identified defects or indemnify or provide other recourse to the investor or insurer. In such cases, Merrill Lynch bears any subsequent credit loss on the mortgage loans. Merrill Lynch's representations and warranties are generally not subject to stated limits and extend over the life of the loans. See Note 14.

Municipal Bond Securitizations

Merrill Lynch sponsors municipal bond trusts that hold highly-rated, long-term, fixed-rate municipal bonds, some of which are callable prior to maturity. The trusts obtain financing by issuing floating-rate trust certificates that reprice on a frequent basis to third party investors. Merrill Lynch may transfer assets into the trusts and may also serve as remarketing agent and/or liquidity provider for the trusts. The floating-rate investors have the right to tender the certificates at specified dates. Should Merrill Lynch be unable to remarket the tendered certificates, it may be obligated to purchase them at par under standby liquidity facilities.

Merrill Lynch also provides default protection or credit enhancement to investors in certain municipal bond trusts whereby Merrill Lynch guarantees the payment of interest and principal on floating-rate certificates issued by these trusts in the event of default by the issuer of the underlying municipal bond. If an investor holds the residual interest, in a trust, Merrill Lynch typically has the ability to trigger the liquidation of that trust only if the market value of the bonds held in the trust declines below a specified threshold. The weighted average remaining life of bonds held in the trusts at June 30, 2013 was 9.6 years. Merrill Lynch's liquidity commitments to unconsolidated municipal bond trusts totaled \$91 million and \$106 million at June 30, 2013 and December 31, 2012, respectively. There were no material write-downs or downgrades of assets or issuers during the three and six months ended June 30, 2013 and 2012.

The following table summarizes certain information related to municipal bond trusts in which Merrill Lynch holds a variable interest as of June 30, 2013 and December 31, 2012.

(dollars in millions)

	June 30, 2013			December 31, 2012		
	Consolidated	Unconsolidated	Total	Consolidated	Unconsolidated	Total
Maximum Loss Exposure	\$ 826	\$ 146	\$ 972	\$ 1,348	\$ 106	\$ 1,454

Total	\$ 1,924	\$ 56	\$ 1,980	\$ 2,505	\$ —	\$ 2,505
On-balance sheet liabilities						
Short-term borrowings	\$ 582	\$ —	\$ 582	\$ 2,859	\$ —	\$ 2,859
Payables to Bank of America	1,098	—	1,098	1,157	—	1,157
Total	\$ 1,680	\$ —	\$ 1,680	\$ 4,016	\$ —	\$ 4,016
Total assets of VIEs	\$ 1,924	\$ 228	\$ 2,152	\$ 2,505	\$ 133	\$ 2,638

Merrill Lynch consolidates municipal bond trusts when it has a controlling financial interest. As transferor of assets into a trust, Merrill Lynch has the power to determine which assets would be held in the trust and to structure the liquidity facilities, default protection and credit enhancement, if applicable. In some instances, Merrill Lynch retains a residual interest in such trusts and has loss exposure that could potentially be significant to the trust through the residual interest, liquidity facilities and other arrangements. Merrill Lynch is also the remarketing agent, through which it has the power to direct the activities that most significantly impact economic performance. Accordingly, Merrill Lynch is the primary beneficiary of and consolidates these trusts. In other instances, one or more third party investor(s) hold(s) the residual interest and, through that interest, has the unilateral right to liquidate the trust. Merrill Lynch does not consolidate these trusts.

CDOs

CDO vehicles hold diversified pools of fixed income securities, typically corporate debt or asset-backed securities, which they fund by issuing multiple tranches of debt and equity securities. Synthetic CDOs enter into a portfolio of credit default swaps to synthetically create exposure to fixed income securities. CLOs are a subset of CDOs that hold pools of loans, typically corporate loans or commercial mortgages. CDOs are typically managed by third party portfolio managers. Merrill Lynch transfers assets to these CDOs, holds securities issued by the CDOs, and may be a derivative counterparty to the CDOs, including credit default swap counterparty for synthetic CDOs. Merrill Lynch has also entered into total return swaps with certain CDOs whereby Merrill Lynch will absorb the economic returns generated by specified assets held by the CDO. Merrill Lynch receives fees for structuring CDOs and providing liquidity support for super senior tranches of securities issued by certain CDOs.

The following table summarizes certain information related to CDO vehicles in which Merrill Lynch holds a variable interest as of June 30, 2013 and December 31, 2012.

(dollars in millions)

	June 30, 2013			December 31, 2012		
	Consolidated	Unconsolidated	Total	Consolidated	Unconsolidated	Total
Maximum Loss Exposure	\$ 1,304	\$ 1,159	\$ 2,463	\$ 2,200	\$ 1,321	\$ 3,521
On-balance sheet assets						
Trading assets	\$ 1,310	\$ 273	\$ 1,583	\$ 2,200	\$ 227	\$ 2,427
Derivative contracts	—	190	190	—	301	301
Other assets	—	44	44	—	52	52
Total	<u>\$ 1,310</u>	<u>\$ 507</u>	<u>\$ 1,817</u>	<u>\$ 2,200</u>	<u>\$ 580</u>	<u>\$ 2,780</u>
On-balance sheet liabilities						
Derivative contracts	\$ —	\$ 7	\$ 7	\$ —	\$ 9	\$ 9
Long-term borrowings	1,548	—	1,548	2,805	—	2,805
Total	<u>\$ 1,548</u>	<u>\$ 7</u>	<u>\$ 1,555</u>	<u>\$ 2,805</u>	<u>\$ 9</u>	<u>\$ 2,814</u>
Total assets of VIEs	<u>\$ 1,310</u>	<u>\$ 24,910</u>	<u>\$ 26,220</u>	<u>\$ 2,200</u>	<u>\$ 26,968</u>	<u>\$ 29,168</u>

Merrill Lynch's maximum loss exposure is significantly less than the total assets of unconsolidated CDO vehicles in the table above because Merrill Lynch typically has exposure to only a portion of the total assets.

At June 30, 2013, Merrill Lynch had \$1.3 billion of aggregate liquidity exposure to CDOs. This amount includes \$91 million of commitments to CDOs to provide funding for super senior exposures and \$1.2 billion notional amount of derivative contracts with unconsolidated VIEs, principally CDO vehicles, which hold non-super senior CDO debt securities or other debt securities on Merrill Lynch's behalf. See Note 14 for additional information. Merrill Lynch's liquidity exposure to CDOs at June 30, 2013 is included in the table above to the extent that Merrill Lynch sponsored the CDO vehicle or the liquidity exposure is more than insignificant compared to total assets of the CDO vehicle. Liquidity exposure included in the table is reported net of previously recorded losses.

Customer Vehicles

Customer vehicles include credit-linked, equity-linked and commodity-linked note vehicles, which are typically created on behalf of customers who wish to obtain exposure to a specific company, commodity price or financial instrument. The vehicles issue notes that pay a return linked to the specific credit, equity or commodity price risk. The vehicles purchase high-grade assets as collateral and enter into credit, equity or commodity derivatives to synthetically create the risk required to pay the specified return on the notes issued. Repackaging vehicles issue notes that are designed to incorporate risk characteristics desired by customers of Merrill Lynch. The vehicles hold debt instruments such as corporate bonds, convertible bonds or ABS with the desired credit risk profile. Merrill Lynch enters into derivatives with the vehicles to change the interest rate or currency profile of the debt instruments. If a vehicle holds convertible bonds and Merrill Lynch retains the conversion option, Merrill Lynch is deemed to have a controlling financial interest and consolidates the vehicle.

The following table summarizes certain information related to customer vehicles in which Merrill Lynch holds a variable interest as of June 30, 2013 and December 31, 2012.

(dollars in millions)

	June 30, 2013			December 31, 2012		
	Consolidated	Unconsolidated	Total	Consolidated	Unconsolidated	Total

Merrill Lynch consolidates customer vehicles in which it has a controlling financial interest. Merrill Lynch typically has control over the initial design of the vehicle and may also have the ability to replace the collateral assets. Merrill Lynch consolidates these vehicles if it also absorbs potentially significant gains or losses through derivative contracts or investments. Merrill Lynch does not consolidate a vehicle if a single investor controlled the initial design of the vehicle or if Merrill Lynch does not have a variable interest that could potentially be significant to the vehicle.

Merrill Lynch had approximately \$725 million and \$742 million of other liquidity commitments, including written put options and collateral value guarantees, with unconsolidated credit-linked and equity-linked note vehicles at June 30, 2013 and December 31, 2012, respectively.

Merrill Lynch's maximum loss exposure from customer vehicles includes the notional amount of the credit or equity derivatives to which it is counterparty, net of losses previously recorded, and Merrill Lynch's investment, if any, in securities issued by the vehicles. It has not been reduced to reflect the benefit of offsetting swaps with the customers or collateral arrangements.

Real Estate and other VIEs

Real Estate and other VIEs primarily includes a real estate investment fund that is a VIE, investments in VIEs that hold investment property, certain hedge fund investment entities, and residential agency resecuritizations.

The following table summarizes certain information related to Real Estate and other VIEs in which Merrill Lynch holds a variable interest as of June 30, 2013 and December 31, 2012.

(dollars in millions)

	June 30, 2013			December 31, 2012		
	Consolidated	Unconsolidated	Total	Consolidated	Unconsolidated	Total

Total	\$ 336	\$ 1	\$ 337	\$ 214	\$ 1	\$ 215
Total assets of VIEs	\$ 773	\$ 22,482	\$ 23,255	\$ 417	\$ 18,060	\$ 18,477

Merrill Lynch consolidates Real Estate and other VIEs in which it has a controlling financial interest. Merrill Lynch has established real estate investment funds designed to provide returns to clients through limited partnership holdings. Merrill Lynch invests in real estate lending vehicles and establishes vehicles to hold real estate investments. In certain instances these entities do not have sufficient equity to finance operations and are therefore considered VIEs. Merrill Lynch consolidates these vehicles when it has decision-making power over the property held by the vehicle and absorbs potentially significant gains or losses through its equity or loan investment.

Merrill Lynch transfers existing securities, typically MBS, into resecuritization vehicles at the request of customers seeking securities with specific characteristics. Generally, there are no significant ongoing activities performed in a resecuritization trust and no single investor has the unilateral ability to liquidate the trust.

Merrill Lynch resecuritized \$4.7 billion and \$11.5 billion of securities during the three and six months ended June 30, 2013, respectively, as compared with and \$14.3 billion and \$24.3 billion, respectively in the three and six months ended June 30, 2012. Merrill Lynch consolidates a resecuritization trust if it has sole discretion over the design of the trust, including the identification of securities to be transferred in and the structure of securities to be issued, and also retains a variable interest that could potentially be significant to the trust. If one or a limited number of third-party investors share responsibility for the design of the trust and purchase a significant portion of securities, including subordinated securities issued by non agency trusts, Merrill Lynch does not consolidate the trust.

Other Transactions

Merrill Lynch transferred pools of securities to certain independent third parties and provided financing for up to 75% of the purchase price under asset-backed financing arrangements. At June 30, 2013 and December 31, 2012, Merrill Lynch's maximum loss exposure under these financing arrangements was \$1.5 billion and \$2.5 billion, respectively, substantially all of which was recorded as loans, notes and mortgages on Merrill Lynch's Condensed Consolidated Balance Sheet. All principal and interest payments have been received when due in accordance with their contractual terms. These arrangements are not included in the tables above because the purchasers are not VIEs.

Note 10. Loans, Notes and Mortgages

Loans, notes, mortgages and related commitments to extend credit include:

- Consumer loans, which are substantially secured, including residential mortgages, home equity loans, and other loans to individuals for household, family, or other personal expenditures;
- Commercial loans, including corporate and institutional loans (including corporate and financial sponsor, non-investment grade lending commitments), commercial mortgages, asset-backed loans, small- and middle-market business loans, and other loans to businesses; and
- Other loans, which include securities-backed loans and loans classified as held for sale.

The table below presents information on Merrill Lynch's loans outstanding at June 30, 2013 and December 31, 2012.

⁽³⁾ Includes securities-backed loans and loans held for sale of \$9.6 billion and \$2.3 billion, respectively, as of December 31, 2012.

Merrill Lynch monitors credit quality based on primary credit quality indicators. Within consumer loans, the primary credit quality indicators are the refreshed LTV ratios and the refreshed Fair Isaac Corporation ("FICO") score. Refreshed LTV measures the carrying value of the loan as a percentage of the value of property securing the loan, which is refreshed quarterly. Home equity loans are evaluated using the refreshed combined loan-to-value ratio ("CLTV"), which measures the carrying value of the combined loans that have liens against the property and the available line of credit as a percentage of the appraised value of the property securing the loan, which is refreshed quarterly. FICO score measures the creditworthiness of the borrower based on the financial obligations of the borrower and the borrower's credit history. At a minimum, FICO scores are refreshed quarterly, and in many cases, more frequently.

Merrill Lynch's commercial loans are evaluated using the internal classifications of pass rated or reservable criticized as the primary credit quality indicators. The term reservable criticized refers to those commercial loans that are internally classified or listed by Merrill Lynch as Special Mention, Substandard or Doubtful, which are asset categories defined by regulatory authorities. These assets have an elevated level of risk and may have a high probability of default or total loss. Pass rated refers to all loans not considered reservable criticized. In addition to these primary credit quality indicators, Merrill Lynch uses other credit quality indicators for certain types of loans.

[Table of Contents](#)

The tables below present credit quality indicators for Merrill Lynch's consumer and commercial loan portfolios, excluding loans accounted for under the fair value option, at June 30, 2013 and December 31, 2012.

Activity in the allowance for loan losses, which is primarily associated with commercial loans, is presented below:

	For the Six Months Ended June 30, 2013	For the Six Months Ended June 30, 2012
Allowance for loan losses, at beginning of period	\$ 57	\$ 72
Provision for loan losses	(33)	(16)
Charge-offs	(3)	(9)
Recoveries	19	8
Net charge-offs	16	(1)
Allowance for loan losses, at end of period	\$ 40	\$ 55

Consumer loans, substantially all of which are collateralized, consisted of approximately 42,000 individual loans at June 30, 2013. Commercial loans consisted of approximately 400 separate loans.

Merrill Lynch's outstanding loans include \$1.4 billion and \$2.3 billion of loans held for sale at June 30, 2013 and December 31, 2012, respectively. Loans held for sale are loans that Merrill Lynch expects to sell prior to maturity. At June 30, 2013, such loans consisted of \$0.7 billion of consumer loans, primarily residential mortgages, and \$0.7

billion of commercial loans. At December 31, 2012, such loans consisted of \$1.4 billion of consumer loans, primarily residential mortgages, and \$0.9 billion of commercial loans.

In some cases, Merrill Lynch enters into single name and index credit default swaps to mitigate credit exposure related to funded and unfunded commercial loans. The notional value of these swaps totaled \$1.5 billion and \$2.0 billion at June 30, 2013 and December 31, 2012, respectively.

The following tables provide information regarding Merrill Lynch's net credit default protection associated with its funded and unfunded commercial loans as of June 30, 2013 and December 31, 2012:

Net Credit Default Protection by Maturity Profile

	June 30, 2013	December 31, 2012
Less than or equal to one year	16%	25%
Greater than one year and less than or equal to five years	84	75
Total net credit default protection	100%	100%

Net Credit Default Protection by Credit Exposure Debt Rating

(dollars in millions)

Ratings ⁽¹⁾	June 30, 2013		December 31, 2012	
	Net Notional	Percent	Net Notional	Percent
AA	\$ (173)	11.4%	\$ (268)	13.1%
A	(873)	57.5	(1,034)	50.6

Total net credit default protection	<u>\$ (1,517)</u>	<u>100%</u>	<u>\$ (2,041)</u>	<u>100.0%</u>

⁽¹⁾ Merrill Lynch considers ratings of BBB- or higher to meet the definition of investment grade.

Purchased Credit-Impaired Loans

During the three and six months ended June 30, 2013, Merrill Lynch acquired certain residential mortgage loans from Bank of America, the majority of which are accounted for as PCI loans. Such PCI loans had an aggregate unpaid principal balance of \$5.3 billion and an aggregate carrying value of \$4.1 billion at the dates of acquisition. The following table below provides details of these loans:

<i>(dollars in millions)</i>	Six Months Ended June 30, 2013	
Contractually required payments including interest	\$	7,433
Less: Non accretable difference		(2,465)
Cash flows expected to be collected ⁽¹⁾		4,968
Less: Accretable yield		(851)
Fair value of loans acquired	\$	<u>4,117</u>

⁽¹⁾ Represents undiscounted expected principal and interest cash flows

As of June 30, 2013, the aggregate unpaid principal balance and aggregate carrying value of PCI loans was \$5.1 billion and \$4.0 billion, respectively.

The table below shows activity for the accretable yield on these loans. The amount of accretable yield is affected by changes in credit outlooks, including items such as default rates and loss severities, prepayment speeds, which can change the amount and period of time over which interest payments are expected to be received, and the interest rates on variable rate loans. The reclassifications from nonaccretable difference during the three and six months ended June 30, 2013 were due to increases in expected cash flows driven by improved home prices and lower expected defaults, along with a decrease in prepayment speeds as a result of rising interest rates. Changes in the prepayment assumption affect the expected remaining life of the portfolio, which results in a change to the amount of future interest cash flows.

<i>(dollars in millions)</i>	Three Months Ended June 30, 2013		Six Months Ended June 30, 2013	
Accretable yield, beginning of period	\$	677		—
Acquisitions		135		851
Accretions		(38)		(72)
Disposals/transfers		(7)		(12)
Reclassifications from nonaccretable difference		462		462
Accretable yield, June 30, 2013	\$	<u>1,229</u>	\$	<u>1,229</u>

Note 11. Goodwill and Intangible Assets

Goodwill

Goodwill is the cost of an acquired company in excess of the fair value of identifiable net assets at the acquisition date. Goodwill is tested annually (or more frequently under certain conditions) for impairment at the reporting unit level in accordance with ASC 350, *Intangibles - Goodwill and Other* ("Goodwill and Intangible Assets Accounting.") If the fair value of the reporting unit exceeds its carrying value, its goodwill is not deemed to be impaired. If the fair value is less than the carrying value, a further analysis is required to determine the amount of impairment, if any. Merrill Lynch's next annual impairment test will be performed during the third quarter of 2013, based on financial information as of June 30, 2013.

The carrying amount of goodwill was \$6.4 billion at both June 30, 2013 and December 31, 2012.

Intangible Assets

Intangible assets with definite lives at June 30, 2013 and December 31, 2012 consisted primarily of value assigned to customer relationships. Intangible assets with definite lives are tested for impairment in accordance with ASC 360, *Property, Plant and Equipment* whenever certain conditions exist which would indicate the carrying amounts of such assets may not be recoverable. Intangible assets with definite lives are amortized over their respective estimated useful lives. Intangible assets with indefinite lives consist of value assigned to the Merrill Lynch brand and are tested for impairment in accordance with Goodwill and Intangible Assets Accounting. Merrill Lynch's next annual impairment test will be performed during the third quarter of 2013, based on financial information as of June 30, 2013. Intangible assets with indefinite lives are not amortized.

The gross carrying amount of intangible assets with definite lives was \$3.1 billion at June 30, 2013 and December 31, 2012. Accumulated amortization of intangible assets with definite lives was \$1.3 billion and \$1.2 billion at June 30, 2013 and December 31, 2012, respectively. The carrying amount of intangible assets with indefinite lives was \$1.5 billion as of June 30, 2013 and December 31, 2012.

Amortization expense for the three month periods ended June 30, 2013 and June 30, 2012 was \$75 million and \$77 million, respectively, and for the six month periods ended June 30, 2013 and June 30, 2012 was \$151 million and \$154 million, respectively.

Note 12. Borrowings and Deposits

Prior to Merrill Lynch's acquisition by Bank of America, ML & Co. was the primary issuer of Merrill Lynch's unsecured debt instruments. Debt instruments were also issued by certain subsidiaries. Bank of America has not assumed or guaranteed the long-term debt that was issued or guaranteed by ML & Co. or its subsidiaries prior to the acquisition of Merrill Lynch by Bank of America.

Beginning late in the third quarter of 2009, in connection with the update or renewal of certain Merrill Lynch international securities offering programs, Bank of America agreed to guarantee debt securities, warrants and/or certificates issued by certain subsidiaries of ML & Co. on a going forward basis. All existing ML & Co. guarantees of securities issued by those same Merrill Lynch subsidiaries under various international securities offering programs will remain in full force and effect as long as those securities are outstanding, and Bank of America has not assumed any of those prior ML & Co. guarantees or otherwise guaranteed such securities. There were approximately \$6.9 billion of securities guaranteed by Bank of America at June 30, 2013.

Following the completion of Bank of America's acquisition of Merrill Lynch, ML & Co. became a subsidiary of Bank of America and established intercompany lending and borrowing arrangements to facilitate centralized liquidity management. Included in these intercompany agreements is a \$75 billion one-year revolving unsecured line of credit that allows ML & Co. to borrow funds from Bank of America at a spread to LIBOR that is reset periodically and is consistent with other intercompany agreements. This credit line was renewed effective January 1, 2013 with a maturity date of January 1, 2014. The credit line will automatically be extended by one year to the succeeding January 1st unless Bank of America provides written notice not to extend at least 45 days prior to the maturity date. The agreement does not contain any financial or other covenants. There were no outstanding borrowings under the line of credit at June 30, 2013 and December 31, 2012.

In addition to the \$75 billion unsecured line of credit, there is also a revolving unsecured line of credit that allows ML & Co. to borrow up to \$25 billion from Bank of America. Interest on borrowings under the line of credit is based on prevailing short-term market rates. The line of credit does not contain any financial or other covenants. The line of credit matures on February 11, 2014. There were no outstanding borrowings under the line of credit at June 30, 2013 and December 31, 2012.

Merrill Lynch Pierce Fenner & Smith Incorporated ("MLPF&S"), a wholly-owned subsidiary of ML & Co., also has the following borrowing agreements with Bank of America:

[Table of Contents](#)

- A \$4 billion one-year revolving unsecured line of credit - Interest on the line of credit is based on prevailing short-term market rates. The credit line will mature on November 1, 2013 and will automatically be extended by one year to the succeeding November 1st unless Bank of America provides written notice not to extend at least 45 days prior to the maturity date. At both June 30, 2013 and December 31, 2012, there were no outstanding borrowings under the line of credit.
- A \$15 billion revolving unsecured line of credit - Interest on the line of credit is based on prevailing short-term market rates. The line of credit will mature on February 1, 2014 and will automatically extend every six months. At June 30, 2013 and December 31, 2012, approximately \$0.7 billion and \$0.9 billion, respectively, was outstanding under the line of credit.

During the quarter ended June 30, 2012, Merrill Lynch entered into a series of transactions involving repurchases of its senior and subordinated debt. Through a tender offer and certain open market transactions, Merrill Lynch repurchased senior and subordinated debt with a carrying value of \$551 million for \$474 million in cash, and recorded a gain of \$77 million. In addition, during the three months ended March 31, 2012, Merrill Lynch completed a tender offer to purchase and retire certain subordinated notes for approximately \$1.2 billion in cash, which resulted in a gain of \$328 million.

The value of Merrill Lynch's debt instruments as recorded on the Condensed Consolidated Balance Sheets does not necessarily represent the amount that will be repaid at maturity. This is due to the following:

- As a result of the acquisition by Bank of America, all debt instruments were adjusted to fair value on January 1, 2009;
- Certain debt issuances are accounted for at fair value and incorporate changes in Merrill Lynch's creditworthiness (see Note 4);
- Certain structured notes whose coupon or repayment terms are linked to the performance of debt and equity securities, indices, currencies or commodities reflect the fair value of those risks (see Note 4); and
- Certain debt issuances are adjusted for the impact of fair value hedge accounting (see Note 6).

The tables below exclude Merrill Lynch's intercompany borrowings from Bank of America, see Note 2 for further information. Total borrowings at June 30, 2013 and December 31, 2012, which are comprised of short-term borrowings, long-term borrowings and junior subordinated notes (related to trust preferred securities), consisted of the following:

(dollars in millions)

	June 30, 2013	December 31, 2012
Senior debt	\$ 43,721	\$ 47,702
Senior structured notes	26,158	27,010
Subordinated debt	6,819	10,740
Junior subordinated notes (related to trust preferred securities)	3,819	3,809
Other subsidiary financing	1,192	941
Debt issued by consolidated VIEs	5,088	9,232
Total	<u>\$ 86,797</u>	<u>\$ 99,434</u>

Borrowings and deposits at June 30, 2013 and December 31, 2012, are presented below:

(dollars in millions)

	June 30, 2013	December 31, 2012

Non-U.S.	<u>\$ 11,253</u>	<u>\$ 12,873</u>

⁽¹⁾ See Note 9 for additional information on debt issued by consolidated VIEs.

⁽²⁾ Excludes junior subordinated notes (related to trust preferred securities).

⁽³⁾ Fixed-rate obligations are generally swapped to variable rates.

⁽⁴⁾ Variable interest rates are generally based on rates such as LIBOR, the U.S. Treasury Bill rate, or the Federal Funds rate.

⁽⁵⁾ Includes structured notes.

See Note 5 for additional information on the fair value of long-term borrowings.

The weighted-average interest rates for borrowings at June 30, 2013 and December 31, 2012 (excluding structured products) were as follows:

	June 30, 2013	December 31, 2012
Short-term borrowings	0.2%	0.2%
Long-term borrowings	3.9	3.9
Junior subordinated notes (related to trust preferred securities)	6.9	6.9

Merrill Lynch also obtains standby letters of credit from issuing banks to satisfy various counterparty collateral requirements, in lieu of depositing cash or securities collateral. Such standby letters of credit aggregated \$1.3 billion and \$1.6 billion at June 30, 2013 and December 31, 2012, respectively.

Long-Term Borrowings

The table below shows the carrying value of long-term borrowings by contractual maturity at June 30, 2013.

(dollars in millions)

	Amount	Percentage of Total
Less than 1 year	\$ 23,303	29%
1 – 2 years	10,492	13
2 – 3 years	6,809	8
3 – 4 years	5,936	7
4 – 5 years	12,215	15
Greater than 5 years	22,796	28
Total	<u>\$ 81,551</u>	<u>100%</u>

Certain long-term borrowing agreements contain provisions whereby the borrowings are redeemable at the option of the holder (“put” options) at specified dates prior to maturity. Merrill Lynch believes that a portion of such borrowings will remain outstanding beyond their earliest redemption date. In addition, the maturity of certain structured notes whose coupon or repayment terms are linked to the performance of debt and equity securities,

indices, currencies or commodities may also be accelerated based on the value of a referenced index or security, in which case Merrill Lynch may be required to immediately settle the obligation for cash or other securities. The aggregate value of the borrowings containing these features was approximately \$9.6 billion at June 30, 2013.

Senior and subordinated debt obligations do not contain provisions that could, upon an adverse change in ML & Co.'s credit rating, financial ratios, earnings or cash flows, trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation.

As part of Bank of America's efforts to streamline its organizational structure and reduce complexity and costs, it has reduced and intends to continue to reduce the number of its subsidiaries, including through intercompany mergers. In connection with these efforts, Bank of America may merge ML & Co. directly into Bank of America Corporation and such a merger may occur as early as the fourth quarter of 2013. Under Delaware law, as a result of such a merger, Bank of America Corporation would assume all of ML & Co.'s obligations, including its outstanding U.S. and non-U.S. debt securities, its obligations with respect to outstanding trust preferred securities and ML & Co. guarantees of outstanding non-U.S. debt securities issued by ML & Co. subsidiaries. Also, as a result of such a merger, ML & Co.'s reporting obligations under the Securities Exchange Act of 1934 would terminate and ML & Co. would cease to separately file reports with the U.S. Securities and Exchange Commission (the "SEC"). There can be no assurance that such a merger will occur, and if it does, the timing thereof. Any such merger would be subject to applicable regulatory approvals, consents and other conditions of closing.

See Note 12 to the Consolidated Financial Statements contained in the 2012 Annual Report for additional information on borrowings.

Note 13. Stockholder's Equity and Earnings Per Share

Common Stock

As of June 30, 2013 and December 31, 2012, there are 1,000 shares of ML & Co. common stock outstanding, all of which are held by Bank of America.

Earnings Per Share

Earnings per share data is not provided, as Merrill Lynch is a wholly-owned subsidiary of Bank of America.

Note 14. Commitments, Contingencies and Guarantees

Litigation and Regulatory Matters

The following supplements the disclosure in Note 14 to the Consolidated Financial Statements in Merrill Lynch's 2012 Annual Report and in Note 14 to the Condensed Consolidated Financial Statements of Merrill Lynch's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2013 (collectively, the "prior commitments and contingencies disclosure").

In the ordinary course of business, Merrill Lynch and its subsidiaries are routinely defendants in, or party to, many pending and threatened legal actions and proceedings, including actions brought on behalf of various classes of claimants. These actions and proceedings are generally based on alleged violations of securities, employment, contract and other laws. In some of these actions and proceedings, claims for substantial monetary damages are asserted against Merrill Lynch and its subsidiaries.

In the ordinary course of business, Merrill Lynch and its subsidiaries are also subject to regulatory examinations, information gathering requests, inquiries, investigations, threatened legal actions and proceedings. Certain subsidiaries of Merrill Lynch are registered broker/dealers or investment advisors and are subject to regulation by the SEC, the Financial Industry Regulatory Authority ("FINRA"), the U.K.'s Prudential Regulatory Authority (the "PRA") and Financial Conduct Authority (the "FCA"), the European Commission (the "Commission"), and other

domestic, international, and state securities regulators. In connection with formal and informal inquiries by those agencies, such subsidiaries receive numerous requests, subpoenas and orders for documents, testimony and information in connection with various aspects of their regulated activities.

In view of the inherent difficulty of predicting the outcome of such litigation and regulatory matters, particularly where the claimants seek very large or indeterminate damages or where the matters present novel legal theories or involve a large number of parties, Merrill Lynch generally cannot predict what the eventual outcome of the pending matters will be, what the timing of the ultimate resolution of these matters will be, or what the eventual loss, fines or penalties related to each pending matter may be.

In accordance with applicable accounting guidance, Merrill Lynch establishes an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. In such cases, there may be an exposure to loss in excess of any amounts accrued. When a loss contingency is not both probable and estimable, Merrill Lynch does not establish an accrued liability. As a litigation or regulatory matter develops, Merrill Lynch, in conjunction with any outside counsel handling the matter, evaluates on an ongoing basis whether such matter presents a loss contingency that is probable and estimable. If, at the time of evaluation, the loss contingency related to a litigation or regulatory matter is not both probable and estimable, the matter will continue to be monitored for further developments that would make such loss contingency both probable and estimable. Once the loss contingency related to a litigation or regulatory matter is deemed to be both probable and estimable, Merrill Lynch will establish an accrued liability with respect to such loss contingency and record a corresponding amount of litigation-related expense. Merrill Lynch continues to monitor the matter for further developments that could affect the amount of the accrued liability that has been previously established. Excluding expenses of internal or external legal service providers, litigation-related expenses of approximately \$53 million and \$150 million were recognized for the three and six months ended June 30, 2013, as compared with approximately \$13 million and \$17 million for the same periods in 2012.

For a limited number of the matters disclosed in this Note, and in the prior commitments and contingencies disclosure, for which a loss is probable or reasonably possible in future periods, whether in excess of a related accrued liability or where there is no accrued liability, Merrill Lynch is able to estimate a range of possible loss. In determining whether it is possible to provide an estimate of loss or range of possible loss, Merrill Lynch reviews and evaluates its material litigation and regulatory matters on an ongoing basis, in conjunction with any outside counsel handling the matter, in light of potentially relevant factual and legal developments. These may include information learned through the discovery process, rulings on dispositive motions, settlement discussions, and other rulings by courts, arbitrators or others. In cases in which Merrill Lynch possesses sufficient appropriate information to develop an estimate of loss or range of possible loss, that estimate is aggregated and disclosed below. There may be other disclosed matters for which a loss is probable or reasonably possible but such an estimate may not be possible. For those matters where an estimate is possible, management currently estimates the aggregate range of possible loss is \$0 to \$610 million in excess of the accrued liability (if any) related to those matters. This estimated range of possible loss is based upon currently available information and is subject to significant judgment and a variety of assumptions, and known and unknown uncertainties. The matters underlying the estimated range will change from time to time, and actual results may vary significantly from the current estimate. Those matters for which an estimate is not possible are not included within this estimated range. Therefore, this estimated range of possible loss represents what Merrill Lynch believes to be an estimate of possible loss only for certain matters meeting these criteria. It does not represent Merrill Lynch's maximum loss exposure. Information is provided below, or in the prior commitments and contingencies disclosure, regarding the nature of all of these contingencies and, where specified, the amount of the claim associated with these loss contingencies. Based on current knowledge, management does not believe that loss contingencies arising from pending matters, including the matters described herein and in the prior commitments and contingencies disclosure, will have a material adverse effect on the consolidated financial position or liquidity of Merrill Lynch. However, in light of the inherent uncertainties involved in these matters, some of which are beyond Merrill Lynch's control, and the very large or indeterminate damages sought in some of these matters, an adverse outcome in one or more of these matters could be material to Merrill Lynch's results of operations or cash flows for any particular reporting period.

Ambac Litigation

On April 16, 2012, Ambac Assurance Corp. and the Segregated Account of Ambac Assurance Corp. (together, "Ambac") sued First Franklin Financial Corp., Bank of America, N.A., MLPF&S, Merrill Lynch Mortgage Lending, Inc., and Merrill Lynch Mortgage Investors, Inc. in New York Supreme Court, New York County. Plaintiffs' claims relate to guaranty insurance Ambac provided on a First Franklin securitization (Franklin Mortgage Loan Trust, Series 2007-FFC). The securitization was sponsored by a Merrill Lynch entity, and certain certificates in the securitization were insured by Ambac. The complaint alleges that defendants breached representations and warranties concerning the origination of the underlying mortgage loans and asserts claims for fraudulent inducement, breach of contract and indemnification. The complaint does not specify the amount of damages sought.

Defendants moved to dismiss the Complaint on July 13, 2012. On July 19, 2013, the court denied defendants' motion to dismiss Ambac's contract and fraud causes of action. In addition, the court denied defendants' motion to dismiss Ambac's claims for attorneys' fees and punitive damages. The court also dismissed Ambac's indemnification cause of action.

European Commission - Credit Default Swaps Antitrust Investigation

On July 1, 2013, the Commission announced that it had addressed a Statement of Objections ("SO") to Banc of America Securities LLC (a predecessor to MLPF&S), Bank of America and a related entity (together, the "Bank of America Entities"); a number of other financial institutions; Markit Group Limited; and the International Swaps and Derivatives Association (together, the "Parties"). The SO sets forth the Commission's preliminary conclusion that the Parties infringed EU competition law by participating in alleged collusion to prevent exchange trading of credit default swaps and futures. According to the SO, the conduct of the Bank of America Entities took place between August 2007 and April 2009. As part of the Commission's procedures, the Parties will be given the opportunity to review the evidence in the investigative file, respond to the Commission's preliminary conclusions, and request a hearing before the Commission. If the Commission is satisfied that its preliminary conclusions are proved, the Commission has stated that it intends to impose a fine and require appropriate remedial measures. However, given the early stage of this matter it is not possible to estimate the amount of any fine or what remedial measures may be required.

In re Bank of America Securities, Derivative and Employee Retirement Income Security Act (ERISA) Litigation

Consolidated Securities Class Action

Certain members of the securities class in the Consolidated Securities Class Action have appealed the district court's final approval of the settlement to the U.S. Court of Appeals for the Second Circuit.

"Good Reason" Litigation

On April 26, 2013, the U.S. District Court for the Southern District of New York granted final approval to the settlement in *Chambers, et al. v. Merrill Lynch & Co., et al.*

Mortgage-Backed Securities ("MBS") Litigation

Merrill Lynch entities and their affiliates have been named as defendants in a number of cases relating to their various roles as issuer, originator, seller, depositor, sponsor, underwriter and/or controlling entity in MBS offerings, pursuant to which the MBS investors were entitled to a portion of the cash flow from the underlying pools of mortgages. These cases generally include actions by individual MBS purchasers. Although the allegations vary by lawsuit, these cases generally allege that the registration statements, prospectuses and prospectus supplements for securities issued by securitization trusts contained material misrepresentations and omissions, in violation of Sections 11, 12 and/or 15 of the Securities Act of 1933, state securities laws and other state statutory and/or common laws.

These cases generally involve allegations of false and misleading statements regarding (i) the process by which the properties that served as collateral for the mortgage loans underlying the MBS were appraised; (ii) the percentage of equity that mortgage borrowers had in their homes; (iii) the borrowers' ability to repay their mortgage loans; (iv) the underwriting practices by which those mortgage loans were originated; (v) the ratings given to the different tranches of MBS by rating agencies; and (vi) the validity of each issuing trusts' title to the mortgage loans comprising the pool for the securitization (collectively, "MBS Claims"). Plaintiffs in these cases generally seek unspecified compensatory damages, unspecified costs and legal fees and, in some instances, seek rescission.

Prudential Insurance Litigation

On March 14, 2013, The Prudential Insurance Company of America and certain of its affiliates (collectively "Prudential") filed a complaint in the U.S. District Court for the District of New Jersey, in a case entitled *Prudential Insurance Company of America, et al. v. Bank of America, N.A., et al.* Prudential has named, among others, Merrill Lynch and a number of its related entities as defendants. Prudential's complaint asserts certain MBS Claims pertaining to 54 MBS offerings in which Prudential alleges that it purchased securities between 2004 and 2007. Prudential seeks, among other relief, compensatory damages, rescission or a rescissory measure of damages, treble damages, punitive damages, and other unspecified relief.

Regulatory and Governmental Investigations

Merrill Lynch has received a number of subpoenas and other requests for information from regulators and governmental authorities regarding MBS and other mortgage-related matters, including inquiries, investigations and potential proceedings related to a number of transactions involving Merrill Lynch's underwriting and issuance of MBS and its participation in certain CDO offerings. These inquiries and investigations include, among others, an investigation by the SEC related to Merrill Lynch's risk control, valuation, structuring, marketing and purchase of CDOs, and investigations by the Department of Justice (the "DOJ"), the SEC, and the New York State Attorney General (the "NYAG") concerning the purchase, securitization and underwriting of mortgage loans and RMBS. Merrill Lynch has provided documents and testimony and continues to cooperate fully with these inquiries and investigations.

The staff of the DOJ has advised that it intends to file civil charges against Bank of America Securities LLC (a predecessor to MLPF&S) and other Bank of America entities arising from one or two jumbo prime securitizations. The staff of the SEC has advised that they intend to recommend civil charges concerning one of those securitizations. The staff of the NYAG has advised that they intend to recommend filing an action against Merrill Lynch arising from their RMBS investigation. In addition, the staff of the SEC has advised that it is considering recommending civil charges against Merrill Lynch arising from its CDO investigation. Merrill Lynch has been in active discussions with senior staff of each government entity in connection with the respective investigations and to explain why the threatened civil charges are not appropriate.

Commitments

At June 30, 2013, Merrill Lynch's commitments had the following expirations:

(dollars in millions)

	Total	Commitment expiration			
		Less than 1 Year	1-3 Years	3-5 Years	Over 5 Years
Lending commitments	\$ 4,718	\$ 961	\$ 1,656	\$ 2,005	\$ 96
Purchasing and other commitments	3,418	1,987	848	435	148
Operating leases	3,285	615	974	692	1,004
Commitments to enter into resale and securities borrowing agreements	93,225	93,225	—	—	—
Commitments to enter into repurchase and securities lending agreements	58,872	58,872	—	—	—
Total	<u>\$ 163,518</u>	<u>\$ 155,660</u>	<u>\$ 3,478</u>	<u>\$ 3,132</u>	<u>\$ 1,248</u>

Lending Commitments

Merrill Lynch enters into commitments to extend credit, predominantly at variable interest rates, in connection with corporate finance, corporate and institutional transactions and asset-based lending transactions. Clients may also be extended loans or lines of credit collateralized by first and second mortgages on real estate, certain liquid assets of small businesses, or securities. These commitments usually have a fixed expiration date and are contingent on certain contractual conditions that may require payment of a fee by the counterparty. Once commitments are drawn upon, Merrill Lynch may require the counterparty to post collateral depending upon creditworthiness and general market conditions. See Note 10 for additional information.

Commitments to extend credit are outstanding as of the date the commitment letter is issued and are comprised of closed and contingent commitments. Closed commitments represent the unfunded portion of existing commitments available for draw down. Contingent commitments are contingent on the borrower fulfilling certain conditions or upon a particular event, such as an acquisition. A portion of these contingent commitments may be syndicated among other lenders or the counterparty may replace the commitment with capital markets funding.

The contractual amounts of these commitments represent the amounts at risk should the contract be fully drawn upon, the client defaults, and the value of the existing collateral becomes worthless. The total amount of outstanding commitments may not represent future cash requirements, as commitments may expire without being drawn.

For lending commitments where the loan will be classified as held for sale upon funding, liabilities associated with unfunded commitments are calculated at the lower of cost or fair value, capturing declines in the fair value of the respective credit risk. For loan commitments where the loan will be classified as held for investment upon funding, liabilities are calculated considering both market and historical loss rates. Loan commitments either held by entities that apply the Broker-Dealer Guide or for which the fair value option was elected are accounted for at fair value.

Purchasing and Other Commitments

At June 30, 2013, Merrill Lynch had commitments to purchase loans of \$2.0 billion, which, upon settlement of the commitment, will be included in trading assets, loans held for investment or loans held for sale. Such commitments totaled \$1.3 billion at December 31, 2012. Merrill Lynch has also entered into agreements with providers of market data, communications, systems consulting, and other office-related services. At June 30, 2013 and December 31, 2012, minimum fee commitments over the remaining life of these agreements totaled \$1.1 billion and \$1.2 billion, respectively. Other purchasing commitments amounted to \$0.2 billion and \$0.8 billion at June 30, 2013 and December 31, 2012, respectively. In addition, Merrill Lynch had commitments to purchase partnership interests, primarily related to private equity and principal investing activities, at both June 30, 2013 and December 31, 2012 of \$0.1 billion.

In the normal course of business, Merrill Lynch enters into commitments for underwriting transactions. Settlement of these transactions as of June 30, 2013 would not have a material effect on the Condensed Consolidated Balance Sheet of Merrill Lynch.

In connection with trading activities, Merrill Lynch enters into commitments to enter into resale and securities borrowing and also repurchase and securities lending agreements.

Operating Leases

Merrill Lynch has entered into various non-cancelable long-term lease agreements for premises that expire through 2028. Merrill Lynch has also entered into various non-cancelable short-term lease agreements, which are primarily commitments of less than one year under equipment leases.

Guarantees

Merrill Lynch issues various guarantees to counterparties in connection with certain transactions. Merrill Lynch's guarantee arrangements and their expiration at June 30, 2013 are summarized as follows (see Note 6 for information related to derivative financial instruments within the scope of Guarantees Accounting):

(dollars in millions)

	Expiration					Carrying Value
	Maximum Payout	Less than 1 year	1-3 years	3-5 years	Over 5 years	
Standby liquidity facilities	\$ 107	\$ 91	\$ 3	\$ —	\$ 13	\$ —
Residual value guarantees	320	320	—	—	—	—
Standby letters of credit and other guarantees	359	257	68	21	13	—

Standby Liquidity Facilities

Standby liquidity facilities are primarily comprised of liquidity facilities provided to certain unconsolidated municipal bond securitization VIEs. In these arrangements, Merrill Lynch is required to fund these standby liquidity facilities if certain contingent events take place (e.g., a failed remarketing) and in certain cases if the fair value of the assets held by the VIE declines below the stated amount of the liquidity obligation. The potential exposure under the facilities is mitigated by economic hedges and/or other contractual arrangements entered into by Merrill Lynch. Based upon historical activity, it is considered remote that future payments would need to be made under these guarantees.

See Note 9 for further information.

Residual Value Guarantees

At June 30, 2013, residual value guarantees of \$320 million consist of amounts associated with certain power plant facilities. Payments under these guarantees would only be required if the fair value of such assets declined below their guaranteed value. As of June 30, 2013, no payments have been made under these guarantees and the carrying value of the associated liabilities was not material, as (i) Merrill Lynch believes that the estimated fair value of such assets was in excess of their guaranteed value and/or (ii) there is a very remote risk of future payment pursuant to the remaining contractual provisions.

Standby Letters of Credit

At June 30, 2013, Merrill Lynch provided guarantees to certain counterparties in the form of standby letters of credit in the amount of \$0.4 billion. Payment risk is evaluated based upon historical payment activity.

Representations and Warranties

Background

In prior years, Merrill Lynch and certain of its subsidiaries, including First Franklin Financial Corporation ("First Franklin"), sold pools of first-lien residential mortgage loans and home equity loans as private-label securitizations (in a limited number of these securitizations, monolines insured all or some of the securities) or in the form of whole loans. Most of the loans sold in the form of whole loans were subsequently pooled into private-label securitizations sponsored by the third-party buyer of the whole loans. In addition, Merrill Lynch and First Franklin securitized first-lien residential mortgage loans generally in the form of mortgage-backed securities guaranteed by the government sponsored enterprises (the "GSEs"). In connection with these transactions, Merrill Lynch made various representations and warranties. These representations and warranties, as set forth in the agreements, related to, among other things, the ownership of the loan, the validity of the lien securing the loan, the absence of delinquent taxes or liens against the property securing the loan, the process used to select the loan for inclusion in a transaction, the loan's compliance with any applicable loan criteria, including underwriting standards, and the loan's compliance with applicable federal, state and local laws. Breaches of these representations and warranties may result in the requirement to repurchase mortgage loans or to otherwise make whole or provide other remedies to the GSEs, whole-loan investors, securitization trusts or monoline insurers (collectively, "repurchases"). In all such cases, Merrill Lynch would be exposed to any credit loss on the repurchased mortgage loans after accounting for any mortgage insurance or mortgage guarantee payments that it may receive.

Subject to the requirements and limitations of the applicable sales and securitization agreements, these representations and warranties can be enforced by the GSEs, the whole-loan investor, the securitization trustee, or others as governed by the applicable agreement or, in a limited number of first-lien and home equity securitizations where monoline insurers have insured all or some of the securities issued, by the monoline insurer, where the contract so provides. In the case of private-label securitizations, the applicable agreements may permit investors, which may include the GSEs, with contractually sufficient holdings to direct or influence action by the securitization trustee. In the case of loans sold to parties other than the GSEs, the contractual liability to repurchase typically arises only if there is a breach of the representations and warranties that materially and adversely affects the interest of the investor, or investors, or of the monoline insurer (as applicable) in the loan. Contracts with the GSEs do not contain equivalent language. Merrill Lynch believes that the longer a loan performs prior to default, the less likely it is that an alleged underwriting breach of representations and warranties would have a material impact on the loan's performance.

Merrill Lynch's credit loss would be reduced by any recourse it may have to originators (e.g., correspondents) that, in turn, had sold such loans to Merrill Lynch based upon its agreements with these originators. When a loan is originated by a correspondent or other third party, Merrill Lynch typically has the right to seek a recovery of related repurchase losses from that originator. Many of the correspondent originators of loans in 2004 through 2008 are no longer in business, or are in a weakened financial condition, and Merrill Lynch's ability to recover on valid claims is therefore impacted, or eliminated accordingly.

The fair value of the obligations to be absorbed under the representations and warranties provided is recorded as an accrued liability when the loans are sold. This liability for probable losses is updated by adjusting the representations and warranties provision in Non-interest expenses on the Condensed Consolidated Statements of Earnings (Loss). This is done throughout the life of the loans, as necessary, when additional relevant information becomes available.

The estimate of the liability for representations and warranties exposures, and the corresponding estimated range of possible loss, is based upon currently available information, significant judgment, and a number of factors, including those discussed in "Liability for Representations and Warranties" in this Note, that are subject to change. Changes to any one of these factors could significantly impact the estimate of the liability and could have a material adverse impact on Merrill Lynch's results of operations for any particular period. Given that these factors vary by counterparty, Merrill Lynch analyzes representations and warranties obligations based on the specific counterparty, or type of counterparty, with whom the sale was made.

Settlement Actions

Merrill Lynch has vigorously contested any request for repurchase when it concludes that a valid basis for repurchase does not exist and will continue to do so in the future. Merrill Lynch may reach settlements in the future if opportunities arise on terms it believes to be advantageous. With regard to Bank of America's settlement with The Bank of New York Mellon as trustee (the "BNY Mellon Settlement"), the court approval hearing began on June 3, 2013 in the New York Supreme Court, New York County, and additional hearing days are currently scheduled in September 2013. Although Bank of America and Merrill Lynch are not parties to the proceeding, certain of Bank of America's rights and obligations under the settlement agreement are conditioned on final court approval of the settlement. For further information on the BNY Mellon Settlement, see Note 14 to the Consolidated Financial Statements in Merrill Lynch's 2012 Annual Report.

Unresolved Repurchase Claims

Unresolved representations and warranties repurchase claims represent the notional amount of repurchase claims made by counterparties, typically the outstanding principal balance or the unpaid principal balance at the time of default. In the case of first-lien mortgages, this amount is significantly greater than the expected loss amount due to the benefit of collateral and, in some cases, mortgage insurance or mortgage guarantee payments. Claims received from a counterparty remain outstanding until the underlying loan is repurchased, the claim is rescinded by the counterparty, or the claim is otherwise resolved.

The notional amount of unresolved claims from private-label securitization trustees, whole-loan investors and others totaled \$7.2 billion at June 30, 2013 compared with \$5.8 billion at December 31, 2012. The increase in the notional amount of unresolved claims is primarily due to continued submissions of claims by private-label securitization trustees, claim quality and, therefore, claims resolution, and the lack of an established process to resolve disputes related to these claims. Merrill Lynch anticipated an increase in aggregate non-GSE claims at the time of the BNY Mellon Settlement in June 2011, and such increase in aggregate non-GSE claims was taken into consideration in developing the increase in Merrill Lynch's representations and warranties liability at that time. Merrill Lynch expects unresolved repurchase claims related to private-label securitizations to continue to increase as claims continue to be submitted by private-label securitization trustees, and there is not an established process for the ultimate resolution of claims on which there is a disagreement.

The table below presents unresolved representations and warranties claims by counterparty at June 30, 2013 and December 31, 2012. The unresolved repurchase claims include only claims where Merrill Lynch believes that the counterparty has a basis to submit claims. During the three months ended June 30, 2013, Merrill Lynch received \$641 million of new repurchase claims, which consisted of approximately \$613 million from private-label securitization trustees and \$28 million from GSEs.

Unresolved Repurchase Claims by Counterparty

(dollars in millions)

	June 30, 2013		December 31, 2012	
GSEs	\$	46	\$	93
Monoline		146		147
Whole-loan investors, private-label securitization trustees and other		7,227		5,805
Total	\$	7,419	\$	6,045

Of the \$7.4 billion of total unresolved repurchase claims as of June 30, 2013, Merrill Lynch believes that for \$7.1 billion, a valid defect has not been identified which would constitute an actionable breach of representations and warranties. The remaining \$0.3 billion of claims are in the process of review. When a claim has been denied and there has not been communication with the counterparty for six months, Merrill Lynch views these claims as inactive; however, they remain in the unresolved repurchase claims balance until resolution.

In addition to, and not included in, the total unresolved repurchase claims above, there are \$1.2 billion of repurchase demands from a master servicer where Merrill Lynch believes the claimant has not satisfied the contractual thresholds to direct the securitization trustee to take action and/or that these demands are otherwise procedurally or substantively invalid. Merrill Lynch does not believe the \$1.2 billion of demands received represents valid repurchase claims, and therefore it is not possible to predict the resolution with respect to such demands.

Cash Settlements

As presented in the table below, during the three and six months ended June 30, 2013, Merrill Lynch paid \$70 million and \$91 million to resolve \$71 million and \$87 million, respectively, of repurchase claims through repurchase or reimbursement to investors or securitization trusts for losses they incurred, resulting in a loss on the related loans at the time of repurchase or reimbursement of \$61 million and \$79 million, respectively. During the three and six months ended June 30, 2012, Merrill Lynch paid \$18 million and \$29 million to resolve \$20 million and \$31 million, respectively, of repurchase claims through repurchase or reimbursement to investors or securitization trusts for losses they incurred, resulting in a loss on the related loans at the time of repurchase or reimbursement of \$12 million and \$23 million, respectively.

(dollars in millions)

	2013				2012			
	Three Months Ended June 30		Six Months Ended June 30		Three Months Ended June 30		Six Months Ended June 30	
Claims resolved ⁽¹⁾	\$	71	\$	87	\$	20	\$	31
Repurchases	\$	10	\$	13	\$	7	\$	7
Indemnification payments		60		78		11		22
Total	\$	70	\$	91	\$	18	\$	29

⁽¹⁾ Represents unpaid principal balance.

Liability for Representations and Warranties

The liability for representations and warranties is included in Interest and other payables on the Condensed Consolidated Balance Sheets, and the related provision is included in Non-interest expenses on the Condensed Consolidated Statements of Earnings (Loss). The liability for representations and warranties is established when those obligations are both probable and reasonably estimable.

Merrill Lynch's estimated liability at June 30, 2013 for representations and warranties exposures and the corresponding range of possible loss considers, and is necessarily dependent on, and limited by, a number of

factors, including, depending on the counterparty, actual defaults, projected future defaults, historical loss experience, estimated home prices, other economic conditions, estimated probability that a repurchase claim will be received, including consideration of whether presentation thresholds will be met, number of payments made by the borrower prior to default and estimated probability that a loan will be required to be repurchased as well as other relevant facts and circumstances, such as bulk settlements, including those of its affiliates, and identity of the counterparty or type of counterparty, as Merrill Lynch believes appropriate.

Additional factors that impact the non-GSE representations and warranties liability and the portion of the estimated range of possible loss corresponding to non-GSE representations and warranties exposures include: (1) contractual material adverse effect requirements; (2) the representations and warranties provided; and (3) the requirement to meet certain presentation thresholds. For information on these factors, see Note 14 to the Consolidated Financial Statements included in Merrill Lynch's 2012 Annual Report.

Although Merrill Lynch continues to believe that presentation thresholds are a factor in the determination of probable loss, given the BNY Mellon Settlement, the estimated range of possible loss assumes that the presentation threshold can be met for all of the non-GSE securitization transactions. Claimants have come forward and Merrill Lynch believes it is probable that other claimants in certain types of securitizations may continue to come forward with claims that meet the requirements of the terms of the securitizations.

The table below presents a rollforward of the liability for representations and warranties and includes the provisions for representation and warranties exposure recorded in the three and six months ended June 30, 2013 and June 30, 2012.

(dollars in millions)

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Balance, beginning of period	\$ 2,008	\$ 2,847	\$ 2,011	\$ 2,847
Provision	(4)	(840)	11	(829)
Other net reductions	(63)	(16)	(81)	(27)
Balance, end of period	\$ 1,941	\$ 1,991	\$ 1,941	\$ 1,991

The estimate of the liability for representations and warranties is based on currently available information, significant judgment and a number of other factors that are subject to change. Changes to any one of these factors could significantly impact the estimate of the liability and could have a material adverse impact on Merrill Lynch's results of operations for any particular period.

Estimated Range of Possible Loss

The representations and warranties liability represents Merrill Lynch's best estimate of probable incurred losses as of June 30, 2013. However, it is reasonably possible that future representations and warranties losses may occur in excess of the amounts recorded for these exposures. In addition, the BNY Mellon Settlement did not provide sufficient experience related to certain private-label securitizations sponsored by whole-loan investors. As it relates to certain private-label securitizations sponsored by whole-loan investors and certain whole loan sales, it is not possible to determine whether a loss has occurred or is probable and, therefore, no representations and warranties liability has been recorded in connection with these transactions.

Merrill Lynch currently estimates that the range of possible loss for all representations and warranties exposures, consisting primarily of non-GSE exposures, could be up to \$1.1 billion over accruals at June 30, 2013, which remains the same as reported at March 31, 2013. This estimated range of possible loss related to representations and warranties exposures does not represent a probable loss and is based on currently available information, significant judgment, and a number of assumptions that are subject to change. Merrill Lynch's estimated range of possible loss related to representations and warranties exposures does not include possible losses related to monoline insurers.

Future provisions and/or ranges of possible loss for representations and warranties exposures may be significantly impacted if actual experiences are different from Merrill Lynch's assumptions in its predictive models, including, without limitation, those regarding the ultimate resolution of the BNY Mellon Settlement, estimated repurchase rates, economic conditions, estimated home prices, consumer and counterparty behavior, and a variety of other judgmental factors. Adverse developments with respect to one or more of the assumptions underlying the liability for representations and warranties and the corresponding estimated range of possible loss could result in significant increases to future provisions and/or this estimated range of possible loss. For example, an appellate court, in the context of claims brought by a monoline insurer, disagreed with the interpretation of an affiliate of Merrill Lynch that a loan must be in default in order to satisfy the underlying agreements' requirement that a breach have a material and adverse effect. If that decision is extended to non-monoline contexts, it could significantly impact the provision and/or Merrill Lynch's estimated range of possible loss.

Additionally, if court rulings related to monoline litigation, including one related to an affiliate of Merrill Lynch, that have allowed sampling of loan files instead of requiring a loan-by-loan review to determine if a representations and warranties breach has occurred, are followed generally by the courts in future monoline litigation, private-label securitization counterparties may view litigation as a more attractive alternative as compared to a loan-by-loan review. Finally, although Merrill Lynch believes that the representations and warranties typically given in non-GSE transactions are less rigorous and actionable than those given in GSE transactions, Merrill Lynch does not have significant experience resolving loan-level claims in non-GSE transactions to measure the impact of these differences on the probability that a loan will be required to be repurchased.

The liability for representations and warranties exposures and the corresponding estimated range of possible loss for these representations and warranties exposures do not include any losses related to litigation matters disclosed herein or in Note 14 to the Consolidated Financial Statements included in our 2012 Annual Report, nor do they include any potential securities law or fraud claims or potential indemnity or other claims against Merrill Lynch. Merrill Lynch is not able to reasonably estimate the amount of any possible loss with respect to any such securities law, fraud or other claims against Merrill Lynch (except to the extent reflected in the estimated range of possible loss for litigation and regulatory matters disclosed herein); however, such loss could be material.

Whole Loan Sales and Private-label Securitizations Experience

The majority of repurchase claims that Merrill Lynch has received are from private-label securitization trustees or whole-loan investors on loans sold by ML & Co.'s subsidiary, First Franklin. Merrill Lynch provided representations and warranties, and the whole-loan investors may retain those rights even when the loans were aggregated with other collateral into private-label securitizations sponsored by the whole-loan investors. Merrill Lynch reviews properly presented repurchase claims for these whole loans on a loan-by-loan basis. If, after Merrill Lynch's review, it does not believe a claim is valid, it will deny the claim and generally indicate a reason for the denial. When the counterparty agrees with Merrill Lynch's denial of the claim, the counterparty may rescind the claim. When there is disagreement as to the resolution of the claim, meaningful dialogue and negotiation between the parties are generally necessary to reach a resolution on an individual claim. Generally, a whole-loan investor is engaged in the repurchase process and Merrill Lynch and the whole-loan investor reach resolution, either through loan-by-loan negotiation or at times, through a bulk settlement. Although the timeline for resolution varies, once an actionable breach is identified on a given loan, settlement is generally reached as to that loan within 60 to 90 days. When a claim has been denied and Merrill Lynch does not have communication with the counterparty for six months, Merrill Lynch views these claims as inactive; however, they remain in the unresolved repurchase claims balance until resolution.

In private-label securitizations, certain presentation thresholds need to be met in order for investors to direct a trustee to bring repurchase claims. Merrill Lynch and its affiliates have had limited experience with loan-level private-label securitization repurchases as the number of valid repurchase claims received has been limited. In the three months ended June 30, 2013, Merrill Lynch received \$0.6 billion of new repurchase claims, primarily from private-label securitization trustees. Over time, there has been an increase in requests for loan files from certain private-label securitization trustees. Merrill Lynch believes it is likely that these requests will lead to a continued increase in repurchase claims from private-label securitization trustees with standing to bring such claims. In addition, private label securitization trustees may have obtained loan files through other means, including litigation and administrative subpoenas. The representations and warranties, as governed by the private-label securitization agreements, generally require that counterparties have the ability to both assert a claim and actually prove that a loan has an actionable defect under the applicable contracts. While Merrill Lynch believes the agreements for private-label securitizations generally contain less rigorous representations and warranties and place higher burdens on claimants seeking repurchases than the express provisions of comparable agreements with the GSEs, without regard to any variations that may have arisen as a result of dealing with the GSEs, the agreements generally include a representation that underwriting practices were prudent and customary. In the case of private-label securitization trustees, there is currently no established process in place for the parties to reach a conclusion on an individual loan if there is a disagreement on the resolution of the claim.

As of June 30, 2013, the notional amount of unresolved repurchase claims submitted by private-label securitization trustees or whole-loan investors was approximately \$7.2 billion. Merrill Lynch has performed an initial review with respect to \$6.9 billion of these claims and does not believe a valid basis for repurchase has been established by the claimant, and is still in the process of reviewing the remaining \$0.3 billion of these claims.

Note 15. Employee Benefit Plans

Merrill Lynch provides pension and other postretirement benefits to its employees worldwide through sponsorship of defined contribution pension, defined benefit pension and other postretirement plans. These plans vary based on the country and local practices. The Bank of America Corporation Corporate Benefits Committee has overall responsibility for the administration of all of Merrill Lynch's employee benefit plans. Merrill Lynch continues as the plan sponsor. See Note 15 to the Consolidated Financial Statements contained in the 2012 Annual Report for a complete discussion of employee benefit plans.

Defined Benefit Pension Plans

Merrill Lynch previously purchased an annuity contract that guarantees the payment of benefits vested under a U.S. defined benefit pension plan that was terminated (the "U.S. terminated pension plan") in accordance with the applicable provisions of ERISA. Merrill Lynch, under a supplemental agreement, may be responsible for, or benefit from, actual experience and investment performance of the annuity assets. Merrill Lynch made no contribution under this agreement for the three and six months ended June 30, 2013 and 2012. Contributions may be required in the future under this agreement.

The net periodic benefit (income) cost of the U.S. defined benefit pension plans, non-U.S. defined benefit pension plans and postretirement plans sponsored by Merrill Lynch for the three and six months ended June 30, 2013 and 2012 included the following components:

(dollars in millions)

	Three Months Ended June 30, 2013			Six Months Ended June 30, 2013		
	U.S. Defined Benefit Pension Plans	Non-U.S. Defined Benefit Pension Plans	Postretirement Plans ⁽¹⁾	U.S. Defined Benefit Pension Plans	Non-U.S. Defined Benefit Pension Plans	Postretirement Plans ⁽¹⁾
Service cost	\$ —	\$ 8	\$ 1	\$ —	\$ 16	\$ 2
Interest cost	19	21	2	39	43	5
Expected return on plan assets	(27)	(27)	—	(55)	(55)	—
Amortization of prior service cost	—	—	1	—	—	2
Amortization of net actuarial losses (gains)	3	—	(1)	6	1	(2)
Recognized gain due to settlements and curtailments	—	—	—	—	(7)	—
Net periodic benefit (income) cost	\$ (5)	\$ 2	\$ 3	\$ (10)	\$ (2)	\$ 7

⁽¹⁾Approximately 93% of the postretirement benefit obligation at June 30, 2013 relates to the U.S. postretirement plan.

(dollars in millions)

	Three Months Ended June 30, 2012			Six Months Ended June 30, 2012		
	U.S. Defined Benefit Pension Plans	Non-U.S. Defined Benefit Pension Plans	Postretirement Plans ⁽¹⁾	U.S. Defined Benefit Pension Plans	Non-U.S. Defined Benefit Pension Plans	Postretirement Plans ⁽¹⁾
Service cost	\$ —	\$ 10	\$ 1	\$ —	\$ 19	\$ 2
Interest cost	23	21	4	45	41	8
Expected return on plan assets	(38)	(32)	—	(76)	(62)	—
Amortization of prior service cost	—	—	1	—	—	2
Amortization of net actuarial (gains) losses	—	(2)	2	1	(4)	4
Net periodic benefit (income) cost	\$ (15)	\$ (3)	\$ 8	\$ (30)	\$ (6)	\$ 16

⁽¹⁾Approximately 96% of the postretirement benefit obligation at June 30, 2012 relates to the U.S. postretirement plan.

For the full year 2013, Merrill Lynch expects to contribute approximately \$1 million to its nonqualified pension plans, \$96 million to its non-U.S. pension plans, and \$19 million to its postretirement health and life plans. Through the second quarter of 2013, Merrill Lynch has contributed \$64 million to the non-U.S. pension plans and \$10 million to its postretirement health and life plans.

Note 16. Regulatory Requirements

As a wholly-owned subsidiary of Bank of America, a bank holding company that is also a financial holding company, Merrill Lynch is subject to the oversight of, and inspection by, the Board of Governors of the Federal Reserve System.

Certain U.S. and non-U.S. subsidiaries are subject to various securities and banking regulations and capital adequacy requirements promulgated by the regulatory and exchange authorities of the countries in which they operate. These regulatory restrictions may impose regulatory capital requirements and limit the amounts that these subsidiaries can pay in dividends or advance to ML & Co. The principal regulated subsidiaries of ML & Co. are discussed below.

Securities Regulation

As a registered broker-dealer and futures commission merchant, MLPF&S is subject to the uniform net capital requirements of SEC Rule 15c3-1, and the Commodities Futures Trading Commission's ("CFTC") Regulation 1.17. MLPF&S has elected to compute the minimum capital requirement in accordance with the "Alternative Net Capital Requirement" as permitted by SEC Rule 15c3-1. At June 30, 2013, MLPF&S's regulatory net capital as defined by Rule 15c3-1 was \$11.6 billion and exceeded the minimum requirement of \$793 million by \$10.9 billion.

In accordance with the Alternative Net Capital Requirement, MLPF&S is required to maintain tentative net capital in excess of \$1.0 billion, net capital in excess of \$500 million, and notify the SEC in the event its tentative net capital is less than \$5.0 billion. As of June 30, 2013, MLPF&S had tentative net capital and net capital in excess of the minimum and notification requirements.

Merrill Lynch International ("MLI"), a U.K. investment firm, is regulated by the FCA and the PRA and is subject to regulatory capital requirements. Financial resources, as defined, must exceed the total financial resources requirement set by the regulators. At June 30, 2013, MLI's financial resources were \$22.4 billion, exceeding the minimum requirement by \$5.2 billion.

Merrill Lynch Japan Securities Co., Ltd. ("MLJS"), a Japan-based regulated broker-dealer, is subject to capital requirements of the Japanese Financial Services Agency ("JFSA"). Net capital, as defined, must exceed 120% of the total risk equivalents requirement of the JFSA. At June 30, 2013, MLJS's net capital was \$2.4 billion, exceeding the minimum requirement by \$1.6 billion.

Banking Regulation

Merrill Lynch International Bank Limited ("MLIB"), an Ireland-based regulated bank, is subject to the capital requirements of the Central Bank of Ireland. MLIB is required to meet minimum regulatory capital requirements under the European Union ("EU") banking law as implemented in Ireland by the Central Bank of Ireland. At June 30, 2013, MLIB's financial resources were \$13.5 billion, exceeding the minimum requirement by \$4.9 billion.

Note 17. Sale of International Wealth Management Business

In 2012, Merrill Lynch entered into agreements to sell its International Wealth Management ("IWM") business based outside of the U.S., subject to regulatory approval in multiple jurisdictions, and the first series of closings occurred in February 2013. During the six months ended June 30, 2013, Merrill Lynch recorded a loss of \$71 million associated with certain initial costs incurred with the sale of the IWM business. Additional closings occurred in July 2013, which resulted in a gain of approximately \$90 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This report on Form 10-Q, the documents that it incorporates by reference and the documents into which it may be incorporated by reference may contain, and from time to time Merrill Lynch & Co., Inc. ("ML & Co. and, together with its subsidiaries, "Merrill Lynch," the "Company," "we," "our" or "us") and its management may make certain statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. When used in this report, "we," "us" and "our" may refer to ML & Co. individually, ML & Co. and its subsidiaries, or certain of ML & Co.'s subsidiaries or affiliates. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as "expects," "anticipates," "believes," "estimates," "targets," "intends," "plans," "goal" and other similar expressions or future or conditional verbs such as "will," "may," "might," "should," "would" and "could." The forward-looking statements made represent the current expectations, plans or forecasts of Merrill Lynch regarding its future results and revenues and future business and economic conditions more generally, including statements concerning: expectations regarding the impact of United Kingdom ("U.K.") corporate income tax rate reductions on Merrill Lynch's income tax expense; the expectation that unresolved repurchase claims related to private-label securitization trustees will continue to increase; the resolution of representations and warranties repurchase and other claims; the final resolution of the BNY Mellon Settlement; the estimates of liability and range of possible loss for representations and warranties repurchase claims; the possibility that future representations and warranties losses may occur in excess of the amounts recorded for those exposures; Merrill Lynch's intention to vigorously contest any requests for repurchase for which it concludes that a valid basis does not exist; that swap dealers will continue to be subject to additional Commodity Futures Trading Commission rules as and when such rules take effect; the possibility that Merrill Lynch will need to register additional entities as swap dealers and major swap participants; the possibility that Merrill Lynch will be required to restructure certain businesses as a result of final derivatives regulations that impose additional operational and compliance costs; effects of the ongoing debt crisis in certain European countries, including the expectation of continued market volatility, the expectation that Merrill Lynch will continue to support client activities in the region and that exposures may vary over time as Merrill Lynch monitors the situation and manages its risk profile; liquidity; the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act; that it is our objective to maintain high-quality credit ratings; the estimated range of possible loss from and the impact on Merrill Lynch of various legal proceedings discussed in Note 14 to the Condensed Consolidated Financial Statements; Bank of America's intentions to streamline its organizational structure and reduce complexity and costs by reducing the number of its subsidiaries, and that Bank of America may, subject to applicable regulatory approvals, consents and other conditions of closing, merge ML & Co. with and into Bank of America Corporation and that such a merger may occur as early as the fourth quarter of 2013; and other matters relating to Merrill Lynch. The foregoing is not an exclusive list of all forward-looking statements we make. These statements are not guarantees of future results or performance and involve certain risks, uncertainties and assumptions that are difficult to predict and often are beyond our control. Actual outcomes and results may differ materially from those expressed in, or implied by, any of these forward-looking statements.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties more fully discussed elsewhere in this report, under Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2012, and in any of ML & Co.'s subsequent Securities and Exchange Commission ("SEC") filings: Merrill Lynch's ability to resolve its representations and warranties repurchase claims made by monolines and private-label and other investors, including as a result of any adverse court rulings, and the chance that we could face related securities, fraud, indemnity or other claims from one or more of the monolines or private-label and other investors; uncertainties about the financial stability of several countries in the European Union (the "EU"), the risk that those countries may default on their sovereign debt and related stresses on financial markets, the Euro and the EU and Merrill Lynch's exposures to such risks, including direct, indirect and operational; the negative impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act on Merrill Lynch's businesses and earnings, including as a result

of additional regulatory interpretation and rulemaking; adverse changes to Merrill Lynch's credit ratings from the major credit rating agencies; estimates of the fair value of certain of Merrill Lynch's assets and liabilities; the possibility that the European Commission will impose remedial measures in relation to its investigation of competitive practices; the outcome of any regulatory or governmental investigations; unexpected claims, damages and fines resulting from pending or future litigation and regulatory proceedings; decisions to downsize, sell or close units or otherwise change the business mix of Merrill Lynch; and other similar matters.

Forward-looking statements speak only as of the date they are made, and Merrill Lynch undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

The Notes to the Condensed Consolidated Financial Statements referred to in Management's Discussion and Analysis of Financial Condition and Results of Operations (the "MD&A") are incorporated by reference into MD&A. Certain prior-period amounts have been reclassified in order to conform with the current period presentation.

Introduction

Merrill Lynch was founded in 1914 and became a publicly traded company on June 23, 1971. In 1973, the holding company ML & Co. was created. Through our subsidiaries, we are one of the world's leading capital markets, advisory and wealth management companies. We are a leading global trader and underwriter of securities and derivatives across a broad range of asset classes, and we serve as a strategic advisor to corporations, governments, institutions and individuals worldwide. On January 1, 2009, Merrill Lynch was acquired by, and became a wholly-owned subsidiary of, Bank of America Corporation ("Bank of America").

As part of Bank of America's efforts to streamline its organizational structure and reduce complexity and costs, it has reduced and intends to continue to reduce the number of its subsidiaries, including through intercompany mergers. In connection with these efforts, Bank of America may merge ML & Co. directly into Bank of America Corporation and such a merger may occur as early as the fourth quarter of 2013. Under Delaware law, as a result of such a merger, Bank of America Corporation would assume all of ML & Co.'s obligations, including its outstanding U.S. and non-U.S. debt securities, its obligations with respect to outstanding trust preferred securities and ML & Co. guarantees of outstanding non-U.S. debt securities issued by ML & Co. subsidiaries. Also, as a result of such a merger, ML & Co.'s reporting obligations under the Securities Exchange Act of 1934 would terminate and ML & Co. would cease to separately file reports with the SEC. There can be no assurance that such a merger will occur, and if it does, the timing thereof. Any such merger would be subject to applicable regulatory approvals, consents and other conditions of closing.

Intragroup Reorganization

On November 1, 2012, in connection with an intragroup reorganization involving Bank of America and a number of its subsidiaries, Merrill Lynch acquired two affiliated companies and their respective subsidiaries from Bank of America. The acquisition was effected through a non-cash capital contribution from Bank of America. In accordance with Accounting Standards Codification ("ASC") 805, *Business Combinations*, Merrill Lynch's Condensed Consolidated Financial Statements appearing in Part I, Item 1 of this Form 10-Q include the historical results of the acquired affiliated companies and their subsidiaries as if the transaction had occurred as of January 1, 2009, the date at which all the affected entities were first under the common control of Bank of America. Merrill Lynch has recorded the assets and liabilities acquired in connection with the transaction at their historical carrying values.

Business Segments

Pursuant to ASC 280, *Segment Reporting*, operating segments represent components of an enterprise for which separate financial information is available that is regularly evaluated by the chief operating decision maker in

determining how to allocate resources and in assessing performance. The business activities of Merrill Lynch are included within certain of the operating segments of Bank of America. Detailed financial information of the nature that could be used to allocate resources and assess the performance and operations for components of Merrill Lynch, however, is not provided to Merrill Lynch's chief operating decision maker. As a result, Merrill Lynch does not contain any identifiable operating segments under Segment Reporting, and therefore the financial information of Merrill Lynch is presented as a single segment.

Form 10-Q Presentation

As a result of the acquisition of Merrill Lynch by Bank of America, certain information is not included in this Quarterly Report on Form 10-Q as permitted by General Instruction H of Form 10-Q. We have also abbreviated the MD&A as permitted by General Instruction H.

EXECUTIVE OVERVIEW

We reported net income of \$967 million and \$760 million for the three and six months ended June 30, 2013, respectively, compared with net income of \$988 million for the three months ended June 30, 2012 and a net loss of \$618 million for the six months ended June 30, 2012. Revenues, net of interest expense ("net revenues") for the three and six months ended June 30, 2013 were \$6.3 billion and \$12.7 billion, respectively, compared with \$5.1 billion and \$9.9 billion for the three and six months ended June 30, 2012, respectively. Our pre-tax earnings were \$752 million and \$416 million for the three and six months ended June 30, 2013, respectively. We recorded pre-tax earnings of \$218 million and a pre-tax loss of \$1.6 billion in the three and six months ended June 30, 2012, respectively.

Our net earnings for the three months ended June 30, 2013 reflected an increase in net revenues, which was primarily driven by higher investment banking revenues and lower net interest expenses. Our non-interest expenses also increased, primarily reflecting an expense reduction of \$840 million that was recorded in the three months ended June 30, 2012. In that period, our liability for representations and warranties exposures decreased because levels of claims and file requests with certain counterparties were less than originally anticipated, and a portion of the loss was no longer deemed probable. Our net results for the three months ended June 30, 2013 also included a less favorable effective income tax rate as compared with the prior year period.

The increase in our net earnings for the six months ended June 30, 2013 was primarily driven by an increase in our net revenues. Such increase was primarily attributable to higher principal transactions revenues associated with the valuation of certain of our liabilities as compared with the prior year period. During the six months ended June 30, 2013, we recorded net gains of \$12 million due to the impact of the widening of Merrill Lynch's credit spreads on the carrying value of certain of our long-term debt liabilities, primarily structured notes, as compared with net losses of \$2.2 billion recorded in the prior year period due to the narrowing of our credit spreads. We also recorded gains due to the impact of net valuation adjustments associated with changes in our credit spreads on the fair value of certain derivative liabilities (i.e., the debit valuation adjustment or "DVA") of \$3 million in the six months ended June 30, 2013 as compared with DVA losses of \$770 million in the six months ended June 30, 2012. These increases in principal transactions revenues were partially offset by lower revenues generated by our fixed income trading businesses. As discussed above, our non-interest expenses increased primarily due to a \$0.8 billion expense reduction recorded in the six months ended June 30, 2012 to lower our liability for representations and warranties exposures.

Transactions with Bank of America

We have entered into various transactions with Bank of America, including transactions in connection with certain sales and trading and financing activities, as well as the allocation of certain shared services. Total net revenues and non-interest expenses related to transactions with Bank of America for the three months ended June 30, 2013 were \$546 million and \$545 million, respectively. Such net revenues and non-interest expenses for the six months ended June 30, 2013 were \$851 million and \$1,107 million, respectively. Total net revenues and non-interest expenses related to transactions with Bank of America for the three months ended June 30, 2012 were \$349 million and \$656 million, respectively. Such net revenues and non-interest expenses for the six months ended June 30, 2012 were \$619 million and \$1,082 million, respectively. Net revenues and non-interest expenses for both periods included intercompany service fee revenues and expenses from Bank of America associated with allocations of certain centralized or shared business activities between Merrill Lynch and Bank of America. See Note 2 to the Condensed Consolidated Financial Statements for further information.

During the three and six months ended June 30, 2013, Merrill Lynch acquired certain residential mortgage loans from Bank of America. Such loans had an aggregate unpaid principal balance of \$5.3 billion and an aggregate carrying value of \$4.2 billion as of June 30, 2013. See Note 10 to the Condensed Consolidated Financial Statements for further information.

Other Events

U.K. Corporate Income Tax Rate Change

On July 17, 2013, the U.K. 2013 Finance Bill was enacted, which reduced the U.K. corporate income tax rate by three percent to 20%. The first two percent of the reduction will become effective on April 1, 2014 and the additional one percent reduction will be effective on April 1, 2015. These reductions will favorably affect income tax expense on future U.K. earnings, but also require us to remeasure, in the period of enactment, our U.K. net deferred tax assets using the lower tax rates. As a result, in the quarter ending September 30, 2013, we will record a charge to income tax expense of approximately \$1.1 billion in the aggregate for these reductions.

Regulatory Matters

U.K. Regulatory Framework

Prior to April 1, 2013, our financial services operations in the U.K. were subject to regulation by and supervision of the Financial Services Authority (the "FSA"). On April 1, 2013, the U.K. abolished the FSA, replacing it with two new regulators, the Prudential Regulatory Authority (the "PRA") and the Financial Conduct Authority (the "FCA"). The PRA operates as a subsidiary of the Bank of England with responsibility for prudential regulation and supervision of banks, insurers and systemically significant investment firms. The FCA regulates and supervises the market conduct of all U.K. financial firms and prudentially regulates those firms not within the scope of the PRA. Our financial services operations in the U.K. are now subject to regulation and supervision by both the PRA and FCA.

Financial Reform Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Financial Reform Act"), which was signed into law on July 21, 2010, enacted sweeping financial regulatory reform and has altered and will continue to alter the way in which we conduct certain businesses, increase our costs and reduce our revenues. Many aspects of the Financial Reform Act remain subject to final rulemaking that will take effect over several years, making it difficult to anticipate the precise impact on us, our customers or the financial services industry.

Derivatives

Pursuant to the Financial Reform Act and subsequent Commodity Futures Trading Commission ("CFTC") rulemaking, we have registered certain of our subsidiaries as swap dealers with the CFTC and we may need to register additional entities as swap dealers or major swap participants as a result of the CFTC's July 2013 final cross-border guidance discussed below. Upon registration, swap dealers and major swap participants become subject to certain CFTC rules, including measures regarding clearing and exchange trading of certain derivatives, new capital and margin requirements, additional reporting, external and internal business conduct, swap documentation and portfolio compression and reconciliation requirements for derivatives. Most of these requirements, with the exception of margin, capital and exchange trading, have gone into effect, except with respect to swaps between our non-U.S. swap dealers and non-U.S. branches of Bank of America, N.A. with certain non-U.S. counterparties. Swap dealers are now required to clear certain interest rate and index credit derivative transactions when facing all counterparty types other than corporate counterparties and third-party subaccounts and, after September 9, 2013, will be required to clear all such interest rate and index credit derivative transactions, unless either counterparty qualifies for the "end-user exception" to the clearing mandate. These products will also become subject to exchange trading requirements beginning in the fourth quarter of 2013. The timing for margin implementation remains unknown. The Financial Reform Act and subsequent rulemaking by the Office of the Comptroller of the Currency also require Bank of America, N.A. to "push out" certain derivatives activity to one or more non-bank affiliates, including, potentially, Merrill Lynch and Co., Inc. and affiliates, by July 2015.

On July 12, 2013, the CFTC provided temporary exemptive relief from application of derivatives requirements of the Financial Reform Act for certain non-U.S. derivatives activity and adopted a final cross-border framework to apply CFTC requirements outside the U.S. Europe and various G-20 jurisdictions are also enacting their own derivatives regulations, although the overall pace of non-U.S. reform is behind that of the U.S. The ultimate impact on us of the derivatives regulations that have not yet been finalized and the time it will take us to comply with unfinalized requirements remains uncertain. Final regulations will impose additional operational and compliance costs on us, may require us to restructure certain businesses and may negatively impact our results of operations.

For information regarding other significant regulatory matters, see Item 1A. "Risk Factors" in our 2012 Annual Report on Form 10-K.

Sale of International Wealth Management Business

In 2012, we entered into agreements to sell our International Wealth Management ("IWM") business based outside of the U.S., subject to regulatory approval in multiple jurisdictions, and the first of a series of closings occurred in February 2013. During the six months ended June 30, 2013, we recorded a loss of \$71 million associated with certain initial costs incurred with the sale of the IWM business. Additional closings occurred in July 2013, which resulted in a gain of approximately \$90 million.

MBIA Settlement

On May 7, 2013, Bank of America entered into a comprehensive settlement (the "MBIA Settlement") with MBIA, Inc. and certain of its affiliates ("MBIA") to resolve all outstanding litigation between the parties, as well as other claims between the parties. Under the MBIA Settlement, all pending litigation between the parties was dismissed and each party received a global release of those claims. In connection with the MBIA Settlement, the parties also terminated various credit default swap ("CDS") transactions in connection with commercial mortgage-backed securities ("CMBS"). Collectively, those CDS transactions had a notional value of \$7.4 billion and a fair value of \$813 million as of March 31, 2013, and, in connection with the MBIA Settlement, MBIA terminated its CDS with Merrill Lynch, and Bank of America paid Merrill Lynch the value of such terminated CDS.

For further information, see "Results of Operations - Six Months Ended June 30, 2013 Compared With Six Months Ended June 30, 2012" and Note 6 to the Condensed Consolidated Financial Statements.

The other-than-temporary impairment losses were \$0 million and \$0 million for the three and six months ended June 30, 2013, respectively, and \$4 million and \$6 million for the three and six months ended June 30, 2012, respectively.

N/M = Not meaningful.

Quarterly Consolidated Results of Operations

Our net income for the three months ended June 30, 2013 was \$967 million compared with net income of \$988 million for the three months ended June 30, 2012. Net revenues for the three months ended June 30, 2013 were \$6.3 billion compared with \$5.1 billion in the prior year period.

Three Months Ended June 30, 2013 Compared With Three Months Ended June 30, 2012

Principal transactions revenues include both realized and unrealized gains and losses on trading assets and trading liabilities and investment securities classified as trading. Principal transactions revenues were \$1.9 billion in the three months ended June 30, 2013, a decline of 2% from the prior year period. The decline was primarily due to lower revenues associated with certain structured equity financing activities; as discussed below, this reduction in principal transactions revenue was offset by a reduction in net interest expense. Such decline in principal transactions revenue was partially offset by higher trading revenues from equity cash and derivative products, as well as by higher revenues from DVA. We recorded DVA gains of \$80 million in the three months ended June 30, 2013 as compared with DVA losses of \$73 million in the three months ended June 30, 2012.

Net interest income (expense) is a function of (i) the level and mix of total assets and liabilities, including trading assets, deposits, financing and lending transactions, and trading strategies associated with our businesses, and (ii) the prevailing level, term structure and volatility of interest rates. Net interest income (expense) is an integral component of trading activity. In assessing the profitability of our client facilitation and trading activities, we view principal transactions and net interest income (expense) in the aggregate as net trading revenues. Changes in the composition of trading inventories and hedge positions can cause the mix of principal transactions and net interest income (expense) to fluctuate from period to period. Net interest expense was \$269 million for the three months ended June 30, 2013 compared with net interest expense of \$953 million in the three months ended June 30, 2012. The fluctuation was primarily due to higher net interest revenues generated from our trading activities, including a decline in net interest expense associated with certain structured equity financing activities. The effect of the lower net interest expense associated with the structured equity financing activities is offset within principal transactions revenues. Lower financing costs, partially due to a lower level of outstanding long-term borrowings, also contributed to the decline in net interest expense.

Commissions revenues primarily arise from agency transactions in listed and OTC equity securities and commodities and options. Commissions revenues also include distribution fees for promoting and distributing mutual funds. Commissions revenues were \$1.4 billion for the three months ended June 30, 2013, an increase of 14% from the prior year period. The increase was primarily attributable to higher revenues from our global equity products business and our global wealth management business.

Managed account and other fee-based revenues primarily consist of asset-priced portfolio service fees earned from the administration of separately managed and other investment accounts for retail investors, annual account fees, and certain other account-related fees. Managed account and other fee-based revenues were \$1.5 billion for the three months ended June 30, 2013, an increase of 5% from the prior year period. The increase was attributable to higher fee-based revenues from our global wealth management activities, driven by increased client assets, resulting from increased client flows and higher market levels.

Investment banking revenues primarily include fees for the underwriting and distribution of debt, equity and loan products, and fees for advisory services. Total investment banking revenues were \$1.4 billion for the three months ended June 30, 2013, an increase of 36% from the prior year, primarily due to higher underwriting fees during the current quarter. Underwriting fees increased 64% to \$1.2 billion, which was driven by higher revenues from both debt and equity issuances. Revenues from advisory services decreased 25% to \$252 million.

Earnings from equity method investments include our pro rata share of income and losses associated with investments accounted for under the equity method of accounting. Earnings from equity method investments were \$4 million for the three months ended June 30, 2013 compared with negative \$29 million for the prior year period.

[Table of Contents](#)

The increase reflected higher revenues from certain investments. See Note 8 to the Consolidated Financial Statements included in our 2012 Annual Report on Form 10-K for further information on equity method investments.

Intercompany service fee revenues from Bank of America include revenues associated with the provision of certain shared business activities with Bank of America. Intercompany service fee revenues from Bank of America were \$294 million in the three months ended June 30, 2013 compared with \$205 million in the prior year period. The increase was driven by higher fees earned from Bank of America in connection with certain shared brokerage and trading activities.

Other revenues include gains and losses on investment securities, including certain available-for-sale securities, gains and losses on private equity investments, and gains and losses on loans and other miscellaneous items. Other revenues were \$108 million for the three months ended June 30, 2013 compared with \$252 million for the three months ended June 30, 2012. Other revenues for the three months ended June 30, 2012 included a gain of \$77 million resulting from the repurchase and retirement of certain of our long-term borrowings and a gain of \$145 million from the sale of an office building.

Compensation and benefits expenses were \$3.5 billion in the three months ended June 30, 2013, a decrease of 1% from the prior year period.

Non-compensation expenses were \$2.1 billion in the three months ended June 30, 2013 and were \$1.3 billion in the three months ended June 30, 2012. Non-compensation expenses for the three months ended June 30, 2012 included an expense reduction of \$840 million to lower our liability for representations and warranties exposures. Excluding this item, non-compensation expenses for the three months ended June 30, 2012 were \$2.2 billion. Brokerage, clearing and exchange fees increased 19% to \$289 million, which reflected higher exchange and other brokerage fees due to higher transaction volumes. Professional fees decreased 9% to \$206 million, primarily reflecting lower legal and consulting fees. Intercompany service fee expenses from Bank of America were \$434 million in the three months ended June 30, 2013 compared with \$538 million in the prior year period. The decrease reflected a lower level of allocated expenses from Bank of America.

The income tax benefit for the three months ended June 30, 2013 was \$215 million compared with an income tax benefit of \$770 million for the three months ended June 30, 2012. The effective tax rate was (28.6)% for the three months ended June 30, 2013 compared with (353.2)% in the prior year period.

The income tax benefit for the three months ended June 30, 2013 was driven primarily by an increase in tax benefits from the 2012 non-U.S. restructurings as compared to amounts previously recognized and an increase in our accumulated earnings presumed to be permanently reinvested in non-U.S. subsidiaries.

The income tax benefit for the three months ended June 30, 2012 resulted from adjusting how the income tax benefit of the first quarter 2012 pre-tax loss is spread over the full year pre-tax results in accordance with applicable accounting standards.

On July 17, 2013, the U.K. 2013 Finance Bill was enacted, which reduced the U.K. corporate income tax rate by three percent to 20%. For additional information, see "Executive Overview - U.K. Corporate Income Tax Rate Change."

Year-To-Date Consolidated Results of Operations

Our net income for the six months ended June 30, 2013 was \$760 million compared with a net loss of \$618 million for the six months ended June 30, 2012.

Six Months Ended June 30, 2013 Compared With Six Months Ended June 30, 2012

Our net revenues for the six months ended June 30, 2013 were \$12.7 billion compared with \$9.9 billion in the six months ended June 30, 2012. The increase primarily reflected higher principal transactions and investment banking revenues and lower net interest expenses, partially offset by lower other revenues. Principal transactions revenues were \$4.0 billion for the six months ended June 30, 2013, an increase of \$2.3 billion from the prior year period. The increase included the impact of higher revenues associated with the valuation of certain of our liabilities. In the six months ended June 30, 2013, we recorded net gains of \$12 million due to the impact of the widening of Merrill Lynch's credit spreads on the carrying value of certain of our long-term debt liabilities, primarily structured notes, as compared with net losses of \$2.2 billion recorded in the prior year period due to the narrowing of our credit spreads. We also recorded gains from DVA of \$3 million in the six months ended June 30, 2013 as compared with DVA losses of \$770 million in the six months ended June 30, 2012. These increases in principal transactions revenues were partially offset by lower fixed income trading revenues, particularly in our credit, commodity and mortgage product businesses. Investment banking revenues were \$2.8 billion and increased 26% from the prior year period, primarily reflecting higher underwriting fees from both debt and equity issuances. Net interest expense was \$98 million in the six months ended June 30, 2013 compared with \$969 million in the prior year period. The fluctuation was primarily due to higher net interest revenues generated from our trading activities, as well as lower financing costs. Other revenues were negative \$274 million in the six months ended June 30, 2013 compared with positive \$1.0 billion in the prior year period. Other revenues for the six months ended June 30, 2013 included a charge of approximately \$450 million to write-down a receivable from MBIA, Inc., as well as a loss of \$71 million associated with certain initial costs incurred with the sale of our IWM business. Other revenues for the six months ended June 30, 2012 included gains of \$405 million resulting from the repurchase and retirement of certain of our long-term borrowings and a gain of \$145 million from the sale of an office building.

Compensation and benefits expenses were \$8.0 billion for the six months ended June 30, 2013, a marginal decrease from the prior year period.

Non-compensation expenses were \$4.2 billion in the six months ended June 30, 2013 compared with \$3.4 billion in the prior year period. As discussed above, non-compensation expenses for the six months ended June 30, 2012 included an expense reduction of \$0.8 billion to lower our liability for representations and warranties. Excluding this item, non-compensation expenses were \$4.2 billion in the six months ended June 30, 2012. Communications and technology expenses decreased 11% to \$741 million due primarily to lower technology equipment and systems consulting costs. Brokerage, clearing and exchange fees increased 13% to \$593 million, which reflected higher exchange and other brokerage fees due to higher transaction volumes.

The income tax benefit was \$344 million for the six months ended June 30, 2013 compared with an income tax benefit of \$981 million for the six months ended June 30, 2012, resulting in effective tax rates of (82.7)% and 61.4%, respectively. The income tax benefit for the six months ended June 30, 2013 reflected an increase in tax benefits from the 2012 non-U.S. restructurings as compared to amounts previously recognized and an increase in our accumulated earnings presumed to be permanently reinvested in non-U.S. subsidiaries. The income tax benefit for the six months ended June 30, 2012 was driven primarily by net recurring preference items (such as tax exempt income) and a true-up of final settlement of certain income tax audits.

OFF-BALANCE SHEET EXPOSURES

As a part of our normal operations, we enter into various off-balance sheet arrangements that may require future payments. The table and discussion below outline our significant off-balance sheet arrangements, as well as their future expirations, as of June 30, 2013. See Note 14 to the Condensed Consolidated Financial Statements for further information.

(dollars in millions)

	Expiration				
	Maximum Payout	Less than 1 Year	1 - 3 Years	3 - 5 Years	Over 5 Years
Standby liquidity facilities	\$ 107	\$ 91	\$ 3	\$ —	\$ 13
Residual value guarantees	320	320	—	—	—
Standby letters of credit and other guarantees	359	257	68	21	13

Standby Liquidity Facilities

We provide standby liquidity facilities primarily to certain unconsolidated municipal bond securitization variable interest entities (“VIEs”). In these arrangements, we are required to fund these standby liquidity facilities if certain contingent events take place (e.g., a failed remarketing) and in certain cases if the fair value of the assets held by the VIE declines below the stated amount of the liquidity obligation. The potential exposure under the facilities is mitigated by economic hedges and/or other contractual arrangements entered into by Merrill Lynch. See Note 9 to the Condensed Consolidated Financial Statements for further information.

Residual Value Guarantees

At June 30, 2013, residual value guarantees of \$320 million consist of amounts associated with certain power plant facilities. Payments under these guarantees would be required only if the fair value of such assets declined below their guaranteed value. As of June 30, 2013, no payments have been made under these guarantees, and (i) Merrill Lynch believes that the estimated fair value of such assets was in excess of their guaranteed value and/or (ii) there is a very remote risk of future payment pursuant to the remaining contractual provisions.

Standby Letters of Credit

At June 30, 2013, we provided guarantees to certain counterparties in the form of standby letters of credit in the amount of \$0.4 billion.

Representations and Warranties*Background*

In prior years, Merrill Lynch and certain of its subsidiaries, including First Franklin Financial Corporation (“First Franklin”), sold pools of first-lien residential mortgage loans and home equity loans as private-label securitizations (in a limited number of these securitizations, monolines insured all or some of the securities) or in the form of whole loans. Most of the loans sold in the form of whole loans were subsequently pooled into private-label securitizations sponsored by the third-party buyer of the whole loans. In addition, Merrill Lynch and First Franklin securitized first-lien residential mortgage loans generally in the form of mortgage-backed securities guaranteed by the government-sponsored enterprises (the “GSEs”). In connection with these transactions, we made various representations and warranties. Breaches of these representations and warranties may result in the requirement to repurchase mortgage loans or to otherwise make whole or provide other remedies to the GSEs, whole-loan investors, securitization trusts or monoline insurers (collectively, “repurchases”). In all such cases, we would be exposed to any credit loss on the repurchased mortgage loans after accounting for any mortgage insurance or mortgage guarantee payments that we may receive.

Subject to the requirements and limitations of the applicable sales and securitization agreements, these representations and warranties can be enforced by the GSEs, the whole-loan investor, the securitization trustee, or others as governed by the applicable agreement or, in a limited number of first-lien and home equity securitizations where monoline insurers have insured all or some of the securities issued, by the monoline insurer, where the contract so provides. In the case of private-label securitizations, the applicable agreements may permit investors, which may include the GSEs, with contractually sufficient holdings to direct or influence action by the securitization trustee. In the case of loans sold to parties other than the GSEs, the contractual liability to repurchase typically arises only if there is a breach of the representations and warranties that materially and adversely affects the interest of the investor, or investors, or of the monoline insurer (as applicable) in the loan. Contracts with the GSEs do not contain equivalent language.

For additional information about accounting for representations and warranties and our representations and warranties repurchase claims and exposures, see Note 14 to the Consolidated Financial Statements and Item 1A. "Risk Factors" in our 2012 Annual Report on Form 10-K.

Settlement Actions

We have vigorously contested any request for repurchase when we conclude that a valid basis for repurchase does not exist and will continue to do so in the future. We may reach settlements in the future if opportunities arise on terms we believe to be advantageous. Certain Merrill Lynch affiliates have settled, or entered into agreements to settle, certain bulk representations and warranties claims, including Bank of America's settlement with a trustee (the "Trustee") for certain private-label securitization trusts in the second quarter of 2011 (the "BNY Mellon Settlement").

The BNY Mellon Settlement, entered into in June 2011, is subject to final court approval and certain other conditions. The court approval hearing on the settlement began on June 3, 2013 in the New York Supreme Court, New York County, and additional hearing days are currently scheduled in September 2013. Although Bank of America and Merrill Lynch are not parties to the proceeding, certain of Bank of America's rights and obligations under the settlement agreement are conditioned on final court approval of the settlement.

There can be no assurance that final court approval of the BNY Mellon Settlement will be obtained, that all conditions to the BNY Mellon Settlement will be satisfied or, if certain conditions to the BNY Mellon Settlement permitting withdrawal are met, that Bank of America will not withdraw from the settlement. If final court approval is not obtained or if Bank of America withdraws from the BNY Mellon Settlement in accordance with its terms, Merrill Lynch's future representations and warranties losses could be substantially different than existing accruals and the estimated range of possible loss over existing accruals.

Unresolved Repurchase Claims

Unresolved representations and warranties repurchase claims represent the notional amount of repurchase claims made by counterparties, typically the outstanding principal balance or the unpaid principal balance at the time of default. In the case of first-lien mortgages, this amount is significantly greater than the expected loss amount due to the benefit of collateral and, in some cases, mortgage insurance or mortgage guarantee payments. Claims received from a counterparty remain outstanding until the underlying loan is repurchased, the claim is rescinded by the counterparty, or the claim is otherwise resolved.

The notional amount of unresolved claims from private-label securitization trustees, whole-loan investors and others totaled \$7.2 billion at June 30, 2013 compared with \$5.8 billion at December 31, 2012. The increase in the notional amount of unresolved repurchase claims is primarily due to the continued submission of claims by private-label securitization trustees, claim quality and, therefore, claims resolution, and the lack of an established process to resolve disputes related to these claims. We anticipated an increase in aggregate non-GSE claims at the time of the BNY Mellon Settlement in June 2011, and such increase in aggregate non-GSE claims was taken into consideration in developing the increase in our representations and warranties liability at that time. We expect unresolved repurchase claims related to private-label securitizations to continue to increase as claims continue to be submitted

[Table of Contents](#)

by private-label securitization trustees, and there is not an established process for the ultimate resolution of claims on which there is a disagreement. The documents governing private-label securitizations require repurchase claimants to show that a breach of representations and warranties had a material adverse impact on the claimant. We believe this to mean that the claimant is required to prove that the breach caused a loss to investors in the trust (or in certain cases, to the monoline insurer or other financial guarantor). We also believe that many of the defaults observed in private-label securitizations have been, and continue to be, driven by external factors, such as the substantial depreciation in home prices, persistently high unemployment and other negative economic trends, diminishing the likelihood that breaches of representations and warranties, where present, caused a loss.

The table below presents unresolved representations and warranties claims by counterparty at June 30, 2013 and December 31, 2012. The unresolved repurchase claims include only claims where we believe that the counterparty has a basis to submit claims. During the three months ended June 30, 2013, we received \$641 million of new repurchase claims, which consisted of approximately \$ 613 million from private-label securitization trustees and \$28 million from GSEs.

Unresolved Repurchase Claims by Counterparty

(dollars in millions)

	June 30, 2013	December 31, 2012
GSEs	\$ 46	\$ 93
Monoline	146	147
Whole-loan investors, private-label securitization trustees and other	7,227	5,805
Total	<u>\$ 7,419</u>	<u>\$ 6,045</u>

At June 30, 2013, the notional amount of unresolved repurchase claims was \$7.4 billion. We have performed an initial review with respect to \$7.1 billion of these claims and do not believe a valid basis for repurchase has been established by the claimants. We are still in the process of reviewing the remaining \$0.3 billion of these claims. When a claim has been denied and there has not been communication with the counterparty for six months, Merrill Lynch views these claims as inactive; however, they remain in the unresolved repurchase claims balance until resolution.

In addition to, and not included in, the total unresolved repurchase claims above, there are \$1.2 billion of repurchase demands from a master servicer where we believe the claimant has not satisfied the contractual thresholds to direct the securitization trustee to take action and/or that these demands are otherwise procedurally or substantively invalid. We do not believe the \$1.2 billion of demands received represents valid repurchase claims, and therefore it is not possible to predict the resolution with respect to such demands.

Cash Settlements

As presented in the table below, during the three and six months ended June 30, 2013, we paid \$70 million and \$91 million to resolve \$71 million and \$87 million, respectively, of repurchase claims through repurchase or reimbursement to investors or securitization trusts for losses they incurred, resulting in a loss on the related loans at the time of repurchase or reimbursement of \$61 million and \$79 million, respectively. During the three and six months ended June 30, 2012, Merrill Lynch paid \$18 million and \$29 million to resolve \$20 million and \$31 million, respectively, of repurchase claims through repurchase or reimbursement to investors or securitization trusts for losses they incurred, resulting in a loss on the related loans at the time of repurchase or reimbursement of \$12 million and \$23 million, respectively.

dollars in millions

	2013		2012	
	Three Months Ended June 30	Six Months Ended June 30	Three Months Ended June 30	Six Months Ended June 30
Claims resolved ⁽¹⁾	\$ 71	\$ 87	\$ 20	\$ 31
Repurchases	\$ 10	\$ 13	\$ 7	\$ 7
Indemnification payments	60	78	11	22
Total	\$ 70	\$ 91	\$ 18	\$ 29

(1) Represents unpaid principal balance.

Liability for Representations and Warranties

The liability for representations and warranties is included in Interest and other payables on the Condensed Consolidated Balance Sheets, and the related provision is included in Non-interest expenses on the Condensed Consolidated Statements of Earnings (Loss).

Our estimate of the liability at June 30, 2013 for representations and warranties exposures and the corresponding range of possible loss is based on currently available information, significant judgment, and a number of other factors and assumptions that are subject to change. For additional information, see Note 14 to the Condensed Consolidated Financial Statements.

The liability for representations and warranties exposures and the corresponding estimated range of possible loss for these representations and warranties exposures do not consider any losses related to litigation matters disclosed in Note 14 to the Condensed Consolidated Financial Statements, nor do they include any potential securities law or fraud claims or potential indemnity or other claims against us. We are not able to reasonably estimate the amount of any possible loss with respect to any such securities law, fraud or other claims against us (except to the extent reflected in the estimated range of possible loss for litigation and regulatory matters disclosed in Note 14 to the Condensed Consolidated Financial Statements); however, such loss could be material.

At June 30, 2013, the liability for representations and warranties was \$1.9 billion.

Estimated Range of Possible Loss

Our estimated liability at June 30, 2013 for obligations under representations and warranties is necessarily dependent on, and limited by, a number of factors, including for private-label securitizations, the implied repurchase experience based on the BNY Mellon Settlement, as well as certain other assumptions and judgmental factors. Accordingly, future provisions associated with obligations under representations and warranties may be materially impacted if actual experiences are different from our historical experience or our understandings, interpretations or assumptions.

The representations and warranties liability represents our best estimate of probable incurred losses as of June 30, 2013. However, it is reasonably possible that future representations and warranties losses may occur in excess of the amounts recorded for these exposures. In addition, we have not recorded any representations and warranties liability for certain private-label securitizations sponsored by whole-loan investors, where we have little to no claim activity.

We currently estimate that the range of possible loss for all representations and warranties exposures, consisting primarily of non-GSE exposures, could be up to \$1.1 billion over accruals at June 30, 2013, which remains the same as reported at March 31, 2013. This estimated range of possible loss related to these representations and warranties exposures does not represent a probable loss and is based on currently available information, significant

judgment, and a number of assumptions that are subject to change. Our estimated range of possible loss related to representations and warranties exposures does not include possible losses related to monoline insurers.

Future provisions and/or ranges of possible loss for representations and warranties exposures may be significantly impacted if actual experiences are different from our assumptions in our predictive models, including, without limitation, those regarding the ultimate resolution of the BNY Mellon Settlement, estimated repurchase rates, economic conditions, estimated home prices, consumer and counterparty behavior, and a variety of other judgmental factors. Adverse developments with respect to one or more of the assumptions underlying the liability for representations and warranties and the corresponding estimated range of possible loss could result in significant increases to future provisions and/or this estimated range of possible loss. For example, an appellate court, in the context of claims brought by a monoline insurer, disagreed with the interpretation of an affiliate of ours that a loan must be in default in order to satisfy the underlying agreements' requirement that a breach have a material and adverse effect. If that decision is extended to non-monoline contexts, it could significantly impact our provision and/or our estimated range of possible loss.

Additionally, if court rulings related to monoline litigation, including one related to an affiliate of ours, that have allowed sampling of loan files instead of requiring a loan-by-loan review to determine if a representations and warranties breach has occurred, are followed generally by the courts in future monoline litigation, private-label securitization counterparties may view litigation as a more attractive alternative as compared to a loan-by-loan review. Finally, although we believe that the representations and warranties typically given in non-GSE transactions are less rigorous and actionable than those given in GSE transactions, we do not have significant experience resolving loan-level claims in non-GSE transactions to measure the impact of these differences on the probability that a loan will be required to be repurchased.

For additional information about the methodology used to estimate the representations and warranties liability and the corresponding estimated range of possible loss, see Note 14 to the Condensed Consolidated Financial Statements.

Experience with Non-GSE Investors

As presented in the table below, Merrill Lynch, including First Franklin, sold loans originated from 2004 to 2008 (primarily subprime and alt-A) with an original principal balance of \$132 billion to investors other than the GSEs (although the GSEs are investors in certain private-label securitizations), of which approximately \$65 billion in principal has been paid and \$47 billion in principal has defaulted or was severely delinquent (i.e., 180 days or more past due) at June 30, 2013.

As it relates to private-label securitizations, a contractual liability to repurchase mortgage loans generally arises only if counterparties prove there is a breach of the representations and warranties that materially and adversely affects the interest of the investor or all investors in a securitization trust or of the monoline insurer (as applicable). We believe that the longer a loan performs, the less likely it is that an alleged representations and warranties breach had a material impact on the loan's performance or that a breach even exists. Because the majority of the borrowers in this population would have made a significant number of payments if they are not yet 180 days or more past due, we believe that the principal balance at the greatest risk for repurchase claims in this population of private-label securitization investors are loans that already have defaulted and those that are currently severely delinquent. Additionally, only counterparties with the contractual right to demand repurchase of a loan can present valid repurchase claims. In the case of private-label securitization trust investors, they generally have to meet certain presentation thresholds in order to require trustees to present repurchase claims.

While we believe the agreements for private-label securitizations generally contain less rigorous representations and warranties and place higher burdens on investors seeking repurchases than the explicit provisions of the comparable agreements with the GSEs, without regard to any variations that may have arisen as a result of dealings with the GSEs, the agreements generally include a representation that underwriting practices were prudent and customary.

[Table of Contents](#)

The following table details the population of loans originated between 2004 and 2008 and the population of loans sold as whole loans or in non-GSE private-label securitizations by entity together with the defaulted and severely delinquent loans stratified by the number of payments the borrower made prior to default or becoming severely delinquent as of June 30, 2013. In connection with these transactions, we provided representations and warranties, and the whole-loan investors may retain those rights even when the whole loans were aggregated with other collateral into private-label securitizations sponsored by the whole-loan investors. At least 25 payments have been made on approximately 62% of the defaulted and severely delinquent loans. In the three months ended June 30, 2013, we have received approximately \$611 million of representations and warranties claims from private-label securitization trustees related to these vintages. We believe that many of the defaults observed in these securitizations have been, and continue to be, driven by external factors, such as the substantial depreciation in home prices, persistently high unemployment and other negative economic trends, diminishing the likelihood that any loan defect (assuming one exists at all) was the cause of a loan's default. As of June 30, 2013, approximately 36% of the loans sold to non-GSE counterparties that were originated between 2004 and 2008 have defaulted or are severely delinquent.

(dollars in billions)

Entity	Principal Balance			Defaulted Principal Balance	Defaulted or Severely Delinquent	Principal at Risk			
	Original Principal Balance	Outstanding Principal Balance June 30, 2013	Outstanding Principal Balance Over 180 Days			Borrower Made Less than 13 Payments	Borrower Made 13 to 24 Payments	Borrower Made 25 to 36 Payments	Borrower Made More Than 36 Payments

(1) Excludes transactions sponsored by Merrill Lynch where no representations or warranties were made.

Legal Matters

Merrill Lynch has been named as a defendant in various legal actions, including arbitrations, class actions, and other litigation arising in connection with its activities as a global diversified financial services institution. See Note 14 to the Condensed Consolidated Financial Statements for further information, including the estimated aggregate range of possible loss.

Derivatives

We record all derivative transactions at fair value on our Condensed Consolidated Balance Sheets. We do not monitor our exposure to derivatives based on the notional amount because that amount is not a relevant indicator of our risk to these contracts, as it is generally not indicative of the amount that we would owe on the contract. Instead, a risk framework is used to define risk tolerances and establish limits to help to ensure that certain risk-related losses occur within acceptable, predefined limits. Derivatives that meet the accounting definition of a guarantee and credit derivatives are included in Note 6 to the Condensed Consolidated Financial Statements.

Involvement with VIEs

We transact with VIEs in a variety of capacities, including those that we help establish as well as those initially established by third parties. We utilize VIEs in the ordinary course of business to support our own and our customers' financing and investing needs. Merrill Lynch securitizes loans and debt securities using VIEs as a source of funding and a means of transferring the economic risk of the loans or debt securities to third parties. We also administer, structure or invest in or enter into derivatives with other VIEs, including multi-seller conduits, municipal bond trusts, collateralized debt obligations ("CDOs") and other entities. Our involvement with VIEs can vary and we are required to continuously reassess prior consolidation and disclosure conclusions (see Note 9 to the Condensed Consolidated Financial Statements). See Note 1 to the Condensed Consolidated Financial Statements for a discussion of our consolidation accounting policy.

Contractual Obligations

We have contractual obligations to make future payments of debt, lease and other agreements. Additionally, in the normal course of business, we enter into contractual arrangements whereby we commit to future purchases of products or services from unaffiliated parties. Other obligations include our contractual funding obligations related to our employee benefit plans. See Notes 12, 14 and 15 to the Condensed Consolidated Financial Statements.

In the normal course of business, we periodically guarantee the obligations of affiliates in a variety of transactions including International Swaps and Derivatives Association, Inc. ("ISDA") -related and non ISDA-related transactions such as trading, repurchase agreements, prime brokerage agreements and other transactions. We have also entered into an agreement with a non-U.S. regulator that could allow it, in its capacity as regulator, to request payments from us to support obligations to clients of the regulated non-U.S. branch. We believe the likelihood of payment under the terms of this agreement to be remote.

FUNDING AND LIQUIDITY

Funding

We fund our assets primarily with a mix of secured and unsecured liabilities through a globally coordinated funding strategy with Bank of America. We fund a portion of our trading assets with secured liabilities, including repurchase agreements, securities loaned and other short-term secured borrowings, which are less sensitive to our credit ratings due to the underlying collateral. See Note 12 to the Condensed Consolidated Financial Statements for additional information regarding our borrowings.

Beginning late in the third quarter of 2009, in connection with the update or renewal of certain Merrill Lynch international securities offering programs, Bank of America agreed to guarantee debt securities, warrants and/or certificates issued by certain subsidiaries of ML & Co. on a going forward basis. All existing ML & Co. guarantees of securities issued by those same Merrill Lynch subsidiaries under various international securities offering programs will remain in full force and effect as long as those securities are outstanding, and Bank of America has not assumed any of those prior ML & Co. guarantees or otherwise guaranteed such securities. There were approximately \$6.9 billion of securities guaranteed by Bank of America at June 30, 2013. In addition, Bank of America has guaranteed the performance of Merrill Lynch on certain derivative transactions. The aggregate amount of such derivative liabilities was approximately \$1.3 billion at June 30, 2013.

Following the completion of Bank of America's acquisition of Merrill Lynch, ML & Co. became a subsidiary of Bank of America and established intercompany lending and borrowing arrangements to facilitate centralized liquidity management. Included in these intercompany agreements is a \$75 billion one-year revolving unsecured line of credit that allows ML & Co. to borrow funds from Bank of America at a spread to the London Interbank Offered Rate ("LIBOR") that is reset periodically and is consistent with other intercompany agreements. This credit line was renewed effective January 1, 2013 with a maturity date of January 1, 2014. The credit line will automatically be extended by one year to the succeeding January 1st unless Bank of America provides written

notice not to extend at least 45 days prior to the maturity date. The agreement does not contain any financial or other covenants. There were no outstanding borrowings under the line of credit at June 30, 2013 and December 31, 2012.

In addition to the \$75 billion unsecured line of credit, there is also a revolving unsecured line of credit that allows ML & Co. to borrow up to \$25 billion from Bank of America. Interest on borrowings under the line of credit is based on prevailing short-term market rates. The line of credit does not contain any financial or other covenants. The line of credit matures on February 11, 2014. There were no outstanding borrowings under the line of credit at June 30, 2013 and December 31, 2012.

Merrill Lynch Pierce Fenner & Smith Incorporated ("MLPF&S"), a wholly-owned subsidiary of ML & Co., also has the following borrowing agreements with Bank of America:

- A \$4 billion one-year revolving unsecured line of credit - Interest on the line of credit is based on prevailing short-term market rates. The credit line matures on November 1, 2013 and may automatically be extended by one year to the succeeding November 1st unless Bank of America provides written notice not to extend at least 45 days prior to the maturity date. At both June 30, 2013 and December 31, 2012, there were no outstanding borrowings under the line of credit.
- A \$15 billion revolving unsecured line of credit - Interest on the line of credit is based on prevailing short-term market rates. The line of credit will mature on February 1, 2014 and will automatically extend every six months. At June 30, 2013 and December 31, 2012, approximately \$0.7 billion and \$0.9 billion, respectively, was outstanding under the line of credit.

Bank of America and Merrill Lynch have entered into certain intercompany lending and borrowing arrangements to facilitate centralized liquidity management. Included in these arrangements is a \$50 billion extendible one-year revolving credit facility that allows Bank of America to borrow funds from Merrill Lynch at a spread to LIBOR that is reset periodically and is consistent with other intercompany agreements. The credit facility matures on January 1, 2014 and will automatically be extended by one year to the succeeding January 1st unless Merrill Lynch provides written notice not to extend at least 45 days prior to the maturity date. There were no amounts outstanding at both June 30, 2013 and December 31, 2012 under this credit facility. There is also a short-term revolving credit facility that allows Bank of America to borrow up to an additional \$25 billion. Interest on borrowings under the credit facility is based on prevailing short-term market rates. The line of credit matures on February 11, 2014. At June 30, 2013 and December 31, 2012, approximately \$7.8 billion and \$16.2 billion, respectively, was outstanding under this line of credit.

Credit Ratings

Our borrowing costs and ability to raise funds are impacted by our credit ratings. In addition, credit ratings may be important to customers or counterparties when we compete in certain markets and when we seek to engage in certain transactions, including OTC derivatives. Thus, it is our objective to maintain high-quality credit ratings.

Credit ratings and outlooks are opinions expressed by rating agencies on our creditworthiness and that of our obligations or securities, including long-term debt, short-term borrowings and other securities, including asset securitizations. Following the acquisition of Merrill Lynch by Bank of America, the major credit rating agencies have indicated that the primary drivers of Merrill Lynch's credit ratings are Bank of America's credit ratings. Bank of America's credit ratings are subject to ongoing review by the rating agencies, which consider a number of factors, including Bank of America's financial strength, performance, prospects and operations as well as factors not under Bank of America's control. The rating agencies could make adjustments to our ratings at any time and they provide no assurances that they will maintain our ratings at current levels.

Other factors that influence Bank of America's and our credit ratings include changes to the rating agencies' methodologies for our industry or certain security types, the rating agencies' assessment of the general operating environment for financial services companies, our mortgage exposures, our relative positions in the markets in

which we compete, reputation, liquidity position, diversity of funding sources, funding costs, the level and volatility of earnings, corporate governance and risk management policies, capital position, capital management practices, and current or future regulatory and legislative initiatives.

The major rating agencies have each indicated that, as a systemically important financial institution, Bank of America's (and consequently ML & Co.'s) credit ratings currently reflect their expectation that, if necessary, Bank of America would receive significant support from the U.S. government, and that they will continue to assess such support in the context of sovereign financial strength and regulatory and legislative developments.

On June 11, 2013, Standard & Poor's Ratings Services ("S&P") published a report that affirmed all its current ratings for Bank of America, and consequently, ML & Co., and seven other bank holding companies that the agency views as having high systemic importance. That report also indicated that S&P is reconsidering, and may remove, the uplift for government support in its holding company ratings for those companies. As a result, the agency maintained its negative outlook on Bank of America's and ML & Co.'s holding company ratings. On May 16, 2013, Fitch Ratings ("Fitch") announced the results of its periodic review of its ratings for 12 large, complex securities trading and universal banks, including Bank of America. As part of this action, Fitch affirmed Bank of America's and ML & Co.'s senior credit ratings and upgraded the rating of Bank of America's stand-alone creditworthiness, as well as the ratings for Bank of America's subordinated debt, trust preferred and preferred stock issuances, each by one notch. On March 27, 2013, Moody's Investors Service, Inc. ("Moody's") published an update on systemic support in U.S. bank ratings and indicated the agency expects to resolve the current negative outlooks on its ratings for systemically important U.S. bank holding companies, including that of Bank of America, during 2013.

Currently, Bank of America's and ML & Co.'s long-term/short-term senior debt ratings and outlooks expressed by the rating agencies are as follows: Baa2/P-2 (negative) by Moody's; A-/A-2 (negative) by S&P; and A/F1 (stable) by Fitch. MLPF&S's long-term/short-term senior debt ratings and outlooks are A/A-1 (negative) by S&P and A/F1 (stable) by Fitch. Merrill Lynch International, a U.K.-based investment firm and subsidiary of ML & Co., has a long-term/short-term senior debt rating and outlook of A/A-1 (negative) by S&P. Merrill Lynch International Bank Limited, an Ireland-based bank subsidiary of ML & Co., has a long-term/short-term senior debt rating and outlook of A/F1 (stable) by Fitch.

A reduction in certain of our credit ratings may have a material adverse effect on our liquidity, potential loss of access to credit markets, the related cost of funds, our businesses and on certain trading revenues, particularly in those businesses where counterparty creditworthiness is critical. In addition, under the terms of certain OTC derivative contracts and other trading agreements, in the event of downgrades of our credit ratings, the counterparties to those agreements may require us to provide additional collateral, or to terminate these contracts or agreements, which could cause us to sustain losses and/or adversely impact our liquidity. If Bank of America's or ML & Co.'s short-term credit ratings, or those of our bank or broker-dealer subsidiaries, were downgraded by one or more levels, the potential loss of access to short-term funding sources, such as repurchase agreement financing, and the effect on our incremental cost of funds could be material.

At June 30, 2013, if the rating agencies had downgraded their long-term senior debt ratings for ML & Co. or certain subsidiaries by one incremental notch, the amount of additional collateral contractually required by derivative contracts and other trading agreements would have been approximately \$0.4 billion. If the rating agencies had downgraded their long-term senior debt ratings for ML & Co. or certain subsidiaries by a second incremental notch, approximately \$4.1 billion in additional incremental collateral would have been required.

Also, if the rating agencies had downgraded their long-term senior debt ratings for ML & Co. or certain subsidiaries by one incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of June 30, 2013 was \$1.2 billion, against which \$0.7 billion of collateral had been posted. If the rating agencies had downgraded their long-term debt ratings for ML & Co. or certain subsidiaries by a second incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of June 30, 2013 was an incremental \$1.0 billion, against which \$0.6 billion of collateral had been posted.

While certain potential impacts are contractual and quantifiable, the full scope of consequences of a credit ratings downgrade to a financial institution is inherently uncertain, as it depends upon numerous dynamic, complex and inter-related factors and assumptions, including whether any downgrade of a firm's long-term credit ratings precipitates downgrades to its short-term credit ratings, and assumptions about the potential behaviors of various customers, investors and counterparties.

For information regarding the additional collateral and termination payments that would be required in connection with certain OTC derivative contracts and other trading agreements as a result of such a credit ratings downgrade, see Note 6 to the Condensed Consolidated Financial Statements and Item 1A. "Risk Factors" of Merrill Lynch's 2012 Annual Report on Form 10-K.

On July 18, 2013, Moody's revised its outlook on the U.S. government to stable from negative and affirmed its Aaa long-term sovereign credit rating on the U.S. government. On June 28, 2013, Fitch affirmed its AAA long-term and F1+ short-term sovereign credit rating on the U.S. government, but the outlook remains negative. On June 10, 2013, S&P affirmed its AA+ long-term and A-1+ short-term sovereign credit rating on the U.S. government, as the outlook on the long-term credit rating was revised to stable from negative.

Credit Risk Management

For information about our credit risk management activities, see Item 7A, "Quantitative and Qualitative Disclosures About Market Risk - Credit Risk Management" included in our 2012 Annual Report on Form 10-K.

European Exposures

Certain European countries, including Greece, Ireland, Italy, Portugal and Spain, have experienced varying degrees of financial stress in recent years. Risks from the ongoing debt crisis in these countries could continue to disrupt the financial markets, which could have a detrimental impact on global economic conditions and sovereign and non-sovereign debt in these countries. Market volatility is expected to continue as policymakers address the fundamental challenges of competitiveness, growth and fiscal solvency. We expect to continue to support client activities in the region, and our exposures may vary over time as we monitor the situation and manage our risk profile.

The table below presents our direct sovereign and non-sovereign exposures in these countries at June 30, 2013. Our total sovereign and non-sovereign exposure to these countries was \$2.5 billion at June 30, 2013 compared with \$2.9 billion at December 31, 2012. Our total exposure to these countries, net of all hedges, was \$786 million at June 30, 2013 compared with \$1.5 billion at December 31, 2012. At June 30, 2013 and December 31, 2012, hedges and credit default protection purchased, net of credit default protection sold, was \$1.7 billion and \$1.4 billion, respectively.

(1) Net counterparty exposure includes the fair value of derivatives, including counterparty risk associated with credit default protection, and secured financing transactions. Derivative exposures are presented net of all eligible collateral pledged under legally enforceable netting agreements. Secured financing transaction exposures are presented net of eligible cash or securities pledged as collateral. The notional amount of reverse repurchase transactions was \$3.6 billion at June 30, 2013. Counterparty exposure is not presented net of hedges or credit default protection.

- (2) Long securities exposures are netted on a single-name basis to, but not below, zero by hedges and short exposures.
- (3) Represents credit default protection purchased, net of credit default protection sold, which is used to mitigate the risk to country exposures as listed, including \$(739) million in net credit default protection purchased to hedge loans and securities and short exposures, and \$(932) million in additional credit default protection purchased to hedge derivative assets. Amounts are calculated based on the credit default protection notional amount assuming zero recovery adjusted for any fair value receivable or payable.
- (4) Represents country exposure less hedges and credit default protection.

We hedge certain of our selected European country exposure with credit default swaps ("CDS"). The majority of our CDS contracts on reference assets in Greece, Ireland, Italy, Portugal and Spain are with highly-rated financial institutions primarily outside of the Eurozone and we work to limit or eliminate correlated CDS. Due to our engagement in market-making activities, our CDS portfolio contains contracts with various maturities with a diverse set of counterparties. We work to limit mismatches in maturities between our exposures and the CDS we use to hedge them. However, there may be instances where the protection purchased has a different maturity than the exposure for which the protection was purchased, in which case those exposures and hedges are subject to more active monitoring and management.

The table below presents the notional amount and fair value of single-name CDS purchased and sold on reference assets in Greece, Ireland, Italy, Portugal and Spain at June 30, 2013. The table below includes only single-name CDS netted at the counterparty level, whereas the table above includes single-name, indexed and tranching CDS exposures netted by the reference asset that they are intended to hedge; therefore, CDS purchased and sold information is not comparable between the tables.

Single-Name CDS with Reference Assets in Greece, Ireland, Italy, Portugal and Spain ⁽¹⁾

(dollars in millions)	Notional		Fair Value	
	Purchased	Sold	Purchased	Sold
Greece				
Aggregate	\$ 71	\$ 34	\$ 1	\$ 2

After Netting ⁽²⁾	942	968	31	66

(1) The majority of our CDS contracts on reference assets in Greece, Ireland, Italy, Portugal and Spain are primarily with non-Eurozone counterparties.

(2) Amounts listed are after consideration of legally enforceable counterparty master netting agreements.

Losses could result even if there is credit default protection purchased because the purchased credit protection contracts may only pay out under certain scenarios and thus not all losses may be covered by the credit protection contracts. The effectiveness of our CDS protection as a hedge of these risks is influenced by a number of factors, including the contractual terms of the CDS. Generally, only the occurrence of a credit event as defined by the CDS terms (which may include, among other events, the failure to pay by, or restructuring of, the reference entity) results in a payment under the purchased credit protection contracts. The determination as to whether a credit event has occurred is made by the relevant ISDA Determination Committee (comprised of various ISDA member firms) based on the terms of the CDS and facts and circumstances for the event. Accordingly, uncertainties exist as to whether any particular strategy or policy action for addressing the European debt crisis would constitute a credit event under the CDS. A voluntary restructuring may not trigger a credit event under CDS terms and consequently may not trigger a payment under the CDS contract.

In addition to our direct sovereign and non-sovereign exposures, a significant deterioration in the European debt crisis could result in material reductions in the value of sovereign debt and other asset classes posted as collateral, disruptions in capital markets, widening of credit spreads of U.S. and non-U.S. financial institutions, loss of investor confidence in the financial services industry, a slowdown in global economic activity and other adverse developments. For additional information on the debt crisis in Europe, see Item 1A. "Risk Factors" in our 2012 Annual Report on Form 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Not required pursuant to General Instruction H(2).

Item 4. Controls and Procedures

As of the end of the period covered by this report and pursuant to Rule 13a-15(b) of the Securities Exchange Act of 1934 (the “Exchange Act”), Merrill Lynch’s management, including the Chief Executive Officer and Chief Financial Officer of ML & Co., conducted an evaluation of the effectiveness and design of Merrill Lynch’s disclosure controls and procedures (as that term is defined in Rule 13a-15(e) of the Exchange Act). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that Merrill Lynch’s disclosure controls and procedures were effective, as of the end of the period covered by this report, in recording, processing, summarizing and reporting information required to be disclosed by ML & Co. in reports that it files or submits under the Exchange Act, within the time periods specified in the SEC’s rules and forms.

In addition, no change in Merrill Lynch’s internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) occurred during the three months ended June 30, 2013 that has materially affected, or is reasonably likely to materially affect, Merrill Lynch’s internal control over financial reporting.

EXHIBIT INDEX

<u>Exhibit</u>	<u>Description</u>
12	Statement re: computation of ratios. ⁽¹⁾
31.1	Rule 13a-14(a) Certification of the Chief Executive Officer. ⁽¹⁾
31.2	Rule 13a-14(a) Certification of the Chief Financial Officer. ⁽¹⁾
32.1	Certification of the Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. ⁽¹⁾
32.2	Certification of the Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002. ⁽¹⁾
101	The following materials from Merrill Lynch & Co., Inc.'s Quarterly Report on Form 10-Q for the three and six months ended June 30, 2013 and June 30, 2012, formatted in XBRL (Extensible Business Reporting Language): (i) the Condensed Consolidated Statements of Earnings (Loss), (ii) the Condensed Consolidated Statements of Comprehensive Income (Loss), (iii) the Condensed Consolidated Balance Sheets, (iv) the Condensed Consolidated Statements of Cash Flows, and (v) the Notes to Condensed Consolidated Financial Statements. ⁽¹⁾

⁽¹⁾ Filed herewith.

MERRILL LYNCH & CO., INC. AND SUBSIDIARIES
COMPUTATION OF RATIOS OF EARNINGS TO FIXED CHARGES AND
COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS
(dollars in millions)

	Three Months Ended June 30, 2013 (unaudited)	Six Months Ended June 30, 2013 (unaudited)	Year Ended December 31, 2012	Year Ended December 31, 2011	Year Ended December 31, 2010	Year Ended December 31, 2009
Pre-tax earnings (loss) (a)	\$ 742	\$ 436	\$ (2,574)	\$ (5,344)	\$ 2,812	\$ 6,527
Add: Fixed charges (excluding capitalized interest and preferred security dividend requirements of subsidiaries)	1,542	3,159	7,387	9,098	9,924	12,335
Pre-tax earnings before fixed charges	\$ 2,284	\$ 3,595	\$ 4,813	\$ 3,754	\$ 12,736	\$ 18,862
Fixed charges:						
Interest	\$ 1,469	\$ 3,012	\$ 7,098	\$ 8,785	\$ 9,610	\$ 12,035
Other (b)	73	147	289	313	314	300
Total fixed charges	\$ 1,542	\$ 3,159	\$ 7,387	\$ 9,098	\$ 9,924	\$ 12,335
Preferred stock dividend requirements	—	—	—	—	140	141
Total combined fixed charges and preferred stock dividends	\$ 1,542	\$ 3,159	\$ 7,387	\$ 9,098	\$ 10,064	\$ 12,476
Ratio of earnings to fixed charges	1.48	1.14	*	*	1.28	1.53
Ratio of earnings to combined fixed charges and preferred stock dividends	1.48	1.14	*	*	1.27	1.51

(a) Excludes undistributed earnings (loss) from equity investments.

(b) Other fixed charges consist of the interest factor in rentals, amortization of debt issuance costs and preferred security dividend requirements of subsidiaries.

*The earnings for the years ended December 31, 2012 and 2011 were inadequate to cover total fixed charges and total fixed charges and preferred stock dividends.

The coverage deficiencies for total fixed charges for the years ended December 31, 2012 and 2011 were \$2,574 million and \$5,344 million, respectively.

The coverage deficiencies for total fixed charges and preferred stock dividends for the years ended December 31, 2012 and 2011 were \$2,574 million and \$5,344 million, respectively.

**CERTIFICATION PURSUANT TO SECTION 302
OF THE SARBANES-OXLEY ACT OF 2002
FOR THE CHIEF EXECUTIVE OFFICER**

I, Thomas K. Montag, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2013 of Merrill Lynch & Co., Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
