  - Excluding discrete tax items and recurring tax credits primarily related to investments in renewable energy and affordable housing, the ETR would have been approximately 25%

## Endnotes

- A We present certain key financial and nonfinancial performance indicators (KPIs) that management uses when assessing consolidated and/or segment results. We believe this information is useful because it provides management and investors with information about underlying operational performance and trends. KPIs are presented in Consolidated and Business Segment Highlights on page 1, Balance Sheet, Liquidity, and Capital Highlights on page 9 and on the Segment pages for each segment.
- B We also measure NII on an FTE basis, which is a non-GAAP financial measure. FTE basis is a performance measure used in operating the business that management believes provides investors with meaningful information on the interest margin for comparative purposes. We believe that this presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practice. NII on an FTE basis was \$13.9 billion, \$14.2 billion and \$14.3 billion for the three months ended June 30, 2024, March 31, 2024 and June 30, 2023, respectively. The FTE adjustment was \$160 million, \$158 million and \$135 million for the three months ended June 30, 2024, March 31, 2024 and June 30, 2023, respectively.
- C Reserve Build (or Release) is calculated by subtracting net charge-offs for the period from the provision for credit losses recognized in that period. The period-end allowance, or reserve, for credit losses reflects the beginning of the period allowance adjusted for net charge-offs recorded in that period plus the provision for credit losses and other valuation accounts recognized in that period.
- D Global Liquidity Sources (GLS) include cash and high-quality, liquid, unencumbered securities, inclusive of U.S. government securities, U.S. agency securities, U.S. agency mortgage-backed securities, and a select group of non-U.S. government and supranational securities, and other investment-grade securities, and are readily available to meet funding requirements as they arise. It does not include Federal Reserve Discount Window or Federal Home Loan Bank borrowing capacity. Transfers of liquidity among legal entities may be subject to certain regulatory and other restrictions.
- E Regulatory capital ratios at June 30, 2024 are preliminary. The Corporation reports regulatory capital ratios under both the Standardized and Advanced approaches. Capital adequacy is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements. The Corporation's binding ratio was Total capital ratio under the Standardized approach for June 30, 2024 and March 31, 2024; and the Common equity tier 1 ratio under the Standardized approach for June 30, 2023.
- F The below table includes Global Markets sales and trading revenue, excluding net DVA, which is a non-GAAP financial measure. We believe that the presentation of measures that exclude this item is useful because such measures provide additional information to assess the underlying operational performance and trends of our businesses and to allow better comparison of period-to-period operating performance.

- G In 1Q24, the FDIC increased its estimate of the loss to the Deposit Insurance Fund arising from the closures of Silicon Valley Bank and Signature Bank that will be recouped through the collection of a special assessment from certain insured depository institutions. Accordingly, the Corporation recorded pretax noninterest expense of \$0.7B to increase its accrual for its estimated share of the special assessment. The Corporation has presented certain non-GAAP financial measures (labeled as "adj." in the tables below) that exclude the impact of the FDIC special assessment (FDIC SA) and has provided a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measures as set forth below. The Corporation believes the use of non-GAAP financial measures adjusting for the impact of the FDIC SA provides additional information for evaluating its results of operations and comparing its operational performance between periods by excluding these impacts that may not be reflective of its underlying operating performance.

<sup>2</sup> Calculated as net income applicable to common shareholders divided by average diluted common shares. Average diluted common shares of 8,031MM for 1Q24.

<sup>3</sup> Calculated as net income divided by average assets. Average assets were \$3,247B for 1Q24.

<sup>4</sup> Calculated as net income applicable to common shareholders divided by average common shareholders' equity. Average common shareholders' equity was \$264B for 1Q24.

<sup>5</sup> Calculated as net income applicable to common shareholders divided by average tangible common shareholders' equity. Average tangible common shareholders' equity was \$194B for 1Q24. Average tangible common shareholders' equity represents a non-GAAP financial measure. For more information and a reconciliation of average tangible common shareholders' equity to average shareholders' equity, see page 20.

<sup>6</sup> Calculated as noninterest expense divided by revenue, net of interest expense.

- H Pretax, pre-provision income (PTPI) is a non-GAAP financial measure calculated by adjusting consolidated pretax income to add back provision for credit losses. Management believes that PTPI is a useful financial measure as it enables an assessment of the Company's ability to generate earnings to cover credit losses through a credit cycle and provides an additional basis for comparing the Company's results of operations between periods by isolating the impact of provision for credit losses, which can vary significantly between periods. For Reconciliations to GAAP Financial Measures, see page 20.

<sup>(1)</sup> Return on average tangible common shareholders' equity and tangible book value per share of common stock are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. Tangible book value per share provides additional useful information about the level of tangible assets in relation to outstanding shares of common stock. See Reconciliations to GAAP Financial Measures on page 20.

<sup>(2)</sup> Ratios do not include loans accounted for under the fair value option. Charge-off ratios are annualized for the quarterly presentation.

<sup>(3)</sup> Balances do not include past due consumer credit card loans, consumer loans secured by real estate where repayments are insured by the Federal Housing Administration and individually insured long-term stand-by agreements (fully-insured home loans), and in general, other consumer and commercial loans not secured by real estate, and nonperforming loans held-for-sale or accounted for under the fair value option.

<sup>(4)</sup> Regulatory capital ratios at June 30, 2024 are preliminary. Bank of America Corporation reports regulatory capital ratios under both the Standardized and Advanced approaches. Capital adequacy is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements. The Corporation's binding ratio was the Total capital ratio under the Standardized approach for June 30, 2024 and March 31, 2024; and Common equity tier 1 ratio under the Standardized approach for June 30, 2023.

<sup>(5)</sup> Tangible equity ratio equals period-end tangible shareholders' equity divided by period-end tangible assets. Tangible common equity ratio equals period-end tangible common shareholders' equity divided by period-end tangible assets. Tangible shareholders' equity and tangible assets are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. See Reconciliations to GAAP Financial Measures on page 20.

### Reconciliations to GAAP Financial Measures

(Dollars in millions, except per share information)

The Corporation evaluates its business using certain non-GAAP financial measures, including pretax, pre-provision income (as defined in Endnote H on page 11) and ratios that utilize tangible equity and tangible assets, each of which is a non-GAAP financial measure. Tangible equity represents shareholders' equity or common shareholders' equity reduced by goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities ("adjusted" shareholders' equity or common shareholders' equity). Return on average tangible common shareholders' equity measures the Corporation's net income applicable to common shareholders as a percentage of adjusted average common shareholders' equity. The tangible common equity ratio represents adjusted ending common shareholders' equity divided by total tangible assets (total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities). Return on average tangible shareholders' equity measures the Corporation's net income as a percentage of adjusted average total shareholders' equity. The tangible equity ratio represents adjusted ending shareholders' equity divided by total tangible assets. Tangible book value per common share represents adjusted ending common shareholders' equity divided by ending common shares outstanding. These measures are used to evaluate the Corporation's use of equity. In addition, profitability, relationship and investment models all use return on average tangible shareholders' equity as key measures to support our overall growth goals.

See the tables below for reconciliations of these non-GAAP financial measures to the most directly comparable financial measures defined by GAAP for the six months ended June 30, 2024 and 2023, and the three months ended June 30, 2024, March 31, 2024 and June 30, 2023. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. Other companies may define or calculate these non-GAAP financial measures differently.

# Net Interest Income

## Net Interest Income (FTE, \$B)<sup>1</sup>

- Net interest income of \$13.7B (\$13.9B FTE)<sup>1</sup>
  - Decreased \$0.5B YoY, as higher deposit costs more than offset higher asset yields, higher NII related to Global Markets (GM) activity, and modest loan growth
  - Decreased \$0.3B from 1Q24, driven primarily by higher deposit costs
  - NII related to GM activity increased approximately \$0.5B YoY and \$0.1B from 1Q24
- Net interest yield of 1.93% decreased 13 bps YoY and 6 bps from 1Q24
  - Excluding GM, net interest yield of 2.41%<sup>1</sup>

## Net Interest Yield (FTE)<sup>1</sup>

## Net Interest Income excl. GM (FTE, \$B)<sup>1</sup>

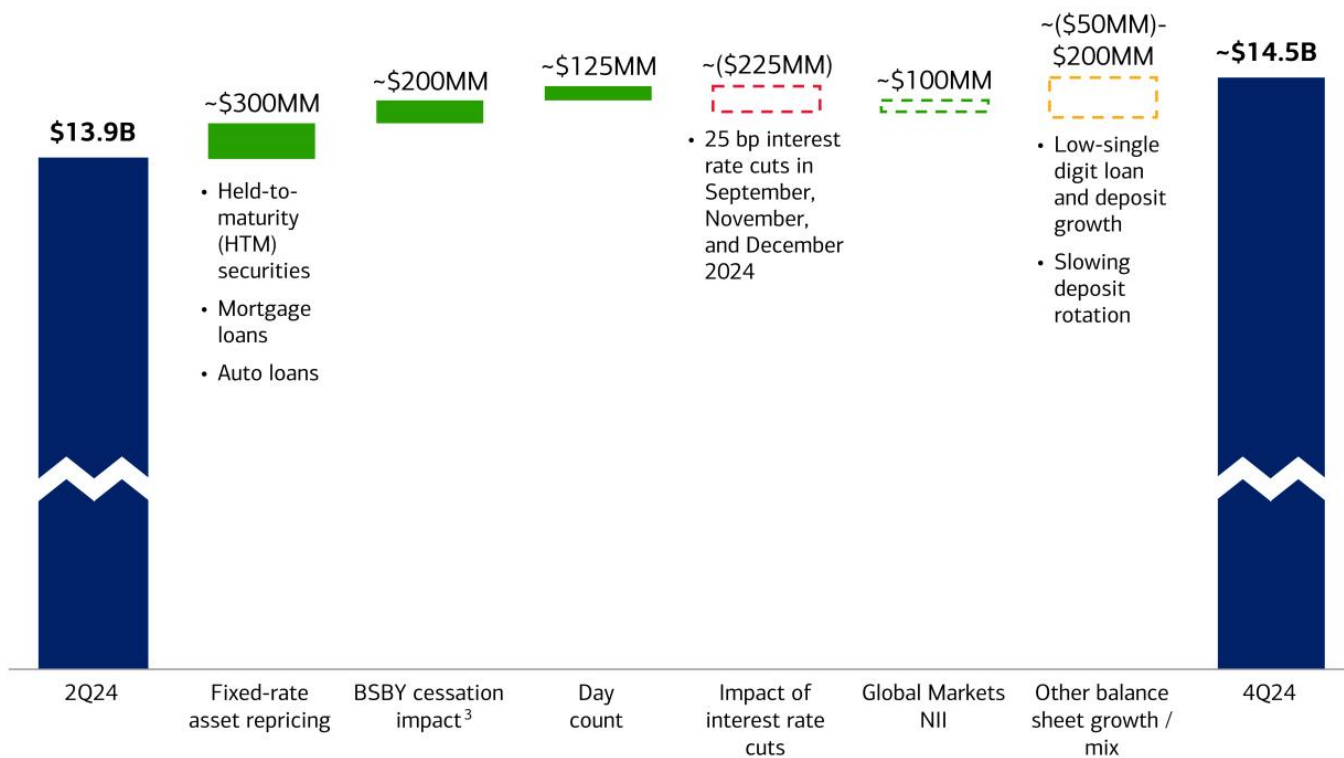

Note: Amounts may not total due to rounding. FTE stands for fully taxable-equivalent basis.

<sup>1</sup> Represent non-GAAP financial measures. Net interest yield adjusted to exclude Global Markets NII of \$0.8B, \$0.7B, \$0.6B, \$0.7B, and \$0.3B and average earning assets of \$706.4B, \$692.9B, \$667.1B, \$656.0B, and \$657.9B for 2Q24, 1Q24, 4Q23, 3Q23, and 2Q23, respectively. The Corporation believes the presentation of NII and net interest yield excluding Global Markets provides investors with transparency of NII and net interest yield in core banking activities. For important presentation information, see slide 36.

# Net Interest Income Outlook<sup>1,2</sup>

Note: Amounts may not total due to use of ranges for select drivers presented.

<sup>1</sup> FTE basis. Represents a non-GAAP financial measure. For important presentation information, see slide 36. A reconciliation to the most directly comparable GAAP measure for the 4Q24 period is not included as it cannot be prepared without unreasonable effort.

<sup>2</sup> For cautionary information in connection with these forward-looking statements, see note E on slide 33, and slide 35.

<sup>3</sup> The 4Q23 pretax noninterest income charge of \$1.6B related to the Bloomberg Short-Term Bank Yield Index (BSBY) cessation is expected to be recognized back into interest income beginning with the November 15, 2024 BSBY cessation and through subsequent periods, largely through 2026.

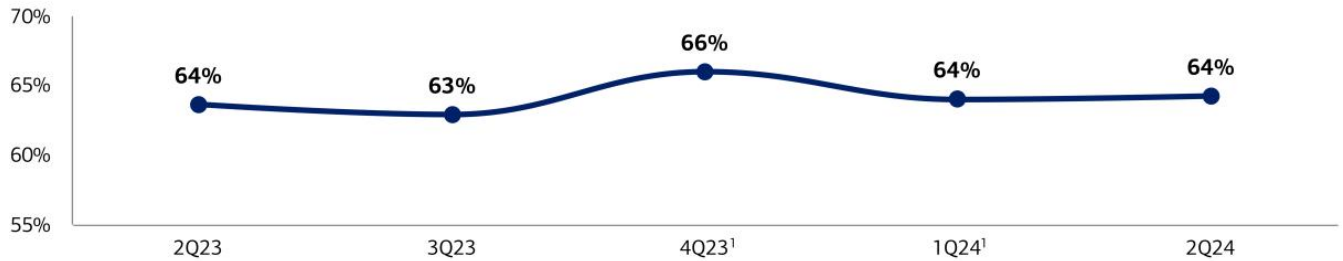

# Expense and Efficiency

## Total Noninterest Expense (\$B)

## Efficiency Ratio

- 1Q24 and 4Q23 noninterest expense of \$17.2B and \$17.7B included accruals of \$0.7B and \$2.1B for the estimated amount of the FDIC special assessment for uninsured deposits of certain failed banks
- 2Q24 noninterest expense of \$16.3B increased \$0.3B, or 2%, vs. 2Q23, driven primarily by investments in people and revenue-related compensation, partially offset by lower litigation expense
- Noninterest expense declined \$0.9B, or 5%, vs. 1Q24, driven by the absence of both the FDIC special assessment accrual and seasonally higher payroll taxes in the first quarter, partially offset by higher revenue-related expenses

Note: Amounts may not total due to rounding.

<sup>1</sup> Represent non-GAAP financial measures. 1Q24 adjusted noninterest expense of \$16.5B is calculated as reported noninterest expense of \$17.2B less the FDIC special assessment accrual of \$0.7B. 4Q23 adjusted noninterest expense of \$15.6B is calculated as reported noninterest expense of \$17.7B, less the FDIC special assessment accrual of \$2.1B. Adjusted 1Q24 efficiency ratio is calculated as the reported 1Q24 efficiency ratio of 67% less 271 bps for the impact of the FDIC special assessment accrual. Adjusted 4Q23 efficiency ratio is calculated as the reported 4Q23 efficiency ratio of 81% less 1,430 bps for the combined impact of the net pretax charge of \$1.6B recorded in noninterest income related to the future cessation of BSBY, as well as the \$2.1B pretax noninterest expense for the FDIC special assessment accrual. For more information, see note A on slide 32. For important presentation information about these measures, see slide 36.

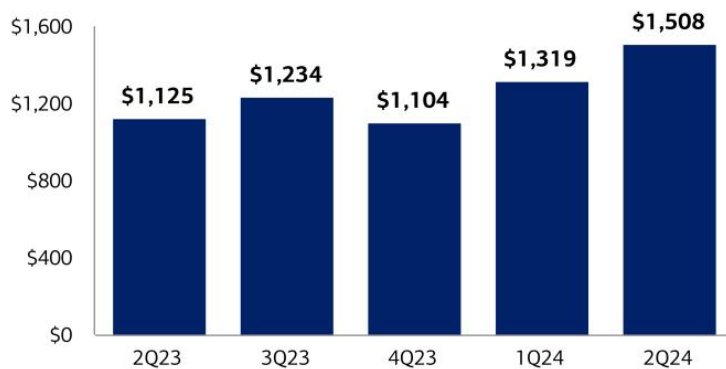

# Asset Quality

## Net Charge-offs (\$MM)<sup>1</sup>

## Provision for Credit Losses (\$MM)

  - Consumer net charge-offs of \$1.1B increased \$31MM, driven by higher credit card losses
  - Credit card loss rate of 3.88% in 2Q24 vs. 3.62% in 1Q24
  - Commercial net charge-offs of \$474MM were relatively flat
- Net charge-off ratio of 0.59% increased 1 bp from 1Q24

  - Net reserve release of \$25MM in 2Q24 vs. \$179MM in 1Q24
- Allowance for loan and lease losses of \$13.2B represented 1.26% of total loans and leases<sup>1,2</sup>
  - Total allowance of \$14.3B included \$1.1B for unfunded commitments
- Nonperforming loans (NPLs) of \$5.5B decreased \$0.4B from 1Q24, driven primarily by the commercial real estate office portfolio
  - 61% of Consumer NPLs are contractually current
- Commercial reservable criticized utilized exposure of \$24.8B increased \$0.2B from 1Q24

# Notes

A In 1Q24, the FDIC increased its estimate of the loss to the Deposit Insurance Fund arising from the closures of Silicon Valley Bank and Signature Bank that will be recouped through the collection of a special assessment from certain insured depository institutions. Accordingly, the Corporation recorded pretax noninterest expense of \$0.7B to increase its accrual for its estimated share of the special assessment. The Corporation has presented certain non-GAAP financial measures (labeled as "adj." in the tables below) that exclude the impact of the FDIC special assessment (FDIC SA) and has provided a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP financial measures as set forth below. The Corporation believes the use of non-GAAP financial measures adjusting for the impact of the FDIC SA provides additional information for evaluating its results of operations and comparing its operational performance between periods by excluding these impacts that may not be reflective of its underlying operating performance.

Reconciliation	1Q24 Reported	FDIC SA	1Q24 adj. FDIC SA
(\$ in billions, except per share data)			
Noninterest expense	\$17.2	\$0.7	\$16.5

B Reserve build (release) is calculated by subtracting net charge-offs for the period from the provision for credit losses recognized in that period. The period-end allowance, or reserve, for credit losses reflects the beginning of the period allowance adjusted for net charge-offs recorded in that period plus the provision for credit losses and other valuation accounts recognized in that period.

Note: Amounts may not total due to rounding.

<sup>1</sup> Represents a non-GAAP financial measure. For more information and a reconciliation to the most directly comparable GAAP financial measure, see note C on slide 33. For important presentation information about this measure, see slide 36.

<sup>2</sup> Calculated as net income applicable to common shareholders divided by average diluted common shares. Average diluted common shares were 8,031MM for 1Q24.

<sup>3</sup> Calculated as net income divided by average assets. Average assets were \$3,247B for 1Q24.

<sup>4</sup> Calculated as net income applicable to common shareholders divided by average common shareholders' equity. Average common shareholders' equity was \$264B for 1Q24.

<sup>5</sup> Calculated as net income applicable to common shareholders divided by average tangible common shareholders' equity. Average tangible common shareholders' equity was \$194B for 1Q24. Average tangible common shareholders' equity represents a non-GAAP financial measure. For important presentation information on non-GAAP measures, see slide 36.

<sup>6</sup> Calculated as noninterest expense divided by revenue, net of interest expense.

# Notes

C Pretax, pre-provision income (PTPI) at the consolidated level is a non-GAAP financial measure calculated by adjusting consolidated pretax income to add back provision for credit losses. Similarly, PTPI at the segment level is a non-GAAP financial measure calculated by adjusting the segments' pretax income to add back provision for credit losses. Management believes that PTPI (both at the consolidated and segment level) is a useful financial measure as it enables an assessment of the Corporation's ability to generate earnings to cover credit losses through a credit cycle as well as provides an additional basis for comparing the Corporation's results of operations between periods by isolating the impact of provision for credit losses, which can vary significantly between periods. See reconciliation below.

E Forward-looking statements related to the Corporation's NII outlook are based on the Corporation's baseline NII forecast that takes into account expected future business growth, ALM positioning, and the future direction of interest rate movements as implied by market-based curves, including, among others, the Corporation's current expectations regarding expected interest rate cuts, the expected impact of an extra day compared to 2Q, the expected benefit to NII from fixed-rate asset repricing and changes in certain cash flow hedges, and a range of expected loan and deposit growth. These statements are not guarantees of future results or performance and involve known and unknown risks, uncertainties, and assumptions that are difficult to predict and are often beyond the Corporation's control. For more information, see Forward Looking Statements on slide 35.

F Revenue for all periods included net debit valuation adjustments (DVA) on derivatives, as well as amortization of own credit portion of purchase discount and realized DVA on structured liabilities. Net DVA gains (losses) were (\$1MM), (\$85MM), and (\$102MM) for 2Q24, 1Q24, and 2Q23, respectively, and (\$86MM), (\$88MM), \$227MM, and (\$36MM) for 2024 YTD, 2023 YTD, 2022 YTD, and 2021 YTD, respectively. Net DVA gains (losses) included in FICC revenue were \$5MM, (\$76MM), and (\$97MM) for 2Q24, 1Q24, and 2Q23, respectively, and (\$71MM), (\$86MM), \$220MM, and (\$37MM) for 2024 YTD, 2023 YTD, 2022 YTD, and 2021 YTD, respectively. Net DVA gains (losses) included in Equities revenue were (\$6MM), (\$9MM), and (\$5MM) for 2Q24, 1Q24, and 2Q23, respectively, and (\$15MM), (\$2MM), \$7MM, and \$1MM for 2024 YTD, 2023 YTD, 2022 YTD, and 2021 YTD, respectively.

G VaR model uses a historical simulation approach based on three years of historical data and an expected shortfall methodology equivalent to a 99% confidence level. Using a 95% confidence level, average VaR was \$45MM, \$43MM, and \$43MM for 2Q24, 1Q24, and 2Q23 respectively, and \$44MM, \$43MM, \$33MM, and \$29MM for 2024 YTD, 2023 YTD, 2022 YTD, and 2021 YTD, respectively.

# Forward-Looking Statements

Bank of America Corporation (the Corporation) and its management may make certain statements that constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as “anticipates,” “targets,” “expects,” “hopes,” “estimates,” “intends,” “plans,” “goals,” “believes,” “continue” and other similar expressions or future or conditional verbs such as “will,” “may,” “might,” “should,” “would” and “could.” Forward-looking statements represent the Corporation’s current expectations, plans or forecasts of its future results, revenues, liquidity, net interest income, provision for credit losses, expenses, efficiency ratio, capital measures, strategy, deposits, assets, and future business and economic conditions more generally, and other future matters. These statements are not guarantees of future results or performance and involve certain known and unknown risks, uncertainties and assumptions that are difficult to predict and are often beyond the Corporation’s control. Actual outcomes and results may differ materially from those expressed in, or implied by, any of these forward-looking statements.

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties more fully discussed under Item 1A. Risk Factors of the Corporation’s 2023 Annual Report on Form 10-K and in any of the Corporation’s subsequent Securities and Exchange Commission filings: the Corporation’s potential judgments, orders, settlements, penalties, fines and reputational damage resulting from pending or future litigation and regulatory investigations, proceedings and enforcement actions, including as a result of our participation in and execution of government programs related to the Coronavirus Disease 2019 (COVID-19) pandemic, such as the processing of unemployment benefits for California and certain other states; the possibility that the Corporation’s future liabilities may be in excess of its recorded liability and estimated range of possible loss for litigation, and regulatory and government actions; the possibility that the Corporation could face increased claims from one or more parties involved in mortgage securitizations; the Corporation’s ability to resolve representations and warranties repurchase and related claims; the risks related to the discontinuation of reference rates, including increased expenses and litigation and the effectiveness of hedging strategies; uncertainties about the financial stability and growth rates of non-U.S. jurisdictions, the risk that those jurisdictions may face difficulties servicing their sovereign debt, and related stresses on financial markets, currencies and trade, and the Corporation’s exposures to such risks, including direct, indirect and operational; the impact of U.S. and global interest rates, inflation, currency exchange rates, economic conditions, trade policies and tensions, including tariffs, and potential geopolitical instability; the impact of the interest rate, inflationary, macroeconomic, banking and regulatory environment on the Corporation’s assets, business, financial condition and results of operations; the impact of adverse developments affecting the U.S. or global banking industry, including bank failures and liquidity concerns, resulting in worsening economic and market volatility, and regulatory responses thereto; the possibility that future credit losses may be higher than currently expected due to changes in economic assumptions, customer behavior, adverse developments with respect to U.S. or global economic conditions and other uncertainties, including the impact of supply chain disruptions, inflationary pressures and labor shortages on economic conditions and our business; potential losses related to the Corporation’s concentration of credit risk; the Corporation’s ability to achieve its expense targets and expectations regarding revenue, net interest income, provision for credit losses, net charge-offs, effective tax rate, loan growth or other projections; adverse changes to the Corporation’s credit ratings from the major credit rating agencies; an inability to access capital markets or maintain deposits or borrowing costs; estimates of the fair value and other accounting values, subject to impairment assessments, of certain of the Corporation’s assets and liabilities; the estimated or actual impact of changes in accounting standards or assumptions in applying those standards; uncertainty regarding the content, timing and impact of regulatory capital and liquidity requirements; the impact of adverse changes to total loss-absorbing capacity requirements, stress capital buffer requirements and / or global systemically important bank surcharges; the potential impact of actions of the Board of Governors of the Federal Reserve System on the Corporation’s capital plans; the effect of changes in or interpretations of income tax laws and regulations; the impact of implementation and compliance with U.S. and international laws, regulations and regulatory interpretations, including, but not limited to, recovery and resolution planning requirements, Federal Deposit Insurance Corporation assessments, the Volcker Rule, fiduciary standards, derivatives regulations and potential changes to loss allocations between financial institutions and customers, including for losses incurred from the use of our products and services, including electronic payments and payment of checks, that were authorized by the customer but induced by fraud; the impact of failures or disruptions in or breaches of the Corporation’s operations or information systems, or those of third parties, including as a result of cybersecurity incidents; the risks related to the development, implementation, use and management of emerging technologies, including artificial intelligence and machine learning; the impact of uncertain political conditions or any future federal government shutdown and uncertainty regarding the federal government’s debt limit or changes in fiscal, monetary or regulatory policy; the emergence or continuation of widespread health emergencies or pandemics; the impact of natural disasters, extreme weather events, military conflicts (including the Russia / Ukraine conflict, the conflict in the Middle East, the possible expansion of such conflicts and potential geopolitical consequences), terrorism or other geopolitical events; Forward-looking statements speak only as of the date they are made, and the Corporation undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

## Important Presentation Information

- The information contained herein is preliminary and based on Corporation data available at the time of the earnings presentation. It speaks only as of the particular date or dates included in the accompanying slides. Bank of America does not undertake an obligation to, and disclaims any duty to, update any of the information provided.
- The Corporation may present certain metrics and ratios, including year-over-year comparisons of revenue, noninterest expense, and pretax income, excluding certain items (e.g., DVA), that are non-GAAP financial measures. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. For more information about the non-GAAP financial measures contained herein, please see the presentation of the most directly comparable financial measures calculated in accordance with GAAP and accompanying reconciliations in the earnings press release for the quarter ended June 30, 2024, and other earnings-related information available through the Bank of America Investor Relations website at: <https://investor.bankofamerica.com/quarterly-earnings>, the content of which is not incorporated by reference into this presentation.
- The Corporation presents certain key financial and nonfinancial performance indicators (KPIs) that management uses when assessing consolidated and / or segment results. The Corporation believes this information is useful because it provides management with information about underlying operational performance and trends. KPIs are presented in 2Q24 Financial Results on slide 2 and on the Summary Income Statement for each segment.
- The Corporation also views net interest income and related ratios and analyses on a fully taxable-equivalent (FTE) basis, which when presented on a consolidated basis are non-GAAP financial measures. The Corporation believes managing the business with net interest income on an FTE basis provides investors with meaningful information on the interest margin for comparative purposes. The Corporation believes that the presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. The FTE adjustment was \$160MM, \$158MM, \$145MM, \$153MM, and \$135MM for 2Q24, 1Q24, 4Q23, 3Q23, and 2Q23, respectively.
- The Corporation allocates capital to its business segments using a methodology that considers the effect of regulatory capital requirements in addition to internal risk-based capital models. Allocated capital is reviewed periodically and refinements are made based on multiple considerations that include, but are not limited to, risk-weighted assets measured under Basel 3 Standardized and Advanced approaches, business segment exposures and risk profile, and strategic plans. As a result of this process, in the first quarter of 2024, the Corporation adjusted the amount of capital being allocated to its business segments.

<sup>(2)</sup> Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures. <sup>(1)</sup> Regulatory capital ratios at June 30, 2024 are preliminary. The Corporation reports regulatory capital ratios under both the Standardized and Advanced approaches. Capital adequacy is evaluated against the lower of the Standardized or Advanced approaches compared to their respective regulatory capital ratio requirements. The Corporation's binding ratio was the Total capital ratio under the Standardized approach for June 30, 2024 and March 31, 2024, and the Common equity tier 1 ratio under the Standardized approach for June 30, 2023.

<sup>(2)</sup> Tangible equity ratio equals period-end tangible shareholders' equity divided by period-end tangible assets. Tangible common equity ratio equals period-end tangible common shareholders' equity divided by period-end tangible assets. Tangible shareholders' equity and tangible assets are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. (See Exhibit A: Non-GAAP Reconciliations - Reconciliation to GAAP Financial Measures on page 33.)

<sup>(2)</sup> For presentation purposes, in segments or businesses where the total of liabilities and equity exceeds assets, the Corporation allocates assets from *All Other* to match the segments' and businesses' liabilities and allocated shareholders' equity. As a result, total earning assets and total assets of the businesses may not equal total *Consumer Banking*.

## Exhibit A: Non-GAAP Reconciliations

### Bank of America Corporation and Subsidiaries Reconciliations to GAAP Financial Measures

(Dollars in millions, except per share information)

The Corporation evaluates its business using certain non-GAAP financial measures, including pretax, pre-provision income and ratios that utilize tangible equity and tangible assets, each of which is a non-GAAP financial measure. Tangible equity represents shareholders' equity or common shareholders' equity reduced by goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities ("adjusted" shareholders' equity or common shareholders' equity). Return on average tangible common shareholders' equity measures the Corporation's net income applicable to common shareholders as a percentage of adjusted average common shareholders' equity. The tangible common equity ratio represents adjusted ending common shareholders' equity divided by total tangible assets (total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities). Return on average tangible shareholders' equity measures the Corporation's net income as a percentage of adjusted average total shareholders' equity. The tangible equity ratio represents adjusted ending shareholders' equity divided by total tangible assets. Tangible book value per common share represents adjusted ending common shareholders' equity divided by ending common shares outstanding. These measures are used to evaluate the Corporation's use of equity. In addition, profitability, relationship and investment models all use return on average tangible shareholders' equity as key measures to support our overall growth goals.

See the tables below for reconciliations of these non-GAAP financial measures to the most directly comparable financial measures defined by GAAP for the six months ended June 30, 2024 and 2023, and the three months ended June 30, 2024, March 31, 2024, December 31, 2023, September 30, 2023 and June 30, 2023. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. Other companies may define or calculate these non-GAAP financial measures differently.
