Cash Conversion:

Cash Conversion Feature:

The notes may be converted for cash at the option of investors during the ten scheduled trading days immediately following the interest payment date occurring in May of each year beginning May 1, 2019, if specified conditions are met as set forth in the accompanying preliminary pricing supplement. Notes that are not so converted early will be converted automatically into cash on the maturity date as set forth in the accompanying preliminary pricing supplement.

Investors who convert their notes for cash prior to the maturity date will not receive any payment for any accrued and unpaid interest on the Early Cash Conversion Date, or any future interest payments. In addition, investors will not receive their payment, if any, upon any optional early cash conversion until the Optional Early Cash Conversion Payment Date. Investors may not convert their notes for cash prior to the maturity date if a Make-Whole Event occurs prior to April 1, 2023.

You may elect to convert for cash all or any portion of your notes early only if (i) a Make-Whole Event has not occurred, and (ii) the product of the Price Multiplier and the Closing Market Price (each as defined in the product supplement) of the Underlying Stock for at least 20 trading days (whether or not consecutive) during the 30 consecutive trading days immediately preceding that interest payment date is greater than or equal to 100% of the Initial Reference Price.

If you do not comply with the procedures as set forth in the accompanying preliminary pricing supplement under “Description of the Notes—Optional Early Cash Conversion” for an early conversion, your attempt to convert the notes will be deemed ineffective. Your delivery of the notice of early conversion as set forth in the accompanying preliminary pricing supplement will be irrevocable.
