A class designation of notes determines the relative seniority for receipt of cash flows and funding of uncovered defaults on principal receivables allocated to the related series of notes. The Class B notes are subordinate to the Class A notes and the Class C notes are subordinate to the Class A and Class B notes. With respect to the tranches in each class of notes, the cash flows and funding of uncovered defaults will be allocated to the tranches on a pro rata basis.

Without noteholder consent, BA Credit Card Trust may issue a new series, class or tranche of notes at any time upon the satisfaction of certain conditions described in the underlying transaction agreements, including confirmation that (i) the issuer reasonably believes that the new issuance will not adversely affect the amount of funds available to be distributed to the holders of any outstanding notes or the timing of such distributions, and (ii) the new issuance will not cause a reduction, qualification or withdrawal of the ratings of any outstanding notes.

In addition, without noteholder consent and without the consent of any holders of certificates issued by BA Master Credit Card Trust II, BA Credit Card Funding, LLC has the right to designate, from time to time, additional eligible credit card accounts to BA Master Credit Card Trust II. In connection with any such designation, BA Credit Card Funding, LLC will transfer the related receivables, whether then existing or thereafter created, to BA Master Credit Card Trust II.

† Variances in Trust Reporting Compared with Cardholder Reporting

This data was produced utilizing FIA's daily trust payment methodology as opposed to FIA's cardholder cycle payment methodology.

As previously reported, on October 1, 2014, FIA consummated the merger of FIA with and into Bank of America, National Association ("BANA"). BANA is an indirect subsidiary of Bank of America Corporation.

Prior to the merger with BANA, FIA utilized two payment prioritization methodologies when servicing credit card accounts. The cardholder cycle payment methodology is utilized for customer calculations such as balance subject to finance charge, finance charges billed, and statement balance reporting functions. The daily trust payment methodology is utilized for reporting on the assets in the BA Master Credit Card Trust II portfolio. Following the merger, BANA continues to utilize these same two payment prioritization methodologies. FIA (prior to the merger) believed, and BANA (following the merger) believes that these two methodologies have been utilized since approximately 1996.

The cardholder methodology prioritizes payments to balances by the interest rate applied to the balance, then, within each rate bucket, by the type of balance, generally fees and finance charge receivable balances before principal receivable balances. This methodology runs only when an account cycles once per month, reprocessing all transactions since the last statement. Although a customer's outstanding balance is updated daily under the cardholder methodology as transactions are posted to the system, the component balances (which define principal receivable and finance charge receivable portions) are updated only once per month at the time an account cycles.

The trust methodology prioritizes payments by balance type, generally paying all outstanding fees and finance charge receivable balances before paying outstanding principal receivable balances. Also, the trust methodology prioritizes some types of credit adjustments between principal receivable balances and finance charge receivable balances differently than does the cardholder methodology. Under the trust methodology, principal receivable and finance charge receivable balances are updated daily as an output of the daily payment allocation.

FIA (prior to the merger) had begun and BANA (following the merger) has continued to implement a systems initiative that will consolidate these methodologies into a single payment prioritization methodology. This initiative was originally expected to be completed by mid-2014 but has been delayed, and is currently expected to be completed by early-2015. Upon completion of this initiative, this consolidated methodology will prioritize payments and credit adjustments to balances similar to the cardholder methodology but will do so on a daily basis similar to the trust methodology.

The two current methodologies agree on the total outstanding balance for each credit card account, but they vary with respect to the component principal receivable and finance charge receivable balances. This variance is primarily due to differences in the prioritization applied to payments and credit adjustments under each of the two methodologies. Due to differences in the frequency with which principal receivable and finance charge receivable balances are updated under the two methodologies, neither FIA (prior to the merger) nor BANA (following the merger) has been able to precisely quantify the variance in the component principal receivable and finance charge receivable balances at any point in time. However, if the cardholder methodology had been utilized for reporting on the assets in the BA Master Credit Card Trust II portfolio for the September 2014 Monthly Period, BANA estimates the reported aggregate principal receivable balance would have been approximately 3% or approximately \$1.6 billion lower and the aggregate finance charge receivable balance would have been higher by a corresponding dollar amount, in each case as compared with the respective amounts reported herein as of the end of the day on the last day of the September 2014 Monthly Period. While this estimated amount represents the variance that has accumulated under the two methodologies over time, due to systems limitations, neither FIA (prior to the merger) nor BANA (following the merger) has been able to determine the rate of such accumulation in the past or what variance may accumulate going forward prior to the implementation of the consolidated methodology.

Certain reported BA Master Credit Card Trust II performance and related metrics are calculated, in part, based on component principal receivable or finance charge receivable balances arising in the credit card accounts at one or more points in time and/or on the amount of collections of principal receivables or finance charge receivables received during each relevant period. These metrics include, but are not limited to, historical information presented in Annex I to each of the Issuer's prospectuses and information included in this and prior periodic reports filed on Form 10-D. BANA expects, therefore, that the reported results for all such reported performance and related metrics have been, are, and will be different than would otherwise have been the case had the trust methodology used the same prioritization for payments and credit adjustments as utilized by the cardholder methodology. However, due to systems limitations, neither FIA (prior to the merger) nor BANA (following the merger) has been able to accurately quantify what impact these different payment and credit adjustment prioritization methodologies have had and will have on these performance and related metrics, and is not able to estimate what the impact

will be at the time of conversion to the consolidated methodology.

While financial reporting for BA Master Credit Card Trust II, including certain calculations dependent on the characterization of a receivable as a principal receivable or a finance charge receivable, is impacted by the different methodologies, the two methodologies do agree on total outstanding balance and total payments received for each credit card account. Cardholder payments and credit adjustments have been, and continue to be, applied and recorded to cardholder accounts in accordance with cardholder agreements under the cardholder methodology.

IN WITNESS WHEREOF, the undersigned has duly executed this certificate this 7th day of October, 2014.

† Variances in Trust Reporting Compared with Cardholder Reporting

This data was produced utilizing FIA's daily trust payment methodology as opposed to FIA's cardholder cycle payment methodology.

As previously reported, on October 1, 2014, FIA consummated the merger of FIA with and into Bank of America, National Association ("BANA"). BANA is an indirect subsidiary of Bank of America Corporation.

Prior to the merger with BANA, FIA utilized two payment prioritization methodologies when servicing credit card accounts. The cardholder cycle payment methodology is utilized for customer calculations such as balance subject to finance charge, finance charges billed, and statement balance reporting functions. The daily trust payment methodology is utilized for reporting on the assets in the BA Master Credit Card Trust II portfolio. Following the merger, BANA continues to utilize these same two payment prioritization methodologies. FIA (prior to the merger) believed, and BANA (following the merger) believes that these two methodologies have been utilized since approximately 1996.

The cardholder methodology prioritizes payments to balances by the interest rate applied to the balance, then, within each rate bucket, by the type of balance, generally fees and finance charge receivable balances before principal receivable balances. This methodology runs only when an account cycles once per month, reprocessing all transactions since the last statement. Although a customer's outstanding balance is updated daily under the cardholder methodology as transactions are posted to the system, the component balances (which define principal receivable and finance charge receivable portions) are updated only once per month at the time an account cycles.

The trust methodology prioritizes payments by balance type, generally paying all outstanding fees and finance charge receivable balances before paying outstanding principal receivable balances. Also, the trust methodology prioritizes some types of credit adjustments between principal receivable balances and finance charge receivable balances differently than does the cardholder methodology. Under the trust methodology, principal receivable and finance charge receivable balances are updated daily as an output of the daily payment allocation.

FIA (prior to the merger) had begun and BANA (following the merger) has continued to implement a systems initiative that will consolidate these methodologies into a single payment prioritization methodology. This initiative was originally expected to be completed by mid-2014 but has been delayed, and is currently expected to be completed by early-2015. Upon completion of this initiative, this consolidated methodology will prioritize payments and credit adjustments to balances similar to the cardholder methodology but will do so on a daily basis similar to the trust methodology.

The two current methodologies agree on the total outstanding balance for each credit card account, but they vary with respect to the component principal receivable and finance charge receivable balances. This variance is primarily due to differences in the prioritization applied to payments and credit adjustments under each of the two methodologies. Due to differences in the frequency with which principal receivable and finance charge receivable balances are updated under the two methodologies, neither FIA (prior to the merger) nor BANA (following the merger) has been able to precisely quantify the variance in the component principal receivable and finance charge receivable balances at any point in time. However, if the cardholder methodology had been utilized for reporting on the assets in the BA Master Credit Card Trust II portfolio for the September 2014 Monthly Period, BANA estimates the reported aggregate principal receivable balance would have been approximately 3% or approximately \$1.6 billion lower and the aggregate finance charge receivable balance would have been higher by a corresponding dollar amount, in each case as compared with the respective amounts reported herein as of the end of the day on the last day of the September 2014 Monthly Period. While this estimated amount represents the variance that has accumulated under the two methodologies over time, due to systems limitations, neither FIA (prior to the merger) nor BANA (following the merger) has been able to determine the rate of such accumulation in the past or what variance may

accumulate going forward prior to the implementation of the consolidated methodology.

Certain reported BA Master Credit Card Trust II performance and related metrics are calculated, in part, based on component principal receivable or finance charge receivable balances arising in the credit card accounts at one or more points in time and/or on the amount of collections of principal receivables or finance charge receivables received during each relevant period. These metrics include, but are not limited to, historical information presented in Annex I to each of the Issuer's prospectuses and information included in this and prior periodic reports filed on Form 10-D. BANA expects, therefore, that the reported results for all such reported performance and related metrics have been, are, and will be different than would otherwise have been the case had the trust methodology used the same prioritization for payments and credit adjustments as utilized by the cardholder methodology. However, due to systems limitations, neither FIA (prior to the merger) nor BANA (following the merger) has been able to accurately quantify what impact these different payment and credit adjustment prioritization methodologies have had and will have on these performance and related metrics, and is not able to estimate what the impact will be at the time of conversion to the consolidated methodology.

While financial reporting for BA Master Credit Card Trust II, including certain calculations dependent on the characterization of a receivable as a principal receivable or a finance charge receivable, is impacted by the different methodologies, the two methodologies do agree on total outstanding balance and total payments received for each credit card account. Cardholder payments and credit adjustments have been, and continue to be, applied and recorded to cardholder accounts in accordance with cardholder agreements under the cardholder methodology.

IN WITNESS WHEREOF, the undersigned has duly executed and delivered this Monthly Noteholders' Statement this 7th day of October, 2014.
