BANK OF AMERICA CORPORATION
Medium-Term Senior Note, Series K

SUPPLEMENTAL REDEMPTION AMOUNT RIDER

General

This Note is part of a series of medium-term notes entitled "Medium-Term Notes, Series K" issued under the Indenture, as described in the Prospectus dated April 14, 2004 and Prospectus Supplement dated April 15, 2004 and is designated as the Bank of America Corporation 1.25% Capital Protected Equity Performance Linked Securities "Basket CYCLES™," due September 27, 2011, Linked to a Basket of Four Indices. Certain capitalized terms used herein have the meanings ascribed to them in the Prospectus and the Prospectus Supplement.

Interest

This Note bears interest from the Original Issue Date at a rate of 1.25% per annum. Interest is payable semi-annually in arrears on March 27 and September 27 of each year, and on the Maturity Date (each, an "interest payment date"), beginning March 27, 2006. Interest is computed on the basis of a 360-day year of twelve 30-day months.

Each interest payment on an interest payment date will include interest accrued from, and including, the Original Issue Date or preceding interest payment date, as the case may be, to, but excluding, that interest payment date. If an interest payment date falls on a day that is not a Business Day, the applicable payment will be made on the next Business Day as if it were the date that payment was due, and no interest will accrue as a result of the postponement.

The record date for each interest payment date, including the interest payment date scheduled to occur on the Maturity Date, will be the date that is 15 calendar days prior to that scheduled interest payment date, whether or not that date is a Business Day. However, the principal amount of this Note will be paid only to the holder of this Note on the Maturity Date.

Payment at Maturity; Supplemental Redemption Amount

At maturity, the Corporation will determine and pay:

- (a) the principal amount of this Note;
- (b) the final semi-annual payment of interest on this Note; and
- (c) under the circumstances described below, a "Supplemental Redemption Amount"

calculated by reference to the performance of a group, or "Basket" of four selected stock indices over the term of this Note. The four stock indices (each, a "Basket Index") are the S&P 500® Index, the S&P MidCap 400 Index, the Russell 2000® Index, and the Dow Jones EURO STOXX 50® Index.

On September 22, 2005, which is the “pricing date” of this Note, the Corporation established the “Starting Level” of the Basket at 1,000. Each Basket Index represents a percentage of the Starting Level of the Basket on the pricing date. For each Basket Index, the Corporation set a “Index Ratio” on the pricing date. The Corporation set the Index Ratio for each Basket Index by (a) multiplying 1,000 by the “Index Weight” for that Basket Index that is set forth in the table below and (b) dividing that product by the closing level of that Basket Index on the pricing date. In the case of the Dow Jones EURO STOXX 50SM Index, to effect the above calculation, the closing level on the pricing date was multiplied by the U.S. dollar/euro exchange rate at 11:00 a.m., New York time, on the pricing date, as determined by the Calculation Agent. The result in both cases was rounded to the nearest one hundred-thousandth. The Index Ratio for each Basket Index was fixed as of the pricing date and is subject to change only if certain events or adjustments affect the relevant Basket Index, as described below.

The “Basket Level” is the hypothetical value of the Basket that is determined at the close of any Business Day. The Basket Level equals the sum of the products of the closing level and the Index Ratio for each Basket Index. However, in the case of the Dow Jones EURO STOXX 50SM Index, its closing level will be multiplied by its Index Ratio **and** the U.S. dollar/euro exchange rate at 11:00 a.m., New York time, on the annual valuation date, as determined by the Calculation Agent. The Basket Level will be rounded to the nearest one-hundredth.

The following table illustrates the Basket Indices, as weighted below based on the closing level of each Basket Index on the pricing date, as determined by the Calculation Agent to achieve a Basket Level of 1,000 on that date:

| Basket Index | Closing Level on Pricing Date | Index Weight | Index Ratio |
|---|-------------------------------------|-----------------|-------------|
| S&P 500 [®] Index | 1,214.62 | 70.00% | 0.5763 |
| S&P MidCap 400 Index | 697.89 | 9.00% | 0.1290 |
| Russell 2000 [®] Index | 651.16 | 7.00% | 0.1075 |
| Dow Jones EURO STOXX 50 SM Index | 3,312.26 | 14.00% | 0.0348 |

After the United States and European stock markets close on the final annual valuation date, the Calculation Agent will determine the “Average Basket Return” and any Supplemental Redemption Amount. At maturity, the holder of this Note will be paid the principal amount of this Note, the final semi-annual interest payment, and any Supplemental Redemption Amount.

The Calculation Agent will determine any Supplemental Redemption Amount payable to the holder of this Note for each \$1,000 principal amount of this Note at maturity by calculating the Average Basket Return and comparing it to the “Total Interest Percentage.” The “Total Interest Percentage” is equal to 7.50% of the principal amount of this Note, and is the sum of the semi-annual interest payments that will be paid over the term of this Note. The Calculation Agent will determine the “Average Level,” which is the arithmetic average of the Basket Level on each of the following six annual valuation dates (the sum of the Basket Level on each valuation date, divided by 6):

Annual Valuation Dates

1. September 22, 2006
2. September 22, 2007
3. September 22, 2008
4. September 22, 2009
5. September 22, 2010
6. September 22, 2011

The Supplemental Redemption Amount, if any, will be based upon the Average Basket Return, which will be calculated as follows:

$$\frac{\text{Average Level} - \text{Starting Level}}{\text{Starting Level}}$$

The result will be rounded to the nearest ten-thousandth of a decimal place and then expressed as a percentage.

If the Average Basket Return is less than or equal to the Total Interest Percentage (which is equal to 7.50%), then the Supplemental Redemption Amount will equal \$0.00.

If the Average Basket Return is greater than the Total Interest Percentage, then the Supplemental Redemption Amount for each \$1,000 principal amount of the notes will equal the product of:

$$\text{\$1,000} \times (\text{Average Basket Return} - \text{Total Interest Percentage})$$

This Note is principal protected. If the Average Basket Return does not exceed the Total Interest Percentage, the holder of this Note will receive only the principal amount and the final semi-annual interest payment at maturity.

Event of Default

Upon the occurrence of an Event of Default (as defined in the Indenture), the holder of this Note only will be entitled to receive the principal amount of the Note, and any accrued and unpaid interest, and will not be entitled to payment of any Supplemental Redemption Amount.

Market Disruption

Each of the following will be a "Market Disruption Event" if, in the sole opinion of the Calculation Agent, that event materially affects any of the Basket Indices:

-
- (a) the suspension, material limitation, or absence of the trading of a material number of stocks included in any of the Basket Indices;
 - (b) the suspension or material limitation of the trading of stocks on one or more stock exchanges on which stocks included in any of the Basket Indices are quoted;
 - (c) the suspension or material limitation of the trading of (i) options or futures relating to any of the Basket Indices or (ii) options or futures generally; or
 - (d) the imposition of any exchange controls with respect to any currencies involved in determining the total amount payable on this Note at maturity.

For the purpose of this definition of Market Disruption Event:

- (a) a limitation on the number of hours or days of trading will not be a Market Disruption Event if it results from an announced change in the regular business hours of the relevant exchange;
- (b) a limitation on trading imposed by reason of the movements in price exceeding the levels permitted by any relevant exchange will be a Market Disruption Event;
- (c) a decision to permanently discontinue trading in the relevant futures or options contracts will not constitute a Market Disruption Event; and
- (d) an absence of trading on a securities exchange or quotation system will not include any time when that exchange or quotation system is closed for trading under ordinary circumstances.

If a Market Disruption Event occurs or is continuing with respect to any Basket Index on a day that would otherwise be an annual valuation date, then, in order to calculate the Basket Level as of that annual valuation date, the Calculation Agent instead will use the closing level of the Basket Index on the first Business Day after that day on which no Market Disruption Event occurs or is continuing as to that Basket Index. The Calculation Agent will use the closing level for each Basket Index that is not subject to a Market Disruption Event on the applicable annual valuation date.

In no event will the determination of the closing level for any Basket Index subject to a Market Disruption Event be postponed by more than five Business Days. If any determination as to a Basket Index subject to a Market Disruption Event is postponed to the last possible day, but a Market Disruption Event occurs or is continuing on that day, that day nevertheless will be the annual valuation date as to that Basket Index, the Calculation Agent will make a good faith estimate of the closing level of the Basket Index based upon its assessment of the level of the Basket Index at that time. If any determination of a closing level required to be made on the final annual valuation date is postponed due to a Market Disruption Event, the Maturity Date for this Note also will be postponed by the same number of Business Days.

Discontinuance of the Basket Indices; Alteration of Method of Calculation

If the publication of any of the Basket Indices is discontinued and a successor or substitute index is published that the Calculation Agent determines, in its sole discretion, is comparable to the discontinued Basket Index (the new index being referred to as a "Successor Index"), then the relevant closing levels of the applicable Basket Index will be determined by reference to the closing level of the Successor Index.

If the Calculation Agent selects a Successor Index for any Basket Index, the Calculation Agent immediately will notify the Corporation and the Trustee, and the Trustee will provide written notice of a change to the holder of this Note within three Business Days of selection.

If the publication of a Basket Index or a Successor Index is discontinued, and the Calculation Agent determines that no Successor Index is available, then the Calculation Agent will notify the Corporation and the Trustee and will calculate the appropriate closing levels. These calculations by the Calculation Agent will be in accordance with the formula for and method of calculating the applicable Basket Index last in effect prior to that discontinuance. If a Successor Index is selected or the Calculation Agent calculates a level as a substitute for the applicable Basket Index, that Successor Index or level will be substituted for that Basket Index for all purposes, and the Calculation Agent will make an adjustment to the applicable Index Ratio as it determines to be necessary.

If at any time the method of calculating a Basket Index or a Successor Index, or the level of that index, is changed in a material respect, or if a Basket Index or a Successor Index in any other way is modified so that it does not, in the opinion of the Calculation Agent, fairly represent the level of the Basket Index or the Successor Index had those changes or modifications not been made, then, from and after that time, the Calculation Agent will notify the Corporation and the Trustee. The Calculation Agent will make those calculations and adjustments as, in the good faith judgment of the Calculation Agent, may be necessary in order to arrive at a level of a stock index comparable to the applicable Basket Index or the Successor Index, as the case may be, as if those changes or modifications had not been made, and calculate the closing levels with reference to that Basket Index or the Successor Index, as adjusted. Accordingly, if the method of calculating a Basket Index or a Successor Index is modified so that its level is a fraction of what it would have been if it had not been modified (e.g., due to a split in an index), then the Calculation Agent will adjust the index in order to arrive at a level of the Basket Index or Successor Index as if it had not been modified (e.g., as if the split had not occurred). The Calculation Agent also may determine that no adjustment is required by the modification of the method of calculation.

Role of the Calculation Agent
