Summary

The 95% Principal Protected Notes Linked to the Exchange Rate of U.S. dollars per Russian ruble due August 7, 2009 (the "Notes") are senior, unsecured debt securities of Merrill Lynch & Co., Inc. that provide investors with a 222.3% participation rate in increases in the exchange rate of United States dollars per Russian ruble (the "Exchange Rate") from the Starting Value of the Exchange Rate on July 31, 2008, the date the Notes were priced for initial sale to the public (the "Pricing Date") to the Ending Value of the Exchange Rate to be determined on a valuation date shortly prior to the maturity date of the Notes. The Exchange Rate is the currency exchange rate in the interbank market quoted as the number of United States dollars for which one Russian ruble can be exchanged, the inverse of the value of the exchange rate of Russian rubles per United States dollar as reported by Reuters on page RUBMCMEEMTA=, or any substitute page thereto, at approximately 10:00 a.m. in London. The Exchange Rate increases as the value of the Russian ruble increases relative to the United States dollar and decreases as the value of the Russian ruble decreases relative to the United States dollar. Investors must be willing to forego interest payments on the Notes and to lose up to 5% of their investment if the Exchange Rate declines from the Starting Value to the Ending Value.

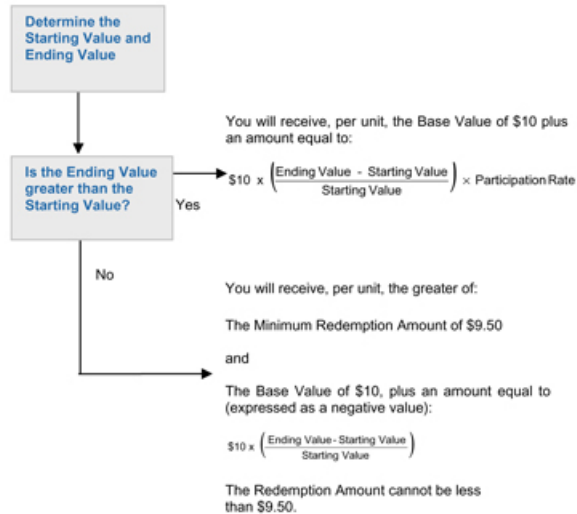

Terms of the Notes

Issuer:	Merrill Lynch & Co., Inc.
Original Public Offering Price:	\$10 per unit.
Term:	Approximately one year.
Exchange Rate:	The exchange rate of United States dollars per Russian ruble.
Starting Value:	0.04271131
Ending Value:	The Exchange Rate on the Valuation Date.
Valuation Date:	July 31, 2009.
Participation Rate:	222.3%
Calculation Agent:	Merrill Lynch Capital Services, Inc.
Minimum Redemption Amount:	\$9.50
Base Value:	\$10.00

Determining Payment at Maturity for the Notes

On the maturity date, you will receive a cash payment per unit denominated in U.S. dollars, equal to the Redemption Amount. If the value of the Exchange Rate decreases from the Starting Value to the Ending Value, you may receive less than the Original Public Offering Price per unit, but in no case will you receive less than the Minimum Redemption Amount.

The "Redemption Amount" per unit to which you will be entitled will depend on the direction of and the percentage change in the value of the Exchange Rate, and will be determined as set forth below:

Hypothetical Payout Profile

This graph reflects the hypothetical performance of the Notes, including the Participation Rate of 222.3%. The blue line reflects the hypothetical Redemption Amount of the Notes, while the gray dashed-line reflects the performance of a hypothetical direct investment in the Exchange Rate.

This graph has been prepared for purposes of illustration only. Your actual return will depend on the actual Ending Value and the term of your investment.

Hypothetical Payments at Maturity

Examples

Set forth below are four examples of Redemption Amount calculations (rounded to two decimal places for the purpose of these examples), including the Starting Value of 0.04271131 and the Participation Rate of 222.3%.

Example 1—The hypothetical Ending Value is 50% below the Starting Value:

Starting Value: 0.04271131 United States dollars per Russian ruble
Hypothetical Ending Value: 0.02135566 United States dollars per Russian ruble

Redemption Amount (per unit) = \$9.50 (The Redemption Amount cannot be less the Minimum Redemption Amount of \$9.50 per unit)

Example 2—The hypothetical Ending Value is 2% below the Starting Value:

Starting Value: 0.04271131 United States dollars per Russian ruble
Hypothetical Ending Value: 0.04185708 United States dollars per Russian ruble

$$\$10 + \$10 \times \left(\frac{0.04185708 - 0.04271131}{0.04271131} \right) = \$9.80$$

Redemption Amount (per unit) = \$9.80

Example 3—The hypothetical Ending Value is 5% higher than the Starting Value:

Starting Value: 0.04271131 United States dollars per Russian ruble
Hypothetical Ending Value: 0.04484688 United States dollars per Russian ruble

$$\$10 + \$10 \times 222.3\% \times \left(\frac{0.04484688 - 0.04271131}{0.04271131} \right) = \$11.11$$

Redemption Amount (per unit) = \$11.11

Example 4—The hypothetical Ending Value is 15% greater than the Starting Value:

Starting Value: 0.04271131 United States dollars per Russian ruble
Hypothetical Ending Value: 0.04911801 United States dollars per Russian ruble

$$\$10 + \$10 \times 222.3\% \times \left(\frac{0.04911801 - 0.04271131}{0.04271131} \right) = \$13.33$$

Redemption Amount (per unit) = \$13.33

The following table illustrates, for the Starting Value of 0.04271131 United States dollars per Russian ruble and a range of hypothetical Ending Values:

- the percentage change from the Starting Value to the hypothetical Ending Value;
- the total amount payable on the maturity date per unit (rounded to two decimal places for the purpose of this table);
- the total rate of return to holders of the Notes;
- the pretax annualized rate of return to holders of the Notes; and
- the pretax annualized rate of return on a direct investment in the Exchange Rate.

The table below includes the Participation Rate of 222.3%.

Hypothetical Ending Value	Percentage Change From the Starting Value to the Hypothetical Ending Value	Total Amount Payable at Maturity per Note	Total Rate of Return on the Notes	Pretax Annualized Rate of Return on the Notes (1)	Pretax Annualized Rate of Return on a Direct Investment in the Exchange Rate (1)(2)
0.02135566	-50%	\$9.50	-5.00%	-5.08%	-58.72%
0.02349122	-45%	\$9.50	-5.00%	-5.08%	-51.80%

0.04911801	15%	\$13.33	33.35%	31.04%	14.52%
0.05125357	20%	\$14.45	44.46%	40.51%	19.14%
0.05338914	25%	\$15.56	55.58%	49.61%	23.68%
0.05552470	30%	\$16.67	66.69%	58.40%	28.12%
0.05766027	35%	\$17.78	77.81%	66.90%	32.48%
0.05979583	40%	\$18.89	88.92%	75.14%	36.75%
0.06193140	45%	\$20.00	100.04%	83.14%	40.96%
0.06406697	50%	\$21.12	111.15%	90.92%	45.09%

(1) The annualized rates of return specified in this column are calculated on a semiannual bond equivalent basis and assume an investment term from August 8, 2008 to August 7, 2009, the term of the Notes.

(2) This rate of return assumes no transaction fees or expenses.

(3) This is the Starting Value.

(4) The amount you receive on the maturity date will not be less than \$9.50 per unit.

The above figures are for purposes of illustration only. The actual amount you receive and the resulting total and pretax annualized rates of return will depend on the actual Ending Value.

Risk Factors

An investment in the Notes involves significant risks. The following is a list of certain of the risks involved in investing in the Notes. You should carefully review the more detailed explanation of risks relating to the Notes in the "Risk Factors" sections included in the product supplement and MTN prospectus supplement identified below under "Additional Terms of the Notes". We also urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the Notes.

- You may not earn a return on your investment and your investment may result in a loss.
- Your yield, which in certain instances could be negative, may be lower than the yield on other debt securities of comparable maturity.
- You must rely on your own evaluation of the merits of an investment linked to the Exchange Rate.
- The return on your Notes depends on the value of the Exchange Rate, which is affected by many complex factors outside of our control.
- Even though currency trades around-the-clock, your Notes will not and the prevailing market prices for your Notes may not reflect the underlying currency prices and rates.
- In seeking to provide investors with what we believe to be commercially reasonable terms for the Notes while providing MLPF&S with compensation for its services, we have considered the costs of developing, hedging and distributing the Notes. If a trading market develops for the Notes (and such a market may not develop), these costs are expected to affect the market price you may receive or be quoted for your Notes on a date prior to the stated maturity date.
- Many factors affect the trading value of the Notes; these factors interrelate in complex ways and the effect of any one factor may offset or magnify the effect of another factor.
- Amounts payable on the Notes may be limited by state law.
- Potential conflicts of interest could arise.

Investor Considerations

You may wish to consider an investment in the Notes if:

- You anticipate that the Exchange Rate will increase from the Starting Value to the Ending Value and that such increase will be sufficient to provide the desired return.
- You accept that you may lose up to 5% of your original investment amount if the value of the Exchange Rate decreases from the Starting Value to the Ending Value.
- You are willing to forego interest payments on the Notes, such as fixed or floating rate interest paid on traditional interest bearing debt securities.
- You are willing to accept that a trading market for the Notes is not expected to develop.

The Notes may not be appropriate investments for you if:

- You anticipate that the Exchange Rate will decrease from the Starting Value to the Ending Value or that the Exchange Rate will not appreciate sufficiently over the term of the Notes to provide you with your desired return.
- You seek an investment that provides a guaranteed redemption amount above the Minimum Redemption Amount.
- You seek interest payments or other current income on your investment.
- You want assurances that there will be a liquid market if and when you want to sell the Notes prior to maturity.

Other Provisions

We may deliver the Notes against payment therefor in New York, New York on a date that is in excess of three business days following the Pricing Date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement on the Notes occurs more than three business days from the Pricing Date, purchasers who wish to trade Notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

If you place an order to purchase these offered securities, you are consenting to each of MLPF&S and its broker-dealer affiliate First Republic Securities Company, LLC acting as a principal in effecting the transaction for your account. MLPF&S is acting as an underwriter and/or selling agent for this offering and will receive underwriting compensation from the issuer of the securities.

Supplement to the Plan of Distribution

MLPF&S and First Republic Securities Company, LLC, each a broker-dealer subsidiary of ML&Co., are members of the Financial Industry Regulatory Authority, Inc. (formerly the National Association of Securities Dealers, Inc. (the "NASD")) and will participate in the distribution of the Notes. Accordingly, offerings of the Notes will conform to the requirements of NASD Rule 2720.

MLPF&S and First Republic Securities Company, LLC may use this Note Prospectus for offers and sales in secondary market transactions and market-making transactions in the Notes. MLPF&S and First Republic Securities Company, LLC may act as principal or agent in these transactions, and any such sales will be made at prices related to prevailing market prices at the time of the sale.

The Exchange Rate

The exchange rate of United States dollars per Russian ruble

The "Exchange Rate" is the currency exchange rate in the interbank market quoted as the number of United States dollars for which one Russian ruble can be exchanged, the inverse of the value of the exchange rate of Russian rubles per United States dollar as reported by Reuters on page RUBMCMEEMTA=, or any substitute page thereto, at approximately 10:00 a.m. in London. The Exchange Rate increases as the value of the Russian ruble increases relative to the United States dollar and decreases as the value of the Russian ruble decreases relative to the United States dollar.

If the Exchange Rate is not so quoted on page RUBMCMEEMTA=, or any substitute page thereto, then the Exchange Rate used to determine the Starting Value or the Ending Value, as applicable, will be calculated on the basis of the arithmetic mean of the applicable spot quotations received by the Calculation Agent at approximately 10:00 a.m., London time, on the relevant date for the purchase or sale for deposits in the Russian ruble by the London offices of three leading banks engaged in the interbank market (selected in the sole discretion of the Calculation Agent) (the "Reference Banks"). If fewer than three Reference Banks provide spot quotations, then the Exchange Rate will be calculated on the basis of the arithmetic mean of the applicable spot quotations received by the Calculation Agent at approximately 10:00 a.m., London time, on the relevant date from two leading commercial banks in London (selected in the sole discretion of the Calculation Agent), for the purchase or sale for deposits in the Russian ruble. If these spot quotations are available from only one bank, then the Calculation Agent, in its sole discretion, will determine which quotation is available and reasonable to be used. If no spot quotation is available, then the Exchange Rate will be the rate the Calculation Agent, in its sole discretion, determines to be fair and reasonable under the circumstances at approximately 10:00 a.m., London time, on the relevant date.

The following graph sets forth the monthly historical performance of the Exchange Rate in the period from January 2003 through July 2008. This historical data on the Exchange Rate is not necessarily indicative of the future performance of the Exchange Rate or what the value of the Notes may be. Any historical upward or downward trend in the level of the Exchange Rate during any period set forth below is not an indication that the Exchange Rate is more or less likely to increase or decrease at any time over the term of the Notes. On the Pricing Date the Exchange Rate as reported by Bloomberg was 0.04271131 United States dollars per Russian ruble.

Certain U.S. Federal Income Taxation Considerations

Set forth below is a summary of certain United States federal income tax considerations relating to an investment in the Notes. The following summary is not complete and is qualified in its entirety by the discussion under the section entitled "United States Federal Income Taxation" in the accompanying product supplement SCURR-1 and MTN prospectus supplement, which you should carefully review prior to investing in the Notes. Capitalized terms used and not defined herein have the meanings ascribed to them in the accompanying product supplement SCURR-1.

Characterization of the Notes. There are no statutory provisions, regulations, published rulings or judicial decisions addressing or involving the characterization, for United States federal income tax purposes, of the Notes or securities with terms substantially the same as the Notes. However, although the matter is not free from doubt, under current law, each Note should be treated as a debt instrument of ML&Co. for United States federal income tax purposes. ML&Co. currently intends to treat each Note as a debt instrument of ML&Co. for United States federal income tax purposes and, where required, intends to file information returns with the Internal Revenue Service (the "IRS") in accordance with this treatment, in the absence of any change or clarification in the law, by regulation or otherwise, requiring a different characterization of the Notes. Prospective investors in the Notes should be aware, however, that the IRS is not bound by ML&Co.'s characterization of the Notes as indebtedness, and the IRS could possibly take a different position as to the proper characterization of the Notes for United States federal income tax purposes. Accordingly, prospective purchasers are urged to consult their own tax advisors regarding the tax consequences of investing in the Notes. The following summary assumes that the Notes will be treated as debt instruments of ML&Co. for United States federal income tax purposes.

General. Since the amount payable on the maturity date with respect to a Note in excess of the Original Public Offering Price thereof, if any, will be determined by reference to the value of the Exchange Rate, the Notes generally should be subject to the rules set forth in Section 988 of the Internal Revenue Code of 1986, as amended (the "Code") regarding foreign currency gain or loss (the "Foreign Currency Rules"). However, the Foreign Currency Rules do not set forth specific rules for determining the appropriate character, timing and amount of income, gain or loss that must be recognized by a taxpayer from holding a short-term debt instrument that provides for one or more foreign currency-related contingent payments, similar to the Notes. In the absence of any specific provision in the Foreign Currency Rules which would currently apply to the Notes, the United States federal income tax consequences of the purchase, ownership and disposition of the Notes generally should be governed by a combination of both the general principles contained in the Foreign Currency Rules and general principles of United States federal income tax law. Nevertheless, the proper United States federal income tax treatment of the Notes is uncertain and prospective investors in the Notes are urged to consult their own tax advisors regarding the proper United States federal income tax treatment of an investment in the Notes.

Cash Method U.S. Holders. The amount payable on the maturity date with respect to a Note in excess of the Original Public Offering Price thereof, if any, generally should be includible in income by a U.S. Holder who uses the cash method of tax accounting as ordinary interest on the date the amount payable on the maturity date is received. Upon the sale, exchange or other disposition of a Note (including upon retirement at maturity), a U.S. Holder who uses the cash method of tax accounting generally should be required to recognize taxable gain or loss in an amount equal to the difference, if any, between the amount realized on the sale, exchange or other disposition (including upon retirement at maturity) and such U.S. Holder's tax basis in the Note. Such a U.S. Holder's tax basis in a Note generally should equal such U.S. Holder's initial investment in the Note. Any portion of such gain or loss that is attributable to changes in the value of the Exchange Rate should constitute exchange gain or loss which will be characterized as ordinary income or loss. Any such gain or loss in excess of the portion of such gain or loss that constitutes exchange gain or loss (as described above) generally should be treated as short-term capital gain or loss. Notwithstanding the foregoing, all or a portion of any such gain should be treated as ordinary income to the extent of the amount of original issue discount (as described below under "Accrual Method U.S. Holders") that has accrued on a straight-line basis, or upon election under a constant yield method (based on daily compounding), through the date of disposition. Despite the foregoing, since the amount payable on the maturity date with respect to the Notes in excess of the Original Public Offering Price thereof, if any, will be calculated by reference to the value of the Exchange Rate, it is possible that the IRS could assert that all or any portion of the income, gain or loss recognized by a U.S. Holder with respect to the Notes should be treated as exchange gain or loss, which would be characterized as ordinary income or loss.

Accrual Method U.S. Holders. U.S. Holders who use the accrual method of tax accounting, and certain other holders including banks and dealers in securities, should be required to accrue original issue discount on a Note on a straight-line basis unless an election is made to accrue the original issue discount under a constant yield method (based on daily compounding). Such original issue discount should accrue based upon an estimated yield for the Note. Upon maturity of a Note, to the extent that the actual yield on the Note differs from this estimated yield, such difference should be treated as additional original issue discount or as an offset to previously accrued original issue discount. Upon the sale, exchange or other disposition (including upon retirement at maturity) of a Note, a U.S. Holder who uses the accrual method of tax accounting generally should recognize gain or loss (or, in some cases, possibly an offset to previously accrued original issue discount) in an amount equal to the difference between the amount realized on the sale, exchange or other disposition (including upon retirement at maturity) and such U.S. Holder's adjusted tax basis in the Note. Such a U.S. Holder's adjusted tax basis generally should equal such U.S. Holder's initial investment in a Note increased by any original issue discount previously included in income by the U.S. Holder. Any portion of such gain or loss that is attributable to changes in the value of the Exchange Rate should constitute exchange gain or loss which will be characterized as ordinary income or loss. Any such gain or loss in excess of the portion of such gain or loss that constitutes exchange gain or loss (as described above) generally should be treated as short-term capital gain or loss. Despite the foregoing, since the amount payable on the maturity date with respect to the Notes in excess of the Original Public Offering Price thereof, if any, will be calculated by reference to the value of the Exchange Rate, it is possible that the IRS could assert that all or any portion of the income, gain or loss recognized by a U.S. Holder with respect to the Notes should be treated as exchange gain or loss, which would be characterized as ordinary income or loss. Due to the uncertainty regarding the proper United States federal income tax treatment of the Notes, prospective investors in the Notes are urged to consult their own tax advisors concerning the United States federal income tax consequences of the purchase, ownership and disposition of the Notes.

Tax Return Disclosure Regulations. Pursuant to certain Treasury regulations (the "Disclosure Regulations"), any taxpayer that has participated in a "reportable transaction" and who is required to file a United States federal income tax return must generally attach a disclosure statement disclosing such taxpayer's participation in the reportable transaction to the taxpayer's tax return for each taxable year for which the taxpayer participates in the reportable transaction. The Disclosure Regulations provide that, in addition to certain other transactions, a "loss transaction" constitutes a "reportable transaction." A "loss transaction" is any transaction resulting in the taxpayer claiming a loss under Section 165 of the Code in an amount equal to or in excess of certain threshold amounts. The Disclosure Regulations specifically provide that a loss resulting from a "Section 988 transaction," such as a loss realized with respect to the Notes, will constitute a Section 165 loss. In the case of individuals or trusts, whether or not the loss flows through from an S corporation or partnership, if the loss arises with respect to a Section 988 transaction (as defined in Section 988(c)(1) of the Code relating to foreign currency transactions), the applicable loss threshold amount is \$50,000 in any single taxable year. Higher loss threshold amounts apply depending upon the taxpayer's status as a corporation, partnership, or S corporation, as well as certain other factors. It is important to note, however,

that the Disclosure Regulations provide that the fact that a transaction is a reportable transaction shall not affect the legal determination of whether the taxpayer's treatment of the transaction is proper.

As previously mentioned, since the amount payable on the maturity date with respect to the Notes in excess of the Original Public Offering Price thereof, if any, will be determined by reference to the value of the Exchange Rate, the Notes generally should be subject to the Foreign Currency Rules and the acquisition of a Note should constitute a Section 988 transaction. Based upon the foregoing, in the absence of future administrative pronouncements to the contrary, a holder of the Notes that recognizes an exchange loss with respect to the Notes that equals or exceeds the loss threshold amount applicable to such holder may be required to file a disclosure statement (i.e., IRS Form 8886 or substitute form) as an attachment to the holder's tax return for the first taxable year in which the loss threshold amount is reached and to any subsequent tax return that reflects any amount of such Section 165 loss from the Notes. Persons considering the purchase of Notes should consult their own tax advisors concerning the application of the rules contained in the Disclosure Regulations with respect to an investment in Notes and to determine their own tax return disclosure obligations, if any, with respect to an investment in the Notes, including any requirement to file IRS Form 8886 as well as any penalties which may be imposed as a result of a failure to comply with the Disclosure Regulations.

Prospective purchasers of the Notes should consult their own tax advisors concerning the tax consequences, in light of their particular circumstances, under the laws of the United States and any other taxing jurisdiction, of the purchase, ownership and disposition of the Notes. See the discussion under the section entitled "United States Federal Income Taxation" in the accompanying product supplement SCURR-1.

The consolidated financial statements incorporated by reference in this term sheet from Merrill Lynch & Co., Inc.'s Annual Report on Form 10-K for the year ended December 28, 2007 and the effectiveness of Merrill Lynch & Co., Inc. and subsidiaries' internal control over financial reporting have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their reports, incorporated herein by reference (which reports (1) expressed an unqualified opinion on the consolidated financial statements and included an explanatory paragraph regarding the changes in accounting methods in 2007 relating to the adoption of Statement of Financial Accounting Standards No. 157, "*Fair Value Measurement*," Statement of Financial Accounting Standards No. 159, "*The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115*," and FASB Interpretation No. 48, "*Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109*," and in 2006 for share-based payments to conform to Statement of Financial Accounting Standards No. 123 (revised 2004), "*Share-Based Payment*," and included an explanatory paragraph relating to the restatement discussed in Note 20 to the consolidated financial statements and (2) expressed an unqualified opinion on the effectiveness of internal control over financial reporting). Such consolidated financial statements have been so incorporated in reliance upon the reports of such firm given upon their authority as experts in accounting and auditing.

With respect to the unaudited condensed consolidated interim financial information as of March 28, 2008 and for the three-month periods ended March 28, 2008 and March 30, 2007, which is incorporated herein by reference, Deloitte & Touche LLP, an independent registered public accounting firm, have applied limited procedures in accordance with the standards of the Public Company Accounting Oversight Board (United States) for a review of such information. However, as stated in their report included in Merrill Lynch & Co., Inc.'s Quarterly Report on Form 10-Q for the quarter ended March 28, 2008 and incorporated by reference herein (which report included an explanatory paragraph relating to the restatement discussed in Note 16 to the condensed consolidated interim financial statements), they did not audit and they do not express an opinion on that interim financial information. Accordingly, the degree of reliance on their reports on such information should be restricted in light of the limited nature of the review procedures applied. Deloitte & Touche LLP are not subject to the liability provisions of Section 11 of the Securities Act of 1933 for their reports on the unaudited interim financial information because those reports are not "reports" or a "part" of the Registration Statement prepared or certified by an accountant within the meaning of Sections 7 and 11 of the Act.

Additional Terms of the Notes

You should read this term sheet, together with the documents listed below (collectively, the "Note Prospectus"), which together contain the terms of the Notes and supersede all prior or contemporaneous oral statements as well as any other written materials. You should carefully consider, among other things, the matters set forth under "Risk Factors" in the sections indicated on the cover of this term sheet. The Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the Notes.

You may access the following documents on the SEC Website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC Website):

- Product supplement SCURR-1 dated May 28, 2008:
<http://www.sec.gov/Archives/edgar/data/65100/000119312508123383/d424b2.htm>
- MTN prospectus supplement, dated March 31, 2006:
<http://www.sec.gov/Archives/edgar/data/65100/000119312506070946/d424b5.htm>
- General prospectus supplement dated March 31, 2006:
<http://www.sec.gov/Archives/edgar/data/65100/000119312506070973/d424b5.htm>
- Prospectus dated March 31, 2006:

Our Central Index Key, or CIK, on the SEC Website is 65100. References in this term sheet to "ML&Co.", "we", "us" and "our" are to Merrill Lynch & Co., Inc., and references to "MLPF&S" are to Merrill Lynch, Pierce, Fenner & Smith Incorporated.

ML&Co. has filed a registration statement (including a prospectus) with the Securities and Exchange Commission (the "SEC") for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement, and the other documents relating to this offering that ML&Co. has filed with the SEC for more complete information about ML&Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC Website at www.sec.gov. Alternatively, ML&Co., any agent or any dealer participating in this offering, will arrange to send you the Note Prospectus if you so request by calling toll-free 1-866-500-5408.

Structured Investments Classification

ML&Co. classifies certain of its structured investments (the "Structured Investments"), including the Notes, into four categories, each with different investment characteristics. The description below is intended to briefly describe the four categories of Structured Investments offered: Principal Protection, Enhanced Income, Market Participation and Enhanced Participation. A Structured Investment may, however, combine characteristics that are relevant to one or more of the other categories. As such, a category should not be relied upon as a description of any particular Structured Investment.

Principal Protection: Principal Protected Structured Investments offer full or partial principal protection at maturity, while offering market exposure and the opportunity for a better return than may be available from comparable fixed income securities. Principal protection may not be achieved if the investment is sold prior to maturity.

Enhanced Income: Structured Investments offering enhanced income may offer an enhanced income stream through interim fixed or variable coupon payments. However, in exchange for receiving current income, investors may forfeit upside potential on the underlying asset. These investments generally do not include the principal protection feature.

Market Participation: Market Participation Structured Investments can offer investors exposure to specific market sectors, asset classes and/or strategies that may not be readily available through traditional investment alternatives. Returns obtained from these investments are tied to the performance of the underlying asset. As such, subject to certain fees, the returns will generally reflect any increases or decreases in the value of such assets. These investments are not structured to include the principal protection feature.

Enhanced Participation: Enhanced Participation Structured Investments may offer investors the potential to receive better than market returns on the performance of the underlying asset. Some structures may offer leverage in exchange for a capped or limited upside potential and also in exchange for downside risk. These investments are not structured to include the principal protection feature.

The classification of Structured Investments is meant solely for informational purposes and is not intended to fully describe any particular Structured Investment nor guarantee any particular performance.
