 Preliminary Term Sheet dated August 26, 2009

<p>Units Bear Market Strategic Accelerated Redemption Securities® Linked to the S&P 500® Index, due April , 2011 \$10 principal amount per unit Term Sheet No.</p>	<p>Expected Pricing Date* September , 2009 Settlement Date* October , 2009 Maturity Date* April , 2011 CUSIP No.</p>
---	---

Bear Market Strategic Accelerated Redemption Securities®

- The notes will be called at an amount equal to the \$10 principal amount per unit plus a Call Premium of between 9% and 13% per annum if the closing value of the S&P 500® Index on any Observation Date is less than or equal to 100% of its starting value
- A maturity of approximately 18 months
- 1-to-1 downside loss if the notes are not called prior to maturity and the closing value of the S&P 500® Index increases above the starting value, with up to 100% of the principal amount at risk
- Payments on the notes are subject to the credit risk of Bank of America Corporation
- No periodic interest payments
- No listing on any securities exchange
- This debt is **not** guaranteed under the Federal Deposit Insurance Corporation's Temporary Liquidity Guarantee Program

STRUCTURED INVESTMENTS

- PRINCIPAL PROTECTION
- ENHANCED INCOME
- MARKET PARTICIPATION
- ENHANCED PARTICIPATION

The notes are being offered by Bank of America Corporation ("BAC"). The notes will have the terms specified in this term sheet as supplemented by the documents indicated herein under "Additional Terms" (together, the "Note Prospectus"). Investing in the notes involves a number of risks. **There are important differences between the notes and a conventional debt security, including different investment risks. See "Risk Factors" on page TS-6 of this term sheet and beginning on page S-10 of product supplement STR-2. The notes:**

Are Not FDIC Insured	Are Not Bank Guaranteed	May Lose Value
----------------------	-------------------------	----------------

In connection with this offering, each of Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S") and its broker-dealer affiliate First Republic Securities Company, LLC ("First Republic") is acting in its capacity as principal for your account.

None of the Securities and Exchange Commission (the "SEC"), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	<u>Per Unit</u>	<u>Total</u>
Public offering price (1)	\$10.00	\$
Selling discount (1)	\$0.15	\$
Proceeds, before expenses, to Bank of America Corporation	\$9.85	\$

(1) The public offering price and selling discount for any purchase of 500,000 or more units in a single transaction by an individual investor will be \$9.95 per unit and \$0.10 per unit, respectively.

*Depending on the date the notes are priced for initial sale to the public (the "pricing date"), which may be in September or October 2009, the settlement date may occur in September or October 2009, the maturity date may occur in March or April 2011 and the Observation Dates may be adjusted accordingly. Any reference in this term sheet to the month in which the pricing date, settlement date, maturity date, or any Observation Date will occur is subject to change as specified above.

Merrill Lynch & Co.

September , 2009

Banc of America Investment Services, Inc.

Summary

The Bear Market Strategic Accelerated Redemption Securities® Linked to the S&P 500® Index, due April , 2011 (the “notes”), are our senior unsecured debt securities and are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. **The notes will rank equally with all of our other unsecured and unsubordinated debt, and any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BAC.** The notes are designed for investors (i) who want to invest in a security of this kind for risk diversification purposes, or (ii) who anticipate that the Observation Level of the S&P 500® Index (the “Index”) on any Observation Date will be less than or equal to the Call Level. The notes provide for an automatic call if the Observation Level of the Index on any Observation Date is less than or equal to the Call Level. If the notes are called on any Observation Date, you will receive on the Call Settlement Date an amount per unit (the “Call Amount”) equal to the \$10 Original Offering Price of the notes plus the applicable Call Premium. If your notes are not called, the amount you receive on the maturity date (the “Redemption Amount”) will be less than the Original Offering Price per unit based upon the percentage increase in the level of the Index from the Starting Value, as determined on the pricing date, to the Ending Value, as determined on the final Observation Date. Investors must be willing to forgo interest payments on the notes and be willing to accept a repayment that may be less, and potentially significantly less, than the Original Offering Price of the notes. Investors also must be prepared to have us call their notes on any Observation Date.

Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement STR-2. Unless otherwise indicated or unless the context requires otherwise, all references in this document to “we,” “us,” “our,” or similar references are to BAC.

Terms of the Notes

Issuer:	Bank of America Corporation (“BAC”)
Original Offering Price:	\$10 per unit
Term:	Approximately 18 months
Market Measure:	S&P 500® Index (Bloomberg symbol: “SPX”)
Starting Value:	The closing level of the Index on the pricing date. The Starting Value will be determined on the pricing date and will be set forth in the final term sheet made available in connection with sales of the notes.
Ending Value:	The Observation Level on the final Observation Date. If it is determined that a scheduled Observation Date is not a Market Measure Business Day, or if a Market Disruption Event occurs on a scheduled Observation Date, the Ending Value will be determined as more fully described in product supplement STR-2.
Observation Level:	The closing level of the Index on any Observation Date.
Observation Dates:	March , 2010; September , 2010; and March , 2011 (the final Observation Date). The Observation Dates will occur approximately every six months after the pricing date.
Call Level:	100% of the Starting Value.
Call Amounts (per Unit):	\$10.45 - \$10.65 if called on March , 2010; \$10.90 - \$11.30 if called on September , 2010; and \$11.35 - \$11.95 if called on March , 2011. The actual Call Amounts will be determined on the pricing date and will be set forth in the final term sheet made available in connection with the sale of the notes.
Call Premium:	9% - 13% of the Original Offering Price per annum. The actual Call Premium will be determined on the pricing date and will be set forth in the final term sheet made available in connection with the sale of the notes.
Call Settlement Date:	The fifth Banking Business Day following an Observation Date, if the notes are called on that Observation Date, subject to postponement as described in product supplement STR-2; provided however, that the Call Settlement Date related to the final Observation Date will be the maturity date.
Threshold Value:	100% of the Starting Value.
Leverage Factor:	100%
Calculation Agent:	MLPF&S, a subsidiary of BAC

Determining Payment on the Notes

Automatic Call Provision:

The notes will be automatically called on an Observation Date if the Observation Level on that Observation Date is less than or equal to the Call Level. If the notes are called, you will receive on the Call Settlement Date the Call Amount per unit applicable to that Observation Date, which is equal to the \$10 Original Offering Price per unit plus the Call Premium.

Payment at Maturity:

If the notes are not called prior to the maturity date, you will receive the Redemption Amount per unit on the maturity date, calculated as follows:

$$\$10 + \left[\$10 \times \left(\frac{\text{Threshold Value} - \text{Ending Value}}{\text{Starting Value}} \right) \times \text{Leverage Factor} \right]$$

In this case, because the Threshold Value of the notes is equal to the Starting Value, you will receive a Redemption Amount that is less, and possibly significantly less, than the Original Offering Price per unit.

Hypothetical Payments

Set forth below are four **hypothetical** examples of payment calculations, assuming:

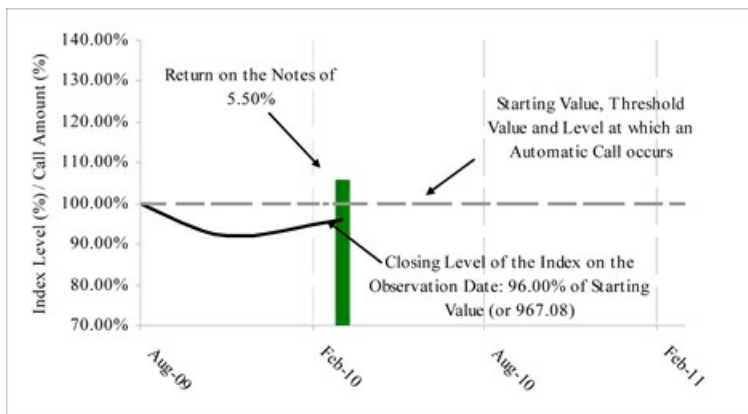

- 1) a **hypothetical** Starting Value and Threshold Value of 1,007.37, the closing level of the Index on August 20, 2009;
- 2) a **hypothetical** Call Level of 1,007.37, or 100% of the **hypothetical** Starting Value;
- 3) a term of the notes from August 27, 2009 to March 7, 2011, a term expected to be similar to that of the notes;
- 4) a **hypothetical** Call Premium of 11% of the \$10.00 Original Offering Price per unit per annum, the midpoint of the Call Premium range of 9% to 13%; and
- 5) **hypothetical** Observation Dates occurring on March 1, 2010, August 27, 2010, and February 21, 2011.

The Notes Are Called on One of the Observation Dates

The notes have not been previously called and the Observation Level on the relevant Observation Date is less than or equal to the Call Level. Consequently, the notes will be called at the Call Amount per unit equal to \$10.00 plus the applicable Call Premium.

Example 1

If the call is related to the Observation Date that falls on March 1, 2010, the Call Amount per unit will be: \$10.00 plus the Call Premium of \$0.55 = \$10.55 per unit.

Example 2

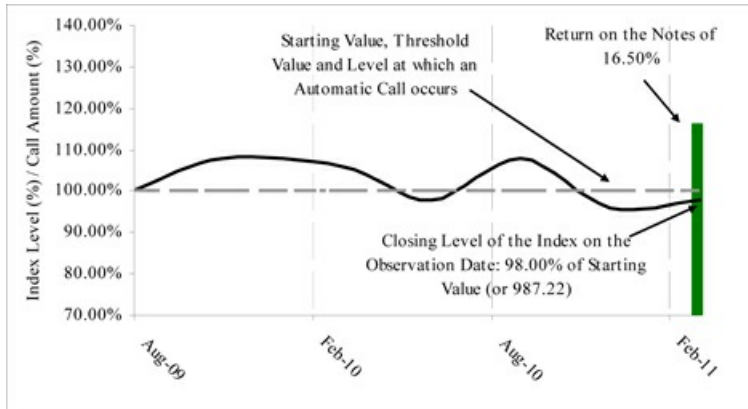

If the call is related to the Observation Date that falls on August 27, 2010, the Call Amount per unit will be: \$10.00 plus the Call Premium of \$1.10 = \$11.10 per unit.

Example 3

If the call is related to the Observation Date that falls on February 21, 2011, the Call Amount per unit will be: \$10.00 plus the Call Premium of \$1.65 = \$11.65 per unit.

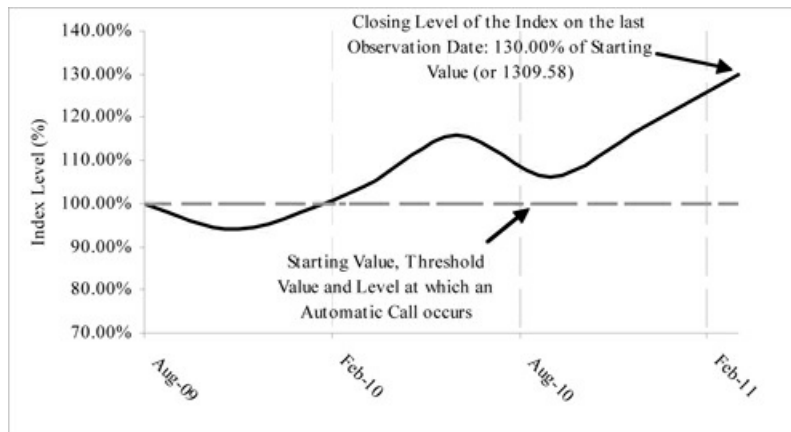

The Notes Are Not Called on Any of the Observation Dates

Example 4

The notes are not called on any of the Observation Dates and the **hypothetical** Ending Value of the Index on the final Observation Date is greater than 1,007.37, the **hypothetical** Starting Value and Threshold Value. The Redemption Amount will be less, and possibly significantly less, than the \$10 Original Offering Price per unit.

If the Ending Value is 1,309.58, or 130% of the **hypothetical** Starting Value, the **hypothetical** Redemption Amount will be:

$$\$10 + \left[\$10 \times \left(\frac{1,007.37 - 1,309.58}{1,007.37} \right) \times 100\% \right] = \$7.00 \text{ per unit}$$

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. The following is a list of certain of the risks involved in investing in the notes. You should carefully review the more detailed explanation of risks relating to the notes in the "Risk Factors" sections included in product supplement STR-2 and the MTN prospectus supplement identified below under "Additional Terms." We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

- If the notes are not called prior to maturity, your investment will result in a loss; there is no guaranteed return of principal.
- Your return, if any, is limited to the return represented by the Call Premium.
- Your yield may be less than the yield on a conventional debt security of comparable maturity.
- Your investment return may be less than the return on a comparable investment directly in the stocks included in the Index.
- You must rely on your own evaluation of the merits of an investment linked to the Index.
- In seeking to provide you with what we believe to be commercially reasonable terms for the notes while providing the selling agents with compensation for their services, we have considered the costs of developing, hedging, and distributing the notes.
- A trading market is not expected to develop for the notes.
- The amount that you receive at maturity or upon a call will not be affected by all developments relating to the Index.
- Standard & Poor's Financial Services LLC ("S&P") may adjust the Index in a way that affects its value, and S&P has no obligation to consider your interests.
- You will have no rights of a securityholder of the securities represented by the Index, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- While we or our affiliates may from time to time own shares of companies included in the Index, except to the extent that our common stock is included in the Index, we do not control any company included in the Index, and are not responsible for any disclosure made by any other company.
- If you attempt to sell notes prior to maturity, their market value, if any, will be affected by various factors that interrelate in complex ways, and their market value may be less than their Original Offering Price.
- Payments on the notes are subject to our credit risk, and changes in our credit ratings are expected to affect the value of the notes.
- Purchases and sales by us and our affiliates of shares of companies included in the Index may affect your return.
- Our trading and hedging activities may create conflicts of interest with you.
- Our hedging activities may affect your return on the notes and their market value.
- Our business activities relating to the companies represented by the Index may create conflicts of interest with you.
- There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.
- The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See "Summary Tax Consequences" and "Certain U.S. Federal Income Taxation Considerations" below and "U.S. Federal Income Tax Summary" in product supplement STR-2.

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the level of the Index will be less than or equal to the Call Level on any Observation Date and you seek an early exit prior to maturity at a premium in that case.
- You are willing to receive a pre-determined return on your investment, capped at the Call Premium, in case the notes are called, regardless of the performance of the Index from the Starting Value to the date on which the notes are called.
- You are willing to accept that the notes may not be called prior to the maturity date, in which case your return on your investment will be less than or equal to the Original Offering Price per unit.
- You accept that your investment will result in a loss, which could be significant, if the level of the Index increases from the Starting Value to the Ending Value on the final Observation Date.
- You are willing to forgo interest payments on the notes, such as fixed or floating rate interest paid on traditional interest bearing debt securities.
- You seek exposure to the Index with no expectation of dividends or other benefits of owning the stocks included in the Index.
- You are willing to accept that a trading market is not expected to develop for the notes. You understand that secondary prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness.
- You are willing to make an investment, the payments on which depend on our creditworthiness, as the issuer of the notes.

The notes may not be an appropriate investment for you if:

- You want to hold your notes for the full term.
- You anticipate that the level of the Index will increase from the Starting Value to the Ending Value.
- You anticipate that the Observation Level will not be less than or equal to the Call Level on any Observation Date.
- You seek a return on your investment that will not be capped at the Call Premium.
- You seek principal protection or preservation of capital.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the stocks included in the Index.
- You seek assurances that there will be a liquid market if and when you want to sell the notes prior to maturity.
- You are unwilling or are unable to assume the credit risk associated with us, as the issuer of the notes.

Other Provisions

We may deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement of the notes occurs more than three business days from the pricing date, purchasers who wish to trade notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

If you place an order to purchase the notes, you are consenting to each of MLPF&S and its broker-dealer affiliate First Republic acting as a principal in effecting the transaction for your account.

Supplement to the Plan of Distribution

MLPF&S, First Republic, and Banc of Investment Services, Inc. ("BAI"), each a broker-dealer subsidiary of BAC, are members of the Financial Industry Regulatory Authority, Inc. (formerly the National Association of Securities Dealers, Inc. (the "NASD")) and will participate as selling agents in the distribution of the notes. Accordingly, offerings of the notes will conform to the requirements of NASD Rule 2720. Under our distribution agreement with the selling agents, MLPF&S will purchase the notes from us on the issue date as principal at the purchase price indicated on the cover of this term sheet, less the indicated selling discount. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units.

MLPF&S, First Republic, and BAI may use this Note Prospectus for offers and sales in secondary market transactions and market-making transactions in the notes but are not obligated to engage in such secondary market transactions and/or market-making transactions. MLPF&S, First Republic, and BAI may act as principal or agent in these transactions, and any such sales will be made at prices related to prevailing market prices at the time of the sale.

The Index

The S&P 500® Index

All disclosures contained in this term sheet regarding the Index, including, without limitation, its make up, method of calculation, and changes in its components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, S&P. S&P, which owns the copyright and all other rights to the Index, has no obligation to continue to publish, and may discontinue publication of, the Index. The consequences of S&P discontinuing publication of the Index are discussed in the section of product supplement STR-2 entitled "Description of the Notes—Discontinuance of a Non-Exchange Traded Fund Market Measure." Neither we, the calculation agent, nor MLPF&S accepts any responsibility for the calculation, maintenance or publication of the Index or any successor index.

"Standard & Poor's®", "Standard & Poor's 500™", "S&P 500®", and "S&P®" are trademarks of S&P and have been licensed for use in this offering by our subsidiary, MLPF&S. The notes are not sponsored, endorsed, sold, or promoted by S&P, and S&P makes no representation regarding the advisability of investing in the notes.

The Index is intended to provide an indication of the pattern of common stock price movement. The calculation of the level of the Index is based on the relative value of the aggregate market value of the common stocks of 500 companies as of a particular time compared to the aggregate average market value of the common stocks of 500 similar companies during the base period of the years 1941 through 1943. As of July 31, 2009, 411 companies or 80.7% of the market capitalization of the Index traded on the New York Stock Exchange; 89 companies or 19.3% of the market capitalization of the Index traded on The NASDAQ Stock Market; and no companies traded on the NYSE Alternext U.S. stock exchange (formerly known as the American Stock Exchange). As of July 31, 2009, the aggregate market value of the companies included in the Index represented approximately 77% of the aggregate market value of stocks included in the Standard & Poor's Stock Guide Database of domestic common stocks traded in the U.S., excluding American depositary receipts, limited partnerships and mutual funds.

S&P chooses companies for inclusion in the Index with the aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the common stock population of its Stock Guide Database of over 10,000 companies, which S&P uses as an assumed model for the composition of the total market. Relevant criteria employed by S&P include the viability of the particular company, the extent to which that company represents the industry group to which it is assigned, the extent to which the market price of that company's common stock generally is responsive to changes in the affairs of the respective industry, and the market value and trading activity of the common stock of that company. Ten main groups of companies comprise the Index, with the approximate percentage of the market capitalization of the Index included in each group as of July 31, 2009 indicated in parentheses: Consumer Discretionary (9.1%); Consumer Staples (11.8%); Energy (12.0%); Financials (13.9%); Health Care (13.7%); Industrials (10.0%); Information Technology (18.7%); Materials (3.4%); Telecommunication Services (3.4%); and Utilities (3.9%). S&P from time to time, in its sole discretion, may add companies to, or delete companies from, the Index to achieve the objectives stated above.

S&P calculates the Index by reference to the prices of the constituent stocks of the Index without taking account of the value of dividends paid on those stocks. As a result, the return on the notes will not reflect the return you would realize if you actually owned the Index constituent stocks and received the dividends paid on those stocks.

Computation of the Index

While S&P currently employs the following methodology to calculate the Index, no assurance can be given that S&P will not modify or change this methodology in a manner that may affect the payment on the notes.

Historically, the market value of any component stock of the Index was calculated as the product of the market price per share and the number of then outstanding shares of such component stock. In March 2005, S&P began shifting the Index halfway from a market capitalization weighted formula to a float-adjusted formula, before moving the Index to full float adjustment on September 16, 2005. S&P's criteria for selecting stocks for the Index did not change with the shift to float adjustment. However, the adjustment affects each company's weight in the Index.

Under float adjustment, the share counts used in calculating the Index reflect only those shares that are available to investors, not all of a company's outstanding shares. S&P defines three groups of shareholders whose holdings are subject to float adjustment:

- holdings by other publicly traded corporations, venture capital firms, private equity firms, strategic partners, or leveraged buyout groups;
- holdings by government entities, including all levels of government in the U.S. or foreign countries; and
- holdings by current or former officers and directors of the company, founders of the company, or family trusts of officers, directors, or founders, as well as holdings of trusts, foundations, pension funds, employee stock ownership plans, or other investment vehicles associated with and controlled by the company.

However, treasury stock, stock options, restricted shares, equity participation units, warrants, preferred stock, convertible stock, and rights are not part of the float. In cases where holdings in a group exceed 10% of the outstanding shares of a company, the holdings of that group are excluded from the float-adjusted count of shares to be used in the index calculation. Mutual funds, investment advisory firms, pension funds, or foundations not associated with the company and investment funds in insurance companies, shares of a U.S. company traded in Canada as "exchangeable shares," shares that trust beneficiaries may buy or sell without difficulty or significant additional expense beyond typical brokerage fees, and, if a company has multiple classes of stock outstanding, shares in an unlisted or non-traded class if such shares are convertible by shareholders without undue delay and cost, are also part of the float.

For each stock, an investable weight factor ("IWF") is calculated by dividing the available float shares, defined as the total shares outstanding less shares held in one or more of the three groups listed above where the group holdings exceed 10% of the outstanding shares, by the total shares outstanding. The float-adjusted index is then calculated by dividing the sum of the IWF multiplied by both the price and the total shares outstanding for each stock by the index divisor. For companies with multiple classes of stock, S&P calculates the weighted average IWF for each stock using the proportion of the total company market capitalization of each share class as weights.

The Index is calculated using a base-weighted aggregate methodology. The level of the Index reflects the total market value of all 500 component stocks relative to the base period of the years 1941 through 1943. An indexed number is used to represent the results of this calculation in order to make the level easier to work with and track over time. The actual total market value of the component stocks during the base period of the years 1941 through 1943 has been set to an indexed level of 10. This is often indicated by the notation 1941-43 = 10. In practice, the daily calculation of the Index is computed by dividing the total market value of the component stocks by the "index divisor." By itself, the index divisor is an arbitrary number. However, in the context of the calculation of the Index, it serves as a link to the original base period level of the Index. The index divisor keeps the Index comparable over time and is the manipulation point for all adjustments to the Index, which is index maintenance.

Index Maintenance

Index maintenance includes monitoring and completing the adjustments for company additions and deletions, share changes, stock splits, stock dividends, and stock price adjustments due to company restructuring or spinoffs. Some corporate actions, such as stock splits and stock dividends, require changes in the common shares outstanding and the stock prices of the companies in the Index, and do not require index divisor adjustments.

To prevent the level of the Index from changing due to corporate actions, corporate actions which affect the total market value of the Index require an index divisor adjustment. By adjusting the index divisor for the change in market value, the level of the Index remains constant and does not reflect the corporate actions of individual companies in the Index. Index divisor adjustments are made after the close of trading and after the calculation of the Index closing level.

Changes in a company's shares outstanding of 5.00% or more due to mergers, acquisitions, public offerings, private placements, tender offers, Dutch auctions, or exchange offers are made as soon as reasonably possible. All other changes of 5.00% or more (due to, for example, company stock repurchases, redemptions, exercise of options, warrants, subscription rights, conversion of preferred stock, notes, debt, equity participation units, or other recapitalizations) are made weekly and are announced on Tuesdays for implementation after the close of trading on Wednesday. Changes of less than 5.00% are accumulated and made quarterly on the third Friday of March, June, September, and December, and are usually announced two days prior.

Changes in IWFs of more than ten percentage points caused by corporate actions (such as merger and acquisition activity, restructurings, or spinoffs) will be made as soon as reasonably possible. Other changes in IWFs will be made annually, in September, when IWFs are reviewed.

The following graph sets forth the monthly historical performance of the Index in the period from January 2004 through July 2009. This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth below is not an indication that the Index is more or less likely to increase or decrease at any time over the term of the notes. On August 20, 2009, the closing level of the Index was 1,007.37.

Before investing in the notes, you should consult publicly available sources for the values and trading pattern of the Index. The generally unsettled international environment and related uncertainties, including the risk of terrorism, may result in financial markets generally and the Index exhibiting greater volatility than in earlier periods.

License Agreement

S&P does not guarantee the accuracy and/or the completeness of the Index or any data included in the Index. S&P shall have no liability for any errors, omissions, or interruptions in the Index. S&P makes no warranty, express or implied, as to results to be obtained by MLPF&S, us, holders of the notes or any other person or entity from the use of the Index or any data included in the Index in connection with the rights licensed under the license agreement described in this term sheet or for any other use. S&P makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Index or any data included in the Index. Without limiting any of the above information, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages, including lost profits, even if notified of the possibility of these damages.

S&P and MLPF&S have entered into a non-exclusive license agreement providing for the license to MLPF&S, in exchange for a fee, of the right to use the Index in connection with this offering. The license agreement provides that the following language must be stated in this term sheet:

"The notes are not sponsored, endorsed, sold, or promoted by S&P. S&P makes no representation or warranty, express or implied, to the holders of the notes or any member of the public regarding the advisability of investing in securities generally or in the notes particularly or the ability of the Index to track general stock market performance. S&P's only relationship to MLPF&S and to us (other than transactions entered into in the ordinary course of business) is the licensing of certain trademarks and trade names of S&P and of the Index which is determined, composed, and calculated by S&P without regard to MLPF&S, us or the notes. S&P has no obligation to take the needs of MLPF&S, our needs or the needs of the holders of the notes into consideration in determining, composing, or calculating the Index. S&P is not responsible for and has not participated in the determination of the timing of the sale of the notes, prices at which the notes are to initially be sold, or quantities of the notes to be issued or in the determination or calculation of the equation by which the notes are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the notes."

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as a callable single financial contract linked to the Index that requires you to pay us at inception an amount equal to the purchase price of the notes and that entitles you to receive at maturity or upon earlier redemption an amount in cash linked to the level of the Index.
- Under this characterization and tax treatment of the notes, upon receipt of a cash payment at maturity or upon a sale, exchange, or redemption of the notes prior to maturity, you generally will recognize capital gain or loss. This capital gain or loss generally will be long-term capital gain or loss if you hold the notes for more than one year.

Certain U.S. Federal Income Taxation Considerations

Set forth below is a summary of certain U.S. federal income tax considerations relating to an investment in the notes. The following summary is not complete and is qualified in its entirety by the discussion under the section entitled "U.S. Federal Income Tax Summary" in product supplement STR-2, which you should carefully review prior to investing in the notes.

General. Although there is no statutory, judicial, or administrative authority directly addressing the characterization of the notes, we intend to treat the notes for all tax purposes as a callable single financial contract linked to the Index that requires you to pay us at inception an amount equal to the purchase price of the notes and that entitles you to receive at maturity or upon earlier redemption an amount in cash linked to the level of the Index. Under the terms of the notes, we and every investor in the notes agree, in the absence of an administrative determination or judicial ruling to the contrary, to treat the notes as described in the preceding sentence. This discussion assumes that the notes constitute a callable single financial contract linked to the Index for U.S. federal income tax purposes. If the notes did not constitute a callable single financial contract, the tax consequences described below would be materially different.

This characterization of the notes is not binding on the Internal Revenue Service ("IRS") or the courts. No statutory, judicial, or administrative authority directly addresses the characterization of the notes or any similar instruments for U.S. federal income tax purposes, and no ruling is being requested from the IRS with respect to their proper characterization and treatment. Due to the absence of authorities on point, significant aspects of the U.S. federal income tax consequences of an investment in the notes are not certain, and no assurance can be given that the IRS or any court will agree with the characterization and tax treatment described in product supplement STR-2. Accordingly, you are urged to consult your tax advisor regarding all aspects of the U.S. federal income tax consequences of an investment in the notes, including possible alternative characterizations. The discussion in this section and in the section entitled "U.S. Federal Income Tax Summary" in product supplement STR-2 assume that there is a significant possibility of a significant loss of principal on an investment in the notes.

Settlement at Maturity or Sale, Exchange, or Redemption Prior to Maturity. Assuming that the notes are properly characterized and treated as callable single financial contracts linked to the Index for U.S. federal income tax purposes, upon receipt of a cash payment at maturity or upon a sale, exchange, or redemption of the notes prior to maturity, a U.S. Holder (as defined in product supplement STR-2) generally will recognize capital gain or loss equal to the difference between the amount realized and the U.S. Holder's basis in the notes. This capital gain or loss generally will be long-term capital gain or loss if the U.S. Holder holds the notes for more than one year. The deductibility of capital losses is subject to limitations.

Possible Future Tax Law Changes. From time to time, there may be legislative proposals or interpretive guidance addressing the tax treatment of financial instruments such as the notes. We cannot predict the likelihood of any such legislation or guidance being adopted, or the ultimate impact on the notes. For example, on December 7, 2007, the IRS released Notice 2008-2 ("Notice") seeking comments from the public on the taxation of financial instruments currently taxed as "prepaid forward contracts." This Notice addresses instruments such as the notes. According to the Notice, the IRS and Treasury are considering whether a holder of an instrument such as the notes should be required to accrue ordinary income on a current basis, regardless of whether any payments are made prior to maturity. It is not possible to determine what guidance the IRS and Treasury will ultimately issue, if any. Any such future guidance may affect the amount, timing, and character of income, gain, or loss in respect of the notes, possibly with retroactive effect. The IRS and Treasury are also considering additional issues, including whether additional gain or loss from such instruments should be treated as ordinary or capital, whether foreign holders of such instruments should be subject to withholding tax on any deemed income accruals, whether Section 1260 of the Internal Revenue Code of 1986, as amended, concerning certain "constructive ownership transactions," generally applies or should generally apply to such instruments, and whether any of these determinations depend on the nature of the underlying asset. We urge you to consult your own tax advisors concerning the impact and the significance of the above considerations. We intend to continue treating the notes for U.S. federal income tax purposes in the manner described herein unless and until such time as we determine, or the IRS or Treasury determines, that some other treatment is more appropriate.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. See the discussion under the section entitled "U.S. Federal Income Tax Summary" in product supplement STR-2.

Additional Terms

You should read this term sheet, together with the documents listed below, which together contain the terms of the notes and supersede all prior or contemporaneous oral statements as well as any other written materials. You should carefully consider, among other things, the matters set forth under "Risk Factors" in the sections indicated on the cover of this term sheet. The notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

You may access the following documents on the SEC Website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC Website):

- Product supplement STR-2 dated April 21, 2009:
<http://www.sec.gov/Archives/edgar/data/70858/000095014409003417/q18702p5e424b5.htm>
- Series L MTN prospectus supplement dated April 21, 2009 and prospectus dated April 20, 2009:
<http://www.sec.gov/Archives/edgar/data/70858/000095014409003387/q18667b5e424b5.htm>

Our Central Index Key, or CIK, on the SEC Website is 70858.

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the product supplement, the prospectus supplement, and the prospectus in that registration statement, and the other documents relating to this offering that we have filed with the SEC for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC Website at www.sec.gov. Alternatively, we, any agent or any dealer participating in this offering will arrange to send you the Note Prospectus if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Structured Investments Classification

MLPF&S classifies certain structured investments (the "Structured Investments"), including the notes, into four categories, each with different investment characteristics. The description below is intended to briefly describe the four categories of Structured Investments offered: Principal Protection, Enhanced Income, Market Participation, and Enhanced Participation. A Structured Investment may, however, combine characteristics that are relevant to one or more of the other categories. As such, a category should not be relied upon as a description of any particular Structured Investment.

Principal Protection: Principal Protected Structured Investments offer full or partial principal protection against decreases in the value of the underlying market measure (or increases in the value of an underlying market measure for bearish Structured Investments), while offering market exposure and the opportunity for a better return than may be available from comparable fixed income securities. Principal protection may not be achieved if the investment is sold prior to maturity.

Enhanced Income: Structured Investments offering enhanced income may offer an enhanced income stream through interim fixed or variable coupon payments. However, in exchange for receiving current income, investors may forfeit upside potential on the underlying asset. These investments generally do not include the principal protection feature.

Market Participation: Market Participation Structured Investments can offer investors exposure to specific market sectors, asset classes, and/or strategies that may not be readily available through traditional investment alternatives. Returns obtained from these investments are tied to the performance of the underlying asset. As such, subject to certain fees, the returns will generally reflect any increases or decreases in the value of such assets. These investments generally do not include the principal protection feature.

Enhanced Participation: Enhanced Participation Structured Investments may offer investors the potential to receive better than market returns on the performance of the underlying asset. Some structures may offer leverage in exchange for a capped or limited upside potential and also in exchange for downside risk. These investments generally do not include the principal protection feature.

The classification of Structured Investments is meant solely for informational purposes and is not intended to fully describe any particular Structured Investment nor guarantee any particular performance.

"Strategic Accelerated Redemption Securities®" is a registered service mark of our subsidiary, Merrill Lynch & Co., Inc.
