ENHANCED PARTICIPATION

The Fixed to Floating Rate Notes (the "notes") are being offered by Bank of America Corporation ("BAC"). The notes will have the terms specified in this term sheet as supplemented by the documents indicated below under "Additional Terms" (together, the "Note Prospectus"). Investing in the notes involves a number of risks. **There are important differences between the notes and a conventional debt security, including different investment risks.** See "Risk Factors" beginning on page TS-4 of this term sheet and beginning on page S-4 of the MTN prospectus supplement identified below under "Additional Terms." The notes:

Are Not FDIC Insured	Are Not Bank Guaranteed	May Lose Value
----------------------	-------------------------	----------------

In connection with this offering, Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S") is acting in its capacity as principal for your account.

None of the Securities and Exchange Commission (the "SEC"), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Unit	Total
Public offering price (1)	\$ 1,000.00	\$ 5,265,000.00
Underwriting discount	\$ 25.00	\$ 131,625.00
Proceeds, before expenses, to Bank of America Corporation	\$ 975.00	\$ 5,133,375.00

(1) Plus accrued interest from November 4, 2010, if settlement occurs after that date.

Merrill Lynch & Co.

October 28, 2010

Summary

The Fixed to Floating Rate Notes Linked to CMS10, due November 4, 2020 (the "notes"), are our senior unsecured debt securities and are not secured by collateral. **The notes will rank equally with all of our other senior unsecured indebtedness from time to time outstanding, and any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BAC.** The notes are not savings accounts, deposits or other obligations of a bank. The notes are not guaranteed by Bank of America, N.A. or any other bank and not insured by the Federal Deposit Insurance Corporation or any other governmental agency.

The notes provide quarterly interest payments at the following rates during their term: (a) during the first year of their term, the fixed rate of 5% per annum and (b) after the first year of their term, a floating rate per annum equal to 0.98 times the 10-Year U.S. Dollar Constant Maturity Swap Rate ("CMS10"). If you hold the notes until maturity, you will receive the principal amount of your notes plus any accrued and unpaid interest, subject to our credit risk.

Capitalized terms used but not defined in this term sheet have the meanings set forth in the MTN prospectus supplement. Unless otherwise indicated or unless the context requires otherwise, all references in this document to "we," "us," "our," or similar references are to BAC.

Terms of the Notes

Issuer:	Bank of America Corporation ("BAC")
Original Offering Price:	\$1,000 per unit
Term:	Ten years
Market Measure:	The 10-Year U.S. Dollar Constant Maturity Swap Rate ("CMS10") that appears on Reuters page ISDAFIX3 as of 11:00 A.M., New York City time, on the applicable U.S. Government Securities Business Day (as defined below), as determined by the calculation agent in the manner described in the section entitled "Other Terms of the Notes—Interest" on page TS-6 of this term sheet. CMS10 is more fully described beginning on page TS-8.
Payment at Maturity:	If you hold the notes until maturity, you will receive for each unit of your notes a cash payment equal to the \$1,000 principal amount plus any accrued and unpaid interest, subject to our credit risk. See "Risk Factors—Payments on the notes are subject to our credit risk, and changes in our credit ratings are expected to affect the value of the notes." on page TS-4 of this term sheet.
Interest Periods:	Quarterly. Each interest period (other than the first interest period from, and including, the original issue date of the notes to, but excluding, February 4, 2011) will begin on and will include an interest payment date, and will extend to, but will exclude, the next succeeding interest payment date (or the maturity date, as applicable).
Interest Payment Dates:	February 4, May 4, August 4, and November 4 of each year, beginning on February 4, 2011, with the final interest payment due on the maturity date, subject to postponement as described in the section entitled "Other Terms of the Notes—Interest" on page TS-6 of this term sheet.
Interest Rate:	For each quarterly interest period during the first year of the term of the notes, interest will accrue at the fixed rate of 5% per annum. Subsequently, interest will accrue quarterly at a floating rate per annum equal to the product of (a) the Participation Rate and (b) CMS10, rounded to three decimal places. After the first year of the notes, the interest rate for each interest period will be reset on the interest determination date (as defined below) for that interest period, as described in the section entitled "Other Terms of the Notes—Interest" on page TS-6 of this term sheet.
Day Count Fraction:	30/360
Participation Rate:	The Participation Rate will be 98%.
Listing:	The notes will not be listed on any securities exchange.
Calculation Agent:	Merrill Lynch Capital Services, Inc. ("MLCS"), a subsidiary of BAC

Hypothetical Interest Rate Calculations

Set forth below are three examples of the calculation of the amount of interest payable on the notes in a quarterly interest period after the first year of the term of the notes, based upon the Participation Rate of 98.00%. Each **hypothetical** interest rate payable on the notes set forth below would apply only to the applicable interest period; the actual applicable interest rate in that interest period, or in any other interest period, may be different.

Example 1:

Hypothetical CMS10: 2.500%

Hypothetical annualized interest rate payable for the quarterly interest period: $98.00\% \times 2.500\% = 2.450\%$

For each \$1,000 in aggregate principal amount of the notes, the **hypothetical** payment on the applicable interest payment date for a **hypothetical** interest period of 91 actual days, using 30/360 day count, would be calculated as follows:

(a) $\$1,000 \times$ (b) $2.450\% \times$ (c) $90/360 = \$6.125$

Example 2:

Hypothetical CMS10: 6.000%

Hypothetical annualized interest rate payable for the quarterly interest period: $98.00\% \times 6.000\% = 5.880\%$

For each \$1,000 in aggregate principal amount of the notes, the **hypothetical** payment on the applicable interest payment date for a **hypothetical** interest period of 91 actual days, using 30/360 day count, would be calculated as follows:

(a) $\$1,000 \times$ (b) $5.880\% \times$ (c) $90/360 = \$14.700$

Example 3:

Hypothetical CMS10: 10.000%

Hypothetical annualized interest rate payable for the quarterly interest period: $98.00\% \times 10.000\% = 9.800\%$

For each \$1,000 in aggregate principal amount of the notes, the **hypothetical** payment on the applicable interest payment date for a **hypothetical** interest period of 91 actual days, using 30/360 day count, would be calculated as follows:

(a) $\$1,000 \times$ (b) $9.800\% \times$ (c) $90/360 = \$24.500$

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. You should carefully review the more detailed explanation of risks relating to the notes in the "Risk Factors" sections beginning on page S-4 of the MTN prospectus supplement identified below under "Additional Terms." We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

The interest rate after the first year of the term of the notes will be less than CMS10.

The interest rate that will be applicable to the notes in any quarterly interest period after the first year of the term of the notes will be limited by the Participation Rate, which will be 98%. Accordingly, the interest rate payable on the notes after the first year of the notes will be less than CMS10.

Your yield may be less than the yield on a conventional debt security of comparable maturity.

The yield that you receive on the notes may be less than the return you would earn if you purchased a more conventional debt security with the same maturity date, such as a security with a fixed rate throughout its entire term. As a result, your investment in the notes may not reflect the full opportunity cost to you when you consider factors, including inflation, that affect the time value of money.

You must rely on your own evaluation of the merits of an investment linked to U.S. Dollar Constant Maturity Swap Rates.

In the ordinary course of their businesses, our affiliates may have expressed views on expected movements in U.S. Dollar Constant Maturity Swap Rates and related interest rates, and may do so in the future. These views or reports may be communicated to our clients and clients of our affiliates. However, these views are subject to change from time to time. Moreover, other professionals who deal in markets relating to U.S. Dollar Constant Maturity Swap Rates may at any time have significantly different views from those of our affiliates. For these reasons, you are encouraged to derive information concerning U.S. Dollar Constant Maturity Swap Rates and related interest rates from multiple sources, and you should not rely on the views expressed by our affiliates. Neither the offering of the notes nor any views which our affiliates from time to time may express in the ordinary course of their businesses constitutes a recommendation as to the merits of an investment in the notes.

Payments on the notes are subject to our credit risk, and changes in our credit ratings are expected to affect the value of the notes.

The notes are our senior unsecured debt securities. As a result, your receipt of all payments of interest and principal on the notes is dependent upon our ability to repay our obligations on the applicable payment date. No assurance can be given as to what our financial condition will be at any time during the term of the notes or on the maturity date.

In addition, our credit ratings are an assessment by ratings agencies of our ability to pay our obligations. Consequently, our perceived creditworthiness and actual or anticipated negative changes in our credit ratings prior to the maturity date of the notes may adversely affect the market value of the notes. However, because your return on the notes depends upon factors in addition to our ability to pay our obligations, such as the difference between the interest rates accruing on the notes and current market interest rates, an improvement in our credit ratings will not reduce the other investment risks related to the notes.

In seeking to provide you with what we believe to be commercially reasonable terms for the notes, while providing MLPF&S with compensation for its services, we have considered the costs of developing, hedging, and distributing the notes.

In determining the economic terms of the notes, and consequently the potential return on the notes to you, a number of factors are taken into account. Among these factors are certain costs associated with creating, hedging, and offering the notes. In structuring the economic terms of the notes, we seek to provide you with what we believe to be commercially reasonable terms and to provide MLPF&S with compensation for its services in developing the securities. The price, if any, at which you could sell your notes in a secondary market transaction is expected to be affected by the factors that we considered in setting the economic terms of the notes, namely the underwriting discount paid in respect of the notes and other costs associated with the notes, and compensation for developing and hedging the notes. The quoted price of any of our affiliates for the notes could be higher or lower than the Original Offering Price.

Assuming there is no change in market conditions or any other relevant factors, the price, if any, at which MLPF&S or another purchaser might be willing to purchase your notes in a secondary market transaction is expected to be lower than the Original Offering Price. This is due to, among other things, the fact that the Original Offering Price includes, and secondary market prices are likely to exclude, the underwriting discount paid with respect to, and the developing and hedging costs associated with the notes.

A trading market is not expected to develop for the notes. MLPF&S is not obligated to make a market for, or to repurchase, the notes.

We will not list the notes on any securities exchange. We cannot predict how the notes will trade in any secondary market or whether that market will be liquid or illiquid.

The development of a trading market for the notes will depend on our financial performance and other factors. The number of potential buyers of your notes in any secondary market may be limited. We anticipate that MLPF&S will act as a market-maker for the notes, but it is not required to do so. MLPF&S may discontinue its market-making activities as to the notes at any time. To the extent that MLPF&S engages in any market-making activities, it may bid for or offer the notes. Any price at which MLPF&S may bid for, offer, purchase, or sell any notes may differ from the values determined by pricing models that it may use, whether as a result of dealer discounts, mark-ups, or other transaction costs. These bids, offers, or completed transactions may affect the prices, if any, at which the notes might otherwise trade in the market.

In addition, if at any time MLPF&S were to cease acting as a market-maker for the notes, it is likely that there would be significantly less liquidity in the secondary market. In such a case, the price at which the notes could be sold likely would be lower than if an active market existed.

If you attempt to sell the notes prior to maturity, their market value, if any, will be affected by various factors that interrelate in complex ways, and their market value may be less than the principal amount of the notes.

Unlike savings accounts, certificates of deposit, and other similar investment products, you have no right to have your notes redeemed prior to maturity. If you wish to liquidate your investment in the notes prior to maturity, your only option would be to sell them. At that time, there may be an illiquid market for your notes or no market at all. Even if you were able to sell your notes, there are many factors outside of our control that may affect their market value, some of which, but not all, are stated below. Some of these factors are interrelated in complex ways. As a result, the effect of any one factor may be offset or magnified by the effect of another factor. The following paragraphs describe the expected impact on the market value of the notes from a change in a specific factor, assuming all other conditions remain constant.

- **Changes in Interest Rates.** We expect that changes in interest rates will affect the market value of the notes. In general, if U.S. interest rates increase, we expect that the market value of the notes will decrease, and conversely, if U.S. interest rates decrease, we expect that the market value of the notes will increase. However, as U.S. interest rates increase or decrease, the market value of the notes may not decrease or increase in tandem. If you sell your notes when the interest payable on the notes is less than, or expected to be less than, other market interest rates, you may receive less than the principal amount that would be payable at maturity.
- **Differences between short-term and long-term interest rates.** The difference between short-term and long-term interest rates also may affect the market value of the notes. CMS10 is often considered a long-term interest rate. In general, if the difference between short-term and long-term interest rates narrows, we expect the market value of the notes to decrease. However, in some scenarios, even if the difference between short-term and long-term interest rates widens, the market value of the notes may also be adversely impacted. The difference between long-term interest rates and short-term interest rates is influenced by a number of factors, including (but not limited to) monetary policy, fiscal policy, inflation, and fundamental demand conditions. These factors interrelate in complex, and sometimes ambiguous, ways. Any factor which reduces the supply of or increases the demand for money available for borrowing will generally disproportionately increase short-term interest rates relative to long-term interest rates, thereby potentially affecting the market value of the notes.
- **Volatility of Market Interest Rates.** Volatility is the term used to describe the size and frequency of market fluctuations. An unsettled international environment and related uncertainties may result in greater interest rate volatility, which may continue over the term of the notes. Increases or decreases in the volatility of the interest rates may have an adverse impact on the market value of the notes.
- **Economic and Other Conditions Generally.** The general economic conditions of the capital markets in the U.S. and globally, as well as geopolitical conditions and other financial, political, regulatory, and judicial events that affect the capital markets generally, may affect the value of the notes.
- **Time to Maturity.** We anticipate that the notes may have a market value that may be different from that which would be expected based on the levels of interest rates accruing on the notes. This difference will reflect a time premium or discount due to expectations concerning the difference between such rates and current or future market interest rates. In general, as the time remaining to maturity decreases, the value of notes will approach a value that reflects the remaining interest payments on the notes based on the then-current interest rate accruing on the notes.

Our hedging activities may affect the market value of the notes.

We, or one or more of our affiliates, including MLPF&S, may engage in hedging activities that may increase or decrease the market value of the notes prior to maturity. In addition, we or one or more of our affiliates, including MLPF&S, may purchase or otherwise acquire a long or short position in the notes. We or any of our affiliates, including MLPF&S, may hold or resell the notes. We cannot assure you that these activities will not affect the market value of the notes prior to maturity.

Our trading and hedging activities may create conflicts of interest with you.

We or one or more of our affiliates, including MLPF&S, may engage in trading activities related to CMS10 that are not for your account or on your behalf. We or one or more of our affiliates also may issue, or our affiliates, including MLPF&S, may underwrite, other financial instruments with returns linked to CMS10. We expect to enter into arrangements to hedge the market risks associated with our obligation to pay the amounts due under the notes. We may seek competitive terms in entering into the hedging arrangements for the notes, but are not required to do so, and we may enter into such hedging arrangements with one of our subsidiaries or affiliates. Such hedging activity is expected to result in a profit to those engaging in the hedging activity, which could be more or less than initially expected, but which could also result in a loss for the hedging counterparty. These trading and hedging activities may present a conflict of interest between your interest in the notes and the interests we and our affiliates may have in our and our affiliates' proprietary accounts, in facilitating transactions for our and our affiliates' customers, and in accounts under our and our affiliates' management. These trading and underwriting activities could affect secondary trading in the notes in a manner that would be adverse to your interests as a beneficial owner of the notes.

There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.

Our subsidiary, MLCS, is the calculation agent for the notes and, as such, will determine the amount of interest to be paid on the notes. Under some circumstances, these duties could result in a conflict of interest between MLCS's status as our subsidiary and its responsibilities as calculation agent. These conflicts could occur, for instance, in connection with judgments that it would be required to make if CMS10 is unavailable. See the section entitled "Other Terms of the Notes—Unavailability of CMS10" below in this term sheet. The calculation agent will be required to carry out its duties in good faith and using its reasonable judgment. However, because we expect to control the calculation agent, potential conflicts of interest could arise.

The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes.

No statutory, judicial, or administrative authority directly addresses the characterization of the notes or securities similar to the notes for U.S. federal income tax purposes. As a result, certain aspects of the U.S. federal income tax consequences of an investment in the notes are not certain. We intend to treat the notes as "variable rate debt instruments" for U.S. federal income tax purposes, as described under the section entitled "U.S. Federal Income Tax Summary." If the Internal Revenue Service (the "IRS") were successful in asserting an alternative characterization for the notes, the timing and character of income or loss with respect to the notes may differ. No ruling will be requested from the IRS with respect to the notes and no assurance can be given that the IRS will agree with the statements made in the section entitled "U.S. Federal Income Tax Summary."

You are urged to consult with your own tax advisor regarding all aspects of the U.S. federal income tax consequences of investing in the notes.

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the level of CMS10 on each interest determination date, multiplied by the Participation Rate, together with interest paid during the first year of the notes, will be sufficient to provide you with your desired return.
- You accept that, although you will be entitled to receive the principal amount of the notes at maturity, the interest rate applicable to each quarterly interest period after the first year of the notes is uncertain.
- You are willing to accept that a trading market is not expected to develop for the notes. You understand that secondary market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness.
- You are willing to make an investment, the payments on which depend in part on our creditworthiness, as the issuer of the notes.

The notes may not be an appropriate investment for you if:

- You anticipate that the level of CMS10 on each interest determination date, multiplied by the Participation Rate, together with interest paid during the first year of the notes, will not be sufficient to provide you with your desired return.
- You seek an investment with a fixed or guaranteed rate of return throughout the term of the notes.
- You seek assurances that there will be a liquid market if and when you want to sell the notes prior to maturity.
- You are unwilling or are unable to assume the credit risk associated with us, as the issuer of the notes.

Other Terms of the Notes

General

The notes are part of a series of medium-term notes entitled "Medium-Term Notes, Series L" issued under the Senior Indenture, as amended and supplemented from time to time. The Senior Indenture is more fully described in the prospectus supplement and prospectus identified below under "Additional Terms." The following description of the notes supplements the description of the general terms and provisions of the notes and debt securities set forth under the headings "Description of the Notes" in the prospectus supplement and "Description of Debt Securities" in the prospectus. These documents should be read in connection with this term sheet.

The notes will be issued in denominations of whole units. Each unit will have an Original Offering Price of \$1,000. You may transfer the notes only in whole units. The notes will mature on November 4, 2020.

Prior to maturity, the notes are not repayable at our option or your option. The notes are not subject to any sinking fund.

The notes will be issued in book-entry form only.

Interest

If any interest payment date, including the maturity date of the notes, falls on a day that is not a business day, no adjustment will be made to the length of the corresponding interest period; however, we will make the required payment on the next business day and no additional interest will accrue in respect of the payment made on the next business day.

The interest rate for each quarterly interest period after the first year of the term of the notes will be reset on the first day of that interest period, which we refer to as the "interest reset date." For each such interest period, the applicable rate of interest will be determined on the second U.S. Government Securities Business Day preceding the applicable interest reset date (each, an "interest determination date"). The calculation agent will determine the interest rate for each applicable interest period. Once determined by the calculation agent, the applicable interest rate for each quarterly interest period will apply from and including the interest reset date, through, but excluding, the next interest reset date (or maturity date, as applicable).

A "U.S. Government Securities Business Day" is any day except a Saturday, a Sunday, or a day on which The Securities Industry and Financial Markets Association recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in U.S. government securities.

A "business day" means any day other than a day on which banking institutions in New York, New York are authorized or required by law, regulation, or executive order to close or a day on which transactions in U.S. dollars are not conducted.

For as long as the notes are held in book-entry only form, the record date for each payment of interest will be the business day prior to the payment date. If the notes are issued at any time in a form that is other than book-entry only, the regular record date for an interest payment date will be the last day of the calendar month preceding the interest payment date.

Unavailability of CMS10

If, on any interest determination date, CMS10 is not quoted on the Reuters Screen ISDAFIX3 Page, or any page substituted for that page, then CMS10 will be determined on the basis of the mid-market semi-annual swap rate quotations provided by three banks chosen by the calculation agent (which may include one of our affiliates) at approximately 11:00 a.m., New York City time, on that date.

For this purpose, the mid-market semi-annual swap rate means the arithmetic mean of the bid and offered rates for the semi-annual fixed leg, calculated on the basis of a 360-day year consisting of twelve 30-day months, of a fixed-for-floating U.S. dollar interest rate swap transaction with a term equal to 10 years, commencing on the applicable interest reset date and in a representative amount quoted by an acknowledged dealer of good credit in the swap market, and the floating leg, calculated on the actual number of days in a 360-day year, is equivalent to USD-LIBOR-BBA, as quoted on the Reuters Screen LIBOR01 Page at 11:00 a.m., New York City time, with a designated maturity of three months. The calculation agent will request the principal New York City office of each of the three banks chosen by it to provide a quotation of its rate. If at least three quotations are

Fixed to Floating Rate Notes

Linked to CMS10, due November 4, 2020

STRUCTURED INVESTMENTS

PRINCIPAL PROTECTION
ENHANCED INCOME
MARKET PARTICIPATION
ENHANCED PARTICIPATION

provided, the rate for the relevant interest determination date will be the arithmetic mean of the quotations. If two quotations are provided, the rate for the relevant interest determination date will be the arithmetic mean of the two quotations. If only one quotation is provided, the rate for the relevant interest determination date will equal that one quotation. If no quotations are available, then CMS10 will be the rate the calculation agent, in its sole discretion, determines to be fair and reasonable under the circumstances at approximately 11:00 a.m., New York City time, on the relevant interest determination date.

Role of the Calculation Agent

The calculation agent has the sole discretion to make all determinations regarding the notes, including determinations regarding the interest rate for each applicable interest period after the first year of the term of the notes, the amount of each interest payment, U.S. Government Securities Business Days, and business days. Absent manifest error, all determinations of the calculation agent will be final and binding on you and us, without any liability on the part of the calculation agent.

We have initially appointed our subsidiary, MLCS, as the calculation agent, but we may change the calculation agent at any time without notifying you.

Events of Default and Rights of Acceleration

If an event of default (as defined in the Senior Indenture) occurs and is continuing, holders of the notes may accelerate the maturity of the notes, as described under "Description of Debt Securities—Events of Default and Rights of Acceleration" in the prospectus identified below under "Additional Terms." Upon an event of default, you will be entitled to receive only your principal amount, and accrued and unpaid interest, if any, through the acceleration date. In case of an event of default, the notes will not bear a default interest rate.

Other Provisions

We will deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

Supplement to the Plan of Distribution

MLPF&S, a broker-dealer subsidiary of BAC, is a member of the Financial Industry Regulatory Authority, Inc. (formerly the National Association of Securities Dealers, Inc. (the "NASD")) and will participate as selling agent in the distribution of the notes. Accordingly, offerings of the notes will conform to the requirements of NASD Rule 2720.

You must have an account with the selling agent to purchase the notes.

The selling agent is not acting as your fiduciary or advisor, and you should not rely upon any communication from the selling agent in connection with the notes as investment advice or a recommendation to purchase the notes. You should make your own investment decision regarding the notes after consulting with your legal, tax, and other advisors.

If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account. Under the terms of our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us on the issue date as principal at the purchase price indicated on the cover of this term sheet, less the indicated underwriting discount.

MLPF&S may use this Note Prospectus for offers and sales in secondary market transactions and market-making transactions in the notes but is not obligated to engage in such secondary market transactions and/or market-making transactions. MLPF&S may act as principal or agent in these transactions, and any such sales will be made at prices related to prevailing market prices at the time of the sale.

TS-7

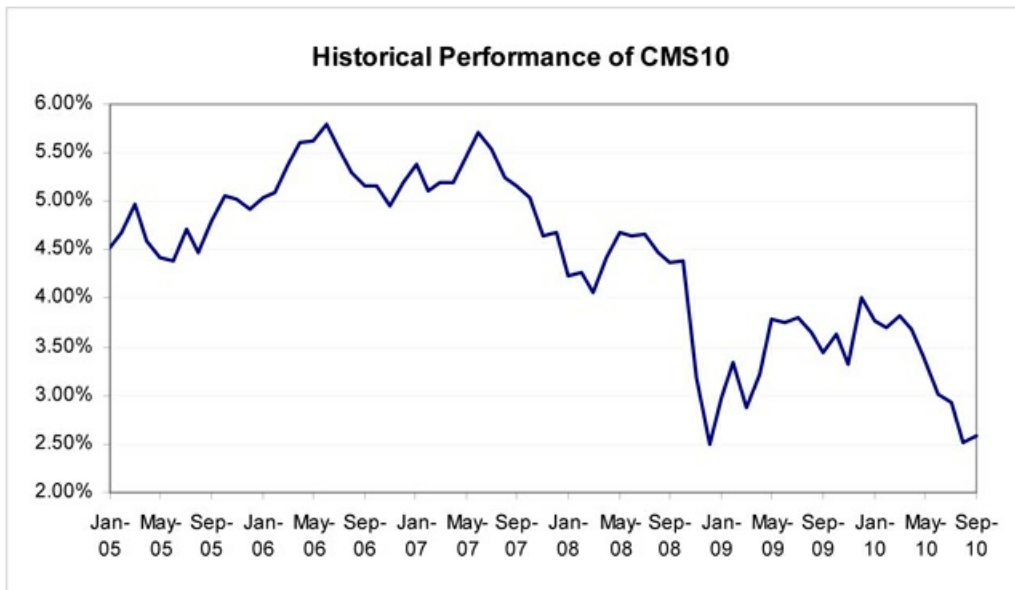

CMS10

CMS10 means the 10-Year U.S. Dollar Constant Maturity Swap Rate that appears on Reuters page ISDAFIX3 as of 11:00 A.M., New York City time, on the applicable U.S. Government Securities Business Day. CMS10 is a "constant maturity swap rate" that measures the fixed rate of interest payable on a hypothetical fixed-for-floating U.S. dollar interest rate swap transaction with a maturity of 10 years. In such a hypothetical swap transaction, the fixed rate of interest, payable semi-annually on the basis of a 360-day year consisting of twelve 30-day months, is exchangeable for a floating 3-month LIBOR-based payment stream that is payable quarterly on the basis of the actual number of days elapsed during a quarterly period in a 360-day year. "LIBOR" is the London Interbank Offered Rate and is a common rate of interest used in the swaps industry.

The following table sets forth the historical month-end levels of CMS10 from January 2005 through September 2010, which we obtained from Bloomberg, L.P. page USISDA10. The historical data on CMS10 is not necessarily indicative of the future performance of CMS10 or what the value of the notes may be. Any historical upward or downward trend in the level of CMS10 during any period set forth below is not an indication that the level of CMS10 is more or less likely to increase or decrease at any time over the term of the notes.

	2005	2006	2007	2008	2009	2010
January	4.531	5.040	5.377	4.226	2.983	3.774
February	4.676	5.085	5.105	4.271	3.337	3.695
March	4.964	5.387	5.190	4.066	2.877	3.826

The following graph sets forth the historical month-end levels of CMS10 presented in the preceding table. On the pricing date, the level of CMS10 was 2.762%.

Fixed to Floating Rate Notes

Linked to CMS10, due November 4, 2020

STRUCTURED INVESTMENTS

- PRINCIPAL PROTECTION
- ENHANCED INCOME
- MARKET PARTICIPATION
- ENHANCED PARTICIPATION

Movements in CMS10 have historically been correlated to some extent to movements in the 10-Year Constant Maturity Treasury Rate, which expresses the yield to maturity on U.S. Treasury securities with a constant maturity of 10 years. The graph below shows the monthly CMS10 relative to the monthly 10-Year Constant Maturity Treasury Rate during the period from January 2005 through September 2010.

TS-9

U.S. Federal Income Tax Summary

The following summary of the material U.S. federal income tax considerations of the acquisition, ownership, and disposition of the notes is based upon the advice of Morrison & Foerster LLP, our tax counsel. The following discussion is not exhaustive of all possible tax considerations. This summary is based upon the Internal Revenue Code of 1986, as amended (the "Code"), regulations promulgated under the Code by the U.S. Treasury Department (including proposed and temporary regulations), rulings, current administrative interpretations and official pronouncements of the Internal Revenue Service (the "IRS"), and judicial decisions, all as currently in effect and all of which are subject to differing interpretations or to change, possibly with retroactive effect. No assurance can be given that the IRS would not assert, or that a court would not sustain, a position contrary to any of the tax consequences described below.

The following discussion supplements, is subject to the same qualifications and limitations as, and should be read in conjunction with the discussion in the prospectus supplement under the caption "U.S. Federal Income Tax Considerations," and in the prospectus under the caption "U.S. Federal Income Tax Considerations." To the extent inconsistent, the following discussion supersedes the discussion in the prospectus supplement and the prospectus.

This discussion only applies to U.S. holders (as defined in the accompanying prospectus) that are not excluded from the discussion of U.S. federal income taxation in the accompanying prospectus. In particular, this summary is directed solely to U.S. holders that will purchase the notes upon original issuance and will hold the notes as capital assets within the meaning of Section 1221 of the Code, which generally means as property held for investment. This summary assumes that the issue price of the notes, as determined for U.S. federal income tax purposes, equals the principal amount thereof.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws.

We intend to treat the notes as variable rate debt instruments providing for stated interest at a single fixed rate and one or more qualified floating rates. Under Treasury regulations applicable to such instruments, you generally will be required to account for interest on the notes as described below. You will be required to construct an "equivalent fixed rate debt instrument" for the notes and apply the general rules applicable to debt instruments described under the section of the prospectus entitled "U.S. Federal Income Tax Considerations – Taxation of Debt Securities." The applicable rules require (i) replacing the initial fixed rate by a "qualified floating rate" that would preserve the fair market value of the notes, and (ii) determining the fixed rate substitute for each floating rate. The fixed rate substitute for each qualified floating rate is the value of the rate on the issue date of the notes. The equivalent fixed rate debt instrument is the hypothetical instrument that has terms that are identical to those of the notes, except that the equivalent fixed rate debt instrument provides for the fixed rate substitutes in lieu of the rates on the notes. Under these rules, the equivalent fixed rate debt instrument will have stated interest equal to the fixed rate substitutes. The amount of OID is determined for the equivalent fixed rate debt instrument under the rules applicable to fixed rate debt instruments and is taken into account as if the holder held the equivalent fixed rate debt instrument. Please see the discussion in the prospectus under the section entitled "U.S. Federal Income Tax Considerations – Taxation of Debt Securities – Consequences to U.S. Holders – Original Issue Discount" for a discussion of these rules. Under these rules, based on current market information, we expect the notes will be issued with no more than de minimis OID. You will be required to make appropriate adjustments for interest actually paid on the notes. Qualified stated interest and OID, if any, allocable to an accrual period must be increased (or decreased) if the interest actually accrued or paid during an accrual period exceeds (or is less than) the interest assumed to be accrued or paid during the accrual period under the equivalent fixed rate debt instrument. This increase or decrease is an adjustment to qualified stated interest for the accrual period if the equivalent fixed rate debt instrument provides for qualified stated interest and the increase or decrease is reflected in the amount actually paid during the accrual period. Otherwise, this increase or decrease is an adjustment to OID, if any, for the accrual period.

With respect to taxable years beginning after December 31, 2012, certain U.S. Holders, including individuals, estates, and trusts, will be subject to an additional 3.8% Medicare tax on unearned income. For individual U.S. Holders, the additional Medicare tax applies to the lesser of (i) "net investment income," or (ii) the excess of "modified adjusted gross income" over \$200,000 (\$250,000 if married and filing jointly or \$125,000 if married and filing separately). "Net investment income" generally equals the taxpayer's gross investment income reduced by the deductions that are allocable to such income. Investment income generally includes passive income such as interest, dividends, annuities, royalties, rents, and capital gains. U.S. Holders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in the notes.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. See the discussion under the section entitled "U.S. Federal Income Tax Considerations" beginning on page 60 of the prospectus.

ERISA Considerations

Each fiduciary of a pension, profit-sharing, or other employee benefit plan subject to ERISA (a "Plan"), should consider the fiduciary standards of ERISA in the context of the Plan's particular circumstances before authorizing an investment in the notes. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the Plan.

In addition, we and certain of our subsidiaries and affiliates, including MLPF&S, may be each considered a party in interest within the meaning of ERISA, or a disqualified person within the meaning of the Code, with respect to many Plans, as well as many individual retirement accounts and Keogh plans (also "Plans"). Prohibited transactions within the meaning of ERISA or the Code would likely arise, for example, if the notes are acquired by or with the assets of a Plan with respect to which MLPF&S or any of our other affiliates is a party in interest, unless the notes are acquired under an exemption from the prohibited transaction rules. A violation of these prohibited transaction rules could result in an excise tax or other liabilities under ERISA and/or Section 4975 of the Code for such persons, unless exemptive relief is available under an applicable statutory or administrative exemption.

Under ERISA and various PTCEs issued by the U.S. Department of Labor, exemptive relief may be available for direct or indirect prohibited transactions resulting from the purchase, holding, or disposition of the notes. Those exemptions are PTCE 96-23 (for certain transactions determined by in-house asset managers), PTCE 95-60 (for certain transactions involving insurance company general accounts), PTCE 91-38 (for certain transactions involving bank collective investment funds), PTCE 90-1 (for certain transactions involving insurance company separate accounts), PTCE 84-14 (for certain transactions determined by independent qualified asset managers), and the exemption under Section 408(b)(17) of ERISA and Section 4975(d)(20) of the Code for certain arm's-length transactions with a person that is a party in interest solely by reason of providing services to Plans or being an affiliate of such a service provider (the "Service Provider Exemption").

Because we may be considered a party in interest with respect to many Plans, the notes may not be purchased, held, or disposed of by any Plan, any entity whose underlying assets include plan assets by reason of any Plan's investment in the entity (a "Plan Asset Entity"), or any person investing plan assets of any Plan, unless such purchase, holding, or disposition is eligible for exemptive relief, including relief available under PTCE 96-23, 95-60, 91-38, 90-1, or 84-14 or the Service Provider Exemption, or such purchase, holding, or disposition is otherwise not prohibited. Any purchaser, including any fiduciary purchasing on behalf of a Plan, transferee, or holder of the notes will be deemed to have represented, in its corporate and its fiduciary capacity, by its purchase and holding of the notes that either (a) it is not a Plan or a Plan Asset Entity and is not purchasing such notes on behalf of or with plan assets of any Plan or with any assets of a governmental, church, or foreign plan that is subject to any federal, state, local, or foreign law that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code or (b) its purchase, holding, and disposition are eligible for exemptive relief or such purchase, holding, and disposition are not prohibited by ERISA or Section 4975 of the Code (or in the case of a governmental, church, or foreign plan, any substantially similar federal, state, local, or foreign law).

The fiduciary investment considerations summarized above generally apply to employee benefit plans maintained by private-sector employers and to individual retirement accounts and other arrangements subject to Section 4975 of the Code, but generally do not apply to governmental plans (as defined in Section 3(32) of ERISA), certain church plans (as defined in Section 3(33) of ERISA), and foreign plans (as described in Section 4(b)(4) of ERISA). However, these other plans may be subject to similar provisions under applicable federal, state, local, foreign, or other regulations, rules, or laws ("similar laws"). The fiduciaries of plans subject to similar laws should also consider the foregoing issues in general terms as well as any further issues arising under the applicable similar laws.

Purchasers of the notes have exclusive responsibility for ensuring that their purchase, holding, and disposition of the notes do not violate the prohibited transaction rules of ERISA or the Code or any similar regulations applicable to governmental or church plans, as described above.

This discussion is a general summary of some of the rules which apply to benefit plans and their related investment vehicles. This summary does not include all of the investment considerations relevant to Plans and other benefit plan investors such as governmental, church, and foreign plans and should not be construed as legal advice or a legal opinion. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing the notes on behalf of or with "plan assets" of any Plan or other benefit plan investor consult with their legal counsel prior to directing any such purchase.

Additional Terms

You should read this term sheet, together with the documents listed below, which together contain the terms of the notes and supersede all prior or contemporaneous oral statements as well as any other written materials. You should carefully consider, among other things, the matters set forth under "Risk Factors" in the sections indicated on the cover of this term sheet. The notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

You may access the following documents on the SEC Website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC Website):

- Series L MTN prospectus supplement dated April 21, 2009 and prospectus dated April 20, 2009:
<http://www.sec.gov/Archives/edgar/data/70858/000095014409003387/q18667b5e424b5.htm>

Our Central Index Key, or CIK, on the SEC Website is 70858.

We have filed a registration statement (including a prospectus supplement and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the prospectus supplement and the prospectus in that registration statement, and the other documents relating to this offering that we have filed with the SEC for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC Website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you the Note Prospectus if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Structured Investments Classification

MLPF&S classifies certain structured investments (the "Structured Investments"), including the notes, into four categories, each with different investment characteristics. The description below is intended to briefly describe the four categories of Structured Investments offered: Principal Protection, Enhanced Income, Market Participation, and Enhanced Participation. A Structured Investment may, however, combine characteristics that are relevant to one or more of the other categories. As such, a category should not be relied upon as a description of any particular Structured Investment.

Principal Protection: Principal Protected Structured Investments offer full or partial principal protection against decreases in the value of the underlying market measure (or increases in the value of an underlying market measure for bearish Structured Investments), while offering market exposure and the opportunity for a better return than may be available from comparable fixed income securities. Principal protection may not be achieved if the investment is sold prior to maturity.

Enhanced Income: Structured Investments offering enhanced income may offer an enhanced income stream through interim fixed or variable coupon payments. However, in exchange for receiving current income, investors may forfeit upside potential on the underlying asset. These investments generally do not include the principal protection feature.

Market Participation: Market Participation Structured Investments can offer investors exposure to specific market sectors, asset classes, and/or strategies that may not be readily available through traditional investment alternatives. Returns obtained from these investments are tied to the performance of the underlying asset. As such, subject to certain fees, the returns will generally reflect any increases or decreases in the value of such assets. These investments generally do not include the principal protection feature.

Enhanced Participation: Enhanced Participation Structured Investments may offer investors the potential to receive better than market returns on the performance of the underlying asset. Some structures may offer leverage in exchange for a capped or limited upside potential and also in exchange for downside risk. These investments generally do not include the principal protection feature.

The classification of Structured Investments is meant solely for informational purposes and is not intended to fully describe any particular Structured Investment nor guarantee any particular performance.
