

Subject to Completion
 Preliminary Term Sheet dated November 23, 2010

Units	Expected Pricing Date*	December , 2010
Market-Linked Step Up Notes	Settlement Date*	December , 2010
Linked to the Global Equity Basket	Maturity Date*	December , 2012
due December , 2012	CUSIP No.	
\$10 principal amount per unit		
Term Sheet No.		

Market-Linked Step Up Notes

- Step Up Payment of 13% to 19% over the Original Offering Price at maturity if the value of a Basket comprised of the S&P 500® Index, the MSCI EAFE Index, and the MSCI Emerging Markets (EM) Index is unchanged or increases, but does not increase above the Step Up Value
- The S&P 500® Index will be given an initial weight of 45.00%, and the MSCI EAFE Index and the MSCI Emerging Markets (EM) Index will each be given an initial weight of 27.50%
- 100% participation in any increase in the value of the Basket if it increases above the Step Up Value of 113% to 119% of the Starting Value
- 1-to-1 downside exposure to decreases in the value of the Basket, with no downside limit
- A maturity of approximately two years
- Payment of the Redemption Amount at maturity is subject to the credit risk of Bank of America Corporation
- No periodic interest payments
- No listing on any securities exchange

-  Market Downside Protection
-  Enhanced Income
-  Market Access
-  Enhanced Return

The notes are being offered by Bank of America Corporation ("BAC"). The notes will have the terms specified in this term sheet as supplemented by the documents indicated below under "Additional Terms" (together, the "Note Prospectus"). Investing in the notes involves a number of risks. **There are important differences between the notes and a conventional debt security, including different investment risks. See "Risk Factors" on page TS-5 of this term sheet and beginning on page S-8 of product supplement SUN-1. The notes:**

Are Not FDIC Insured	Are Not Bank Guaranteed	May Lose Value
----------------------	-------------------------	----------------

In connection with this offering, Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S") is acting in its capacity as principal for your account.

None of the Securities and Exchange Commission (the "SEC"), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Unit	Total
Public offering price ⁽¹⁾	\$10.00	\$
Underwriting discount ⁽¹⁾	\$0.20	\$
Proceeds, before expenses, to Bank of America Corporation	\$9.80	\$

(1) The public offering price and underwriting discount for any purchase of 500,000 units or more in a single transaction by an individual investor will be \$9.95 per unit and \$0.15 per unit, respectively. The public offering price and underwriting discount for any purchase by certain fee-based trusts and fee-based discretionary accounts managed by U.S. Trust operating through Bank of America, N.A. will be \$9.80 per unit and \$0.00 per unit, respectively.

*Depending on the date the notes are priced for initial sale to the public (the "pricing date"), which may be in December 2010 or January 2011, the settlement date may occur in December 2010 or January 2011, and the maturity date may occur in December 2012 or January 2013. Any reference in this term sheet to the month in which the pricing date, the settlement date, or the maturity date will occur is subject to change as specified above.

Merrill Lynch & Co.

December , 2010

Summary

The Market-Linked Step Up Notes Linked to a Global Equity Basket, due December , 2012 (the "notes") are our senior unsecured debt securities. The notes are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. **The notes will rank equally with all of our other unsecured and unsubordinated debt, and any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BAC.**

The notes provide investors with a Step Up Payment if the value of the Global Equity Basket described below (the "Basket") is unchanged or increases from the Starting Value of the Basket, which will be set to 100.00 on the pricing date, to the Ending Value of the Basket, determined on a calculation day shortly before the maturity date, but does not increase above the Step Up Value. If the value of the Basket increases from the Starting Value to an Ending Value that is above the Step Up Value, investors will participate on a 1-for-1 basis in the increase above the Starting Value. Investors should be of the view that the value of the Basket will increase over the term of the notes. Investors must be willing to forgo interest payments on the notes and be willing to accept a repayment that will be less, and potentially significantly less, than the Original Offering Price if the Ending Value is less than the Starting Value.

The Basket is comprised of the S&P 500® Index, the MSCI EAFE Index and the MSCI Emerging Markets (EM) Index, (each, a "Basket Component Index," and together, the "Basket Component Indices"). On the pricing date, the S&P 500® Index will be given an initial weight of 45.00%, the MSCI EAFE Index will be given an initial weight of 27.50%, and the MSCI Emerging Markets (EM) Index will be given an initial weight of 27.50%

Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement SUN-1. Unless otherwise indicated or unless the context requires otherwise, all references in this document to "we," "us," "our," or similar references are to BAC.

Terms of the Notes

Issuer:	Bank of America Corporation ("BAC")
Original Offering Price:	\$10.00 per unit
Term:	Approximately two years
Market Measure:	A Global Equity Basket comprised of the S&P 500® Index (Bloomberg symbol: "SPX"), the MSCI EAFE Index (Bloomberg symbol: "MXEA"), and the MSCI Emerging Markets (EM) Index (Bloomberg symbol: "MXEF").
Starting Value:	The Starting Value will be set to 100.00 on the pricing date.
Ending Value:	The closing value of the Basket on the calculation day. If it is determined that the scheduled calculation day is not a Market Measure Business Day, or if a Market Disruption Event occurs on the scheduled calculation day, the Ending Value will be determined as more fully described beginning on page S-22 of product supplement SUN-1.
Step Up Value:	The Step Up Value will be between 113% and 119% of the Starting Value. The Step Up Value will be determined on the pricing date and set forth in the final term sheet that will be made available in connection with sales of the notes.
Step Up Payment:	The Step Up Payment will be between \$1.30 and \$1.90 per unit at maturity (representing a return of between 13% and 19% over the Original Offering Price). The actual Step Up Payment will be determined on the pricing date and set forth in the final term sheet that will be made available in connection with sales of the notes.
Threshold Value:	100% of the Starting Value. Accordingly, you will lose all or a portion of your investment if the Ending Value is less than the Starting Value.
Calculation Day:	The fifth scheduled Market Measure Business Day immediately prior to the maturity date, determined on the pricing date and set forth in the final term sheet that will be made available in connection with sales of the notes.
Calculation Agent:	MLPF&S, a subsidiary of BAC

Determining the Redemption Amount for the Notes

On the maturity date, you will receive a cash payment per unit of the notes (the "Redemption Amount") calculated as follows:

Because the Threshold Value for the notes is equal to the Starting Value, you will receive a Redemption Amount that is less, and possibly significantly less, than the Original Offering Price per unit of the notes if the Ending Value is less than the Starting Value.

Hypothetical Payout Profile

This graph reflects the **hypothetical** returns on the notes at maturity, based on the **hypothetical** Step Up Payment of \$1.60 (the midpoint of the Step Up Payment range of \$1.30 to \$1.90), the **hypothetical** Step Up Value of 116% of the Starting Value (the midpoint of the Step Up Value range of 113% to 119%), and the Threshold Value of 100% of the Starting Value. The green line reflects the **hypothetical** returns on the notes while the grey dotted line reflects the **hypothetical** returns of a direct investment in the stocks included in the Basket Component Indices, excluding dividends.

This graph has been prepared for purposes of illustration only. Your actual return will depend on the actual Step Up Payment, Step Up Value, Ending Value, and the term of your investment.

Hypothetical Redemption Amounts

Examples

Set forth below are three examples of **hypothetical** Redemption Amount calculations (rounded to two decimal places) payable at maturity, based upon a Starting Value and Threshold Value of 100.00, a **hypothetical** Step Up Payment of \$1.60 (the midpoint of the Step Up Payment range of \$1.30 to \$1.90), and a **hypothetical** Step Up Value of 116% of the Starting Value (the midpoint of the Step Up Value range of 113% to 119%):

Example 1 — The **hypothetical** Ending Value is 80% of the Starting Value and Threshold Value:

Starting Value: 100.00
Threshold Value: 100.00
Hypothetical Ending Value: 80.00

$$\text{Hypothetical Redemption Amount (per unit)} = \$10 - \left[\$10 \times \left(\frac{100.00 - 80.00}{100.00} \right) \right] = \$8.00$$

Example 2 — The **hypothetical** Ending Value is 115% of the Starting Value but is less than the **hypothetical** Step Up Value:

Starting Value: 100.00
Hypothetical Ending Value: 115.00
Hypothetical Step Up Value: 116.00

$$\text{Hypothetical Redemption Amount (per unit)} = \$10.00 + \$1.60 = \$11.60$$

In this case, because the **hypothetical** Ending Value is greater than or equal to the Starting Value but less than or equal to the **hypothetical** Step Up Value, the **hypothetical** Redemption Amount (per unit) will equal \$11.60, which is the sum of the Original Offering Price and the **hypothetical** Step Up Payment of \$1.60.

Example 3 — The **hypothetical** Ending Value is 150% of the Starting Value and is greater than the **hypothetical** Step Up Value:

Starting Value: 100.00
Hypothetical Ending Value: 150.00
Hypothetical Step Up Value: 116.00

$$\text{Hypothetical Redemption Amount (per unit)} = \$10 + \left[\$10 \times \left(\frac{150.00 - 100.00}{100.00} \right) \right] = \$15.00$$

The following table illustrates, for the Starting Value and Threshold Value of 100.00 and a range of **hypothetical** Ending Values of the Basket:

- the percentage change from the Starting Value to the **hypothetical** Ending Value;
- the **hypothetical** Redemption Amount per unit of the notes (rounded to two decimal places); and
- the **hypothetical** total rate of return to holders of the notes.

The table below is based on a **hypothetical** Step Up Payment of \$1.60 (the midpoint of the Step Up Payment range of \$1.30 to \$1.90) and a **hypothetical** Step Up Value of 116% of the Starting Value (the midpoint of the Step Up Value range of 113% to 119%).

Hypothetical Ending Value ⁽¹⁾	Percentage Change from the Starting Value to the Hypothetical Ending Value	Hypothetical Redemption Amount per Unit	Hypothetical Total Rate of Return on the Notes
50.00	-50.00%	\$5.00	-50.00%
60.00	-40.00%	\$6.00	-40.00%
70.00	-30.00%	\$7.00	-30.00%
80.00	-20.00%	\$8.00	-20.00%
85.00	-15.00%	\$8.50	-15.00%
95.00	-5.00%	\$9.50	-5.00%
98.00	-2.00%	\$9.80	-2.00%
100.00 ⁽²⁾	0.00%	\$11.60 ⁽³⁾	16.00%
102.00	2.00%	\$11.60	16.00%
105.00	5.00%	\$11.60	16.00%
110.00	10.00%	\$11.60	16.00%
116.00 ⁽⁴⁾	16.00%	\$11.60	16.00%
120.00	20.00%	\$12.00	20.00%
130.00	30.00%	\$13.00	30.00%
140.00	40.00%	\$14.00	40.00%
150.00	50.00%	\$15.00	50.00%

(1) Each Basket Component Index comprising the Basket is a price return index. Accordingly, the Ending Value will not include any income generated by dividends paid on the stocks included in the Basket Component Indices, which you would otherwise be entitled to receive if you invested in those stocks directly.

(2) The Starting Value and Threshold Value will be set to 100.00 on the pricing date.

(3) This amount represents the sum of the Original Offering Price and the **hypothetical** Step Up Payment. The actual Step Up Payment will be determined on the pricing date and will be between \$1.30 and \$1.90.

(4) This is the **hypothetical** Step Up Value. The actual Step Up Value will be determined on the pricing date and will be between 113% and 119% of the Starting Value.

The above figures are for purposes of illustration only. The actual Redemption Amount and the resulting total rate of return will depend on the actual Ending Value, Step Up Value, Step Up Payment, and the term of your investment.

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. You should carefully review the more detailed explanation of risks relating to the notes in the "Risk Factors" sections beginning on page S-8 of product supplement SUN-1 and page S-4 of the MTN prospectus supplement identified below under "Additional Terms." We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

- Your investment may result in a loss; there is no guaranteed return of principal.
- Your yield may be less than the yield on a conventional debt security of comparable maturity.
- You must rely on your own evaluation of the merits of an investment linked to the Basket.
- In seeking to provide you with what we believe to be commercially reasonable terms for the notes while providing MLPF&S with compensation for its services, we have considered the costs of developing, hedging, and distributing the notes.
- A trading market is not expected to develop for the notes. MLPF&S is not obligated to make a market for, or to repurchase, the notes.
- Payments on the notes are subject to our credit risk, and changes in our credit ratings are expected to affect the value of the notes.
- The Redemption Amount will not be affected by all developments relating to the Basket Component Indices.
- Changes in the levels of the Basket Component Indices may offset each other. Due to its Initial Component Weight, changes in the level of the S&P 500[®] Index will have a more substantial impact on the value of the Basket than similar changes in the levels of the other Basket Component Indices.
- Each Index Publisher (as defined below) may adjust its Basket Component Index in a way that affects their levels, and those publishers have no obligation to consider your interests.
- You will have no rights of a holder of the securities included in the Basket Component Indices, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- While we or our affiliates may from time to time own shares of companies included in the Basket Component Indices, except to the extent that our common stock is included in the S&P 500[®] Index, we do not control any company whose securities are included in each Basket Component Index, and are not responsible for any disclosure made by any other company.
- Your return on the notes may be affected by factors affecting the international securities markets.
- Exchange rate movements may impact the value of the notes.
- If you attempt to sell the notes prior to maturity, their market value, if any, will be affected by various factors that interrelate in complex ways, and their market value may be less than their Original Offering Price.
- Purchases and sales by us and our affiliates of stocks included in the Basket Component Indices may affect your return.
- Our trading and hedging activities may create conflicts of interest with you.
- Our hedging activities may affect your return on the notes and their market value.
- Our business activities relating to the companies whose securities are included in the Basket Component Indices may create conflicts of interest with you.
- There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.
- The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See "Summary Tax Consequences" and "Certain U.S. Federal Income Taxation Considerations" below and "U.S. Federal Income Tax Summary" beginning on page S-31 of product supplement SUN-1.

Other Terms of the Notes

Market Measure Business Day

The following definition shall supersede and replace the definition of a "Market Measure Business Day" set forth on pages S-6 and S-21 of product supplement SUN-1.

A "Market Measure Business Day" means a day on which:

(A) the New York Stock Exchange and The NASDAQ Stock Market (as to the S&P 500[®] Index); the London Stock Exchange, the Frankfurt Stock Exchange, the Paris Bourse, and the Tokyo Stock Exchange (as to the MSCI EAFE Index) (or any successor to the foregoing exchanges) are open for trading, and the London Stock Exchange, the Hong Kong Stock Exchange, the São Paulo Stock Exchange, and the Korea Stock Exchange (as to the MSCI Emerging Markets (EM) Index); and

(B) the Basket Component Indices or any successors thereto are calculated and published.

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the value of the Basket will increase from the Starting Value to the Ending Value.
- You accept that your investment will result in a loss, which could be significant, if the value of the Basket decreases from the Starting Value to the Ending Value.
- You are willing to forgo interest payments on the notes, such as fixed or floating rate interest paid on traditional interest bearing debt securities.
- You seek exposure to the Basket Component Indices with no expectation of dividends or other benefits of owning the stocks included in the Basket Component Indices.
- You are willing to accept that a trading market is not expected to develop for the notes. You understand that secondary market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness.
- You are willing to make an investment, the payment on which depends on our creditworthiness, as the issuer of the notes.

The notes may not be an appropriate investment for you if:

- You anticipate that the value of the Basket will decrease from the Starting Value to the Ending Value.
- You seek principal protection or preservation of capital.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the stocks included in the Basket Component Indices.
- You seek assurances that there will be a liquid market if and when you want to sell the notes prior to maturity.
- You are unwilling or are unable to assume the credit risk associated with us, as the issuer of the notes.

Other Provisions

We may deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement of the notes occurs more than three business days from the pricing date, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

Supplement to the Plan of Distribution

MLPF&S, a broker-dealer subsidiary of BAC, is a member of the Financial Industry Regulatory Authority, Inc. (formerly the National Association of Securities Dealers, Inc. (the "NASD")) and will participate as selling agent in the distribution of the notes. Accordingly, offerings of the notes will conform to the requirements of NASD Rule 2720. Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us on the issue date as principal at the purchase price indicated on the cover of this term sheet, less the indicated underwriting discount. MLPF&S will not receive an underwriting discount for notes sold to certain fee-based trusts and fee-based discretionary accounts managed by U.S. Trust operating through Bank of America, N.A. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units.

MLPF&S may use this Note Prospectus for offers and sales in secondary market transactions and market-making transactions in the notes but is not obligated to engage in such secondary market transactions and/or market-making transactions. MLPF&S may act as principal or agent in these transactions, and any such sales will be made at prices related to prevailing market prices at the time of the sale.

The Basket

The Basket is designed to allow investors to participate in the percentage changes in the levels of the Basket Component Indices from the Starting Value to the Ending Value of the Basket. The Basket Component Indices are described in the section "The Basket Component Indices" below. Each Basket Component Index will be assigned an initial weight on the pricing date, as set forth in the table below.

For more information on the calculation of the value of the Basket, please see the section entitled "Description of the Notes—Basket Market Measures" beginning on page S-26 of product supplement SUN-1.

If November 15, 2010 were the pricing date, for each Basket Component Index, the Initial Component Weight, the closing level, the **hypothetical** Component Ratio and the initial contribution to the Basket value would be as follows:

Basket Component Index	Bloomberg Symbol	Initial Component Weight	Closing Level ⁽¹⁾⁽²⁾	Hypothetical Component Ratio ⁽¹⁾⁽³⁾	Initial Basket Value Contribution
The S&P 500 [®] Index	SPX	45.00%	1,197.75	0.03757044	45.00
The MSCI EAFE Index	MXEA	27.50%	1,630.10	0.01687013	27.50
The MSCI Emerging Markets (EM) Index	MXEF	27.50%	1,115.05	0.02466257	27.50
			Starting Value		100.00

- (1) The actual closing level of each Basket Component Index and the resulting actual Component Ratios will be determined on the pricing date, subject to adjustment as more fully described in the section entitled "Description of the Notes—Basket Market Measures—Determination of the Component Ratio for Each Basket Component—Equity-Based Basket Components" beginning on page S-26 of product supplement SUN-1 if a Market Disruption Event occurs on the pricing date as to any Basket Component Index. The actual closing level and Component Ratio of each Basket Component Index will be set forth in the final term sheet that will be made available in connection with sales of the notes.
- (2) These were the closing levels of the Basket Component Indices on November 15, 2010.
- (3) Each **hypothetical** Component Ratio equals the Initial Component Weight of the Basket Component Index (as a percentage) multiplied by 100, and then divided by the closing level of that Basket Component Index on November 15, 2010 and rounded to eight decimal places.

The calculation agent will calculate the value of the Basket by summing the products of the closing level for each Basket Component Index on the calculation day and the Component Ratio applicable to such Basket Component Index. If a Market Disruption Event occurs as to any Basket Component Index on the scheduled calculation day, the closing level of that Basket Component Index will be determined as more fully described beginning on page S-22 of product supplement SUN-1 in the section "Description of the Notes—The Starting Value and the Ending Value—Ending Value—Equity-Based Basket Market Measures."

While actual historical information on the Basket will not exist before the pricing date, the following graph sets forth the hypothetical historical monthly performance of the Basket from January 2005 through October 2010. The graph is based upon actual month-end historical levels of the Basket Component Indices, and hypothetical Component Ratios determined as of December 31, 2004, and a Basket Value of 100.00 as of that date. This hypothetical historical data on the Basket is not necessarily indicative of the future performance of the Basket or what the value of the notes may be. Any historical upward or downward trend in the value of the Basket during any period set forth below is not an indication that the value of the Basket is more or less likely to increase or decrease at any time over the term of the notes.

The Basket Component Indices

All disclosures contained in this term sheet regarding the Basket Component Indices, including, without limitation, their make up, method of calculation, and changes in their components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by each of Standard & Poor's Financial Services ("S&P") and MSCI (together, the "Index Publishers"). The Index Publishers have no obligation to continue to publish, and may discontinue publication of, the Basket Component Indices. The consequences of the Index Publishers discontinuing publication of the Basket Component Indices are discussed in the section of product supplement SUN-1 entitled "Description of the Notes—Discontinuance of a Market Measure" on page S-25 of product supplement SUN-1. None of us, the calculation agent, or the selling agent accepts any responsibility for the calculation, maintenance, or publication of any of the Basket Component Indices or any successor index.

The S&P 500[®] Index

"Standard & Poor's[®]", "Standard & Poor's 500TM", "S&P 500[®]", and "S&P[®]" are trademarks of S&P and have been licensed for use in this offering by our subsidiary, MLPF&S. The notes are not sponsored, endorsed, sold, or promoted by S&P, and S&P makes no representation regarding the advisability of investing in the notes.

The S&P 500[®] Index is intended to provide an indication of the pattern of common stock price movement. The calculation of the level of the S&P 500[®] Index is based on the relative value of the aggregate market value of the common stocks of 500 companies as of a particular time compared to the aggregate average market value of the common stocks of 500 similar companies during the base period of the years 1941 through 1943. As of October 29, 2010, 404 companies included in the S&P 500[®] Index traded on the New York Stock Exchange, and 96 companies included in the S&P 500[®] Index traded on The NASDAQ Stock Market. On October 29, 2010, the average market capitalization of the companies included in the S&P 500[®] Index was \$21.45 billion. As of that date, the largest component of the S&P 500[®] Index had a market capitalization of \$338.45 billion, and the smallest component of the S&P 500[®] Index had a market capitalization of \$0.91 billion.

S&P chooses companies for inclusion in the S&P 500[®] Index with the aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the common stock population of its Stock Guide Database of over 10,000 companies, which S&P uses as an assumed model for the composition of the total market. Relevant criteria employed by S&P include the viability of the particular company, the extent to which that company represents the industry group to which it is assigned, the extent to which the market price of that company's common stock generally is responsive to changes in the affairs of the respective industry, and the market value and trading activity of the common stock of that company. Ten main groups of companies constitute the S&P 500[®] Index, with the approximate percentage of the market capitalization of the S&P 500[®] Index included in each group as of October 29, 2010 indicated in parentheses: Consumer Discretionary (10.58%); Consumer Staples (11.15%); Energy (11.13%); Financials (15.39%); Health Care (11.46%); Industrials (10.67%); Information Technology (19.32%); Materials (3.63%); Telecommunication Services (3.12%); and Utilities (3.55%). S&P from time to time, in its sole discretion, may add companies to, or delete companies from, the S&P 500[®] Index to achieve the objectives stated above. S&P calculates the S&P 500[®] Index by reference to the prices of the constituent stocks of the S&P 500[®] Index without taking account of the value of dividends paid on those stocks. As a result, the return on the notes will not reflect the return you would realize if you actually owned the S&P 500[®] Index constituent stocks and received the dividends paid on those stocks.

Computation of the S&P 500[®] Index

While S&P currently employs the following methodology to calculate the S&P 500[®] Index, no assurance can be given that S&P will not modify or change this methodology in a manner that may affect the Redemption Amount.

Historically, the market value of any component stock of the S&P 500[®] Index was calculated as the product of the market price per share and the number of then outstanding shares of such component stock. In March 2005, S&P began shifting the S&P 500[®] Index halfway from a market capitalization weighted formula to a float-adjusted formula, before moving the S&P 500[®] Index to full float adjustment on September 16, 2005. S&P's criteria for selecting stocks for the S&P 500[®] Index did not change with the shift to float adjustment. However, the adjustment affects each company's weight in the S&P 500[®] Index.

Under float adjustment, the share counts used in calculating the S&P 500[®] Index reflect only those shares that are available to investors, not all of a company's outstanding shares. S&P defines three groups of shareholders whose holdings are subject to float adjustment:

- holdings by other publicly traded corporations, venture capital firms, private equity firms, strategic partners, or leveraged buyout groups;
- holdings by government entities, including all levels of government in the U.S. or foreign countries; and
- holdings by current or former officers and directors of the company, founders of the company, or family trusts of officers, directors, or founders, as well as holdings of trusts, foundations, pension funds, employee stock ownership plans, or other investment vehicles associated with and controlled by the company.

However, treasury stock, stock options, restricted shares, equity participation units, warrants, preferred stock, convertible stock, and rights are not part of the float. In cases where holdings in a group exceed 10% of the outstanding shares of a company, the holdings of that group are excluded from the float-adjusted count of shares to be used in the S&P 500[®] Index calculation. Mutual funds, investment advisory firms, pension funds, or foundations not associated with the company and investment funds in insurance companies, shares of a U.S. company traded in Canada as "exchangeable shares," shares that trust beneficiaries may buy or sell without difficulty or significant additional expense beyond typical brokerage fees, and, if a company has multiple classes of stock outstanding, shares in an unlisted or non-traded class if such shares are convertible by shareholders without undue delay and cost, are also part of the float.

For each stock, an investable weight factor ("IWF") is calculated by dividing the available float shares, defined as the total shares outstanding less shares held in one or more of the three groups listed above where the group holdings exceed 10% of the outstanding shares, by the total shares outstanding. The float-adjusted S&P 500[®] Index is then calculated by multiplying, for each stock in the S&P 500[®] Index, the IWF, the price, and total number of shares outstanding, adding together the resulting amounts, and then dividing that sum by the index divisor. For companies with multiple classes of stock, S&P calculates the weighted average IWF for each stock using the proportion of the total company market capitalization of each share class as weights. The S&P 500[®] Index is calculated using a base-weighted aggregate methodology. The level of the S&P 500[®] Index reflects the total market value of all 500 component stocks relative to the base period of the years 1941 through 1943. An indexed number is used to represent the results of this calculation in order to make the level easier to work with and track over time. The actual total market value of the component stocks during the base period of the years 1941 through 1943 has been set to an indexed level of 10. This is often indicated by the notation 1941-43 = 10. In practice, the daily calculation of the S&P 500[®] Index is computed by dividing the total market value of the component stocks by the "index divisor." By itself, the index divisor is an arbitrary number. However, in the context of the calculation of the S&P 500[®] Index, it serves as a link to the original base period level of the S&P 500[®] Index. The index divisor keeps the S&P 500[®] Index comparable over time and is the manipulation point for all adjustments to the S&P 500[®] Index, which is index maintenance.

S&P 500[®] Index Maintenance

S&P 500[®] Index maintenance includes monitoring and completing the adjustments for company additions and deletions, share changes, stock splits, stock dividends, and stock price adjustments due to company restructuring or spinoffs. Some corporate actions, such as stock splits and stock dividends, require changes in the common shares outstanding and the stock prices of the companies in the S&P 500[®] Index, and do not require index divisor adjustments.

To prevent the level of the S&P 500[®] Index from changing due to corporate actions, corporate actions which affect the total market value of the S&P 500[®] Index require an index divisor adjustment. By adjusting the index divisor for the change in market value, the level of the S&P 500[®] Index remains constant and does not reflect the corporate actions of individual companies in the S&P 500[®] Index. Index divisor adjustments are made after the close of trading and after the calculation of the S&P 500[®] Index closing level.

Changes in a company's shares outstanding of 5% or more due to mergers, acquisitions, public offerings, tender offers, Dutch auctions, or exchange offers are made as soon as reasonably possible. All other changes of 5% or more (due to, for example, company stock repurchases, private placements, redemptions, exercise of options, warrants, conversion of preferred stock, notes, debt, equity participation units, at the market offerings, or other recapitalizations) are made weekly and are announced on Wednesdays for implementation after the close of trading on the following Wednesday. Changes of less than 5% due to a company's acquisition of another company in the S&P 500[®] Index are made as soon as reasonably possible. All other changes of less than 5% are accumulated and made quarterly on the third Friday of March, June, September, and December, and are usually announced two to five days prior.

Changes in IWFs of more than ten percentage points caused by corporate actions (such as merger and acquisition activity, restructurings, or spinoffs) will be made as soon as reasonably possible. Other changes in IWFs will be made annually when IWFs are reviewed.

The following graph sets forth the monthly historical performance of the S&P 500[®] Index in the period from January 2005 through October 2010. This historical data on the S&P 500[®] Index is not necessarily indicative of the future performance of the S&P 500[®] Index or what the value of the notes may be. Any historical upward or downward trend in the level of the S&P 500[®] Index during any period set forth below is not an indication that the level of the S&P 500[®] Index is more or less likely to increase or decrease at any time over the term of the notes. On November 15, 2010, the closing level of the S&P 500[®] Index was 1,197.75.

Before investing in the notes, you should consult publicly available sources for the levels and trading pattern of the S&P 500[®] Index. The generally unsettled international environment and related uncertainties, including the risk of terrorism, may result in the S&P 500[®] Index and financial markets generally exhibiting greater volatility than in earlier periods.

License Agreement

S&P does not guarantee the accuracy and/or the completeness of the S&P 500[®] Index or any data included in the S&P 500[®] Index. S&P shall have no liability for any errors, omissions, or interruptions in the S&P 500[®] Index. S&P makes no warranty, express or implied, as to results to be obtained by MLPF&S, us, holders of the notes or any other person or entity from the use of the S&P 500[®] Index or any data included in the S&P 500[®] Index in connection with the rights licensed under the license agreement described in this term sheet or for any other use. S&P makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the S&P 500[®] Index or any data included in the S&P 500[®] Index. Without limiting any of the above information, in no event shall S&P have any liability for any special, punitive, indirect, or consequential damages, including lost profits, even if notified of the possibility of these damages.

S&P and MLPF&S have entered into a non-exclusive license agreement providing for the license to MLPF&S, in exchange for a fee, of the right to use the S&P 500[®] Index in connection with this offering. The license agreement provides that the following language must be stated in this term sheet:

"The notes are not sponsored, endorsed, sold, or promoted by S&P. S&P makes no representation or warranty, express or implied, to the holders of the notes or any member of the public regarding the advisability of investing in securities generally or in the notes particularly or the ability of the S&P 500[®] Index to track general stock market performance. S&P's only relationship to MLPF&S and to us (other than transactions entered into in the ordinary course of business) is the licensing of certain trademarks and trade names of S&P and of the S&P 500[®] Index which is determined, composed, and calculated by S&P without regard to MLPF&S, us, or the notes. S&P has no obligation to take the needs of MLPF&S, our needs or the needs of the holders of the notes into consideration in determining, composing, or calculating the S&P 500[®] Index. S&P is not responsible for and has not participated in the determination of the timing of the sale of the notes, prices at which the notes are to initially be sold, or quantities of the notes to be issued or in the determination or calculation of the equation by which the notes are to be converted into cash. S&P has no obligation or liability in connection with the administration, marketing, or trading of the notes."

The MSCI EAFE Index

The MSCI EAFE Index is intended to measure equity market performance in developed market countries, excluding the U.S. and Canada. The MSCI EAFE Index is a free float-adjusted market capitalization equity index with a base date of December 31, 1969 and an initial value of 100.00. The MSCI EAFE Index is calculated daily in U.S. dollars and published in real time every 60 seconds during market trading hours. The MSCI EAFE Index currently consists of companies from the following 22 developed countries: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Israel, Italy, Japan, The Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom. As of November 15, 2010, the five largest country weights were the United Kingdom (22.0%), Japan (21.0%), France (10.0%), Australia (8.5%) and Germany (8.2%), and the five largest sector weights were Financials (24.5%), Industrials (12.3%), Materials (11.0%), Consumer Staples (10.5%), and Consumer Discretionary (10.2%).

The MSCI EAFE Index is part of the MSCI Regional Equity Indices series and is an MSCI Global Investable Market Index, which is a family within the MSCI International Equity Indices.

The MSCI Emerging Markets (EM) Index

The MSCI Emerging Markets (EM) Index is intended to measure equity market performance in the global emerging markets. The MSCI Emerging Markets (EM) Index is a free float-adjusted market capitalization index with a base date of December 31, 1987 and an initial value of 100.00. The MSCI Emerging Markets (EM) Index is calculated daily in U.S. dollars and published in real time every 60 seconds during market trading hours. The MSCI Emerging Markets (EM) Index currently consists of the following 22 emerging market country indices: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Hungary, India, Indonesia, Malaysia, Mexico, Morocco, Peru, Philippines, Poland, Russia, South Africa, South Korea, Taiwan, Thailand, and Turkey. As of November 15, 2010, the five largest country weights were China (18.5%), Brazil (15.9%), South Korea (13.4%), Taiwan (10.6%), and India (8.0%), and the five largest sector weights were Financials (26.0%), Materials (14.6%), Energy (14.1%), Information Technology (12.3%), and Telecommunication Services (7.9%).

The MSCI Emerging Markets (EM) Index is part of the MSCI Regional Equity Indices series and is an MSCI Global Investable Market Index, which is a family within the MSCI International Equity Indices.

General - MSCI Indices

MSCI provides global equity indices intended to measure equity performance in international markets and the MSCI International Equity Indices are designed to serve as global equity performance benchmarks. In constructing these indices, MSCI applies its index construction and maintenance methodology across developed, emerging, and frontier markets.

MSCI enhanced the methodology used in its MSCI International Equity Indices. The MSCI Standard and MSCI Small Cap Indices, along with the other MSCI equity indices based on them, transitioned to the global investable market indices methodology described below. The transition was completed at the end of May 2008. The Enhanced MSCI Standard Indices are composed of the MSCI Large Cap and Mid Cap Indices. The MSCI Global Small Cap Index transitioned to the MSCI Small Cap Index resulting from the Global Investable Market Indices methodology and contains no overlap with constituents of the transitioned MSCI Standard Indices. Together, the relevant MSCI Large Cap, Mid Cap, and Small Cap Indices will make up the MSCI investable market index for each country, composite, sector, and style index that MSCI offers.

Constructing the MSCI Global Investable Market Indices. MSCI undertakes an index construction process, which involves:

- defining the equity universe;
- determining the market investable equity universe for each market;
- determining market capitalization size segments for each market;
- applying index continuity rules for the MSCI Standard Index;
- creating style segments within each size segment within each market; and
- classifying securities under the Global Industry Classification Standard (the "GICS").

Defining the Equity Universe. The equity universe is defined by:

- Identifying Eligible Equity Securities: the equity universe initially looks at securities listed in any of the countries in the MSCI Global Index Series, which will be classified as either Developed Markets ("DM") or Emerging Markets ("EM"). All listed equity securities, or listed securities that exhibit characteristics of equity securities, except mutual funds, ETFs, equity derivatives, limited partnerships, and most investment trusts, are eligible for inclusion in the equity universe. Real Estate Investment Trusts ("REITs") in some countries and certain income trusts in Canada are also eligible for inclusion.
- Classifying Eligible Securities into the Appropriate Country: each company and its securities (i.e., share classes) are classified in only one country.

Determining the Market Investable Equity Universes. A market investable equity universe for a market is derived by applying investability screens to individual companies and securities in the equity universe that are classified in that market. A market is equivalent to a single country, except in DM Europe, where all DM countries in Europe are aggregated into a single market for index construction purposes. Subsequently, individual DM Europe country indices within the MSCI Europe Index are derived from the constituents of the MSCI Europe Index under the global investable market indices methodology.

The investability screens used to determine the investable equity universe in each market are as follows:

- **Equity Universe Minimum Size Requirement:** this investability screen is applied at the company level. In order to be included in a market investable equity universe, a company must have the required minimum full market capitalization.
- **Equity Universe Minimum Free Float-Adjusted Market Capitalization Requirement:** this investability screen is applied at the individual security level. To be eligible for inclusion in a market investable equity universe, a security must have a free float-adjusted market capitalization equal to or higher than 50% of the equity universe minimum size requirement.
- **DM and EM Minimum Liquidity Requirement:** this investability screen is applied at the individual security level. To be eligible for inclusion in a market investable equity universe, a security must have adequate liquidity. The twelve-month and three-month Annual Traded Value Ratio ("ATVR"), a measure that screens out extreme daily trading volumes and takes into account the free float-adjusted market capitalization size of securities, together with the three-month frequency of trading are used to measure liquidity. In the calculation of the ATVR, the trading volumes in depository receipts associated with that security, such as ADRs or GDRs, are also considered. A minimum liquidity level of 20% of three- and twelve-month ATVR and 90% of three-month frequency of trading over the last four consecutive quarters are required for inclusion of a security in a market investable equity universe of a DM, and a minimum liquidity level of 15% of three- and twelve-month ATVR and 80% of three-month frequency of trading over the last four consecutive quarters are required for inclusion of a security in a market investable equity universe of an EM.
- **Global Minimum Foreign Inclusion Factor Requirement:** this investability screen is applied at the individual security level. To be eligible for inclusion in a market investable equity universe, a security's Foreign Inclusion Factor ("FIF") must reach a certain threshold. The FIF of a security is defined as the proportion of shares outstanding that is available for purchase in the public equity markets by international investors. This proportion accounts for the available free float of and/or the foreign ownership limits applicable to a specific security (or company). In general, a security must have an FIF equal to or larger than 0.15 to be eligible for inclusion in a market investable equity universe.
- **Minimum Length of Trading Requirement:** this investability screen is applied at the individual security level. For an initial public offering ("IPO") to be eligible for inclusion in a market investable equity universe, the new issue must have started trading at least four months before the implementation of the initial construction of the index or at least three months before the implementation of a semi-annual index review (as described below). This requirement is applicable to small new issues in all markets. Large IPOs are not subject to the minimum length of trading requirement and may be included in a market investable equity universe and the MSCI Standard Index outside of a Quarterly or Semi-Annual Index Review (as defined below).

Defining Market Capitalization Size Segments for Each Market. Once a market investable equity universe is defined, it is segmented into the following size-based indices:

- Investable Market Index (Large + Mid + Small);
- Standard Index (Large + Mid);
- Large Cap Index;
- Mid Cap Index; or
- Small Cap Index.

Creating the size segment indices in each market involves the following steps:

- defining the market coverage target range for each size segment;
- determining the global minimum size range for each size segment;
- determining the market size-segment cutoffs and associated segment number of companies;
- assigning companies to the size segments; and
- applying final size-segment investability requirements.

Index Continuity Rules for the Standard Indices. In order to achieve index continuity, as well as to provide some basic level of diversification within a market index, and notwithstanding the effect of other index construction rules described in this section, a minimum number of five constituents will be maintained for a DM Standard Index and a minimum number of three constituents will be maintained for an EM Standard Index.

Creating Style Indices within Each Size Segment. All securities in the investable equity universe are classified into value or growth segments using the MSCI Global Value and Growth methodology.

Classifying Securities under the Global Industry Classification Standard. All securities in the global investable equity universe are assigned to the industry that best describes their business activities. To this end, MSCI has designed, in conjunction with Standard & Poor's, the GICS. Under the GICS, each company is assigned to one sub-industry according to its principal business activity. Therefore, a company can belong to only one industry grouping at each of the four levels of the GICS.

Index Maintenance

The MSCI global investable market indices are maintained with the objective of reflecting the evolution of the underlying equity markets and segments on a timely basis, while seeking to achieve index continuity, continuous investability of constituents and replicability of the indices, and index stability, and low index turnover. In particular, index maintenance involves:

(i) Semi-Annual Index Reviews (“SAIRs”) in May and November of the Size Segment and Global Value and Growth Indices which include:

- updating the indices on the basis of a fully refreshed equity universe;
- taking buffer rules into consideration for migration of securities across size and style segments; and
- updating FIFs and Number of Shares (“NOS”).

(ii) Quarterly Index Reviews (“QIRs”) in February and August of the Size Segment Indices aimed at:

- including significant new eligible securities (such as IPOs that were not eligible for earlier inclusion) in the index;
- allowing for significant moves of companies within the Size Segment Indices, using wider buffers than in the SAIR; and
- reflecting the impact of significant market events on FIFs and updating NOS.

(iii) Ongoing Event-Related Changes: changes of this type are generally implemented in the indices as they occur. Significantly large IPOs are included in the indices after the close of the company’s tenth day of trading.

Neither we nor any of our affiliates, including MLPF&S, accepts any responsibility for the calculation, maintenance, or publication of, or for any error, omission, or disruption in, the MSCI EAFE Index, the MSCI Emerging Markets (EM) Index, or any successor to these indices. MSCI does not guarantee the accuracy or the completeness of the MSCI EAFE Index, MSCI Emerging Markets (EM) Index, or any data included in these indices. MSCI assumes no liability for any errors, omissions, or disruption in the calculation and dissemination of the MSCI EAFE Index or the MSCI Emerging Markets (EM) Index. MSCI disclaims all responsibility for any errors or omissions in the calculation and dissemination of the MSCI EAFE Index, MSCI Emerging Markets (EM) Index, or the manner in which these indices are applied in determining the amount payable on the notes at maturity.

The following graph sets forth the monthly historical performance of the MSCI EAFE Index in the period from January 2005 through October 2010. This historical data on the MSCI EAFE Index is not necessarily indicative of the future performance of the MSCI EAFE Index or what the value of the notes may be. Any historical upward or downward trend in the level of the MSCI EAFE Index during any period set forth below is not an indication that the level of the MSCI EAFE Index is more or less likely to increase or decrease at any time over the term of the notes. On November 15, 2010, the closing level of the MSCI EAFE Index was 1,630.10.

The following graph sets forth the monthly historical performance of the MSCI Emerging Markets (EM) Index in the period from January 2005 to October 2010. This historical data on the MSCI Emerging Markets (EM) Index is not necessarily indicative of the future performance of the MSCI Emerging Markets (EM) Index or what the value of the notes may be. Any historical upward or downward trend in the level of the MSCI Emerging Markets (EM) Index during any period set forth below is not an indication that the level of the MSCI Emerging Markets (EM) Index is more or less likely to increase or decrease at any time over the term of the notes. On November 15, 2010, the closing level of the MSCI Emerging Markets (EM) Index was 1,115.05.

Before investing in the notes, you should consult publicly available sources for the levels and trading pattern of the MSCI EAFE Index and the MSCI Emerging Markets (EM) Index. The generally unsettled international environment and related uncertainties, including the risk of terrorism, may result in the MSCI EAFE Index or the MSCI Emerging Markets (EM) Index and financial markets generally exhibiting greater volatility than in earlier periods.

License Agreement

"MSCI EAFE IndexSM" and "MSCI Emerging Markets (EM) IndexSM" are service marks of MSCI and have been licensed for use for certain purposes by us. Notes based on the MSCI EAFE IndexSM and the MSCI Emerging Markets (EM) IndexSM are not sponsored, endorsed, sold, or promoted by MSCI, and MSCI makes no representation regarding the advisability of investing in the notes.

Our right to use the MSCI EAFE Index and the MSCI Emerging Markets (EM) Index in connection with the notes is subject to a license agreement between us and MSCI. In connection with that license, please note the following:

THE NOTES ARE NOT SPONSORED, ENDORSED, SOLD, OR PROMOTED BY MSCI, ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS, OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING, OR CREATING THE MSCI EAFE INDEX OR THE MSCI EMERGING MARKETS (EM) INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI EAFE INDEX AND THE MSCI EMERGING MARKETS (EM) INDEX ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI, THE MSCI EAFE INDEX AND THE MSCI EMERGING MARKETS (EM) INDEX ARE SERVICE MARKS OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED TO US FOR USE FOR CERTAIN PURPOSES. THE NOTES HAVE NOT BEEN PASSED ON BY ANY OF THE MSCI PARTIES AS TO THEIR LEGALITY OR SUITABILITY WITH RESPECT TO ANY PERSON OR ENTITY AND NONE OF THE MSCI PARTIES MAKES ANY WARRANTIES OR BEARS ANY LIABILITY WITH RESPECT TO THE NOTES. WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO US OR OWNERS OF THE NOTES OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN ANY SECURITIES GENERALLY OR IN THIS OFFERING PARTICULARLY OR THE ABILITY OF THE MSCI EAFE INDEX OR THE MSCI EMERGING MARKETS (EM) INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS, AND TRADE NAMES AND OF THE MSCI EAFE INDEX AND THE MSCI EMERGING MARKETS (EM) INDEX, WHICH ARE DETERMINED, COMPOSED, AND CALCULATED BY MSCI WITHOUT REGARD TO THE NOTES, TO US, TO THE OWNERS OF THE NOTES, OR TO ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF US OR OWNERS OF THE NOTES OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING, OR CALCULATING THE MSCI EAFE INDEX OR THE MSCI EMERGING MARKETS (EM) INDEX. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THE NOTES TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE AMOUNT THAT MAY BE PAID AT MATURITY ON THE NOTES. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO US OR TO OWNERS OF THE NOTES OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR, OFFERING OF THE NOTES.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI EAFE INDEX OR THE MSCI EMERGING MARKETS (EM) INDEX FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY, AND/OR COMPLETENESS OF THE MSCI EAFE INDEX, THE MSCI EMERGING MARKETS (EM) INDEX, OR ANY DATA INCLUDED THEREIN OR THE RESULTS TO BE OBTAINED BY US, OWNERS OF THE NOTES, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF THE MSCI EAFE INDEX, THE MSCI EMERGING MARKETS (EM) INDEX, OR ANY DATA INCLUDED THEREIN AND NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY TO ANY PERSON OR ENTITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS OF OR IN CONNECTION WITH THE MSCI EAFE INDEX, THE MSCI EMERGING MARKETS (EM) INDEX, OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES (INCLUDING, WITHOUT LIMITATION AND FOR PURPOSES OF EXAMPLE ONLY, ALL WARRANTIES OF TITLE, SEQUENCE, AVAILABILITY, ORIGINALITY, ACCURACY, COMPLETENESS, TIMELINESS, NON-INFRINGEMENT, MERCHANTABILITY, AND FITNESS FOR A PARTICULAR PURPOSE AND ALL IMPLIED WARRANTIES ARISING FROM TRADE USAGE, COURSE OF DEALING, AND COURSE OF PERFORMANCE) WITH RESPECT TO THE MSCI EAFE INDEX, THE MSCI EMERGING MARKETS (EM) INDEX, AND ALL DATA INCLUDED THEREIN. WITHOUT LIMITING THE GENERALITY OF ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY TO ANY PERSON OR ENTITY FOR ANY DAMAGES, WHETHER DIRECT, INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, CONSEQUENTIAL (INCLUDING, WITHOUT LIMITATION, LOSS OF USE, LOSS OF PROFITS OR REVENUES, OR OTHER ECONOMIC LOSS), AND WHETHER IN TORT (INCLUDING, WITHOUT LIMITATION, STRICT LIABILITY, AND NEGLIGENCE), CONTRACT, OR OTHERWISE, EVEN IF IT MIGHT HAVE ANTICIPATED, OR WAS ADVISED OF, THE POSSIBILITY OF SUCH DAMAGES.

No purchaser, seller, or holder of the notes, or any other person or entity, should use or refer to any MSCI trade name, trademark, or service mark to sponsor, endorse, market, or promote the notes without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as single financial contracts linked to the Basket that requires you to pay us at inception an amount equal to the purchase price of the notes and that entitles you to receive at maturity an amount in cash linked to the performance of the Basket.
- Under this characterization and tax treatment of the notes, upon receipt of a cash payment at maturity or upon a sale or exchange of the notes prior to maturity, you generally will recognize capital gain or loss. This capital gain or loss generally will be long-term capital gain or loss if you held the notes for more than one year.

Certain U.S. Federal Income Taxation Considerations

Set forth below is a summary of certain U.S. federal income tax considerations relating to an investment in the notes. The following summary is not complete and is qualified in its entirety by the discussion under the section entitled "U.S. Federal Income Tax Summary" beginning on page S-31 of product supplement SUN-1, which you should carefully review prior to investing in the notes.

General. Although there is no statutory, judicial, or administrative authority directly addressing the characterization of the notes, we intend to treat the notes for all tax purposes as single financial contracts linked to the Basket that requires the investor to pay us at inception an amount equal to the purchase price of the notes and that entitles the investor to receive at maturity an amount in cash linked to the performance of the Basket. Under the terms of the notes, we and every investor in the notes agree, in the absence of an administrative determination or judicial ruling to the contrary, to treat the notes as described in the preceding sentence. This discussion assumes that the notes constitute single financial contracts linked to the Basket for U.S. federal income tax purposes. If the notes do not constitute single financial contracts, the tax consequences described below would be materially different. The discussion in this section also assumes that there is a significant possibility of a significant loss of principal on an investment in the notes.

This characterization of the notes is not binding on the Internal Revenue Service ("IRS") or the courts. No statutory, judicial, or administrative authority directly addresses the characterization of the notes or any similar instruments for U.S. federal income tax purposes, and no ruling is being requested from the IRS with respect to their proper characterization and treatment. Due to the absence of authorities on point, significant aspects of the U.S. federal income tax consequences of an investment in the notes are not certain, and no assurance can be given that the IRS or any court will agree with the characterization and tax treatment described in product supplement SUN-1. Accordingly, you are urged to consult your tax advisor regarding all aspects of the U.S. federal income tax consequences of an investment in the notes, including possible alternative characterizations.

Settlement at Maturity or Sale or Exchange Prior to Maturity. Assuming that the notes are properly characterized and treated as single financial contracts linked to the Basket for U.S. federal income tax purposes, upon receipt of a cash payment at maturity or upon a sale or exchange of the notes prior to maturity, a U.S. Holder (as defined on page S-32 in product supplement SUN-1) generally will recognize capital gain or loss equal to the difference between the amount realized and the U.S. Holder's basis in the notes. This capital gain or loss generally will be long-term capital gain or loss if the U.S. Holder held the notes for more than one year. The deductibility of capital losses is subject to limitations.

Possible Future Tax Law Changes. From time to time, there may be legislative proposals or interpretive guidance addressing the tax treatment of financial instruments such as the notes. We cannot predict the likelihood of any such legislation or guidance being adopted, or the ultimate impact on the notes. For example, on December 7, 2007, the IRS released Notice 2008-2 ("Notice") seeking comments from the public on the taxation of financial instruments currently taxed as "prepaid forward contracts." This Notice addresses instruments such as the notes. According to the Notice, the IRS and Treasury are considering whether a holder of an instrument such as the notes should be required to accrue ordinary income on a current basis, regardless of whether any payments are made prior to maturity. It is not possible to determine what guidance the IRS and Treasury will ultimately issue, if any. Any such future guidance may affect the amount, timing, and character of income, gain, or loss in respect of the notes, possibly with retroactive effect. The IRS and Treasury are also considering additional issues, including whether additional gain or loss from such instruments should be treated as ordinary or capital, whether foreign holders of such instruments should be subject to withholding tax on any deemed income accruals, whether Section 1260 of the Internal Revenue Code of 1986, as amended, concerning certain "constructive ownership transactions," generally applies or should generally apply to such instruments, and whether any of these determinations depend on the nature of the underlying asset. We intend to continue treating the notes for U.S. federal income tax purposes in the manner described herein unless and until such time as we determine, or the IRS or Treasury determines, that some other treatment is more appropriate. We urge you to consult your own tax advisors concerning the impact and the significance of the above considerations.

Additional Medicare Tax on Unearned Income. With respect to taxable years beginning after December 31, 2012, certain U.S. Holders, including individuals, estates and trusts, will be subject to an additional 3.8% Medicare tax on unearned income. For individual U.S. Holders, the additional Medicare tax applies to the lesser of (i) "net investment income," or (ii) the excess of "modified adjusted gross income" over \$200,000 (\$250,000 if married and filing jointly or \$125,000 if married and filing separately). "Net investment income" generally equals the taxpayer's gross investment income reduced by the deductions that are allocable to such income. Investment income generally includes passive income such as interest, dividends, annuities, royalties, rents, and capital gains. U.S. Holders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in the LIRNs.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. See the discussion under the section entitled "U.S. Federal Income Tax Summary" beginning on page S-31 of product supplement SUN-1.

Additional Terms

You should read this term sheet, together with the documents listed below, which together contain the terms of the notes and supersede all prior or contemporaneous oral statements as well as any other written materials. You should carefully consider, among other things, the matters set forth under "Risk Factors" in the sections indicated on the cover of this term sheet. The notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

You may access the following documents on the SEC Website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC Website):

- Product supplement SUN-1 dated September 22, 2009:
<http://www.sec.gov/Archives/edgar/data/70858/000119312509195916/d424b5.htm>
- Series L MTN prospectus supplement dated April 21, 2009 and prospectus dated April 20, 2009:
<http://www.sec.gov/Archives/edgar/data/70858/000095014409003387/g18667b5e424b5.htm>

Our Central Index Key, or CIK, on the SEC Website is 70858.

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the product supplement, the prospectus supplement, and the prospectus in that registration statement, and the other documents relating to this offering that we have filed with the SEC for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC Website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you the Note Prospectus if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Market-Linked Investments Classification

Market-Linked Investments come in four basic categories, each designed to meet a different set of investor risk profiles, time horizons, income requirements, and market views (bullish, bearish, moderate outlook, etc.). The following descriptions of these categories are meant solely for informational purposes and are not intended to represent any particular Market-Linked Investment or guarantee performance. Certain Market-Linked Investments may have overlapping characteristics.

Market Downside Protection: Market Downside Protection Market-Linked Investments combine some of the capital preservation features of traditional bonds with the growth potential of equities and other asset classes. They offer full or partial market downside protection at maturity, while offering market exposure that may provide better returns than comparable fixed income securities. It is important to note that the market downside protection feature provides investors with protection only at maturity, subject to issuer credit risk. In addition, in exchange for full or partial protection, you forfeit dividends and full exposure to the linked asset's upside. In some circumstances, this could result in a lower return than with a direct investment in the asset.

Enhanced Income: These short- to medium-term market-linked notes offer you a way to enhance your income stream, either through variable or fixed-interest coupons, an added payout at maturity based on the performance of the linked asset, or both. In exchange for receiving current income, you will generally forfeit upside potential on the linked asset. Even so, the prospect of higher interest payments and/or an additional payout may equate to a higher return potential than you may be able to find through other fixed-income securities. Enhanced Income Market-Linked Investments generally do not include market downside protection. The degree to which your principal is repaid at maturity is generally determined by the performance of the linked asset. Although enhanced income streams may help offset potential declines in the asset, you can still lose part or all of your original investment.

Market Access: Market Access notes may offer exposure to certain market sectors, asset classes, and/or strategies that may not even be available through the other three categories of Market-Linked Investments. Subject to certain fees, the returns on Market Access Market-Linked Investments will generally correspond on a one-to-one basis with any increases or decreases in the value of the linked asset, similar to a direct investment. In some instances, they may also provide interim coupon payments. These investments do not include the market downside protection feature and, therefore, your principal remains at risk.

Enhanced Return: These short- to medium-term investments offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept a degree of market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.
