 Settlement Date February 2, 2012
 Maturity Date August 31, 2012

Bear Accelerated Return Notes[®] Linked to the Russell 2000[®] Index

- Maturity of approximately seven months
- 3-to-1 upside exposure to decreases in the Index, subject to a capped return of 16.20%
- 1-to-1 downside exposure to increases in the Index, with up to 100% of your investment at risk
- All payments at maturity subject to the credit risk of Bank of America Corporation
- No periodic interest payments
- Limited secondary market liquidity, with no exchange listing

The notes are being issued by Bank of America Corporation ("BAC"). There are important differences between the notes and a conventional debt security, including different investment risks. See "Risk Factors" on page TS-6 of this term sheet and beginning on page S-10 of product supplement ARN-3.

None of the Securities and Exchange Commission (the "SEC"), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Unit	Total

January 26, 2012

Bear Accelerated Return Notes®

Linked to the Russell 2000® Index, due August 31, 2012

Summary

The Bear Accelerated Return Notes® Linked to the Russell 2000® Index, due August 31, 2012 (the "notes") are our senior unsecured debt securities. The notes are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. **They will rank equally with all of our other unsecured and unsubordinated debt. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BAC.** The notes are designed for investors (i) who seek a leveraged return, subject to a cap, if the level of the Russell 2000® Index (the "Index") decreases moderately from the Starting Value to the Ending Value or (ii) who want to invest in a security of this kind for risk diversification purposes. The notes should not be viewed as a hedging instrument for an investor's equity positions because the notes are a capped investment and will not track the market movements of your investments. If the Ending Value is greater than the Starting Value, you will lose all or a portion of the principal amount of your notes.

The terms and risks of the notes are contained in this term sheet and the documents listed below (together, the "Note Prospectus"). The documents have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated below or obtained from MLPF&S by calling 1-866-500-5408:

- Product supplement ARN-3 dated April 1, 2010:
<http://www.sec.gov/Archives/edgar/data/70858/000119312510075888/d424b5.htm>
- Series L MTN prospectus supplement dated April 21, 2009 and prospectus dated April 20, 2009:
<http://www.sec.gov/Archives/edgar/data/70858/000095014409003387/q18667b5e424b5.htm>

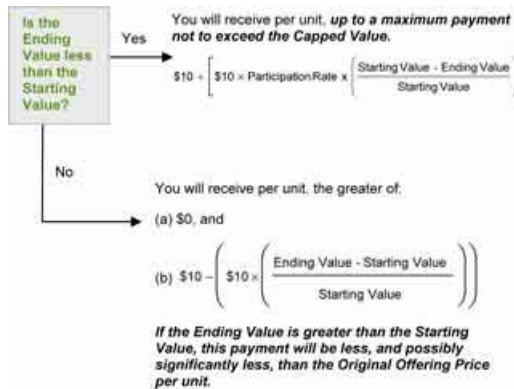

Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. Capitalized terms used but not defined in this term sheet have the meanings set forth in ARN-3. Unless otherwise indicated or unless the context requires otherwise, all references in this document to "we," "us," "our," or similar references are to BAC.

Terms of the Notes

Issuer:	Bank of America Corporation ("BAC")
Original Offering Price:	\$10.00 per unit
Term:	Approximately seven months
Market Measure:	The Russell 2000® Index (Bloomberg symbol: "RTY"), a price return index.
Starting Value:	The closing level of the Market Measure on the pricing date.
Ending Value:	The average of the closing levels of the Market Measure on each scheduled calculation day occurring during the maturity valuation period. The calculation days are subject to postponement in the event of Market Disruption Events, as described on page S-24 of product supplement ARN-1.
Capped Value:	\$11.62 per unit of the notes, which represents a return of 16.20% over the Original Offering Price.
Maturity Valuation Period:	August 22, 2012, August 23, 2012, August 24, 2012, August 27, 2012 and August 28, 2012
Participation Rate:	300%
Minimum Redemption Amount:	\$0.00 per unit
Calculation Agent:	Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"), a subsidiary of BAC
Fees Charged:	The public offering price of the notes includes the underwriting discount of \$0.10 per unit as listed on the cover page and an additional charge of \$0.050 per unit more fully described on page TS-11.

Redemption Amount Determination

On the maturity date, you will receive a cash payment per unit determined as follows:

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the Index level will decrease moderately from the Starting Value to the Ending Value.
- You are willing to risk loss of principal and return if at maturity the Index has increased from the Starting Value.
- You accept that the return on the notes, if any, will be capped.
- You are willing to forgo the interest payments that are paid on traditional interest bearing debt securities.
- You are willing to forego dividends or other benefits of owning the stocks included in the Index.
- You are willing to accept a limited market for sales prior to maturity, and understand that the market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness, and the fees charged on the notes, as described on TS-2.
- You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Redemption Amount.

The notes may not be an appropriate investment for you if:

- You believe that the Index level will increase from the Starting Value or that it will not decrease sufficiently over the term of the notes to provide you with your desired return.
- You seek principal protection or preservation of capital.
- You seek an uncapped return on your investment.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the stocks included in the Index.
- You seek an investment for which there will be a liquid secondary market.
- You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Hypothetical Payout Profile

This graph reflects the returns on the notes, based on the Participation Rate of 300% and the Capped Value of \$11.62. The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the stocks included in the Index, excluding dividends.

This graph has been prepared for purposes of illustration only.

Hypothetical Payments at Maturity

The below table and examples are for purposes of illustration only. They are based on **hypothetical** values and show **hypothetical** returns on the notes. **The actual amount you receive and the resulting total rate of return will depend on the actual Ending Value and the term of your investment.**

The following table is based on a Starting Value of 100, the Participation Rate of 300%, and the Capped Value of \$11.62 per unit. It illustrates the effect of a range of Ending Values on the Redemption Amount per unit of the notes and the total rate of return to holders of notes. The following examples do not take into account any tax consequences from investing in the notes.

<u>Ending Value</u>	<u>Percentage Change from the Starting Value to the Ending Value</u>	<u>Redemption Amount per Unit</u>	<u>Total Rate of Return on the Notes</u>
70.00	-30.00%	\$11.62	16.20%
80.00	-20.00%	\$11.62	16.20%
90.00	-10.00%	\$11.62	16.20%
92.00	-8.00%	\$11.62 ⁽²⁾	16.20%
98.00	-2.00%	\$10.60	6.00%
98.50	-1.50%	\$10.45	4.50%
99.00	-1.00%	\$10.30	3.00%
99.50	-0.50%	\$10.15	1.50%
100.00 ⁽¹⁾	0.00%	\$10.00	0.00%
105.00	5.00%	\$9.50	-5.00%
110.00	10.00%	\$9.00	-10.00%
120.00	20.00%	\$8.00	-20.00%
130.00	30.00%	\$7.00	-30.00%
140.00	40.00%	\$6.00	-40.00%
150.00	50.00%	\$5.00	-50.00%
200.00	100.00%	\$0.00 ⁽³⁾	-100.00%
250.00	150.00%	\$0.00	-100.00%

⁽¹⁾ The **hypothetical** Starting Value of 100 used in these examples has been chosen for illustrative purposes only. The actual Starting Value is 792.91, which was the closing level of the Index on the pricing date.

⁽²⁾ The Redemption Amount per unit cannot exceed the Capped Value.

⁽³⁾ The Redemption Amount will not be less than the Minimum Redemption Amount.

For recent actual levels of the Market Measure, see "The Index" section below. In addition, all payments on the notes are subject to issuer credit risk.

Redemption Amount Calculation Examples

Example 1

The Ending Value is 80, or 80% of the Starting Value:

Starting Value: 100.00

Ending Value: 80.00

$$\$10 + \left[\$10 \times 300\% \times \left(\frac{100 - 80}{100} \right) \right] = \$16.00, \quad \text{however, because the Redemption Amount for the notes cannot exceed the Capped Value, the Redemption Amount will be \$11.62 per unit.}$$

Example 2

The Ending Value is 99% of the Starting Value:

Starting Value: 100.00

Ending Value: 99.00

$$\$10 + \left[\$10 \times 300\% \times \left(\frac{100 - 99}{100} \right) \right] = \$10.30 \quad \text{Redemption Amount per unit}$$

Example 3

The Ending Value is 130% of the Starting Value:

Starting Value: 100

Ending Value: 130

$$\$10 - \left[\$10 \times \left(\frac{130 - 100}{100} \right) \right] = \$7.00 \quad \text{Redemption Amount per unit}$$

Example 4

The Ending Value is 250% of the Starting Value:

Starting Value: 100

Ending Value: 250

$$\$10 - \left[\$10 \times \left(\frac{250 - 100}{100} \right) \right] = -\$5.00, \quad \text{however, because the Redemption Amount for the notes cannot be less than the Minimum Redemption Amount, the Redemption Amount will be \$0.00 per unit.}$$

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. You should carefully review the more detailed explanation of risks relating to the notes in the "Risk Factors" sections beginning on page S-10 of product supplement ARN-3, page S-4 of the MTN prospectus supplement, and page 8 of the prospectus identified above under "Summary." We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

- Depending on the performance of the Index measured shortly before the maturity date, your investment may result in a loss; there is no guaranteed return of principal.
- Your yield may be less than the yield you could earn by owning a conventional debt security of comparable maturity.
- Payments on the notes are subject to our credit risk, and actual or perceived changes in our credit worthiness are expected to affect the value of the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.
- Your investment return, if any, is limited to the return represented by the Capped Value and may be less than a comparable short position taken directly on the stocks included in the Index.
- The price at which you may sell the notes in any secondary market may be lower than the price you paid for the notes due to, among other things, the inclusion of fees charged for developing, hedging and distributing of the notes, as described on page TS-11 and various credit, market and economic factors that interrelate in complex and unpredictable ways.
- A trading market is not expected to develop for the notes. MLPF&S is not obligated to make a market for, or to repurchase, the notes.
- Our business activities as a full service financial institution, including our commercial and investment banking activities, our hedging and trading activities (including trades in shares of companies included in the Index) and any hedging and trading activities we engage in for our clients' accounts, may affect the market value of the notes and their return and may create conflicts of interest with you.
- The Index Sponsor may adjust the Index in a way that affects its level, and has no obligation to consider your interests.
- You will have no rights of a holder of the securities represented by the Index, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- While we or our affiliates may from time to time own shares of companies included in the Index, we do not control any company included in the Index, and are not responsible for any disclosure made by any other company.
- There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.
- The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See "Summary Tax Consequences" below and "U.S. Federal Income Tax Summary" beginning on page S-43 of product supplement ARN-3.

The Index

All disclosures in this term sheet regarding the Index have been derived from publicly available sources, which we have not independently verified. The information summarizes the current index methodology as published by Russell Investments ("Russell," or the "Index Sponsor") and may be changed by Russell at any time. Additional information on the Index is available at the following website: <http://www.russell.com>. No information on that website is deemed to be included or incorporated by reference in this term sheet.

"Russell 2000®" and "Russell 3000®" are trademarks of Russell and have been licensed for use by our subsidiary, MLPF&S. The notes are not sponsored, endorsed, sold, or promoted by Russell, and Russell makes no representation regarding the advisability of investing in the notes.

Russell began dissemination of the Index (Bloomberg L.P. index symbol "RTY") on January 1, 1984 and calculates and publishes the Index. The Index was set to 135 as of the close of business on December 31, 1986. The Index is designed to track the performance of the small capitalization segment of the U.S. equity market. As a subset of the Russell 3000® Index, the Index consists of approximately 2,000 of the smallest companies (based on a combination of their market capitalization and current index membership) included in the Russell 3000® Index. The Russell 3000® Index measures the performance of the largest 3,000 U.S. companies, representing approximately 99% of the U.S. equity market. The Index is determined, comprised, and calculated by Russell without regard to the notes.

Selection of Stocks Underlying the Index

All companies eligible for inclusion in the Index must be classified as a U.S. company under Russell's country-assignment methodology. If a company is incorporated, has a stated headquarters location, and trades in the same country (American Depositary Receipts and American Depositary Shares are not eligible), then the company is assigned to its country of incorporation. If any of the three factors are not the same, Russell defines three Home Country Indicators ("HCIs"): country of incorporation, country of headquarters, and country of the most liquid exchange (as defined by a two-year average daily dollar trading volume) ("ADDTV"). Using the HCIs, Russell compares the primary location of the company's assets with the three HCIs. If the primary location of its assets matches any of the HCIs, then the company is assigned to the primary location of its assets. If there is insufficient information to determine the country in which the company's assets are primarily located, Russell will use the primary country from which the company's revenues are primarily derived for the comparison with the three HCIs in a similar manner. For the 2010 reconstitution, Russell will use one year of assets or revenues data to determine the country for the company. Beginning in 2011, Russell will use the average of two years of assets or revenues data, in order to reduce potential turnover. Assets and revenues data are retrieved from each company's annual report as of the last trading day in May. If conclusive country details cannot be derived from assets or revenues data, Russell will assign the company to the country of its headquarters, which is defined as the address of the company's principal executive offices, unless that country is a Benefit Driven Incorporation "BDI" country, in which case the company will be assigned to the country of its most liquid stock exchange. BDI countries include: Anguilla, Antigua and Barbuda, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Cayman Islands, Channel Islands, Cook Islands, Faroe Islands, Gibraltar, Isle of Man, Liberia, Marshall Islands, Netherlands Antilles, Panama, and Turks and Caicos Islands. For any companies incorporated or headquartered in a U.S. territory, including countries such as Puerto Rico, Guam, and U.S. Virgin Islands, a U.S. HCI is assigned.

All securities eligible for inclusion in the Index must trade on a major U.S. exchange. Bulletin board, pink-sheets, and over-the-counter ("OTC") traded securities are not eligible for inclusion. Stocks must trade at or above \$1.00 on their primary exchange on the last trading day in May to be eligible for inclusion during annual reconstitution. However, in order to reduce unnecessary turnover, if an existing member's closing price is less than \$1.00 on the last day of May, it will be considered eligible if the average of the daily closing prices (from its primary exchange) during the month of May is equal to or greater than \$1.00. Nonetheless, a stock's closing price (on its primary exchange) on the last trading day in May will be used to calculate market capitalization and index membership. Initial public offerings are added each quarter and must have a closing price at or above \$1.00 on the last day of their eligibility period in order to qualify for index inclusion. If a stock, new or existing, does not have a closing price at or above \$1.00 (on its primary exchange) on the last trading day in May, but does have a closing price at or above \$1.00 on another major U.S. exchange, that stock will be eligible for inclusion, but the lowest price from a non-primary exchange will be used to calculate market capitalization and index membership. If multiple share classes exist, Russell will determine a primary trading vehicle, and the price of that primary trading vehicle (usually the most liquid) is used to calculate market capitalization.

An important criteria used to determine the list of securities eligible for the Index is total market capitalization, which is defined as the market price as of the last trading day in May for those securities being considered at annual reconstitution times the total number of shares outstanding. Where applicable, common stock, non-restricted exchangeable shares and partnership units/membership interests are used to determine market capitalization. Any other form of shares such as preferred stock, convertible preferred stock, redeemable shares, participating preferred stock, warrants and rights, or trust receipts, are excluded from the calculation. If multiple share classes of common stock exist, they are combined. In cases where the common stock share classes act independently of each other (e.g., tracking stocks), each class is considered for inclusion separately.

Companies with a total market capitalization of less than \$30 million are not eligible for the Index. Similarly, companies with only 5% or less of their shares available in the marketplace are not eligible for the Index. Royalty trusts, limited liability companies, closed-end investment companies (business development companies are eligible), blank check companies, special purpose acquisition companies, and limited partnerships are also ineligible for inclusion.

Annual reconstitution is a process by which the Index is completely rebuilt. Based on closing levels of the company's common stock on its primary exchange on the last trading day of May of each year, Russell reconstitutes the composition of the Index using the then existing market capitalizations of eligible companies. Reconstitution of the Index occurs on the last Friday in June or, when the last Friday in June is the 28th, 29th, or 30th, reconstitution occurs on the prior Friday. In addition, Russell adds initial public offerings to the Index on a quarterly basis based on market capitalization guidelines established during the most recent reconstitution.

After membership is determined, a security's shares are adjusted to include only those shares available to the public. This is often referred to as "free float." The purpose of the adjustment is to exclude from market calculations the capitalization that is not available for purchase and is not part of the investable opportunity set.

Bear Accelerated Return Notes®

Linked to the Russell 2000® Index, due August 31, 2012

As a capitalization-weighted index, the Index reflects changes in the capitalization, or market value, of the component stocks relative to the entire market value of the Index. The current Index level is calculated by adding the market values of the Index's component stocks, which are derived by multiplying the price of each stock by the number of shares publicly available, to arrive at the available market capitalization of the 2,000 stocks. The available market capitalization is then divided by a divisor, which represents the index value of the Index. To calculate the Index, closing prices will be used from the primary exchange of each security. If a component stock is not open for trading, the most recently traded price for that security will be used in calculating the Index. In order to provide continuity for the Index's level, the divisor is adjusted periodically to reflect events including changes in the number of common shares outstanding for component stocks, company additions or deletions, corporate restructurings, and other capitalization changes.

The following graph shows the monthly historical performance of the Index in the period from January 2007 through December 2011. We obtained this historical data from Bloomberg L.P. We make no representation or warranty as to the accuracy or completeness of the information from Bloomberg L.P. On the pricing date, the value of the Index was 792.91.

This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth above is not an indication that the level of the Index is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the levels and trading pattern of the Index.

License Agreement

Russell and MLPF&S have entered into a non-exclusive license agreement providing for the license to MLPF&S and its affiliates, including us, in exchange for a fee, of the right to use indices owned and published by Russell in connection with some securities, including the notes. The license agreement provides that the following language must be stated in this term sheet:

The notes are not sponsored, endorsed, sold, or promoted by Russell. Russell makes no representation or warranty, express or implied, to the holders of the notes or any member of the public regarding the advisability of investing in securities generally or in the notes particularly or the ability of the Index to track general stock market performance or a segment of the same. Russell's publication of the Index in no way suggests or implies an opinion by Russell as to the advisability of investment in any or all of the securities upon which the Index is based. Russell's only relationship to MLPF&S and to us is the licensing of certain trademarks and trade names of Russell and of the Index, which is determined, composed, and calculated by Russell without regard to MLPF&S, us, or the notes. Russell is not responsible for and has not reviewed the notes nor any associated literature or publications and Russell makes no representation or warranty express or implied as to their accuracy or completeness, or otherwise. Russell reserves the right, at any time and without notice, to alter, amend, terminate, or in any way change the Index. Russell has no obligation or liability in connection with the administration, marketing, or trading of the notes.

RUSSELL DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE INDEX OR ANY DATA INCLUDED THEREIN AND RUSSELL SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN. RUSSELL MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY MLPF&S, US, HOLDERS OF THE NOTES, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDEX OR ANY DATA INCLUDED THEREIN. RUSSELL MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL RUSSELL HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Supplement to the Plan of Distribution

We will deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units.

If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

MLPF&S may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices. MLPF&S may act as principal or agent in these market-making transactions; however it is not obligated to engage in any such transactions.

Role of MLPF&S and Conflicts of Interest

MLPF&S, a broker-dealer subsidiary of BAC, is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA") and will participate as selling agent in the distribution of the notes. Accordingly, offerings of the notes will conform to the requirements of Rule 5121 applicable to FINRA members. MLPF&S may not make sales in this offering to any of its discretionary accounts without the prior written approval of the account holder.

Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount. The public offering price includes, in addition to the underwriting discount, a charge of approximately \$0.050 per unit. This charge reflects an estimated profit earned by MLPF&S from transactions through which the notes are structured and resulting obligations hedged. The fees charged reduce the economic terms of the notes. Actual profits or losses from these hedging transactions may be more or less than this amount. In entering into the hedging arrangements for the notes, we seek competitive terms and may enter into hedging transactions with a division of MLPF&S or one of our subsidiaries or affiliates. For further information regarding these charges, our trading and hedging activities and conflicts of interest, see "Risk Factors—General Risks Relating to ARNs," beginning on page S-10 and "Use of Proceeds" on page S-21 in product supplement ARN-3.

Validity of the Notes

In the opinion of McGuireWoods LLP, as counsel to BAC, when the notes offered by this Note Prospectus have been completed and executed by BAC, and authenticated by the trustee in accordance with the provisions of the Senior Indenture, and delivered against payment therefor as contemplated by this Note Prospectus, such notes will be legal, valid and binding obligations of BAC, subject to applicable bankruptcy, reorganization, insolvency, moratorium, fraudulent conveyance or other similar laws affecting the rights of creditors now or hereafter in effect, and to equitable principles that may limit the right to specific enforcement of remedies, and further subject to 12 U.S.C. §1818(b)(6)(D) (or any successor statute) and any bank regulatory powers now or hereafter in effect and to the application of principles of public policy. This opinion is given as of the date hereof and is limited to the Federal laws of the United States, the laws of the State of New York and the Delaware General Corporation Law (including the statutory provisions, all applicable provisions of the Delaware Constitution and reported judicial decisions interpreting the foregoing). In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the Senior Indenture, the validity, binding nature and enforceability of the Senior Indenture with respect to the trustee, the legal capacity of natural persons, the genuineness of signatures, the authenticity of all documents submitted to McGuireWoods LLP as originals, the conformity to original documents of all documents submitted to McGuireWoods LLP as photocopies, the authenticity of the originals of such copies and certain factual matters, all as stated in the letter of McGuireWoods LLP dated April 28, 2011, which has been filed as an exhibit to our Current Report on Form 8-K dated April 28, 2011.

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- There is no statutory, judicial, or administrative authority directly addressing the characterization of the notes.
- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as a single financial contract with respect to the Index.
- Under this characterization and tax treatment of the notes, a U.S. Holder (as defined in product supplement ARN-3) generally will recognize short-term capital gain or loss upon maturity or upon a sale or exchange of the notes prior to maturity.
- No assurance can be given that the IRS or any court will agree with this characterization and tax treatment.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. See the discussion under the section entitled "U.S. Federal Income Tax Summary" beginning on page S-43 of product supplement ARN-3.

Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you these documents if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Market-Linked Investments Classification

Enhanced Return

MLPF&S classifies certain market-linked investments (the "Market-Linked Investments") into categories, each with different investment characteristics. The following description is meant solely for informational purposes and is not intended to represent any particular Enhanced Return Market-Linked Investment or guarantee any performance.

Enhanced Return Market-Linked Investments are short- to medium-term investments that offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.

"Accelerated Return Notes®" and "ARNs®" are our registered service marks.
