CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Amount to be Registered	Proposed Maximum Offering Price Per Unit	Proposed Maximum Aggregate Offering Price	Amount of Registration Fee[1]
Autocallable Market-Linked Step Up Notes Linked to the Russell 2000 ® Index	4,397,469	$10.00	$43,974,690	$5,998.15

(1) Calculated in accordance with Rule 457(r) of the Securities Act of 1933.

Filed Pursuant to Rule 424(b)(2)
Registration No. 333-180488

4,397,469 Units
$10 principal amount per unit
CUSIP No. 06053D716

Pricing Date	November 29, 2012
Settlement Date	December 7, 2012
Maturity Date	November 30, 2015

Bank of America

Autocallable Market-Linked Step Up Notes Linked to the Russell 2000® Index

- Maturity of approximately three years if not called prior to maturity
- Automatic call of the notes per unit at $10 plus the applicable Call Premium ($1.00 on the first Observation Date and $2.00 on the second Observation Date) if the Index is flat or increases above 100% of the Starting Value on the relevant Observation Date
- The Observation Dates will occur approximately one year and two years after the pricing date
- If the notes are not called, at maturity:
  - a return of 49.5% if the Index is flat or increases up to the Step Up Value
  - a return equal to the percentage increase in the Index if the Index increases above the Step Up Value
  - 1-to-1 downside exposure to decreases in the Index beyond a 5% decline, with up to 95% of your principal at risk
- All payments are subject to the credit risk of Bank of America Corporation
- No periodic interest payments
- Limited secondary market liquidity, with no exchange listing

Enhanced Return

The notes are being issued by Bank of America Corporation ("BAC"). There are important differences between the notes and a conventional debt security, including different investment risks and certain additional costs. See "Risk Factors" and "Additional Risk Factor" beginning on page TS-7 of this term sheet and "Risk Factors" beginning on page S-8 of product supplement SUN-2.

The estimated initial value of the notes at the time the terms of the notes were set is less than the public offering price. See "Summary" on the following page, "Risk Factors" on page TS-7 of this term sheet and "Structuring the Notes" on page TS-12 of this term sheet for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy.

None of the Securities and Exchange Commission (the "SEC"), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Unit	Total
Public offering price	$ 10.00	$ 43,974,690.00
Underwriting discount	$ 0.20	$ 879,493.80
Proceeds, before expenses, to BAC	$ 9.80	$ 43,095,196.20

The notes:

Are Not FDIC Insured	Are Not Bank Guaranteed	May Lose Value

Merrill Lynch & Co.

November 29, 2012

Summary

The Autocallable Market-Linked Step Up Notes Linked to the Russell 2000® Index due November 30, 2015 (the "notes") are our senior unsecured debt securities. The notes are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. **The notes will rank equally with all of our other unsecured and unsubordinated debt. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BAC.** The notes will be automatically called at the applicable Call Amount if the Observation Level of the Market Measure, which is the Russell 2000® Index (the "Index"), is equal to or greater than the Call Level on the relevant Observation Date. If not called, at maturity, the notes provide you with a Step Up Payment if the Ending Value of the Index is equal to or greater than its Starting Value, but is not greater than the Step Up Value. If the Ending Value is greater than the Step Up Value, you will participate on a 1-for-1 basis in the increase in the level of the Index above the Starting Value. If the Ending Value is less than the Threshold Value, you will lose a portion, which could be significant, of the principal amount of your notes. The amount you receive at maturity will be calculated based on the $10 Original Offering Price per unit and the performance of the Index. See "Terms of the Notes" below.

Payments on the notes depend on our credit risk and on the performance of the Index. The economic terms of the notes (including the Step Up Payment and the Call Premium) are based on the rate we would pay to borrow funds through the issuance of market-linked notes and the terms of certain related hedging arrangements. The implied borrowing rate for market-linked notes is typically lower than the rate we would pay when we issue conventional fixed or floating rate debt securities. This difference in borrowing rate, as well as the underwriting discount and the hedging related charge described below, will reduce the economic terms of the notes to you and the estimated initial value of the notes.

Due to these factors, the public offering price you pay to purchase the notes is greater than the estimated initial value of the notes determined immediately at the time the terms of the notes were set. The notes are subject to an automatic call, and the initial value estimate is based on an assumed tenor of the notes. This estimated initial value is $9.67 per unit. For more information about the estimated initial value and the structuring of the notes, see "Structuring the Notes" on page TS-12.

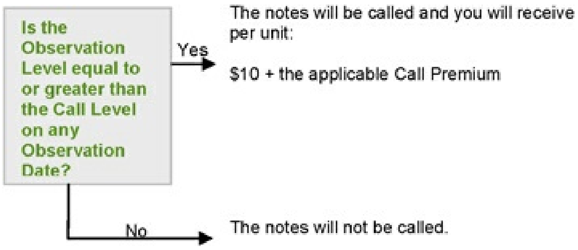
Terms of the Notes

Issuer:	Bank of America Corporation ("BAC")
Original Offering Price:	$10.00 per unit
Term:	Approximately three years
Market Measure:	The Russell 2000® Index (Bloomberg symbol: "RTY"), a price return index.
Starting Value:	823.20
Observation Level:	The closing level of the Market Measure on the applicable Observation Date.
Observation Dates:	December 6, 2013 and November 21, 2014, subject to postponement in the event of Market Disruption Events, as described on page TS-8.
Call Level:	100% of the Starting Value
Call Amounts (per Unit):	$11.00 if called on December 6, 2013 and $12.00 if called on November 21, 2014
Call Settlement Dates:	On or about five business days following the applicable Observation Date, subject to postponement if the related Observation Date is postponed, as described below.
Call Premium:	$1.00 per unit if called on December 6, 2013 (which represents a return of 10.00% over the Original Offering Price) and $2.00 per unit if called on November 21, 2014 (which represents a return of 20.00% over the Original Offering Price).
Ending Value:	The closing level of the Market Measure on the scheduled calculation day. The calculation day is subject to postponement in the event of Market Disruption Events, as described beginning on page S-22 of product supplement SUN-2.
Step Up Value:	1,230.68 (149.5% of the Starting Value, rounded to two decimal places).
Step Up Payment:	$4.95 per unit, which represents a return of 49.5% over the Original Offering Price.
Threshold Value:	782.04 (95% of the Starting Value, rounded to two decimal places).
Calculation Day:	November 20, 2015
Fees and Charges:	The underwriting discount of $0.20 per unit listed on the cover page and the hedging related charge of $0.075 per unit described in "Structuring the Notes" on page TS-12.
Calculation Agent:	Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"), a subsidiary of BAC

Determining Payment on the Notes

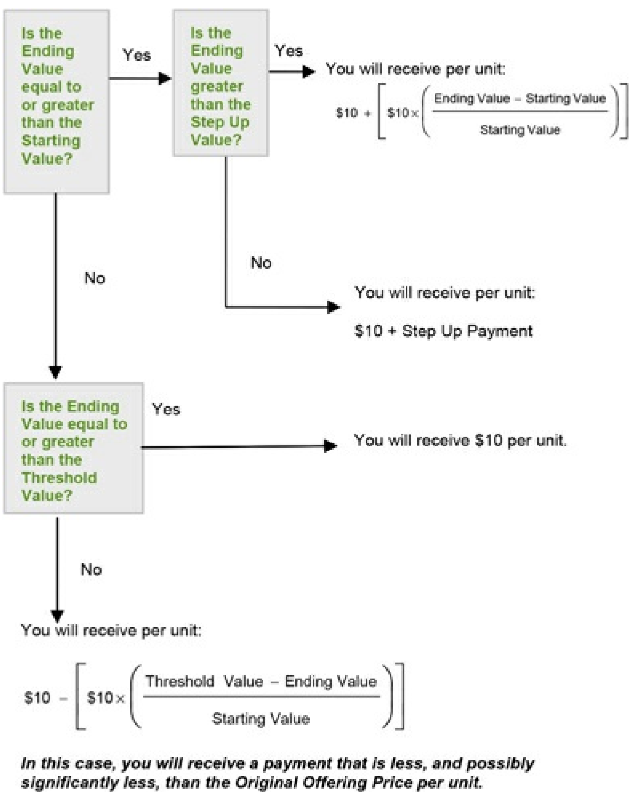
Automatic Call Provision

The notes will be called automatically on an Observation Date if the Observation Level on that Observation Date is equal to or greater than the Call Level. If the notes are called, you will receive $10 per unit plus the applicable Call Premium.



Redemption Amount Determination

If the notes are not automatically called, on the maturity date, you will receive a cash payment per unit determined as follows:



The terms and risks of the notes are contained in this term sheet and in the following:

- Product supplement SUN-2 dated April 2, 2012:
  http://www.sec.gov/Archives/edgar/data/70858/000119312512146583/d324730d424b5.htm
- Series L MTN prospectus supplement dated March 30, 2012 and prospectus dated March 30, 2012:
  http://www.sec.gov/Archives/edgar/data/70858/000119312512143855/d323958d424b5.htm

These documents (together, the "Note Prospectus") have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated above or obtained from MLPF&S by calling 1-866-500-5408. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement SUN-2. Unless otherwise indicated or unless the context requires otherwise, all references in this document to "we," "us," "our," or similar references are to BAC.

Investor Considerations

You may wish to consider an investment in the notes if:

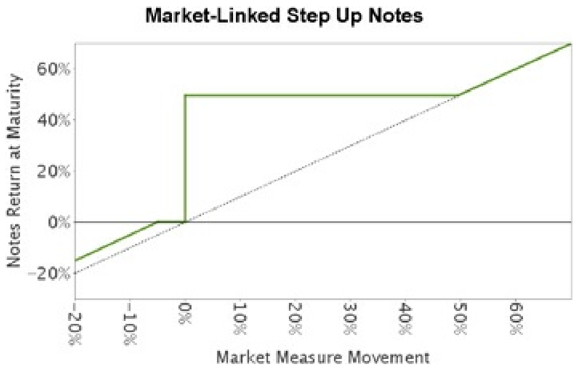
- You are willing to receive a return on your investment capped at the applicable Call Premium if the relevant Observation Level is equal to or greater than the Call Level.
- You anticipate that the Index will increase from the Starting Value to the Ending Value.
- You are willing to risk a loss of principal and return if the Index decreases from the Starting Value to an Ending Value that is below the Threshold Value.
- You are willing to forgo the interest payments that are paid on conventional interest bearing debt securities.
- You are willing to forgo dividends or other benefits of owning the stocks included in the Index.
- You are willing to accept a limited market for sales prior to maturity, and understand that the market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness, the implied borrowing rate and fees and charges on the notes.
- You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Redemption Amount.

The notes may not be an appropriate investment for you if:

- You want to hold your notes for the full term.
- You believe that the Index will decrease from the Starting Value to the Ending Value.
- You seek 100% principal protection or preservation of capital.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the stocks included in the Index.
- You seek an investment for which there will be a liquid secondary market.
- You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Hypothetical Payout Profile and Examples of Payments at Maturity



This graph reflects the returns on the notes, based on the Step Up Payment of $4.95, the Step Up Value of 149.5% of the Starting Value and the Threshold Value of 95% of the Starting Value. The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the stocks included in the Index, excluding dividends.

This graph has been prepared for purposes of illustration only.

The following table and examples are for purposes of illustration only. They are based on **hypothetical** values and show **hypothetical** returns on the notes. They illustrate the calculation of the Redemption Amount and total rate of return based on a hypothetical Starting Value of 100, a Threshold Value of 95, a Step Up Value of 149.5, the Step Up Payment of $4.95 per unit and a range of hypothetical Ending Values. **The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Threshold Value, Ending Value, Step Up Value, whether the notes are called on an Observation Date, and whether you hold the notes until maturity.** The following examples do not take into account any tax consequences from investing in the notes.

For recent actual levels of the Market Measure, see "The Index" section below. The Index is a price return index and as such the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Ending Value	Percentage Change from the Starting Value to the Ending Value	Redemption Amount per Unit	Total Rate of Return on the Notes
60.00	-40.00%	$6.50	-35.00%
70.00	-30.00%	$7.50	-25.00%
80.00	-20.00%	$8.50	-15.00%
90.00	-10.00%	$9.50	-5.00%
94.00	-6.00%	$9.90	-1.00%
95.00 (1)	-5.00%	$10.00	0.00%
97.00	-3.00%	$10.00	0.00%
100.00 (2)	0.00%	$14.95 (3)	49.50%
103.00	3.00%	$14.95	49.50%
106.00	6.00%	$14.95	49.50%
110.00	10.00%	$14.95	49.50%
120.00	20.00%	$14.95	49.50%
130.00	30.00%	$14.95	49.50%
140.00	40.00%	$14.95	49.50%
149.50 (4)	49.50%	$14.95	49.50%
150.00	50.00%	$15.00	50.00%
160.00	60.00%	$16.00	60.00%

(1) This is the **hypothetical** Threshold Value.

(2) The **hypothetical** Starting Value of 100 used in these examples has been chosen for illustrative purposes only. The actual Starting Value is 823.20, which was the closing level of the Market Measure on the pricing date.

(3) This amount represents the sum of the Original Offering Price and the Step Up Payment of $4.95.

(4) This is the **hypothetical** Step Up Value.

Redemption Amount Calculation Examples

Example 1:

The Ending Value is 85.00, or 85.00% of the Starting Value:

Starting Value:	100.00
Threshold Value:	95.00
Ending Value:	85.00

$$\$10 - \left[\$10 \times \left(\frac{95 - 85}{100} \right) \right] = \$9.00$$ Redemption Amount per unit

Example 2

The Ending Value is 96.00, or 96.00% of the Starting Value:

Starting Value:	100.00
Threshold Value:	95.00
Ending Value:	96.00

Redemption Amount per unit = **$10.00**, *the Original Offering Price, since the Ending Value is less than the Starting Value, but is equal to or greater than the Threshold Value.*

Example 3

The Ending Value is 110.00, or 110.00% of the Starting Value:

Starting Value:	100.00
Step Up Value:	149.50
Ending Value:	110.00

$10.000 + $4.950 = $14.950 Redemption Amount per unit, *the Original Offering Price plus the Step Up Payment, since the Ending Value is equal to or greater than the Starting Value, but less than the Step Up Value.*

Example 4

The Ending Value is 170.00, or 170.00% of the Starting Value:

Starting Value:	100.00
Step Up Value:	149.50
Ending Value:	170.00

$$\$10 + \left[\$10 \times \left(\frac{170 - 100}{100} \right) \right] = \$17.00$$ Redemption Amount per unit

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. You should carefully review the more detailed explanation of risks relating to the notes in the "Risk Factors" sections beginning on page S-8 of product supplement SUN-2, page S-5 of the MTN prospectus supplement, and page 8 of the prospectus identified above under "Summary." We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

- Depending on the performance of the Index as measured shortly before the maturity date, your investment may result in a loss; there is no guaranteed return of principal.
- Your yield may be less than the yield you could earn by owning a conventional fixed or floating rate debt security of comparable maturity.
- Payments on the notes are subject to our credit risk, and actual or perceived changes in our creditworthiness are expected to affect the value of the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.
- The public offering price you pay for the notes exceeds their estimated initial value. The estimated initial value of the notes is an estimate only, calculated to reflect the costs and charges included in the notes and the implied borrowing rate at the time the terms of the notes were set, and is provided for informational purposes only. The estimated initial value does not represent a minimum price at which we, MLPF&S or any of our affiliates would be willing to purchase your notes in any secondary market (if any exists) at any time. The value of your notes at any time after issuance will vary based on many factors, including changes in market conditions, and cannot be predicted with accuracy.
- A trading market is not expected to develop for the notes. Neither we nor MLPF&S is obligated to make a market for, or to repurchase, the notes. There is no assurance that any party will be willing to purchase your notes at any price in any secondary market.
- If you attempt to sell the notes prior to maturity, their market value may be lower than the price you paid for them and lower than their estimated initial value. This is due to, among other things, changes in the level of the Index, the implied borrowing rate we pay to issue market-linked notes, and the inclusion in the public offering price of the underwriting discount and the hedging related charge, all as further described in "Structuring the Notes" on page TS-12. These factors, together with various credit, market and economic factors over the term of the notes, are expected to reduce the price at which you may be able to sell the notes in any secondary market and will affect the value of the notes in complex and unpredictable ways.
- Our business activities as a full service financial institution, including our commercial and investment banking activities, our hedging and trading activities (including trades in shares of companies included in the Index) and any hedging and trading activities we engage in for our clients' accounts, may affect the market value and return of the notes and may create conflicts of interest with you.
- The Index sponsor may adjust the Index in a way that affects its level, and has no obligation to consider your interests.
- You will have no rights of a holder of the securities represented by the Index, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- While we or our affiliates may from time to time own securities of companies included in the Index we do not control any company included in the Index, and are not responsible for any disclosure made by any other company.
- There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.
- The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See "Summary Tax Consequences" below and "U.S. Federal Income Tax Summary" beginning on page S-32 of product supplement SUN-2.

Additional Risk Factor

If the notes are called, your return will be limited to the applicable Call Premium. If the Observation Level of the Index on an Observation Date is equal to or greater than the Call Level, we will automatically call the notes. If the notes are automatically called, the amount payable on the notes will be the applicable Call Amount, regardless of the extent of the increase in the level of the Index.

Additional Terms of the Notes

If an Observation Date is not a Market Measure Business Day or if there is a Market Disruption Event on that day, the Observation Date will be the immediately succeeding Market Measure Business Day during which no Market Disruption Event shall have occurred or is continuing; provided that the closing value of the Market Measure will be determined (or, if not determinable, estimated) by the calculation agent in a manner which the calculation agent considers commercially reasonable under the circumstances on a date no later than the tenth scheduled Market Measure Business Day after the originally scheduled Observation Date, regardless of the occurrence of a Market Disruption Event on that scheduled Market Measure Business Day. If an Observation Date is postponed, the relevant Call Settlement Date, if applicable, will be on or about the fifth business day following the Observation Date as postponed.

The Index

All disclosures in this term sheet regarding the Index have been derived from publicly available sources, which we have not independently verified. The information summarizes the current index methodology as published by Russell Investments ("Russell," or the "Index sponsor") and may be changed by Russell at any time. Additional information on the Index is available at the following website: http://www.russell.com. No information on that website is deemed to be included or incorporated by reference in this term sheet.

"Russell 2000®" and "Russell 3000®" are trademarks of Russell and have been licensed for use by our subsidiary, MLPF&S. The notes are not sponsored, endorsed, sold, or promoted by Russell, and Russell makes no representation regarding the advisability of investing in the notes.

Russell began dissemination of the Index (Bloomberg L.P. index symbol "RTY") on January 1, 1984 and calculates and publishes the Index. The Index was set to 135 as of the close of business on December 31, 1986. The Index is designed to track the performance of the small capitalization segment of the U.S. equity market. As a subset of the Russell 3000® Index, the Index consists of approximately 2,000 of the smallest companies (based on a combination of their market capitalization and current index membership) included in the Russell 3000® Index. The Russell 3000® Index measures the performance of the largest 3,000 U.S. companies, representing approximately 99% of the U.S. equity market. The Index is determined, comprised, and calculated by Russell without regard to the notes.

Selection of Stocks Underlying the Index

All companies eligible for inclusion in the Index must be classified as a U.S. company under Russell's country-assignment methodology. If a company is incorporated, has a stated headquarters location, and trades in the same country (American Depositary Receipts and American Depositary Shares are not eligible), then the company is assigned to its country of incorporation. If any of the three factors are not the same, Russell defines three Home Country Indicators ("HCIs"): country of incorporation, country of headquarters, and country of the most liquid exchange (as defined by a two-year average daily dollar trading volume) ("ADDTV"). Using the HCIs, Russell compares the primary location of the company's assets with the three HCIs. If the primary location of its assets matches any of the HCIs, then the company is assigned to the primary location of its assets. If there is insufficient information to determine the country in which the company's assets are primarily located, Russell will use the primary country from which the company's revenues are primarily derived for the comparison with the three HCIs in a similar manner. For the 2010 reconstitution, Russell will use one year of assets or revenues data to determine the country for the company. Beginning in 2011, Russell will use the average of two years of assets or revenues data, in order to reduce potential turnover. Assets and revenues data are retrieved from each company's annual report as of the last trading day in May. If conclusive country details cannot be derived from assets or revenues data, Russell will assign the company to the country of its headquarters, which is defined as the address of the company's principal executive offices, unless that country is a Benefit Driven Incorporation "BDI" country, in which case the company will be assigned to the country of its most liquid stock exchange. BDI countries include: Anguilla, Antigua and Barbuda, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Cayman Islands, Channel Islands, Cook Islands, Faroe Islands, Gibraltar, Isle of Man, Liberia, Marshall Islands, Netherlands Antilles, Panama, and Turks and Caicos Islands. For any companies incorporated or headquartered in a U.S. territory, including countries such as Puerto Rico, Guam, and U.S. Virgin Islands, a U.S. HCI is assigned.

All securities eligible for inclusion in the Index must trade on a major U.S. exchange. Bulletin board, pink-sheets, and over-the-counter ("OTC") traded securities are not eligible for inclusion. Stocks must trade at or above $1.00 on their primary exchange on the last trading day in May to be eligible for inclusion during annual reconstitution. However, in order to reduce unnecessary turnover, if an existing member's closing price is less than $1.00 on the last day of May, it will be considered eligible if the average of the daily closing prices (from its primary exchange) during the month of May is equal to or greater than $1.00. Nonetheless, a stock's closing price (on its primary exchange) on the last trading day in May will be used to calculate market capitalization and index membership. Initial public offerings are added each quarter and must have a closing price at or above $1.00 on the last day of their eligibility period in order to qualify for index inclusion. If a stock, new or existing, does not have a closing price at or above $1.00 (on its primary exchange) on the last trading day in May, but does have a closing price at or above $1.00 on another major U.S. exchange, that stock will be eligible for inclusion, but the lowest price from a non-primary exchange will be used to calculate market capitalization and index membership. If multiple share classes exist, Russell will determine a primary trading vehicle, and the price of that primary trading vehicle (usually the most liquid) is used to calculate market capitalization.

An important criteria used to determine the list of securities eligible for the Index is total market capitalization, which is defined as the market price as of the last trading day in May for those securities being considered at annual reconstitution times the total number of shares outstanding. Where applicable, common stock, non-restricted exchangeable shares and partnership units/membership interests are used to determine market capitalization. Any other form of shares such as preferred stock, convertible preferred stock, redeemable shares, participating preferred stock, warrants and rights, or trust receipts, are excluded from the calculation. If multiple share classes of common stock exist, they are combined. In cases where the common stock share classes act independently of each other (e.g., tracking stocks), each class is considered for inclusion separately.

Companies with a total market capitalization of less than $30 million are not eligible for the Index. Similarly, companies with only 5% or less of their shares available in the marketplace are not eligible for the Index. Royalty trusts, limited liability companies, closed-end investment companies (business development companies are eligible), blank check companies, special purpose acquisition companies, and limited partnerships are also ineligible for inclusion.

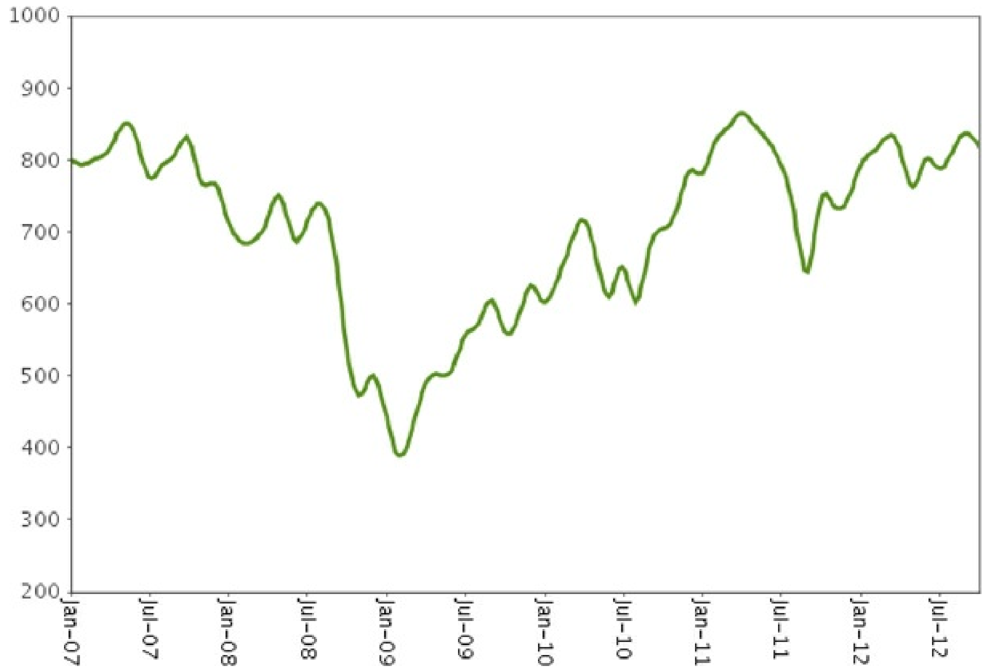
Annual reconstitution is a process by which the Index is completely rebuilt. Based on closing levels of the company's common stock on its primary exchange on the last trading day of May of each year, Russell reconstitutes the composition of the Index using the then existing market capitalizations of eligible companies. Reconstitution of the Index occurs on the last Friday in June or, when the last Friday in June is the 28th, 29th, or 30th, reconstitution occurs on the prior Friday. In addition, Russell adds initial public offerings to the Index on a quarterly basis based on market capitalization guidelines established during the most recent reconstitution.

After membership is determined, a security's shares are adjusted to include only those shares available to the public. This is often referred to as "free float"." The purpose of the adjustment is to exclude from market calculations the capitalization that is not available for purchase and is not part of the investable opportunity set.

As a capitalization-weighted index, the Index reflects changes in the capitalization, or market value, of the component stocks relative to the entire market value of the Index. The current Index level is calculated by adding the market values of the Index's component stocks, which are derived by multiplying the price of each stock by the number of shares publicly available, to arrive at the available market capitalization of the 2,000 stocks. The available market capitalization is then divided by a divisor, which represents the index value of the Index. To calculate the Index, closing prices will be used from the primary exchange of each security. If a component stock is not open for trading, the most recently traded price for that security will be used in calculating the Index. In order to provide continuity for the Index's level, the divisor is adjusted periodically to reflect events including changes in the number of common shares outstanding for component stocks, company additions or deletions, corporate restructurings, and other capitalization changes.

The following graph shows the monthly historical performance of the Index in the period from January 2007 through October 2012. We obtained this historical data from Bloomberg L.P. We have not independently verified the accuracy or completeness of the information obtained from Bloomberg L.P. On the pricing date, the closing level of the Index was 823.20.

Historical Performance of the Index



This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth above is not an indication that the level of the Index is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the levels and trading pattern of the Index.

License Agreement

"Russell 2000®" and "Russell 3000®" are trademarks of Russell and have been licensed for use by our subsidiary, MLPF&S. The notes are not sponsored, endorsed, sold, or promoted by Russell, and Russell makes no representation regarding the advisability of investing in the notes.

Russell and MLPF&S have entered into a non-exclusive license agreement providing for the license to MLPF&S and its affiliates, including us, in exchange for a fee, of the right to use indices owned and published by Russell in connection with some securities, including the notes. The license agreement provides that the following language must be stated in this term sheet:

"The notes are not sponsored, endorsed, sold, or promoted by Russell. Russell makes no representation or warranty, express or implied, to the holders of the notes or any member of the public regarding the advisability of investing in securities generally or in the notes particularly or the ability of the Index to track general stock market performance or a segment of the same. Russell's publication of the Index in no way suggests or implies an opinion by Russell as to the advisability of investment in any or all of the securities upon which the Index is based. Russell's only relationship to MLPF&S and to us is the licensing of certain trademarks and trade names of Russell and of the Index, which is determined, composed, and calculated by Russell without regard to MLPF&S, us, or the notes. Russell is not responsible for and has not reviewed the notes nor any associated literature or publications and Russell makes no representation or warranty express or implied as to their accuracy or completeness, or otherwise. Russell reserves the right, at any time and without notice, to alter, amend, terminate, or in any way change the Index. Russell has no obligation or liability in connection with the administration, marketing, or trading of the notes.

RUSSELL DOES NOT GUARANTEE THE ACCURACY AND/OR THE COMPLETENESS OF THE INDEX OR ANY DATA INCLUDED THEREIN AND RUSSELL SHALL HAVE NO LIABILITY FOR ANY ERRORS, OMISSIONS, OR INTERRUPTIONS THEREIN. RUSSELL MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY MLPF&S, US, HOLDERS OF THE NOTES, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDEX OR ANY DATA INCLUDED THEREIN. RUSSELL MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL RUSSELL HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Supplement to the Plan of Distribution; Conflicts of Interest

Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount.

MLPF&S, a broker-dealer subsidiary of BAC, is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA") and will participate as selling agent in the distribution of the notes. Accordingly, offerings of the notes will conform to the requirements of Rule 5121 applicable to FINRA members. MLPF&S may not make sales in this offering to any of its discretionary accounts without the prior written approval of the account holder.

We will deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units. If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

The value of the notes shown on your account statement will be based on MLPF&S's estimate of the value of the notes if MLPF&S or another of our affiliates were to make a market in the notes, which it is not obligated to do. That estimate will be based upon the price that MLPF&S may pay for the notes in light of then-prevailing market conditions, our creditworthiness and transaction costs. At certain times, this price may be higher than or lower than the estimated initial value of the notes.

MLPF&S may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices, and these will include MLPF&S's trading commissions and mark-ups. MLPF&S may act as principal or agent in these market-making transactions; however it is not obligated to engage in any such transactions.

Structuring the Notes

The notes are our debt securities, the return on which is linked to the performance of the Index. As is the case for all of our debt securities, including our market-linked notes, the economic terms of the notes reflect our actual or perceived creditworthiness at the time of pricing. In addition, because market-linked notes result in increased operational, funding and liability management costs to us, we typically borrow the funds under these notes at a rate that is more favorable to us than the rate that we might pay for a conventional fixed or floating rate debt security of comparable estimated maturity and is generally lower by an amount ranging from 0.25% to 0.50% per annum (equivalent to $-1.13 to $-2.39 per unit) at the time we commence the offering of our market-linked notes. This generally relatively lower implied borrowing rate, which is reflected in the economic terms of the notes, along with the fees and charges associated with market-linked notes, reduced the estimated initial value of the notes at the time the terms of the notes were set.

At maturity, or upon automatic call, our payments on the notes will be calculated based on the performance of the Index and the $10 per unit Original Offering Price. In order to meet these payment obligations, at the time we issue the notes, we may choose to enter into certain hedging arrangements (which may include call options, put options or other derivatives) with MLPF&S or one of its affiliates. The terms of these hedging arrangements are determined by seeking bids from market participants, including MLPF&S and its affiliates, and take into account a number of factors, including our creditworthiness, interest rate movements, the volatility of the Index, the tenor of the note and the tenor of the hedging arrangements. The economic terms of the notes depend in part on the terms of these hedging arrangements.

MLPF&S has advised us that the hedging arrangements will include a hedging related charge of approximately $0.075 per unit, reflecting an estimated profit to be credited to MLPF&S from these transactions. Since hedging entails risk and may be influenced by unpredictable market forces, actual profits or losses from these hedging transactions may be more or less than this amount.

The lower implied borrowing rate, the underwriting discount and the hedging-related costs and charges, reduce the economic terms of the notes to you and result in the estimated initial value for the notes (estimated at the time the terms of the notes were set) being less than the public offering price for the notes. For further information, see "Risk Factors — General Risks Relating to the Notes" beginning on page S-8 and "Use of Proceeds" on page S-18 of product supplement SUN-2.

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- There is no statutory, judicial, or administrative authority directly addressing the characterization of the notes.
- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as a callable single financial contract with respect to the Index.
- Under this characterization and tax treatment of the notes, a U.S. Holder (as defined beginning on page 62 of the prospectus) generally will recognize capital gain or loss upon maturity or upon a sale, exchange, or redemption of the notes prior to maturity. This capital gain or loss generally will be long-term capital gain or loss if you held the notes for more than one year.
- No assurance can be given that the IRS or any court will agree with this characterization and tax treatment.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. You should review carefully the discussion under the section entitled "U.S. Federal Income Tax Summary" beginning on page S-32 of product supplement SUN-2.

Validity of the Notes

In the opinion of McGuireWoods LLP, as counsel to BAC, when the trustee has made an appropriate entry on Schedule 1 to the Master Registered Global Senior Note, dated March 30, 2012 (the "Master Note") identifying the notes offered hereby as supplemental obligations thereunder in accordance with the instructions of BAC, and the notes have been delivered against payment therefor as contemplated in this Note Prospectus, all in accordance with the provisions of the Senior Indenture, such notes will be legal, valid and binding obligations of BAC, subject to applicable bankruptcy, reorganization, insolvency, moratorium, fraudulent conveyance or other similar laws affecting the rights of creditors now or hereafter in effect, and to equitable principles that may limit the right to specific enforcement of remedies, and further subject to 12 U.S.C. §1818(b)(6)(D) (or any successor statute) and any bank regulatory powers now or hereafter in effect and to the application of principles of public policy. This opinion is given as of the date hereof and is limited to the federal laws of the United States, the laws of the State of New York and the Delaware General Corporation Law (including the statutory provisions, all applicable provisions of the Delaware Constitution and reported judicial decisions interpreting the foregoing). In addition, this opinion is subject to the assumption that the trustee's certificate of authentication of the Master Note has been manually signed by one of the trustee's authorized officers and to customary assumptions about the trustee's authorization, execution and delivery of the Senior Indenture, the validity, binding nature and enforceability of the Senior Indenture with respect to the trustee, the legal capacity of natural persons, the genuineness of signatures, the authenticity of all documents submitted to McGuireWoods LLP as originals, the conformity to original documents of all documents submitted to McGuireWoods LLP as photocopies thereof, the authenticity of the originals of such copies and certain factual matters, all as stated in the letter of McGuireWoods LLP dated March 30, 2012, which has been filed as an exhibit to BAC's Registration Statement relating to the notes filed with the SEC on March 30, 2012.

Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you these documents if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Market-Linked Investments Classification

Enhanced Return

MLPF&S classifies certain market-linked investments (the "Market-Linked Investments") into categories, each with different investment characteristics. The following description is meant solely for informational purposes and is not intended to represent any particular Enhanced Return Market-Linked Investment or guarantee any performance.

Enhanced Return Market-Linked Investments are short- to medium-term investments that offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.
