Preliminary Term Sheet dated February 4, 2013

Units \$10 principal amount per unit CUSIP No.	Pricing Date* Settlement Date* Maturity Date*	February , 2013 February , 2013 March , 2014
--	---	--

*Subject to change based on the actual date the notes are priced for initial sale to the public (the "pricing date")

Strategic Accelerated Redemption Securities[®] Linked to the S&P 500[®] Index

- Automatically callable if the level of the Index on any Observation Date, occurring approximately six, nine, and twelve months after the pricing date, is at or above the Starting Value
- In the event of an automatic call, the amount payable per unit will be:
 - [\$10.200 to \$10.350] if called on the first Observation Date
 - [\$10.300 to \$10.525] if called on the second Observation Date
 - [\$10.400 to \$10.700] if called on the final Observation Date
- If not called on the first or second observation dates, a maturity of approximately one year
- If not called, 1-to-1 downside exposure to decreases in the Index beyond a 5% decline, with up to 95% of your principal at risk
- All payments are subject to the credit risk of Bank of America Corporation
- No periodic interest payments
- Limited secondary market liquidity, with no exchange listing

The notes are being issued by Bank of America Corporation ("BAC"). There are important differences between the notes and a conventional debt security, including different investment risks and certain additional costs. See "Risk Factors" on page TS-6 of this term sheet and beginning on page S-10 of product supplement STR-3.

The estimated initial value of the notes at the time the terms of the notes are set will be less than the public offering price. See "Summary" on the following page, "Risk Factors" on page TS-6 of this term sheet and "Structuring the Notes" on page TS-10 of this term sheet for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy.

None of the Securities and Exchange Commission (the "SEC"), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

	Per Unit	Total
Public offering price ^{(1) (2)}	\$10.000	\$
Underwriting discount ^{(1) (2)}	\$0.125	\$
Proceeds, before expenses, to BAC	\$9.875	\$

- ⁽¹⁾ For any purchase of 500,000 units or more in a single transaction by an individual investor, the public offering price and the underwriting discount will be \$9.975 per unit and \$0.10 per unit, respectively.
- ⁽²⁾ For any purchase by certain fee-based trusts and discretionary accounts managed by U.S. Trust operating through Bank of America, N.A., the public offering price and underwriting discount will be \$9.875 per unit and \$0.00 per unit, respectively.

Strategic Accelerated Redemption Securities®

Linked to the S&P 500® Index, due March , 2014

Summary

The Strategic Accelerated Redemption Securities® Linked to the S&P 500® Index, due March , 2014 (the "notes") are our senior unsecured debt securities. The notes are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. **The notes will rank equally with all of our other unsecured and unsubordinated debt. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of BAC.** The notes will be automatically called at the applicable Call Amount if the closing level of the Market Measure, which is the S&P 500® Index (the "Index"), on any Observation Date is equal to or greater than the Starting Value. If your notes are not called, you may lose a portion, which could be significant, of the principal amount of your notes. The amount we will pay on the notes will be based on the performance of the Index and will be calculated based on the \$10 Original Offering Price per unit. See "Terms of the Notes" below.

Payments on the notes depend on our credit risk and on the performance of the Index. The economic terms of the notes (including the Call Amounts and Call Premiums) are based on the rate we would pay to borrow funds through the issuance of market-linked notes and the terms of certain related hedging arrangements. The implied borrowing rate for market-linked notes is typically lower than the rate we would pay when we issue conventional fixed or floating rate debt securities. This difference in borrowing rate, as well as the underwriting discount and the hedging related charge described below, will reduce the economic terms of the notes to you and the estimated initial value of the notes.

Due to these factors, the public offering price you pay to purchase the notes will be greater than the estimated initial value of the notes determined immediately at the time the terms of the notes are set. This estimated initial value is expected to be between \$9.79 and \$9.81 per unit. The estimated initial value will be calculated shortly before pricing and will be set forth in the final term sheet made available to investors in the notes. The notes are subject to an automatic call, and the estimated initial value is based on an assumed tenor of the notes. For more information about the estimated initial value and the structuring of the notes, see "Structuring the Notes" on page TS-10.

Terms of the Notes

Issuer:	Bank of America Corporation ("BAC")
Original Offering Price:	\$10.00 per unit
Term:	Approximately one year
Market Measure:	The S&P 500® Index (Bloomberg symbol: "SPX"), a price return index.
Starting Value:	The closing level of the Market Measure on the pricing date
Ending Value:	The closing level of the Market Measure on the final Observation Date.
Observation Level:	The closing level of the Market Measure on any Observation Date.
Observation Dates:	August , 2013, November , 2013, and February , 2014 (the final Observation Date), approximately six, nine, and twelve months after the pricing date. The Observation Dates are subject to postponement in the event of Market Disruption Events, as described on page S-25 of product supplement STR-3.
Call Level:	100% of the Starting Value
Call Amounts (per Unit) and Call Premiums:	<p>[\$10.200 to \$10.350], representing a Call Premium of [2.00% to 3.50%] of the Original Offering Price, if called on the first Observation Date;</p> <p>[\$10.300 to \$10.525], representing a Call Premium of [3.00% to 5.25%] of the Original Offering Price, if called on the second Observation Date; and</p> <p>[\$10.400 to \$10.700], representing a Call Premium of [4.00% to 7.00%] of the Original Offering Price, if called on the final Observation Date.</p> <p>The actual Call Amounts and Call Premiums will be determined on the pricing date.</p>
Call Settlement Dates:	The fifth business day following the applicable Observation Date, subject to postponement as described on page S-25 of product supplement STR-3; provided however, that the Call Settlement Date related to the final Observation Date will be the maturity date.
Threshold Value:	95% of the Starting Value, rounded to two decimal places.
Fees and Charges:	The underwriting discount of \$0.125 per unit listed on the cover page and the hedging related charge of \$0.05 per unit described in "Structuring the Notes" on page TS-10.
Calculation Agent:	Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"), a subsidiary of BAC.

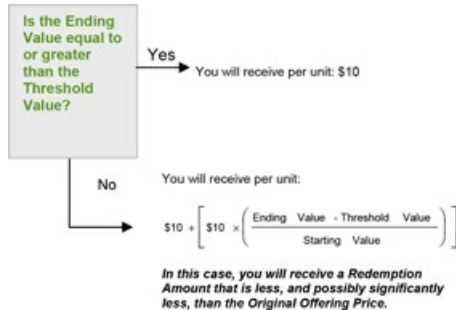

Payments Determination

Automatic Call Provision:

Redemption Amount Determination:

If the notes are not called, you will receive the Redemption Amount per unit on the maturity date, determined as follows:

The terms and risks of the notes are contained in this term sheet and in the following:

- Product supplement STR-3 dated April 2, 2012:
<http://www.sec.gov/Archives/edgar/data/70858/000119312512146587/d324780d424b5.htm>
- Series L MTN prospectus supplement dated March 30, 2012 and prospectus dated March 30, 2012:
<http://www.sec.gov/Archives/edgar/data/70858/000119312512143855/d323958d424b5.htm>

These documents (together, the "Note Prospectus") have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated above or obtained from MLPF&S by calling 1-866-500-5408. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement STR-3. Unless otherwise indicated or unless the context requires otherwise, all references in this document to "we," "us," "our," or similar references are to BAC.

Investor Considerations

You may wish to consider an investment in the notes if:

- You anticipate that the closing level of the Index on any of the Observation Dates will be equal to or greater than the Starting Value, and, in that case, you accept an early exit from your investment.
- You accept that the return on the notes, if any, will be limited to the return represented by the applicable Call Premium even if the percentage change in the level of the Index is significantly greater than the applicable Call Premium.
- If the notes are not called, you accept that your investment will result in a loss, which could be significant, if the Ending Value is below the Threshold Value.
- You are willing to forgo the interest payments that are paid on conventional interest bearing debt securities.
- You are willing to forgo dividends or other benefits of owning the stocks included in the Index.
- You are willing to accept a limited market for sales prior to maturity, and understand that the market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness, the implied borrowing rate and fees and charges on the notes.
- You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Call Amounts and the Redemption Amount.

The notes may not be an appropriate investment for you if:

- You wish to make an investment that cannot be automatically called prior to maturity.
- You believe that the Index will decrease from the Starting Value to the Ending Value.
- You anticipate that the Observation Level will be less than the Call Level on each Observation Date.
- You seek an uncapped return on your investment.
- You seek 100% principal protection or preservation of capital.
- You seek interest payments or other current income on your investment.
- You want to receive dividends or other distributions paid on the stocks included in the Index.
- You seek an investment for which there will be a liquid secondary market.
- You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

Examples of Hypothetical Payments

The following examples are for purposes of illustration only. They are based on **hypothetical** values and show **hypothetical** returns on the notes. They illustrate the calculation of the Call Amount or Redemption Amount, as applicable, based on the hypothetical terms set forth below. **The actual amount you receive and the resulting return will depend on the actual Starting Value, Threshold Value, Call Level, Observation Levels, Call Premiums, and the term of your investment.** The following examples do not take into account any tax consequences from investing in the notes. These examples are based on:

- 1) a Starting Value of 100.00;
- 2) a Threshold Value of 95.00;
- 3) a Call Level of 100.00;
- 4) an expected term of the notes of approximately one year if the notes are not called;
- 5) a Call Premium of 2.75% of the Original Offering Price if the notes are called on the first Observation Date, 4.125% if called on the second Observation Date, and 5.50% if called on the final Observation Date (the midpoint of the applicable Call Premium ranges); and
- 6) Observation Dates occurring approximately six, nine, and twelve months after the pricing date.

The **hypothetical** Starting Value of 100.00 used in these examples has been chosen for illustrative purposes only, and does not represent a likely actual Starting Value for the Market Measure. For recent actual levels of the Market Measure, see "The Index" section below. The Index is a price return index and as such the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Notes Are Called on an Observation Date

The notes will be called at \$10.00 plus the applicable Call Premium on one of the Observation Dates if the Observation Level is equal to or greater than the Call Level.

Example 1 – The Observation Level on the first Observation Date is 110.00. Therefore, the notes will be called at \$10.0000 plus the Call Premium of \$0.2750 = \$10.2750 per unit. After the notes are called, they will no longer remain outstanding and there will not be any further payments on the notes.

Example 2 – The Observation Level on the first Observation Date is below the Call Level, but the Observation Level on the second Observation Date is 105.00. Therefore, the notes will be called at \$10.0000 plus the Call Premium of \$0.4125 = \$10.4125 per unit. After the notes are called, they will no longer remain outstanding and there will not be any further payments on the notes.

Example 3 – The Observation Levels on the first and second Observation Dates are below the Call Level, but the Observation Level on the third and final Observation Date is 105.00. Therefore, the notes will be called at \$10.0000 plus the Call Premium of \$0.5500 = \$10.5500 per unit.

Notes Are Not Called on Any Observation Date

Example 4 – The notes are not called on any Observation Date and the Ending Value is 97.00, which is greater than the Threshold Value. Therefore, the Redemption Amount per unit will be \$10.00.

Example 5 – The notes are not called on any Observation Date and the Ending Value is less than the Threshold Value. The Redemption Amount will be less, and possibly significantly less, than the Original Offering Price. For example, if the Ending Value is 85.00, the Redemption Amount per unit will be:

$$\$10 + \left[\$10 \times \left(\frac{85.00 - 95.00}{100.00} \right) \right] = \$9.00$$

Strategic Accelerated Redemption Securities®

Linked to the S&P 500® Index, due March , 2014

Summary of the Hypothetical Examples

	Notes Are Called on an Observation Date			Notes Are Not Called on Any Observation Date	
	Example 1	Example 2	Example 3	Example 4	Example 5
Starting Value	100.00	100.00	100.00	100.00	100.00
Call Level	100.00	100.00	100.00	100.00	100.00
Threshold Value	95.00	95.00	95.00	95.00	95.00
Observation Level on the First Observation Date	110.00	90.00	90.00	93.00	88.00
Observation Level on the Second Observation Date	N/A	105.00	83.00	85.00	78.00
Observation Level on the Final Observation Date	N/A	N/A	105.00	97.00	85.00
Return of the Index	10.00%	5.00%	5.00%	-3.00%	-15.00%
Return of the Notes	2.75%	4.125%	5.500%	0.000%	-10.000%
Call Amount / Redemption Amount per Unit	\$10.2750	\$10.4125	\$10.5500	\$10.0000	\$9.0000

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. You should carefully review the more detailed explanation of risks relating to the notes in the "Risk Factors" sections beginning on page S-10 of product supplement STR-3, page S-5 of the MTN prospectus supplement, and page 8 of the prospectus identified above under "Summary." We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

- If the notes are not called, your investment may result in a loss; there is no guaranteed return of principal.
- Your return on the notes may be less than the yield you could earn by owning a conventional fixed or floating rate debt security of comparable maturity.
- Payments on the notes are subject to our credit risk, and actual or perceived changes in our creditworthiness are expected to affect the value of the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.
- Your investment return, if any, is limited to the return represented by the applicable Call Premium and may be less than a comparable investment directly in the stocks included in the Index.
- The public offering price you pay for the notes will exceed their estimated initial value. The estimated initial value of the notes that will be provided in the final term sheet is an estimate only, calculated to reflect the costs and charges included in the notes and the implied borrowing rate at the time the terms of the notes are set, and is provided for informational purposes only. The estimated initial value does not represent a minimum price at which we, MLPF&S or any of our affiliates would be willing to purchase your notes in any secondary market (if any exists) at any time. The value of your notes at any time after issuance will vary based on many factors, including changes in market conditions, and cannot be predicted with accuracy.
- A trading market is not expected to develop for the notes. Neither we nor MLPF&S is obligated to make a market for, or to repurchase, the notes. There is no assurance that any party will be willing to purchase your notes at any price in any secondary market.
- If you attempt to sell the notes prior to maturity, their market value may be lower than the price you paid for them and lower than their estimated initial value. This is due to, among other things, changes in the level of the Index, the implied borrowing rate we pay to issue market-linked notes, and the inclusion in the public offering price of the underwriting discount and the hedging related charge, all as further described in "Structuring the Notes" on page TS-10. These factors, together with various credit, market and economic factors over the term of the notes, are expected to reduce the price at which you may be able to sell the notes in any secondary market and will affect the value of the notes in complex and unpredictable ways.
- Our business activities as a full service financial institution, including our commercial and investment banking activities, our hedging and trading activities (including trades in shares of companies included in the Index) and any hedging and trading activities we engage in for our clients' accounts, may affect the market value and return of the notes and may create conflicts of interest with you.
- The Index sponsor may adjust the Index in a way that affects its level, and has no obligation to consider your interests.
- You will have no rights of a holder of the securities represented by the Index, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- While we or our affiliates may from time to time own securities of companies included in the Index, except to the extent that our common stock is included in the Index, we do not control any company included in the Index, and are not responsible for any disclosure made by any other company.
- There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.
- The U.S. federal income tax consequences of the notes are uncertain, and may be adverse to a holder of the notes. See "Summary Tax Consequences" below and "U.S. Federal Income Tax Summary" beginning on page S-45 of product supplement STR-3.

The Index

All disclosures contained in this term sheet regarding the Index, including, without limitation, its make up, method of calculation, and changes in its components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, S&P Dow Jones Indices LLC (the "Index sponsor"). The Index sponsor, which licenses the copyright and all other rights to the Index, has no obligation to continue to publish, and may discontinue publication of, the Index. The consequences of the Index sponsor discontinuing publication of the Index are discussed in the section entitled "Description of the Notes - Discontinuance of a Non-Exchange Traded Fund Market Measure" beginning on page S-37 of product supplement STR-3. None of us, the calculation agent, or MLPF&S accepts any responsibility for the calculation, maintenance or publication of the Index or any successor index.

The Index is intended to provide an indication of the pattern of common stock price movement. The calculation of the level of the Index is based on the relative value of the aggregate market value of the common stocks of 500 companies as of a particular time compared to the aggregate average market value of the common stocks of 500 similar companies during the base period of the years 1941 through 1943.

The Index sponsor chooses companies for inclusion in the Index with the aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the common stock population of its Stock Guide Database of over 10,000 companies, which the Index sponsor uses as an assumed model for the composition of the total market. Relevant criteria employed by the Index sponsor include the viability of the particular company, the extent to which that company represents the industry group to which it is assigned, the extent to which the market price of that company's common stock generally is responsive to changes in the affairs of the respective industry and the market value and trading activity of the common stock of that company. Ten main groups of companies constitute the Index, with the approximate percentage of the market capitalization of the Index included in each group as of January 31, 2013 indicated in parentheses: Consumer Discretionary (11.6%); Consumer Staples (10.7%); Energy (11.3%); Financials (15.7%); Health Care (12.3%); Industrials (10.2%); Information Technology (18.4%); Materials (3.6%); Telecommunication Services (3.0%); and Utilities (3.4%). The Index sponsor may from time to time, in its sole discretion, add companies to, or delete companies from, the Index to achieve the objectives stated above.

The Index sponsor calculates the Index by reference to the prices of the constituent stocks of the Index without taking account of the value of dividends paid on those stocks. As a result, the return on the notes will not reflect the return you would realize if you actually owned the Index constituent stocks and received the dividends paid on those stocks.

Computation of the Index

While the Index sponsor currently employs the following methodology to calculate the Index, no assurance can be given that the Index sponsor will not modify or change this methodology in a manner that may affect the Redemption Amount.

Historically, the market value of any component stock of the Index was calculated as the product of the market price per share and the number of then outstanding shares of such component stock. In March 2005, the Index sponsor began shifting the Index halfway from a market capitalization weighted formula to a float-adjusted formula, before moving the Index to full float adjustment on September 16, 2005. The Index sponsor's criteria for selecting stocks for the Index did not change with the shift to float adjustment. However, the adjustment affects each company's weight in the Index.

Under float adjustment, the share counts used in calculating the Index reflect only those shares that are available to investors, not all of a company's outstanding shares. Float adjustment excludes shares that are closely held by control groups, other publicly traded companies or government agencies.

In September 2012, all shareholdings representing more than 5% of a stock's outstanding shares, other than holdings by "block owners," were removed from the float for purposes of calculating the Index. Generally, these "control holders" will include officers and directors, private equity, venture capital and special equity firms, other publicly traded companies that hold shares for control, strategic partners, holders of restricted shares, ESOPs, employee and family trusts, foundations associated with the company, holders of unlisted share classes of stock, government entities at all levels (other than government retirement/pension funds) and any individual person who controls a 5% or greater stake in a company as reported in regulatory filings. However, holdings by block owners, such as depository banks, pension funds, mutual funds and ETF providers, 401(k) plans of the company, government retirement/pension funds, investment funds of insurance companies, asset managers and investment funds, independent foundations and savings and investment plans, will ordinarily be considered part of the float.

Treasury stock, stock options, restricted shares, equity participation units, warrants, preferred stock, convertible stock, and rights are not part of the float. Shares held in a trust to allow investors in countries outside the country of domicile, such as depository shares and Canadian exchangeable shares are normally part of the float unless those shares form a control block. If a company has multiple classes of stock outstanding, shares in an unlisted or non-traded class are treated as a control block.

For each stock, an investable weight factor ("IWF") is calculated by dividing the available float shares by the total shares outstanding. As of September 21, 2012, available float shares are defined as the total shares outstanding less shares held by control holders. This calculation is subject to a 5% minimum threshold for control blocks. For example, if a company's officers and directors hold 3% of the company's shares, and no other control group holds 5% of the company's shares, the Index sponsor would assign that company an IWF of 1.00, as no control group meets the 5% threshold. However, if a company's officers and directors hold 3% of the company's shares and another control group holds 20% of the company's shares, the Index sponsor would assign an IWF of 0.77, reflecting the

fact that 23% of the company's outstanding shares are considered to be held for control. For companies with multiple classes of stock, the Index sponsor calculates the weighted average IWF for each stock using the proportion of the total company market capitalization of each share class as weights.

The Index is calculated using a base-weighted aggregate methodology. The level of the Index reflects the total market value of all 500 component stocks relative to the base period of the years 1941 through 1943. An indexed number is used to represent the results of this calculation in order to make the level easier to work with and track over time. The actual total market value of the component stocks during the base period of the years 1941 through 1943 has been set to an indexed level of 10. This is often indicated by the notation 1941-43 = 10. In practice, the daily calculation of the Index is computed by dividing the total market value of the component stocks by the "index divisor." By itself, the index divisor is an arbitrary number. However, in the context of the calculation of the Index, it serves as a link to the original base period level of the Index. The index divisor keeps the Index comparable over time and is the manipulation point for all adjustments to the Index, which is index maintenance.

Index Maintenance

Index maintenance includes monitoring and completing the adjustments for company additions and deletions, share changes, stock splits, stock dividends, and stock price adjustments due to company restructuring or spinoffs. Some corporate actions, such as stock splits and stock dividends, require changes in the common shares outstanding and the stock prices of the companies in the Index, and do not require index divisor adjustments.

To prevent the level of the Index from changing due to corporate actions, corporate actions which affect the total market value of the Index require an index divisor adjustment. By adjusting the index divisor for the change in market value, the level of the Index remains constant and does not reflect the corporate actions of individual companies in the Index. Index divisor adjustments are made after the close of trading and after the calculation of the Index closing level.

Changes in a company's shares outstanding of 5.00% or more due to mergers, acquisitions, public offerings, tender offers, Dutch auctions, or exchange offers are made as soon as reasonably possible. All other changes of 5.00% or more (due to, for example, company stock repurchases, private placements, redemptions, exercise of options, warrants, conversion of preferred stock, notes, debt, equity participation units, at-the-market offerings, or other recapitalizations) are made weekly and are announced on Wednesdays for implementation after the close of trading on the following Wednesday. Changes of less than 5.00% due to a company's acquisition of another company in the Index are made as soon as reasonably possible. All other changes of less than 5.00% are accumulated and made quarterly on the third Friday of March, June, September, and December, and are usually announced two to five days prior.

Changes in IWFs of more than five percentage points caused by corporate actions (such as merger and acquisition activity, restructurings, or spinoffs) will be made as soon as reasonably possible. Other changes in IWFs will be made annually when IWFs are reviewed.

The following graph shows the monthly historical performance of the Index in the period from January 2007 through January 2013. We obtained this historical data from Bloomberg L.P. We have not independently verified the accuracy or completeness of the information obtained from Bloomberg L.P. On January 31, 2013, the closing level of the Index was 1,498.11.

Historical Performance of the Index

This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth above is not an indication that the level of the Index is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the levels and trading pattern of the Index.

S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. S&P DOW JONES INDICES MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY US, MLPF&S, HOLDERS OF THE NOTES, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDEX OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND MLPF&S, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

Supplement to the Plan of Distribution; Conflicts of Interest

Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount.

MLPF&S, a broker-dealer subsidiary of BAC, is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA") and will participate as selling agent in the distribution of the notes. Accordingly, offerings of the notes will conform to the requirements of Rule 5121 applicable to FINRA members. MLPF&S may not make sales in this offering to any of its discretionary accounts without the prior written approval of the account holder.

We may deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement of the notes occurs more than three business days from the pricing date, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units. If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

MLPF&S will not receive an underwriting discount for notes sold to certain fee-based trusts and fee-based discretionary accounts managed by U.S. Trust operating through Bank of America, N.A.

The value of the notes shown on your account statement will be based on MLPF&S's estimate of the value of the notes if MLPF&S or another of our affiliates were to make a market in the notes, which it is not obligated to do. That estimate will be based upon the price that MLPF&S may pay for the notes in light of then-prevailing market conditions, our creditworthiness and transaction costs. At certain times, this price may be higher than or lower than the estimated initial value of the notes. For a short initial period after the issuance of the notes, at MLPF&S's discretion, any purchase price paid by MLPF&S in the secondary market may be, in certain circumstances, closer to the amount that you paid for the notes than to their estimated initial value. However, neither we nor any of our affiliates is obligated to purchase your notes at any price, or at a price that exceeds their estimated initial value.

MLPF&S may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices, and these will include MLPF&S's trading commissions and mark-ups. MLPF&S may act as principal or agent in these market-making transactions; however it is not obligated to engage in any such transactions.

Structuring the Notes

The notes are our debt securities, the return on which is linked to the performance of the Index. As is the case for all of our debt securities, including our market-linked notes, the economic terms of the notes reflect our actual or perceived creditworthiness at the time of pricing. In addition, because market-linked notes result in increased operational, funding and liability management costs to us, we typically borrow the funds under these notes at a rate that is more favorable to us than the rate that we might pay for a conventional fixed or floating rate debt security and is generally lower by an amount ranging from 0.25% to 0.50% per annum (equivalent to \$0.02 to \$0.04 per unit) at the time we commence the offering of our market-linked notes. This generally relatively lower implied borrowing rate, which is reflected in the economic terms of the notes, along with the fees and charges associated with market-linked notes, typically results in the estimated initial value of the notes at the time the terms of the notes are set being less than their public offering price.

The amounts that we will pay on the notes will be based on the performance of the Index and calculated based on the \$10 per unit Original Offering Price. In order to meet these payment obligations, at the time we issue the notes, we may choose to enter into certain hedging arrangements (which may include call options, put options or other derivatives) with MLPF&S or one of its affiliates. The terms of these hedging arrangements are determined by seeking bids from market participants, including MLPF&S and its affiliates, and take into account a number of factors, including our creditworthiness, interest rate movements, the volatility of the Index, the tenor of the note and the tenor of the hedging arrangements. The economic terms of the notes depend in part on the terms of these hedging arrangements.

MLPF&S has advised us that the hedging arrangements will include a hedging related charge of approximately \$0.05 per unit, reflecting an estimated profit to be credited to MLPF&S from these transactions. Since hedging entails risk and may be influenced by unpredictable market forces, additional profits and losses from these hedging arrangements may be realized by the hedge providers.

The lower implied borrowing rate, the underwriting discount and the hedging-related costs and charges, reduce the economic terms of the notes to you and result in the estimated initial value for the notes (estimated at the time the terms of the notes are set) being less than the public offering price for the notes. For further information, see "Risk Factors — General Risks Relating to the Notes" beginning on page S-10 and "Use of Proceeds" on page S-23 of product supplement STR-3.

Summary Tax Consequences

You should consider the U.S. federal income tax consequences of an investment in the notes, including the following:

- There is no statutory, judicial, or administrative authority directly addressing the characterization of the notes.
- You agree with us (in the absence of an administrative determination, or judicial ruling to the contrary) to characterize and treat the notes for all tax purposes as a callable single financial contract with respect to the Index.
- Under this characterization and tax treatment of the notes, a U.S. Holder (as defined beginning on page 62 of the prospectus) generally will recognize capital gain or loss upon maturity or upon a sale, exchange, or redemption of the notes prior to maturity. This capital gain or loss generally will be long-term capital gain or loss if you held the notes for more than one year.
- No assurance can be given that the IRS or any court will agree with this characterization and tax treatment.
- Withholding and reporting requirements under the legislation enacted on March 18, 2010 (as discussed beginning on page 85 of the prospectus), will generally apply to payments made after December 31, 2013. However, this withholding tax will not be imposed on payments pursuant to obligations outstanding on January 1, 2014. Additionally, withholding due to any payment being treated as a "dividend equivalent" (as discussed beginning on page S-49 of product supplement STR-3 will begin no earlier than January 1, 2014. Holders are urged to consult with their own tax advisors regarding the possible implications of this recently enacted legislation on their investment in the notes.

You should consult your own tax advisor concerning the U.S. federal income tax consequences to you of acquiring, owning, and disposing of the notes, as well as any tax consequences arising under the laws of any state, local, foreign, or other tax jurisdiction and the possible effects of changes in U.S. federal or other tax laws. You should review carefully the discussion under the section entitled "U.S. Federal Income Tax Summary" beginning on page S-45 of product supplement STR-3.

Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement, and a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, we, any agent, or any dealer participating in this offering will arrange to send you these documents if you so request by calling MLPF&S toll-free at 1-866-500-5408.

Market-Linked Investments Classification

Enhanced Return

MLPF&S classifies certain market-linked investments (the "Market-Linked Investments") into categories, each with different investment characteristics. The following description is meant solely for informational purposes and is not intended to represent any particular Enhanced Return Market-Linked Investment or guarantee any performance.

Enhanced Return Market-Linked Investments are short- to medium-term investments that offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.

"Strategic Accelerated Redemption Securities®" is our registered service mark.
