## Risk Factors

- Your investment may result in a loss; there is no guaranteed return of principal.
- The Notes do not bear interest.
- The Redemption Amount will not reflect the levels of the Underlyings other than on the Valuation Date.
- Because the Notes are linked to the least performing (and not the average performance) of the Underlyings, you may not receive any return on the Notes and may lose a significant portion or all of your principal amount even if the Ending Value of one Underlying is greater than or equal to its Threshold Value.
- Your return on the Notes may be less than the yield on a conventional debt security of comparable maturity.
- Any payment on the Notes is subject to our credit risk and the credit risk of the Guarantor, and any actual or perceived changes in our or the Guarantor's creditworthiness are expected to affect the value of the Notes.
- The public offering price you pay for the Notes will exceed their initial estimated value.
- We cannot assure you that a trading market for your Notes will ever develop or be maintained.
- The Notes are subject to risks associated with small-size capitalization companies.
