Risk Factors

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

- If the notes are not automatically called, your investment will result in a loss; there is no guaranteed return of principal.
- Payments on the notes are subject to the credit risk of BofA Finance and the credit risk of BAC, and actual or perceived changes in the creditworthiness of BofA Finance or BAC are expected to affect the value of the notes. If BofA Finance and BAC become insolvent or are unable to pay their respective obligations, you may lose your entire investment.
- Your investment return is limited to the applicable Call Premium and may be less than a comparable investment directly in the Market Measure.
- The initial estimated value of the notes on the pricing date will be less than their public offering price.
- If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.
- Ownership of the notes will not entitle you to any rights with respect to the Market Measure or any related futures contracts.
- Suspensions or disruptions of trading in crude oil and related futures contracts may adversely affect the value of the notes.
- An investment linked to commodity futures contracts is not equivalent to an investment linked to the spot prices of physical commodities.
- The notes will not be regulated by the U.S. Commodity Futures Trading Commission.

Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.
