(1) The "Return on the Notes" is calculated based on the Redemption Amount and potential final Contingent Coupon Payment, not including any Contingent Coupon Payments paid prior to maturity, and assumes that relevant Contingent Coupon Payment has been made on each prior Contingent Payment Date.

(2) This is the Underlying Return which corresponds to the Threshold Value of the Least Performing Underlying.

(3) This is the Underlying Return which corresponds to the Coupon Barrier of the Least Performing Underlying.

Risk Factors

- Your investment may result in a loss; there is no guaranteed return of principal.
- Your return on the Notes is limited to the return represented by the Contingent Coupon Payments, if any, over the term of the Notes.
- The Notes are subject to a potential Automatic Call, which would limit your ability to receive the Contingent Coupon Payments over the full term of the Notes.
- You may not receive any Contingent Coupon Payments and the Notes do not provide for any regular fixed coupon payments.
- The Contingent Coupon Payment or Redemption Amount, as applicable, will not reflect the prices of the Underlyings other than on the Observation Dates.
- Because the Notes are linked to the least performing (and not the average performance) of the Underlyings, you may not receive any return on the Notes and may lose some or all of your principal amount even if the Observation Value of one Underlying is always greater than or equal to its Coupon Barrier or Threshold Value, as applicable.
- Your return on the Notes may be less than the yield on a conventional debt security of comparable maturity.
- Any payments on the Notes are subject to the credit risk of BofA Finance and the Guarantor, and actual or perceived changes in BofA Finance or the Guarantor's creditworthiness are expected to affect the value of the Notes.
- The public offering price you pay for the Notes will exceed their initial estimated value.
- We cannot assure you that a trading market for your Notes will ever develop or be maintained.
- A limited number of securities may affect the level of the Underlying Index of the GDX, and the Underlying Index of the GDX is not necessarily representative of the gold and silver mining industry.
- There is no direct correlation between the value of the notes or the price of the GDX and the SLV, on the one hand, and gold and silver prices, on the other hand.
- NYSE Arca, Inc. ("NYSE Arca"), as the sponsor and compiler of the Underlying Index of the GDX, retains significant control and discretionary decision-making over the Underlying Index of the GDX and is responsible for decisions regarding the interpretation of and amendments to the Underlying Index rules, which may have an adverse effect on the price of the GDX, the market value of the notes and the amount payable on the notes.
- The performance of the GDX and the SLV may be influenced by gold and silver prices.
- The notes are subject to risks associated with foreign securities markets.
- The notes are subject to foreign currency exchange rate risk.
- The stocks or assets held by the GDX and SLV are concentrated in one sector.
- There are risks associated with commodities trading on the London Bullion Market Association.

You may revoke your offer to purchase the Notes at any time prior to the time at which we accept such offer on the date the Notes are priced.
