

Terms of the Notes

The Contingent Income Auto-Callable Yield Notes Linked to the Least Performing of the Russell 2000[®] Index, the S&P 500[®] Index and the SPDR[®] S&P[®] Regional Banking ETF (the "Notes") provide a quarterly Contingent Coupon Payment of at least \$28.125 on the applicable Contingent Payment Date if, on any quarterly Observation Date, the Observation Value of each Underlying is greater than or equal to its Coupon Barrier. The coupon per \$1,000 in principal amount of Notes payable on the related Contingent Payment Date will equal (i) the product of at least \$28.125 times the number of Contingent Payment Dates that have occurred up to the relevant Contingent Payment Date (inclusive of the relevant Contingent Payment Date) minus (ii) the sum of all Contingent Coupon Payments previously paid. The actual contingent coupon rate will be determined on the pricing date. Beginning in September 2023, if the Observation Value of each Underlying is greater than or equal to 100% of its Starting Value on any applicable quarterly Observation Date (other than the final Observation Date), the Notes will be automatically called, in whole but not in part, at an amount equal to 100% of the principal amount, together with the relevant Contingent Coupon Payment. No further amounts will be payable following an Automatic Call. If the Notes are not automatically called, at maturity you will receive the Redemption Amount, calculated as described under "Redemption Amount Determination".

Issuer:	BofA Finance LLC ("BofA Finance")
Guarantor:	Bank of America Corporation ("BAC")

- (1) The "Return on the Notes" is calculated based on the Redemption Amount and potential final Contingent Coupon Payment, not including any Contingent Coupon Payments paid prior to maturity, and assumes that the relevant Contingent Coupon Payment has been made on each prior Contingent Payment Date.
- (2) This amount represents the sum of the principal amount and the final Contingent Coupon Payment (assuming that each prior quarterly Contingent Coupon Payment has been made on the related Contingent Payment Date).
- (3) This is the Underlying Return which corresponds to the Coupon Barrier and the Threshold Value of the Least Performing Underlying.

Risk Factors

- Your investment may result in a loss; there is no guaranteed return of principal.
- Your return on the Notes is limited to the return represented by the Contingent Coupon Payments, if any, over the term of the Notes.
- The Contingent Coupon Payment, Early Redemption Amount or Redemption Amount, as applicable, will not reflect the values of the Underlyings other than on the Observation Dates.
- The Notes are subject to a potential Automatic Call, which would limit your ability to receive the Contingent Coupon Payments over the full term of the Notes.
- You may not receive any Contingent Coupon Payments and the Notes do not provide for any regular fixed coupon payments.
- Your return on the Notes may be less than the yield on a conventional debt security of comparable maturity.
- Because the Notes are linked to the least performing (and not the average performance) of the Underlyings, you may not receive any return on the Notes and may lose a significant portion or all of your principal amount even if the Observation Value or Ending Value of one Underlying is always greater than or equal to its Coupon Barrier or Threshold Value, as applicable.
- Any payments on the Notes are subject to our credit risk and the credit risk of the Guarantor, and any actual or perceived changes in our or the Guarantor's creditworthiness are expected to affect the value of the Notes.
- The public offering price you pay for the Notes will exceed their initial estimated value.
- We cannot assure you that a trading market for your Notes will ever develop or be maintained.
- The Notes are subject to risks associated with small-size capitalization companies.
- The Notes are subject to risks associated with the banking industry.
- The stocks held by the KRE are concentrated in one sector.
- The performance of the KRE may not correlate with the performance of its underlying index as well as the net asset value per share or unit of the Underlying, especially during periods of market volatility.
- The anti-dilution adjustments will be limited.

You may revoke your offer to purchase the Notes at any time prior to the time at which we accept such offer on the date the Notes are priced. We reserve the right to change the terms of, or reject any offer to purchase, the Notes prior to their issuance. In the event of any changes to the terms of the Notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.
