

**Jump Securities with Auto-Callable Feature Based on the Performance of the Russell 2000® Index due January 31, 2028**  
 Fully and Unconditionally Guaranteed by Bank of America Corporation  
 Principal at Risk Securities

**This document provides a summary of the terms of the securities. Investors must carefully review the accompanying preliminary pricing supplement referenced below, product supplement, prospectus supplement and prospectus, and the "Risk Considerations" on the following page, prior to making an investment decision.**

The securities do not guarantee the repayment of principal and do not provide for the regular payment of interest. Investors will not participate in any appreciation in the underlying index. The securities are for investors who are willing to risk their principal and forego current income and participation in the appreciation of the underlying index in exchange for the possibility of receiving an early redemption payment or payment at maturity greater than the stated principal amount if the underlying index closes at or above the initial index value on a quarterly determination date or the final determination date, respectively. The securities are our senior debt securities. Any payments on the securities are fully and unconditionally guaranteed by Bank of America Corporation ("BAC"). The securities are issued as part of BofA Finance LLC's ("BofA Finance") "Medium-Term Notes, Series A" program.

SUMMARY TERMS

Stated principal amount:	\$1,000.00 per security
Issue price:	\$1,000.00 per security
Pricing date:	January 26, 2024
Original issue date:	January 31, 2024 (3 business days after the pricing date)
Maturity date:	January 31, 2028
Early redemption:	If, on any quarterly determination date (other than the final determination date), beginning on February 3, 2025, the index closing value of the underlying index is greater than or equal to the initial index value, the securities will be automatically redeemed for the applicable early redemption payment on the related early redemption date. No further payments will be made on the securities once they have been redeemed.
Early redemption payment:	The early redemption payment for each quarterly determination date prior to the final determination date will be an amount in cash per stated principal amount (corresponding to a return of approximately at least 9.16% per annum). See "Determination Dates, Early Redemption Dates and Early Redemption Payments" below.
Payment at maturity:	If the securities have not previously been redeemed, you will receive at maturity a cash payment per security as follows: <ul style="list-style-type: none"> <li>• If the final index value is greater than or equal to the initial index value: At least \$1,366.40 (set on the pricing date)</li> <li>• If the final index value is less than the initial index value but the final index value is greater than or equal to the downside threshold level: \$1,000</li> <li>• If the final index value is less than the downside threshold level: \$1,000 × index performance factor</li> </ul> Under these circumstances, the payment at maturity will be less than 80% of the stated principal amount of the securities and could be zero.
Initial index value:	The index closing value of the underlying index on the pricing date.
Final index value:	The index closing value of the underlying index on the final determination date.
Index performance factor:	The final index value divided by the initial index value.
Determination dates:	Quarterly. See "Determination Dates, Early Redemption Dates and Early Redemption Payments" below. We also refer to January 26, 2028 as the final determination date. The determination dates are subject to postponement as set forth in "Description of the Notes—Certain Terms of the Notes—Events Relating to Observation Dates" beginning on page PS-23 of the accompanying product supplement.

## Underlying Index

For information about the underlying index, including historical performance information, see the accompanying preliminary pricing supplement.

## Risk Considerations

The risks set forth below are discussed in more detail in the "Risk Factors" section in the accompanying preliminary pricing supplement. Please review those risk factors carefully prior to making an investment decision.

### **Structure-related Risks**

- Your investment may result in a loss; there is no guaranteed return of principal.
- Any positive investment return on the securities is limited.
- The securities do not bear interest.
- The securities are subject to potential early redemption, which would limit your ability to receive further payment on the securities.
- Your return on the securities may be less than the yield on a conventional debt security of comparable maturity.
- The early redemption payment or payment at maturity, as applicable, will not reflect changes in the level of the underlying index other than on the determination dates or the final determination date, as applicable.
- Any payments on the securities are subject to our credit risk and the credit risk of the guarantor, and any actual or perceived changes in our or the guarantor's creditworthiness are expected to affect the value of the securities.
- We are a finance subsidiary and, as such, have no independent assets, operations, or revenues.

### **Valuation- and Market-related Risks**

- The price to public you pay for the securities will exceed their initial estimated value.
- The initial estimated value does not represent a minimum or maximum price at which we, BAC, BofAS or any of our other affiliates would be willing to purchase your securities in any secondary market (if any exists) at any time.
- We cannot assure you that a trading market for your securities will ever develop or be maintained.

### **Conflict-related Risks**

- Trading and hedging activities by us, the guarantor and any of our other affiliates, including BofAS, may create conflicts of interest with you and may affect your return on the securities and their market value.
- There may be potential conflicts of interest involving the calculation agent, which is an affiliate of ours.

### **Underlying Index-related Risks**

- The securities are subject to risks associated with small-size capitalization companies.
- Governmental regulatory actions, such as sanctions, could adversely affect your investment in the securities.
- The publisher of the underlying index may adjust the underlying index in a way that affects its levels, and the publisher has no obligation to consider your interests.

### **Tax-related Risks**

- The U.S. federal income tax consequences of an investment in the securities are uncertain, and may be adverse to a holder of the securities.

## Tax Considerations

You should review carefully the discussion in the accompanying preliminary pricing supplement under the caption "Additional Information About the Securities—Tax considerations" concerning the U.S. federal income tax consequences of an investment in the securities, and you should consult your tax adviser.
