Pricing Date*:	December 26, 2024
Issue Date*:	December 31, 2024
Denominations:	\$1,000 and any integral multiple of \$1,000. References in the pricing supplement to a "Security" are to a Security with a principal amount of \$1,000.
Contingent Coupon Payments:	On each Contingent Coupon Payment Date, you will receive a Contingent Coupon Payment at a per annum rate equal to the Contingent Coupon Rate if, and only if, the closing level of the Lowest Performing Underlying on each Eligible Trading Day during the relevant Observation Period is greater than or equal to its Coupon Barrier. Each Contingent Coupon Payment, if any, will be calculated per Security as follows: $(\$1,000 \times \text{Contingent Coupon Rate}) / 4$
Contingent Coupon Payment Dates:	Quarterly, on the third business day following each Observation Period End-Date; provided that the Contingent Coupon Payment Date with respect to the Final Calculation Day will be the Maturity Date.
Contingent Coupon Rate:	At least 10.00% per annum, to be determined on the Pricing Date.
Observation Period End-Dates*:	Quarterly, on the 26th of each March, June, September and December, commencing March 2025 and ending September 2027, and December 27, 2027 (the "Final Calculation Day").
Observation Periods:	Each Observation Period will consist of each day that is a trading day for at least one Underlying (each such day, an "Eligible Trading Day") from but excluding an Observation Period End-Date to and including the following Observation Period End-Date, provided that the first Observation Period will consist of each Eligible Trading Day from but excluding the Pricing Date to and including the first Observation Period End-Date.
Optional Redemption:	We may, at our option, redeem the Securities, in whole but not in part, on any Optional Redemption Date. If we elect to redeem the Securities prior to stated maturity, you will be entitled to receive on the applicable Optional Redemption Date a cash payment per Security equal to the principal amount plus any final Contingent Coupon Payment otherwise due.
Optional Redemption Dates*:	Quarterly, on the Contingent Coupon Payment Dates following each Observation Period End-Date scheduled to occur from March 2025 to September 2027, inclusive.
Maturity Payment Amount (per Security):	If the Securities are not called, you will receive a Maturity Payment Amount that could be equal to or less than the principal amount per Security, determined as follows: if the Ending Value of the Lowest Performing Underlying on the Final Calculation Day is greater than or equal to its Threshold Value: \$1,000; or if the Ending Value of the Lowest Performing Underlying on the Final Calculation Day is less than its Threshold Value: $\$1,000 \times \text{Performance Factor of the Lowest Performing Underlying on the Final Calculation Day}$.
Maturity Date*:	December 30, 2027
Lowest Performing Underlying	For any Eligible Trading Day during an Observation Period (including the Final Calculation Day), the Lowest Performing Underlying will be the Underlying with the lowest Performance Factor on that day and that has not been disregarded due to a Market Disruption Event or non-trading day.
Performance Factor:	With respect to an Underlying on any Eligible Trading Day during an Observation Period, its closing level on such day divided by its Starting Value (expressed as a percentage).
Starting Value:	For each Underlying, its closing level on the pricing date

Coupon Barrier:	For each Underlying, 70% of its Starting Value
Threshold Value:	For each Underlying, 60% of its Starting Value

Hypothetical Payout Profile (Maturity Payment Amount)

If we do not redeem the Securities prior to maturity and the Ending Value of the Lowest Performing Underlying on the Final Calculation Day is less than its Threshold Value, you will lose more than 40%, and possibly all, of the principal amount of your Securities at maturity.

Any return on the Securities will be limited to the sum of your Contingent Coupon Payments, if any. You will not participate in any appreciation of any Underlying, but you will have full downside exposure to decreases in the value of the Lowest Performing Underlying on the Final Calculation Day if the Ending Value of that Underlying is less than its Threshold Value.

The initial estimated value of the Securities as of the pricing date is expected to be between \$929.20 and \$979.50 per Security, which is less than the public offering price. The actual value of your Securities at any time will reflect many factors and cannot be predicted with accuracy. See "Selected Risk Considerations" beginning on page PS-9 of the accompanying preliminary pricing supplement and "Structuring the Securities" on page PS-30 of the accompanying preliminary pricing supplement for additional information.

Selected Risk Considerations

The risks set forth below, as well as additional risks related to this investment, are discussed in detail in the "Selected Risk Considerations" section in the accompanying preliminary pricing supplement. Please review those risk disclosures carefully.

- **Your investment may result in a loss; there is no guaranteed return of principal.**
- **Your return on the Securities is limited to the return represented by the Contingent Coupon Payments, if any, over the term of the Securities.**
- **The Securities are subject to a potential early redemption, which would limit your ability to receive the Contingent Coupon Payments over the full term of the Securities.**
- **You may not receive any Contingent Coupon Payments.**
- **Because the Securities are linked to the lowest performing (and not the average performance) of the Underlyings, you may not receive any return on the Securities and may lose a significant portion or all of your principal amount even if the closing level of one Underlying is always greater than or equal to its Coupon Barrier or Threshold Value, as applicable.**
- **Higher Contingent Coupon Rates are associated with greater risk.**
- **Your return on the Securities may be less than the yield on a conventional debt security of comparable maturity.**
- **A Contingent Coupon Payment Date, an Optional Redemption Date and the Maturity Date may be postponed if an Observation Period End-Date is postponed.**
- **Any payment on the Securities is subject to the credit risk of BofA Finance, as issuer, and BAC, as Guarantor, and actual or perceived changes in BofA Finance's or the Guarantor's creditworthiness are expected to affect the value of the Securities.**
- **We are a finance subsidiary and, as such, have no independent assets, operations or revenues.**
- **The public offering price you pay for the Securities will exceed their initial estimated value.**
- **The initial estimated value does not represent a minimum or maximum price at which BofA Finance, BAC, BofAS or any of our other affiliates or WFS or its affiliates would be willing to purchase your Securities in any secondary market (if any exists) at any time.**
- **BofA Finance cannot assure you that a trading market for your Securities will ever develop or be maintained.**
- **The Securities are not designed to be short-term trading instruments, and if you attempt to sell the Securities prior to maturity, their market value, if any, will be affected by various factors that interrelate in complex ways, and their market value may be less than the principal amount.**
- **Trading and hedging activities by BofA Finance, the Guarantor and any of our other affiliates, including BofAS, and WFS and its affiliates, may create conflicts of interest with you and may affect your return on the Securities and their market value.**
- **There may be potential conflicts of interest involving the calculation agent, which is an affiliate of ours.**
- **Changes that affect the Underlyings may adversely affect the value of the Securities and any payments on the Securities.**
- **We and our affiliates have no affiliation with any Underlying Sponsor and have not independently verified their public disclosure of information.**
- **The Securities are subject to risks associated with foreign securities markets.**
- **The Securities are subject to risks associated with small-size capitalization companies.**
- **The U.S. federal income tax consequences of an investment in the Securities are uncertain, and may be adverse to a holder of the Securities.**
