Risk Factors

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

- If the notes are not automatically called, your investment will result in a loss; there is no guaranteed return of principal.
- Payments on the notes are subject to the credit risk of BofA Finance and the credit risk of BAC, and actual or perceived changes in the creditworthiness of BofA Finance or BAC are expected to affect the value of the notes. If BofA Finance and BAC become insolvent or are unable to pay their respective obligations, you may lose your entire investment.
- Your investment return is limited to the return represented by the applicable Call Premium and may be less than a comparable investment directly in the Market Measure or the securities held by the Market Measure.
- The initial estimated value of the notes on the pricing date will be less than their public offering price.
- If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.
- You will have no rights of a holder of the Market Measure or the securities held by the Market Measure, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
- The sponsor of the Underlying Fund’s underlying index (the Underlying Index”) may adjust the Underlying Index in a way that affects its level, and has no obligation to consider your interests.
- The sponsor and investment advisor of the Underlying Fund may adjust the Underlying Fund in a way that could adversely impact the value of the notes and the amount payable on the notes, and these entities have no obligation to consider your interests.
- There are liquidity and management risks associated with the Underlying Fund.
- The performance of the Underlying Fund may not correlate with the performance of its Underlying Index as well as the net asset value per share of the Underlying Fund, especially during periods of market volatility when the liquidity and the market price of shares of the Underlying Fund and/or securities held by the Underlying Fund may be adversely affected, sometimes materially.
- Risks associated with the Underlying Index or the underlying assets of the Underlying Fund will affect the share price of the Underlying Fund and hence, the value of the notes.
- All of the securities held by the Underlying Fund are concentrated in one industry.
- The notes will be subject to risks associated with small- or mid-capitalization companies.
- An investment in the Notes is subject to risks associated with investing in stocks in the gold and silver mining industries.
- An investment in the Notes is subject to risks associated with foreign securities markets, including emerging markets.
- The Notes are subject to foreign currency exchange rate risk.

Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.
