#### Hypothetical Payout Profile (Maturity Payment Amount)

If we do not redeem the Securities prior to maturity and the Ending Value of the Lowest Performing Underlying on the Final Calculation Day is less than its Threshold Value, you will lose more than 40%, and possibly all, of the principal amount of your Securities at maturity.

Any return on the Securities will be limited to the sum of your Contingent Coupon Payments, if any. You will not participate in any appreciation of any Underlying, but you will have full downside exposure to decreases in the value of the Lowest Performing Underlying on the Final Calculation Day if the Ending Value of that Underlying is less than its Threshold Value.

The initial estimated value of the Securities as of the pricing date is expected to be between \$927.25 and \$977.25 per Security, which is less than the public offering price . The actual value of your Securities at any time will reflect many factors and cannot be predicted with accuracy. See "Selected Risk Considerations" beginning on page PS-9 of the accompanying preliminary pricing supplement and "Structuring the Securities" on page PS-30 of the accompanying preliminary pricing supplement for additional information.

### Selected Risk Considerations

The risks set forth below, as well as additional risks related to this investment, are discussed in detail in the "Selected Risk Considerations" section in the accompanying preliminary pricing supplement. Please review those risk disclosures carefully.

- Your investment may result in a loss; there is no guaranteed return of principal.
- Your return on the Securities is limited to the return represented by the Contingent Coupon Payments, if any, over the term of the Securities.
- The Securities are subject to a potential early redemption, which would limit your ability to receive the Contingent Coupon Payments over the full term of the Securities.
- You may not receive any Contingent Coupon Payments.
- Because the Securities are linked to the lowest performing (and not the
  average performance) of the Underlyings, you may not receive any return
  on the Securities and may lose a significant portion or all of your principal
  amount even if the closing level of one Underlying is always greater than
  or equal to its Coupon Barrier or Threshold Value, as applicable.
- Higher Contingent Coupon Rates are associated with greater risk.
- Your return on the Securities may be less than the yield on a conventional debt security of comparable maturity.
- A Contingent Coupon Payment Date, an Optional Redemption Date and the Maturity Date may be postponed if an Observation Period End-Date is postponed.
- Any payment on the Securities is subject to the credit risk of BofA Finance,
   as issuer, and BAC, as Guarantor, and actual or perceived changes in BofA Finance's or the Guarantor's creditworthiness are expected to affect the value of the Securities.
- We are a finance subsidiary and, as such, have no independent assets, operations or revenues.
- The public offering price you pay for the Securities will exceed their initial astimated value.
- The initial estimated value does not represent a minimum or maximum
  price at which BofA Finance, BAC, BofAS or any of our other affiliates or
  Wells Fargo Securities, LLC ("WFS") or its affiliates would be willing to
  purchase your Securities in any secondary market (if any exists) at any
  time.

- BofA Finance cannot assure you that a trading market for your Securities will ever develop or be maintained.
- The Securities are not designed to be short-term trading instruments, and if
  you attempt to sell the Securities prior to maturity, their market value, if any,
  will be affected by various factors that interrelate in complex ways, and their
  market value may be less than the principal amount.
- Trading and hedging activities by BofA Finance, the Guarantor and any of our other affiliates, including BofAS, and WFS and its affiliates, may create conflicts of interest with you and may affect your return on the Securities and their market value.
- There may be potential conflicts of interest involving the calculation agent, which is an affiliate of ours.
- Changes that affect the Underlyings may adversely affect the value of the Securities and any payments on the Securities.
- We and our affiliates have no affiliation with any Underlying Sponsor and have not independently verified their public disclosure of information.
- The Securities are subject to risks associated with foreign securities markets.
- The Securities are subject to risks associated with small-size capitalization companies.
- The U.S. federal income tax consequences of an investment in the Securities are uncertain, and may be adverse to a holder of the Securities.

This term sheet is a summary of the terms of the Securities and factors that you should consider before deciding to invest in the Securities. BofA Finance and BAC have filed a registration statement (including preliminary pricing supplement, product supplement, prospectus supplement and prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this term sheet relates. Before you invest, you should read this term sheet together with the Preliminary Pricing Supplement dated March 4, 2025, Product Supplement No. WF-1 dated March 8, 2023 and the Prospectus Supplement and Prospectus each dated December 30,2022 to understand fully the terms of the Securities and other considerations that are important in making a decision about investing in the Securities.
