Pricing Date*:	April 16, 2025
Issue Date*:	April 22, 2025
Maturity Date*:	April 19, 2029
Denominations:	\$1,000 and any integral multiple of \$1,000.
Automatic Call:	If the closing level of the Lowest Performing Underlying on any Call Date is greater than or equal to its Starting Value, the Securities will be automatically called for the principal amount plus the Call Premium applicable to that Call Date.
Call Dates* and Call Premiums:	The Call Premium applicable to each Call Date will be a percentage of the principal amount that increases for each Call Date based on a simple (non-compounding) return of at least approximately 11.00% per annum (to be determined on the Pricing Date). See "Call Dates and Call Premiums" on page 2.
Lowest Performing Underlying:	The Lowest Performing Underlying on any Call Date is the Underlying with the lowest Performance Factor on that Call Date.
Performance Factor:	With respect to an Underlying on any Call Date, its closing level on such Call Date <i>divided</i> by its Starting Value (expressed as a percentage).
Call Settlement Date:	Three business days after the applicable Call Date.
Maturity Payment Amount (per Security):	If the Securities are not automatically called, you will receive a Maturity Payment Amount that could be equal to or less than the principal amount per Security: <ul style="list-style-type: none"> If the Ending Value of the Lowest Performing Underlying on the Final Calculation Day is less than its Starting Value but greater than or equal to its Threshold Value: \$1,000; or If the Ending Value of the Lowest Performing Underlying on the Final Calculation Day is less than its Threshold Value: \$1,000 × Performance Factor of the Lowest Performing Underlying on the Final Calculation Day
Starting Value:	For each Underlying, its closing level on the Pricing Date
Ending Value:	For each Underlying, its closing level on the Final Calculation Day
Threshold Value:	For each Underlying, 63% of its Starting Value.

*Subject to change.	
** In addition, selected dealers may receive a fee of up to 0.30% per Security for marketing and other services.	

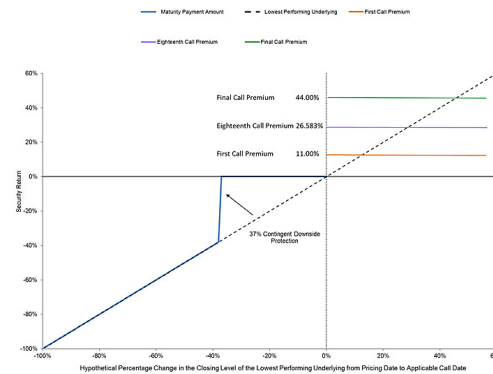

The Securities have complex features and investing in the Securities involves risks not associated with an investment in conventional debt securities. Potential purchasers of the Securities should consider the information in "Selected Risk Considerations" beginning on page PS-9 of the accompanying preliminary pricing supplement and in "Risk Factors" beginning on page PS-5 of the accompanying product supplement, page S-6 of the accompanying prospectus supplement, and page 7 of the accompanying prospectus.

This introductory term sheet does not provide all of the information that an investor should consider prior to making an investment decision.

Investors should carefully review the accompanying preliminary pricing supplement, product supplement, prospectus supplement and prospectus before making a decision to invest in the Securities.

NOT A BANK DEPOSIT AND NOT INSURED OR GUARANTEED BY THE FDIC OR ANY OTHER GOVERNMENTAL AGENCY

Hypothetical Payout Profile***

*** Not all call dates reflected; reflects only the first, eighteenth and final call dates for illustrative purposes only; assumes a Call Premium equal to the lowest possible Call Premium that may be determined on the Pricing Date.

If the Securities are not automatically called and the Ending Value of the Lowest Performing Underlying on the Final Calculation Day is less than its Threshold Value, you will lose more than 37%, and possibly all, of the principal amount of your Securities on the Maturity Date.

Any positive return on the Securities will be limited to any applicable Call Premium, even if the closing level of the Lowest Performing Underlying on the applicable Call Date significantly exceeds its Starting Value. You will not participate in any appreciation of any Underlying beyond any applicable Call Premium.

The initial estimated value of the Securities as of the pricing date is expected to be between \$914.25 and \$964.25 per Security, which is less than the public offering price. The actual value of your Securities at any time will reflect many factors and cannot be predicted with accuracy. See "Selected Risk Considerations" beginning on page PS-9 of the accompanying preliminary pricing supplement and "Structuring the Securities" on page PS-30 of the accompanying preliminary pricing supplement for additional information.

Selected Risk Considerations

The risks set forth below, as well as additional risks related to this investment, are discussed in detail in the "Selected Risk Considerations" section in the accompanying preliminary pricing supplement. Please review those risk disclosures carefully.

<ul style="list-style-type: none"> Your investment may result in a loss; there is no guaranteed return of principal. Any positive investment return on the Securities is limited. The Securities do not bear interest. The Call Premium or Maturity Payment Amount, as applicable, will not reflect the levels of the Underlyings other than on the Call Dates. The Securities are subject to a potential automatic call, which would limit your ability to receive further payment on the Securities. Because the Securities are linked to the lowest performing (and not the average performance) of the Underlyings, you may not receive any return on the Securities and may lose a significant portion or all of your principal amount even if the closing level of one Underlying is always greater than or equal to its Starting Value or Threshold Value. Your return on the Securities may be less than the yield on a conventional debt security of comparable maturity. A Call Settlement Date and the Maturity Date may be postponed if a Call Date is postponed. Any payment on the Securities is subject to the credit risk of BofA Finance, as issuer, and BAC, as Guarantor, and actual or perceived changes in BofA Finance's or the Guarantor's creditworthiness are expected to affect the value of the Securities. We are a finance subsidiary and, as such, have no independent assets, operations or revenues. The public offering price you pay for the Securities will exceed their initial estimated value. The initial estimated value does not represent a minimum or maximum price at which BofA Finance, BAC, BofAS or any of our other affiliates or Wells Fargo Securities, LLC ("WFS") or its affiliates would be willing to purchase your Securities in any secondary market (if any exists) at any time. 	<ul style="list-style-type: none"> BofA Finance cannot assure you that a trading market for your Securities will ever develop or be maintained. The Securities are not designed to be short-term trading instruments, and if you attempt to sell the Securities prior to maturity, their market value, if any, will be affected by various factors that interrelate in complex ways, and their market value may be less than the principal amount. Trading and hedging activities by BofA Finance, the Guarantor and any of our other affiliates, including BofAS, and WFS and its affiliates, may create conflicts of interest with you and may affect your return on the Securities and their market value. There may be potential conflicts of interest involving the calculation agent, which is an affiliate of ours. Changes that affect the Underlyings may adversely affect the value of the Securities and any payments on the Securities. We and our affiliates have no affiliation with any index sponsor and have not independently verified their public disclosure of information. The Securities are subject to risks associated with small-size capitalization companies. An investment in the Securities is subject to risks associated with investing in non-U.S. companies. Adverse conditions in the technology sector may reduce your return on the Securities. The stocks included in the NDXT are concentrated in one sector. The U.S. federal income and estate tax consequences of the Securities are uncertain, and may be adverse to a holder of the Securities.
