Hypothetical Payout Profile***

*** prepared for purposes of illustration only; assumes a Contingent Fixed Return equal to the lowest possible Contingent Fixed Return that may be determined on the Pricing Date.

The positive return on the Securities at maturity will be limited to the Contingent Fixed Return, even if the Ending Price of the Lowest Performing Underlying Stock significantly exceeds its Starting Price. You will not have the opportunity to participate in any appreciation of either Underlying Stock beyond the Contingent Fixed Return.

If the Ending Price of the Lowest Performing Underlying Stock is less than its Threshold Price, you will lose more than 40%, and possibly all, of the principal amount of your Securities on the Maturity Date.

The initial estimated value of the Securities as of the pricing date is expected to be between \$906.75 and \$966.75 per Security, which is less than the public offering price. The actual value of your Securities at any time will reflect many factors and cannot be predicted with accuracy. See "Selected Risk Considerations" beginning on page PS-8 of the accompanying preliminary pricing supplement and "Structuring the Securities" on page PS-17 of the accompanying preliminary pricing supplement for additional information.

The Securities have complex features and investing in the Securities involves risks not associated with an investment in conventional debt securities. Potential purchasers of the Securities should consider the information in "Selected Risk Considerations" beginning on page PS-8 of the accompanying preliminary pricing supplementand in "Risk Factors" beginning on page PS-5 of the accompanying prospectus supplement, and page 7 of the accompanying prospectus.

This introductory term sheet does not provide all of the information that an investor should consider prior to making an investment decision.

Investors should carefully review the accompanying preliminary pricing supplement, product supplement, prospectus supplement and prospectus before making a decision to invest in the Securities.

Selected Risk Considerations

The risks set forth below, as well as additional risks related to this investment, are discussed in detail in the "Selected Risk Considerations" section in the accompanying preliminary pricing supplement. Please review those risk disclosures carefully.

- Your investment may result in a loss; there is no guaranteed return of principal.
- The Securities do not bear interest.
- Your return will be limited to the Contingent Fixed Return.
- The Maturity Payment Amount will not reflect the prices of the Underlying Stocks other than on the Calculation Day.
- Because the Securities are linked to the lowest performing (and not the
 average performance) of the Underlying Stocks, you may not receive any
 return on the Securities and may lose a significant portion or all of your
 principal amount even if the Ending Price of one Underlying Stock is greater
 than or equal to its Starting Price or Threshold Price.
- Your return on the Securities may be less than the yield on a conventional debt security of comparable maturity.
- The Maturity Date may be postponed if the Calculation Day is postponed.
- Any payment on the Securities is subject to the credit risk of BofA Finance, as issuer, and BAC, as Guarantor, and actual or perceived changes in BofA Finance's or the Guarantor's creditworthiness are expected to affect the value of the Securities.
- We are a finance subsidiary and, as such, have no independent assets, operations or revenues.
- The public offering price you pay for the Securities will exceed their initial estimated value.
- The initial estimated value does not represent a minimum or maximum
 price at which BofA Finance, BAC, BofAS or any of our other affiliates or
 Wells Fargo Securities, LLC ("WFS") or its affiliates would be willing to
 purchase your Securities in any secondary market (if any exists) at any time.

- BofA Finance cannot assure you that a trading market for your Securities will ever develop or be maintained.
- The Securities are not designed to be short-term trading instruments, and if you attempt to sell the Securities prior to maturity, their market value, if any, will be affected by various factors that interrelate in complex ways, and their market value may be less than the principal amount.
- Trading and hedging activities by BofA Finance, the Guarantor and any of our other affiliates, including BofAS, and WFS and its affiliates, may create conflicts of interest with you and may affect your return on the Securities and their market value.
- There may be potential conflicts of interest involving the calculation agent, which is an affiliate of ours.
- Any payments on the Securities will depend upon the performance of the Underlying Stocks, and therefore the Securities are subject to the following risks, each as discussed in more detail in the accompanying product supplement.
 - The Securities may become linked to the common stock of a company other than an original Underlying Stock Issuer.
 - o We cannot control actions by an Underlying Stock Issuer.
 - We and our affiliates have no affiliation with any Underlying Stock Issuer and have not independently verified any public disclosure of information.
 - You have limited anti-dilution protection.
- The U.S. federal income and estate tax consequences of the Securities are uncertain, and may be adverse to a holder of the Securities.

This term sheet is a summary of the terms of the Securities and factors that you should consider before deciding to invest in the Securities. BofA Finance and BAC have filed a registration statement (including preliminary pricing supplement, product supplement, prospectus supplement and prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this term sheet relates.
