Bank of America earnings per share rise 32% in third quarter; \$2.9 billion net income sets another record

Major business lines all achieve double-digit earnings growth

Revenue rises 14%

Total fee income rises 39% as mortgage banking income triples

Core deposits grow 13%

CHARLOTTE — Bank of America Corporation today reported record earnings of \$2.92 billion for the third quarter, or \$1.92 per share (diluted). Those results were 31 and 32 percent increases, respectively, from \$2.24 billion, or \$1.45 per share, earned a year ago.

The return on common equity increased to a record 23.74 percent.

All three of the company's major businesses significantly increased their net income. Deposit and loan growth, strong investment banking and trading results and strong growth in mortgage and card revenues drove this quarter's results.

"Our initiatives to improve the customer experience are paying off as they bring us more of their business," said Kenneth D. Lewis, chairman and chief executive officer.

"Deeper customer relationships and better retention are fueling our strong revenue growth and record profits this quarter."

Net income for the first nine months of 2003 was \$8.08 billion, or \$5.31 per share (diluted), 22 and 26 percent increases, respectively, from \$6.64 billion, or \$4.22 per share, a year ago.

Third quarter financial highlights (compared to a year earlier)

- Return on assets grew 11 percent to 1.48 percent.
- Nonperforming assets reached a three and a half year low at \$3.66 billion.
- The efficiency ratio declined to 51.13 percent.
- · Mortgage banking, card and trading account profits recorded significant advances:
 - Mortgage banking income increased 203 percent to \$666 million.
 - Card income increased 16 percent to \$794 million.
 - Trading account profits increased 146 percent to \$175 million.
- Shareholder Value Added (SVA) grew 85 percent to \$1.62 billion.
- Product sales in the banking centers increased 28 percent.

Customer highlights (compared to a year earlier)

- Three months ahead of schedule, the company surpassed its goal of opening one million net new checking accounts in 2003. Nearly 60 percent of all new checking accounts turn into multi-product and service relationships.
- The company extended its lead as the No. 1 Small Business Administration (SBA) lender in the nation by issuing 9,406 SBA loans to entrepreneurs during the October 2002 to September 2003 SBA fiscal year. This is a 140 percent increase over the previous year's 3,917 SBA loans.
- · Customers continue to express high levels of satisfaction with the company and steady improvements were made:
 - Small-business satisfaction increased 18 percent.
 - Customer dissatisfaction hit a record low, with a 13 percent decline.
 - Online banking satisfaction increased 11 percent.
- In the first nine months of the year, the company's market share in the US equities and equity-related securities business increased to 6.7 percent from 2.8 percent in the same time-period a year ago. Mortgage-backed securities' market share increased to 7.9 percent from 6.3 percent.
- In the first nine months of the year, the company opened 57 new banking centers.

- · Marsico Funds' assets under management grew 94 percent.
- Online banking continued to grow steadily as the number of active users increased 52 percent, to 6.63 million. Additionally, adoption of bill pay increased 90 percent and more than 270 companies now present bills electronically.
- The company was named the best domestic cash management bank by Treasury and Risk Management Magazine.

Revenue

Revenue grew 14 percent from the previous year to \$9.92 billion on a fully taxable-equivalent basis.

Net interest income was virtually unchanged at \$5.48 billion on a fully taxable-equivalent basis. The net interest yield declined 53 basis points to 3.22 percent primarily from an increase in trading assets and the impact of lower interest rates.

Noninterest income increased 38 percent to \$4.44 billion driven by improvements in equity investments and increases in trading account profits, mortgage banking, credit card and investment banking income.

Other income was up due to \$197 million in gains on residential loan sales taken to manage interest rate risk in response to current market conditions.

During the quarter, the company realized \$233 million in net securities gains compared to \$189 million a year ago, as the asset-liability management portfolio was repositioned in line with market conditions.

Efficiency

Driven by strong revenue growth, the efficiency ratio declined to 51.13 percent. Expenses increased 10 percent from a year ago to \$5.07 billion. This rise was driven by an increase in revenue-driven employee incentives, professional fees and benefits expense. In addition, the company recognized a charge of \$100 million to establish a reserve related to the ongoing inquiry into the company's mutual fund practices. It also increased the litigation reserve by \$75 million to cover other specific cases. This quarter, the company also recorded a pre-tax impact of \$31 million related to expensing employee stock options.

Credit quality

The allowance for credit losses decreased as overall credit quality improved. Total charge-offs declined as a percentage of loans and leases for the third straight quarter. The company is encouraged by these declines but asset quality trends will be affected by the strength of the economic recovery.

- · Provision for credit losses was \$651 million, down 16 percent from \$772 million in the second quarter and down 19 percent from \$804 million a year earlier.
- Net charge-offs were \$776 million, or 0.86 percent of loans and leases, relatively unchanged from \$772 million, or 0.88 percent, in the second quarter and down from \$804 million, or 0.94 percent, a year earlier.
- Nonperforming assets were \$3.66 billion, or 0.98 percent of loans, leases and foreclosed properties as of September 30, 2003. This was down 17 percent from the second quarter and down 29 percent from \$5.13 billion a year earlier.
- The allowance for credit losses, at \$6.72 billion or 1.80 percent of loans and leases, was down from \$6.84 billion or 1.90 percent, in second quarter and down from \$6.86 billion and 2.01 percent, the prior year. As of September 30, 2003, the allowance for credit losses represented 196 percent of nonperforming loans, up from 163 percent in the second quarter and 142 percent a year earlier.

Capital management

Total shareholders' equity was \$50.4 billion at September 30, 2003, up 5 percent from a year ago, and represented 7 percent of period-end assets of \$737 billion. The Tier 1 Capital Ratio was 8.25 percent, an increase of 12 basis points from a year ago and 17 basis points from the June 30, 2003 level.

During the quarter, Bank of America issued 18 million shares related to employee options and stock ownership plans and repurchased 25 million shares. Average common shares outstanding were 1.49 billion in the third quarter, down slightly from 1.50 billion a year earlier.

Consumer and Commercial Banking

Exceeding \$2 billion in earnings for the first time, Consumer and Commercial Banking earned \$2.15 billion during the quarter, a 28 percent rise from a year ago. Total revenue grew 14 percent to \$6.89 billion while noninterest expense was up 3 percent, driven primarily by marketing and volume-related expenses in mortgage banking. Return on equity was 42 percent and SVA grew \$489 million to \$1.63 billion.

Commercial banking earnings increased 19 percent from a year ago. This was driven by a 14 percent growth in deposits, a 62 percent growth in middle market investment banking fees, including a 60 percent growth in M&A advisory activity, and a 22 percent increase in new lines of credit.

Net interest income increased slightly to \$3.94 billion.

Noninterest income was up 36 percent to \$2.95 billion, driven by higher mortgage banking and card income.

Total consumer loans increased 5 percent as the company attracted 4 million new credit card accounts, and customers continued to take advantage of the low interest rate environment. Average deposits grew 13 percent. Consumer credit and debit card purchase volumes increased 14 and 23 percent, respectively. The average purchase amount also increased.

Global Corporate and Investment Banking

Global Corporate and Investment Banking (GCIB) earnings rose 33 percent from a year ago to \$513 million. This was driven by increased market-based activity and a decline in provision expense. Revenue increased 13 percent to \$2.25 billion while expenses increased 16 percent. Return on equity was 22 percent and SVA increased \$199 million to \$262 million.

The quarter was marked by the strength of the core businesses as investment banking revenue grew to \$399 million, up 32 percent from last year, led by strong demand for securities underwriting. Trading-related revenue grew to \$688 million, up 20 percent.

Net interest income was relatively unchanged at \$1.22 billion from a year ago. Period-end corporate loans and leases in the quarter were \$44 billion, down 26 percent from \$60 billion a year earlier. Offsetting this decline was an increase in trading-related assets as GCIB continued to expand its distribution network.

Asset Management

Asset Management net income rose 95 percent from a year ago to \$123 million, reflecting lower provision expense. Revenue increased 8 percent to \$615 million. Expenses increased 19 percent due to an increase in revenue-driven employee incentives and a \$50 million allocation of the reserve related to the ongoing inquiry into the company's mutual fund practices. Return on equity was 18 percent and SVA increased \$62 million to \$48 million.

Assets under management increased 17 percent to \$318 billion, led by increases in equities and short-term funds. Balances in equity funds grew 33 percent from a year earlier, led by higher sales across all channels.

Year to date, Asset Management has added 164 net new financial advisors, one short of its target for 2003. Additionally, the business has rolled out the advice-focused High Net Worth client service model in 37 markets and will complete the rollout to all markets during the fourth quarter.

Equity Investments

Equity Investments reported a loss of \$68 million, compared to a loss of \$161 million a year ago. Principal Investing reported cash gains of \$49 million and \$8 million in mark-to-market adjustments in the third quarter offset by \$100 million in impairments.

Note: James H. Hance, Jr., vice chairman and chief financial officer, will discuss third quarter results in a conference call at 9:30 a.m. (Eastern Time) today. The call can be accessed via a webcast available on the Bank of America Web site at http://www.bankofamerica.com/investor/.

Bank of America Corporation Results Overview

- Record earnings of \$2.9 billion.
- Diluted EPS of \$1.92, up 7% and 32% over 2Q03 and 3Q02, respectively.
- Total revenue rose 1% over 2Q03 and 14% over 3Q02.
- Consumer and Commercial Banking segment noninterest revenue rose 13% over 2Q03 and 36% over 3Q02 led by record quarters in card services and consumer real estate.
- Consumer loans grew 17% while core deposit levels rose 13% over 3Q02.
- Achieved full year goal of 1 million net new checking accounts 3 months early by adding approximately 425,000 new accounts in the 3rd quarter, clearly surpassing the 528,000 accounts added in 2002.
- Customer satisfaction for Top 2 box scores of most delighted customers continues at record highs.
- Banking center product sales increased 28% in the past year.
- Active online banking users increased 52% over 3Q02 to 6.6 million.
- Marsico Funds grew assets under management 94% from 3Q02 leading the 18% growth in total assets under management.
- Global Corporate and Investment Banking grew earnings 16% over 2Q03 as strong revenues were combined with good cost containment and lower provision.
- Nonperforming assets declined 17% from 2Q03; lowest level in three years.
- Net charge-off ratio declined to .86% of average loans compared to 2Q03.
- The quarterly dividend payment made in September reflected a 25% increase to \$0.80 per common share.

Reconciliation to GAAP financial measures

Shareholder value added (SVA) is a performance measure used in managing the corporation's growth strategy and is not defined in GAAP (generally accepted accounting principles). Management believes that this measure provides users of this financial information with a more accurate picture of returns on capital used in operating the business for comparative purposes. Other companies may define or calculate supplemental financial data differently. See the Table below for supplemental financial data and corresponding reconciliation to GAAP financial measures for the nine months ended September 30, 2003 and 2002, and the three months ended September 30, 2003, June 30, 2003, March 31, 2003, December 31, 2002, and September 30, 2002.

⁽¹⁾ Includes acceptances, standby letters of credit, commercial letters of credit and formal guarantees.

Amounts outstanding in the table above for Philippines, Argentina, Mexico, Venezuela and Latin America Other have been reduced by \$13, \$44, \$0, \$141 and \$39, respectively, at September 30, 2003, and \$12, \$90, \$505, \$131 and \$37, respectively, at December 31, 2002. Such amounts represent the fair value of U.S. Treasury securities held as collateral outside the country of exposure.

(3) Cross-border exposure includes amounts payable to the Corporation by residents of countries other than the one in which the credit is booked, regardless of the currency in which the claim is denominated, consistent with

Federal Financial Institutions Examinations Council (FFIEC) reporting rules.

⁽⁴⁾ Gross local country exposure includes amounts payable to the Corporation by residents of countries in which the credit is booked, regardless of the currency in which the claim is denominated. Management does not net local

funding or liabilities against local exposures as allowed by the FFIEC.

(5) Gross local country exposure to Hong Kong consisted of \$1,885 of consumer loans and \$1,611 of commercial exposure at September 30, 2003 compared to \$1,828 of consumer loans and \$1,572 of commercial exposure at December 31, 2002. The consumer loans were collateralized primarily by residential real estate. The commercial exposure was primarily to local clients and was diversified across many industries.
