Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (17 CFR 230.405) or Rule 12b-2 of the Securities Exchange Act of 1934 (17 CFR 240.12b-2).
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

ITEM 7.01. REGULATION FD DISCLOSURE.

Bank of America Corporation (the “Corporation”) has elected to change its accounting methods related to its tax-related affordable housing, eligible wind renewable energy and solar renewable energy equity investments. The Corporation determined that the new accounting methods are preferable as they better align the financial statement presentation with the economic impact of these equity investments.

For its affordable housing and eligible wind renewable energy equity investments, the Corporation is changing its accounting from the equity method of accounting to the proportional amortization method (PAM). Under PAM, the cost of the equity investments is amortized in proportion to the related income tax benefits and classified in income tax expense, whereas previously the cost of the equity investments was determined using the equity method of accounting and classified in noninterest income – other income.

For its solar renewable energy equity investments, the Corporation is changing its accounting for the investment tax credits (ITCs) where the ITCs and applicable equity investment expense are recognized over the productive life of the underlying facilities, whereas previously the ITCs and applicable expense were recognized when the facilities were placed in service. As part of this accounting change, the Corporation is also electing to report the ITCs in noninterest income – other income against the related equity investment expense.

The primary impact of the accounting changes described above is a reclassification between income statement line items. Following is a summary of the reclassifications between certain income statement lines to implement the accounting change:

(in millions)	Year Ended December 31		Third Quarter	Second Quarter	First Quarter	Fourth Quarter	Third Quarter	Second Quarter	First Quarter
	2024	2023	2025	2025	2025	2024	2024	2024	2024
Impact to total revenue, net of interest expense:									
Noninterest income - as previously reported	\$ 45,827	\$ 41,650	\$ 12,855	\$ 11,793	\$ 12,923	\$ 10,988	\$ 11,378	\$ 11,675	\$ 11,786
Adjustment	3,969	4,188	952	980	881	1,128	868	928	1,045
Noninterest income - revised	\$ 49,796	\$ 45,838	\$ 13,807	\$ 12,773	\$ 13,804	\$ 12,116	\$ 12,246	\$ 12,603	\$ 12,831
Impact to income tax expense:									
Income tax expense - as previously reported	\$ 2,122	\$ 1,827	\$ 987	\$ 572	\$ 720	\$ 443	\$ 428	\$ 663	\$ 588
Adjustment	4,128	4,398	1,089	926	917	987	1,053	1,022	1,066
Income tax expense - revised	\$ 6,250	\$ 6,225	\$ 2,076	\$ 1,498	\$ 1,637	\$ 1,430	\$ 1,481	\$ 1,685	\$ 1,654

In addition, the accounting changes have an insignificant impact on net income on an annualized basis, which were applied retrospectively through cumulative adjustment to retained earnings. As a result, retained earnings as of September 30, 2025 decreased \$1.7 billion from the previously reported amount, reflecting the cumulative impact of the timing difference in expense recognition under the new accounting methods. This timing difference is expected to reverse over the remaining life of the investments.

Under the applicable bank regulatory rules, the Corporation is not required to and, accordingly, will not revise previously filed regulatory capital ratios. However, the cumulative impact of the changes in accounting methods would have resulted in an estimated \$2.1 billion decrease in the Corporation’s Common equity tier 1 capital due to the above-referenced impact to retained earnings as well as deferred tax effects, which would have resulted in a decrease of 13 basis points to the Common equity tier 1 ratio as of September 30, 2025. Additionally, the effective tax rate for the third quarter of 2025 would have been an estimated 20.0% compared to 10.4% previously reported.

The information contained in this Form 8-K has been prepared by, and is the responsibility of, the Corporation and is being furnished to assist investors in understanding how the changes in accounting methods, which are discussed above, affected the Corporation’s previously filed Consolidated Statements of Income and Consolidated Balance Sheets. The information related to the changes in accounting methods is preliminary and based on company data available at the time this Form 8-K is furnished.

Financial information presented in the Revised Supplemental Information for the prior quarters of 2025 and 2024, as well as the full years 2024 and 2023, has been updated to reflect the changes in accounting methods and is attached hereto as Exhibit 99.1. This Revised Supplemental Information is being furnished pursuant to Item 7.01, and shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor shall the Revised Supplemental Information be deemed incorporated by reference into any filings under the Securities Act of 1933, as amended.

Description of Accounting Changes

Bank of America Corporation (the "Corporation") has elected to change its accounting methods related to its tax-related affordable housing, eligible wind renewable energy and solar renewable energy equity investments.

The primary impact of the accounting changes described below is a reclassification between income statement line items. The Corporation determined that the new accounting methods are preferable as they better align the financial statement presentation with the economic impact of these equity investments.

For its affordable housing and eligible wind renewable energy equity investments, the Corporation is changing its accounting from the equity method of accounting to the proportional amortization method (PAM). Under PAM, the cost of the equity investments is amortized in proportion to the related income tax benefits and classified in income tax expense, whereas previously the cost of the equity investments was determined using the equity method of accounting and classified in noninterest income – other income.

For its solar renewable energy equity investments, the Corporation is changing its accounting for the investment tax credits (ITCs) where the ITCs and applicable equity investment expense are recognized over the productive life of the underlying facilities, whereas previously the ITCs and applicable expense were recognized when the facilities were placed in service. As part of this accounting change, the Corporation is also electing to report the ITCs in noninterest income – other income against the related equity investment expense.

Financial information for the prior quarters of 2025 and 2024, as well as the full years 2024 and 2023, has been updated and presented herein to reflect the changes in accounting methods.

Key Performance Indicators

The Corporation presents certain key financial and nonfinancial performance indicators that management uses when assessing consolidated results. The Corporation believes this information is useful because it provides management with information about underlying operational performance and trends. Key performance indicators are presented in Consolidated Financial Highlights on page 2.

Business Segment Operations

The Corporation reports the results of operations of its four business segments and *All Other* on a fully taxable-equivalent (FTE) basis. Additionally, the results for the total Corporation as presented on pages 10 - 14 are reported on an FTE basis.

⁽¹⁾ Pretax, pre-provision income (PTPI) is a non-GAAP financial measure calculated by adjusting pretax income to add back provision for credit losses. Management believes that PTPI is a useful financial measure because it enables an assessment of the Corporation's ability to generate earnings to cover credit losses through a credit cycle. (See Exhibit A: Non-GAAP Reconciliations - Reconciliations to GAAP Financial Measures on page 20.)

⁽²⁾ Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures. We believe the use of ratios that utilize tangible equity provides additional useful information because they present measures of those assets that can generate income. Tangible book value per share provides additional useful information about the level of tangible assets in relation to outstanding shares of common stock. (See Exhibit A: Non-GAAP Reconciliations - Reconciliations to GAAP Financial Measures on page 20.)

⁽¹⁾ FTE basis is a non-GAAP financial measure. FTE basis is a performance measure used by management in operating the business that management believes provides investors with meaningful information on the interest margin for comparative purposes. The Corporation believes that this presentation allows for comparison of amounts from both taxable and tax-exempt sources and is consistent with industry practices. Net interest income includes FTE adjustments of \$619 million and \$567 million for the years ended December 31, 2024 and 2023, \$154 million, \$145 million and \$145 million for the third, second and first quarters of 2025, and \$154 million, \$147 million, \$160 million and \$158 million for the fourth, third, second and first quarters of 2024, respectively.

⁽¹⁾ Return on average allocated capital is calculated as net income, adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital. Other companies may define or calculate these measures differently.

⁽²⁾ Total earning assets and total assets include asset allocations to match liabilities (i.e., deposits) and allocated shareholders' equity.

⁽¹⁾ All Other primarily consists of asset and liability management (ALM) activities, liquidating businesses and certain expenses not otherwise allocated to a business segment. ALM activities encompass interest rate and foreign currency risk management activities for which substantially all of the results are allocated to our business segments.

⁽²⁾ Includes elimination of segments' excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders' equity of \$956.5 billion and \$977.4 billion for the years ended December 31, 2024 and 2023, \$994.4 billion, \$981.6 billion and \$976.7 billion for the third, second and first quarters of 2025, and \$976.3 billion, \$946.3 billion, \$943.5 billion and \$959.8 billion for the fourth, third, second and first quarters of 2024, respectively.

⁽³⁾ Includes elimination of segments' excess asset allocations to match liabilities (i.e., deposits) and allocated shareholders' equity of \$1.0 trillion, \$1.0 trillion, \$1.0 trillion, \$980.4 billion, \$955.6 billion, \$933.0 billion, \$988.9 billion and \$974.7 billion at September 30, 2025, June 30, 2025, March 31, 2025, December 31, 2024, September 30, 2024, June 30, 2024, March 31, 2024 and December 31, 2023, respectively.

Exhibit A: Non-GAAP Reconciliations

Bank of America Corporation and Subsidiaries Reconciliations to GAAP Financial Measures

(Dollars in millions, except per share information)

The Corporation evaluates its business using certain non-GAAP financial measures, including pretax, pre-provision income and ratios that utilize tangible equity and tangible assets, each of which is a non-GAAP financial measure. Tangible equity represents shareholders' equity or common shareholders' equity reduced by goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities ("adjusted" shareholders' equity or common shareholders' equity). Return on average tangible common shareholders' equity measures the Corporation's net income applicable to common shareholders as a percentage of adjusted average common shareholders' equity. The tangible common equity ratio represents adjusted ending common shareholders' equity divided by total tangible assets (total assets less goodwill and intangible assets (excluding mortgage servicing rights), net of related deferred tax liabilities). Return on average tangible shareholders' equity measures the Corporation's net income as a percentage of adjusted average total shareholders' equity. The tangible equity ratio represents adjusted ending shareholders' equity divided by total tangible assets. Tangible book value per common share represents adjusted ending common shareholders' equity divided by ending common shares outstanding. These measures are used to evaluate the Corporation's use of equity. In addition, profitability, relationship and investment models all use return on average tangible shareholders' equity as key measures to support our overall growth goals.

See the tables below for reconciliations of these non-GAAP financial measures to the most directly comparable financial measures defined by GAAP for the years ended December 31, 2024 and 2023, and the three months ended September 30, 2025, June 30, 2025, March 31, 2025, December 31, 2024, September 30, 2024, June 30, 2024 and March 31, 2024. The Corporation believes the use of these non-GAAP financial measures provides additional clarity in understanding its results of operations and trends. Other companies may define or calculate these non-GAAP financial measures differently.
